This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

A GRAMMAR

OF THE

ENGLISH LANGUAGE,

IN A SERIES OF LETTERS;

INTENDED FOR THE USE OF SCHOOLS AND OF YOUNG PERSONS IN GENERAL, BUT MORE ESPECIALLY FOR THE USE OF SOLDIERS, SAILORS, APPRENTICES, AND PLOUGH-BOYS.

BY

WILLIAM COBBETT,

TO WHICH ARE ADDED

SIX LESSONS, INTENDED TO PREVENT STATESMEN FROM USING FALSE GRAMMAR, AND FROM WRITING IN AN AWKWARD MANNER.

WITH NOTES

BY

ROBERT WATERS,

PRINCIPAL OF WEST HOBOKEN PUBLIC SCHOOL; AUTHOR OF "HOW TO GET ON IN THE WORLD, AS DISPLAYED IN THE LIFE AND WRITINGS OF WILLIAM COBBETT."

EDITOR'S PREFACE.

MR. RICHARD GRANT WHITE'S VIEWS; AND SOME OTHER VIEWS.

Among recent writers on language, there is perhaps not one who has written more wisely, or exhibited a finer perception of the true means of acquiring the power of expression, than Mr. Richard Grant White. His two works, "Words and their Uses" and "Every-day English," are marvelously interesting and full of sound, wholesome instruction. These books will, by any one uninformed of his novel views, be read with surprise and even with incredulity; but they cannot fail to impress the reader with the conviction, that they possess a measure of truth which is confirmed by experience. Mr. White condemns as altogether useless, nay, as worse than useless, the grammar studies of our public schools, and recommends the study of *authors* instead of *grammars*.

Now, although I agree in the main with Mr. White's views concerning the character of our tongue, and the unprofitableness of grammar studies in general; although I fully agree with him that our language must be learned, chiefly, from hearing good speakers and reading good writers; still I maintain that THIS IS NOT ENOUGH; that in order to be able to write correctly, and to be SURE that one DOES write correctly, a fair knowledge of well-defined principles is necessary; that the study of these principles, rightly pursued, is not only necessary to enable one to speak and write correctly, but is useful as a discipline of the mind and as a means of general culture. Theory MUST be combined with practice. For although one may, by a large acquaintance with good writers and speakers, acquire a good ear and a discriminating sense of correct language, these are not *infallible* guides; a person with

the finest culture of this kind may commit the most egregious blunders. It is precisely this which is so forcibly displayed by Cobbett in his "Six Lessons"; where he shows that persons of the highest rank, the finest taste, the gentlest training, and the most extensive learning have committed errors of the coarsest kind.

Mr. White says: "In speaking or writing English, we have only to choose the right words and put them in the right places, respecting no laws but those of reason, conforming to no order but that which we call logical." But most people must be taught *what are* "the laws of reason, and the order which we call logical." Without some instruction in these matters, common people will hardly ever write half-a-dozen lines without a blunder. Take the mechanics and shopkeepers, for instance, and you will find that most of them are unable to announce even their names and business correctly. Not to mention the ludicrous and amusing errors of which Mr. White himself gives specimens—the "inauguration of a sample-room," the "home-made hotel," etc.—we have only to look at any common sign to be convinced of the truth of this statement. "John Smith, Iron Foundry," "John Jones, Cigar-Store." John Smith is not an iron foundry, nor John Jones a cigar-store. We know that they mean, "John Smith, Iron Founder," or "John Smith's Iron Foundry," "John Jones, Cigar-maker," or "John Jones's Cigar-Store"; but they must be TAUGHT to SAY what they mean, and the only way to do this is to instruct them in the principles of grammar; or, if you please, in "the laws of reason and the order which we call logical."

Boys and girls must be taught to *write* their thoughts as well as to *speak* them. It is vain to say otherwise. And the only question is, what is the best way of teaching them. Mr. White will not listen to the teaching of grammar in any shape or form whatever. Well, as far as the text-book method, the rule-and-word-cramming method

of the public schools, is concerned, he is perfectly right; there is very little profit to be derived from it. But there is a right and a wrong way of doing everything. Mr. White has never, I imagine, been a teacher; he knows nothing of the actual work of teaching young people how to write correctly; he knows nothing of *teaching*, I imagine, except by *writing*, which is an easy, pleasant, and convenient way of teaching—I say not a word against its effectiveness—for no questions are asked, except such as may be again answered in writing, at one's leisure, and without interruption or interpellation. If he were a teacher, he would find it impossible to teach boys and girls anything of correct speech without giving them some knowledge of the LAWS of speech—as impossible as it would be to teach them any science or art without mentioning the name or explaining the meaning of any one of its parts. I do not say that this knowledge must be communicated by means of a book; it may be communicated without a book; indeed, much better without a book. But taught it must be. For when you have shown boys and girls how to write a composition, and they have written it, how are you going to show them or explain to them its errors, or how to improve their language, without ever mentioning anything of the principles of grammar? Can there be any better way of showing a boy that "He writes beautiful" is wrong, than by explaining to him the difference between the adjective and the adverb? Can there be any better way of showing him that "The book lays on the table" is wrong, than by explaining to him the difference between a transitive and an intransitive verb? Can there be any better way of showing that "I am taller than him" is wrong, than by explaining to him the difference between the nominative and the objective case? That "The color of the leaves are green" is wrong, than by showing him the nature of subject and predicate, and that the one must agree with the other? These explana-

tions, properly done, will be like taking him out of a thick fog, and putting him in broad sunlight; taking him out of a perplexing, bewildering maze, and putting him on a plain high-road, with a chart or compass by which he may walk right on to his goal, with perfect ease, and in perfect confidence.

I have heard of a lawyer who, at a banquet of gentlemen of his cloth, brought out a toast "To the man who writes his own will." Why? Because he is likely to make use of language that will admit of question as to its meaning; and thus give work to the lawyers. Now I maintain that the man who acquires a clear comprehension of the principles of our language may write in such a manner as to defy the astutest lawyer to make his words mean anything else than what he intends them to mean; which is something that cannot be said of the man who learns only by talking and reading. Such a man lives in the land of uncertainty, and never knows whither he is going or whence he has come.

Grammar, properly considered and properly taught, is nothing but an unfolding of general principles, which must be applied, more or less, in all languages; every one of which principles has a reason for its existence, and the majority of which may be made as plain and evident as a statement in mathematics. Mr. White says that nobody that thinks of his grammar while writing will ever write a sentence worth reading. Of course, no boy or girl ought for a moment to think of his grammar while writing a composition; in fact, nobody ever does think of his *grammar* while intent on putting down his *thoughts*. But when the work is DONE, when he HAS written it, then he ought to be able to review it understandingly, and see that it conforms to "the laws of reason and the order which we call logical"; otherwise he will, in nine cases out of ten, write incorrectly.

I fully agree with Mr. White, that all the grammars of

Brown, Green, White, and Black, may be thrown into the fire, and the world will be none the worse off; for, in my opinion, boys and girls ought to be taught the principles of English grammar without placing any text-book whatever in their hands. Never did the Board of Education of New York adopt a wiser resolution than that recently adopted, abolishing grammar text-books from the public schools, in all but the two higher grades. Any person, that requires a book in the hands of his scholars in order to teach them the principles of English grammar, is no teacher; he is simply a crammer-down of other people's teaching, which he has himself been unable to master. A genuine teacher requires, in order to teach grammar, nothing but the blackboard and a piece of chalk; all the rest must come out of his head or out of the heads of his scholars. He may make use of what books he pleases in building up his own knowledge; but no book should ever be placed in the hands of his scholars. To children, books on the subject of grammar are generally in a dead language; it is all Greek to them; the living speech of the teacher is the only language they can understand. Away, therefore, with all grammar text-books; for they are the dead-weights of progress, fatal to all true teaching.

Nor is this book of Cobbett's intended for boys and girls at school; it is for those who are studying out of school; for those who are trying to acquire that real, practical, profitable knowledge which is acquired by *self-exertion*, or *self-help;* for those who have no teacher, and are striving to teach themselves; for those who wish *to learn* in order *to teach;* for those who have failed to make any proper progress by means of other grammars, and now wish to UNDERSTAND and MASTER the subject for themselves.

I do not deny that this book, being so entirely different from all other grammars; so conversational, easy, and plain in its character; I do not deny that it *may* be ad-

vantageously used by school-boys under a competent teacher; nay, even under an incompetent teacher;—in fact, if the teacher *must* use a text-book, he cannot select a better one than Cobbett's;—but what I maintain is, that it is the only grammar that can be profitably used without a teacher; the only book that can teach grammar BY ITSELF to those who are learning FOR THEMSELVES. As long as principles last, and as long as men learn by using their reason, grammar in some shape *must* be taught; and this being granted, I contend that there is no BETTER WAY of teaching it than this way of Cobbett's. Of course, no child ought ever to be taught a word about grammar until he has learned to read fluently, and even write tolerably well, the words of his native language; not until he has attained his twelfth or fourteenth year; for grammar is a matter which cannot be rightly understood and assimilated before that age. This is another reason why the action of the New York Board of Education is a wise one.

Some of Mr. White's readers—feeling, no doubt, as I did, that even if all ordinary grammars *are* worthless, *some* grammar of *some* sort is necessary, and being delighted by his clear and sensible manner of writing—requested *him* to write a grammar; one of them declaring that if he did so, a future generation would rise up and call him blessed. Whereupon Mr. White makes the following amusing and significant reply: "I would gladly act on this suggestion if it were probable that any responsible and competent publisher would make it prudent for me to do so. It would be delightful to believe that the next generation would rise up and call me blessed; but I am of necessity much more interested in the question whether the present generation would rise up and put its hand into its pocket to pay me for my labor. Any one who is acquainted with the manner in which school-books are 'introduced' in this country, knows that the

opinions of competent persons upon the merits of a book have the least possible influence upon its coming sufficiently into vogue to make its publication profitable; and publishers, like other men of business, work for money. One of the trade made, I know—although not to me—an answer like this to a proposition to publish a short series of school-books: 'I believe your books are excellent; but supposing that they are all that you believe them to be, I should, after stereotyping them, be obliged to spend $100,000 in introducing them. I am not prepared to do this, and therefore I must say No, at once. The merit of a book has nothing to do with its value in trade.' And the speaker was a man of experience."*

Now, I am strongly inclined to think that these admirers of Mr. White's, and all those disgusted with the ordinary grammars and the ordinary methods of teaching grammar, will, if made acquainted with Cobbett's little grammar, which has long been out of print in this country, find what they want, or nearly what they want; for there does not exist in our language a clearer exposition of the nature of English grammar than this by Cobbett. The very language of the grammar itself is a capital illustration of how one ought to write; and if the scholar's *understanding* the subject is a true test of the proper *learning* of it, then no other grammar can, in the attainment of this end, be compared with this; for thousands, who have failed to understand the subject by other grammars, have succeeded by this, and have, no doubt, risen up and called Cobbett blessed for writing it. Even Mr. White himself, who looks upon most other grammars as worse than useless, declares of Cobbett's grammar, that he has "read it with great admiration, both for the soundness of its teaching and the excellence of its sys-

* "Words and their Uses," p. 427.

tem."* And he also declares, I think (I quote from memory), that if grammar is to be taught at all, it cannot be taught better than by this method of Cobbett's.

At a meeting of school superintendents held recently in Iowa, one of the superintendents read a paper on text-books, in which he says: "Men of letters and men of science have sought to veil their thoughts with the obscurity of strange and foreign terms rather than to make the road following them in their investigation easy. They have sought the vain-glory of stultifaction in their selection of a medium for the communication of their thoughts, rather than the lasting praise consequent upon a simple style. Hence the difficulty in following them in their text-books, and the unprofitableness of being taught how to read thought from printed characters." If there is one writer in the whole range of English literature who deserves more praise than another for avoiding this very style, so common among ordinary writers; if there is one author who is more conspicuous than any other for clothing his thoughts in plain, intelligible language, it is William Cobbett. In all that goes to the making up of good English speech, he has no superior. He was the first to show how one ought to write for young people, the first to write in a manner that plain people could understand; the first to instruct in a truly edifying manner. It is his great glory that he uses simple, plain language, and he makes every subject he touches, whether it be the definition of a verb or the explanation of the nature of the national debt, perfectly clear and intelligible.

The Editor has endeavored to write the notes in something of the same plain and easy style as that in which Cobbett has written the grammar, keeping constantly in mind that he is addressing a youth of fourteen or fifteen years of age. Of course, he has never for a moment thought of imitating Cobbett; but simply and only of making the matter plain.

DEDICATION.

TO HER MOST GRACIOUS MAJESTY,

QUEEN CAROLINE.

MAY IT PLEASE YOUR MAJESTY,

A work, having for its objects, to lay the solid foundation of literary knowledge amongst the laboring classes of the community; to give practical effect to the natural genius found in the soldier, the sailor, the apprentice, and the plough-boy; and to make that genius a perennial source of wealth, strength, and safety to the kingdom; such a work naturally seeks the approbation of your majesty, who, amongst all the royal personages of the present age, is the only one that appears to have justly estimated the value of the people.

The nobles and the hierarchy have long had the arrogance to style themselves the pillars that support the throne. But, as your majesty has now clearly ascertained, royalty has, in the hour of need, no efficient supporters but the people.

During your majesty's long, arduous, magnanimous, and gallant struggle against matchless fraud and bound-

less power, it must have inspired you with great confidence to perceive the wonderful intelligence and talent of your millions of friends; while your majesty cannot have failed to observe, that the haughty and insolent few who have been your enemies, have, upon all occasions, exhibited an absence of knowledge, a poverty of genius, a feebleness of intellect, which nothing but a constant association with malevolence and perfidy could prevent from being ascribed to dotage or idiocy.

That to her, whose great example is so well calculated to inspire us with a love of useful knowledge, and to stimulate us to perseverance in its pursuit; that to her, the records of whose magnanimity and courage will make mean spite and cowardice hide their heads to the end of time; that to her, who, while in foreign lands, did honor to Britain's throne, and to Britain herself, by opening the debtor's prison, and by setting the captive Christian free; that to her, who has so long had to endure all the sufferings that malice could invent and tyranny execute; that to her, God may grant, to know no more of sorrow, but long to live in health, prosperity, and glory, surrounded and supported by a grateful and admiring people, is the humble prayer of

Your majesty's most dutiful

And most devoted servant,

WILLIAM COBBETT.

London, Nov. 25th, 1820.

TO

MR. JAMES PAUL COBBETT.

LETTER I.

INTRODUCTION.

North Hempstead, Long Island, Dec. 6, 1817.

MY DEAR LITTLE JAMES:

You have now arrived at the age of fourteen years without ever having been bidden, or even advised, to look into a book; and all you know of reading or of writing you owe to your own unbiassed taste and choice. But, while you have lived unpersecuted by such importunities, you have had the very great advantage of being bred up under a roof beneath which no cards, no dice, no gaming, no senseless pastime of any description, ever found a place. In the absence of these, books naturally became your companions during some part of your time: you have read and have written, because you saw your elders read and write, just as you have learned to ride and hunt and shoot, to dig the beds in the garden, to trim the flowers and to prune the trees. The healthful exercise, and the pleasures, unmixed with fear, which you have derived from these sources, have given you "a sound mind in a sound body," and this, says an English writer, whose works you will by-and-by read, "is the greatest blessing that God can give to man."

It is true that this is a very great blessing; but mere

soundness of mind, without any mental acquirements, is possessed by millions; it is an ordinary possession; and it gives a man no fair pretensions to merit, because he owes it to accident, and not to any thing done by himself. But knowledge, in any art or science, being always the fruit of observation, study, or practice, gives, in proportion to its extent and usefulness, the possessor a just claim to respect. We do, indeed, often see all the outward marks of respect bestowed upon persons merely because they are rich or powerful; but these, while they are bestowed with pain, are received without pleasure. They drop from the tongue or beam from the features, but have no communication with the heart. They are not the voluntary offerings of admiration, or of gratitude; but are extorted from the hopes, the fears, the anxieties, of poverty, of meanness, or of guilt. Nor is respect due to honesty, fidelity, or any such qualities; because dishonesty and perfidy are crimes. To entitle a man to respect, there must be something of his own doing, beyond the bounds of his well-known duties and obligations.

Therefore, being extremely desirous to see you, my dear James, an object of respect, I now call upon you to apply your mind to the acquiring of that kind of knowledge which is inseparable from an acquaintance with books; for, though knowledge in every art and science is, if properly applied, worthy of praise in proportion to its extent and usefulness, there are some kinds of knowledge which are justly considered as of a superior order, not only because the possession of them is a proof of more than ordinary industry and talent, but because the application of them has naturally a more powerful influence in the affairs and on the condition of our friends, acquaintances, neighbors, and country. Blake, the Titchfield thatcher, who broke his leg into splinters in falling from a wheat-rick, was, on account of the knowledge which he possessed, beyond that of laborers in general, an object

of respect; but, in its degree, and in the feelings from which it arose, how different was that respect from the respect due to our excellent neighbor, Mr. Blundell, who restored the leg to perfect use, after six garrison and army surgeons had declared that it was impossible to preserve it, and that, if the leg were not cut off, the man must die within twenty-four hours! It is probable that the time of Mr. Blundell was not, on this occasion, occupied more, altogether, than four days and four nights; yet, the effect was a great benefit to be enjoyed by Blake for probably thirty or forty years to come: and, while we must see that this benefit would necessarily extend itself to the whole of his numerous family, we must not overlook those feelings of pleasure which the cure would naturally produce amongst friends, acquaintances, and neighbors.

The respect due to the profession of the surgeon or physician is, however, of an order inferior to that which is due to the profession of the law; for whether in the character of counsellor or of judge, here are required, not only uncommon industry, labor, and talent, in the acquirement of knowledge; but the application of this knowledge in defending the property of the feeble or incautious against the attacks of the strong and the wiles of the crafty, in affording protection to innocence and securing punishment to guilt, has, in the affairs of men and on their condition in life, a much more extensive and powerful influence than can possibly arise from the application of surgical or medical knowledge.

To the functions of statesmen and legislators is due the highest respect which can be shown by man to anything human; for, not only are the industry, labor, and talent requisite in the acquirement of knowledge, still greater and far greater here, than in the profession of the law; but, of the application of this knowledge, the effects are so transcendent in point of magnitude as to place them

be useful; in some situations it must be necessary to the avoiding of really injurious errors; and in no situation, which calls on man to place his thoughts upon paper, can the possession of it fail to be a source of self-gratulation, or the want of it a cause of mortification and sorrow.

But, to the acquiring of this branch of knowledge, my dear son, there is one motive which, though it ought at all times, to be strongly felt, ought, at the present time, to be so felt in an extraordinary degree: I mean that desire which every man, and especially every young man, should entertain to be able to assert with effect the rights and liberties of his country. When you come to read the history of those laws of England by which the freedom of the people has been secured, and by which the happiness and power and glory of our famed and beloved country have been so greatly promoted; when you come to read the history of the struggles of our forefathers, by which those sacred laws have, from time to time, been defended against despotic ambition; by which they have been restored to vigor when on the eve of perishing; by which their violators have never failed, in the end, to be made to feel the just vengeance of the people; when you come to read the history of these struggles in the cause of freedom, you will find that tyranny has no enemy so formidable as the pen. And, while you will see with exultation the long-imprisoned, the heavily-fined, the banished William Prynne, returning to liberty, borne by the people from Southampton to London, over a road strewed with flowers; then accusing, bringing to trial, and to the block, the tyrants from whose hands he and his country had unjustly and cruelly suffered; while your heart and the heart of every young man in the kingdom will bound with joy at the spectacle, you ought all to bear in mind that, without a knowledge of *grammar*, Mr. Prynne could never have performed any of those acts by which his name has

been thus preserved, and which have caused his memory to be held in honor.

Though I have now said what, I am sure, will be more than sufficient to make you entertain a strong desire to take this first step in the road to literary knowledge. I cannot conclude this introductory letter without observing, that you ought to proceed in your study, not only with diligence, but with *patience;* that, if you meet with difficulties, you should bear in mind that, to enjoy the noble prospect from Port's-Down Hill, you had first to climb slowly to the top; and that, if those difficulties gather about you and impede your way, you have only to call to your recollection any one of the many days that you have toiled through briers and brambles and bogs, cheered and urged on by the hope of at last finding and killing your game.

I have put my work into the form of Letters, in order that I might be continually reminded that I was addressing myself to persons who needed to be spoken to with great clearness. I have *numbered* the Letters themselves, and also the *paragraphs*, in order that I might be able, in some parts of the work, to *refer* you to, or *tell you where to look at*, other parts of the work. And here I will just add, that a *sentence*, used as a term in Grammar, means one of those portions of words which are divided from the rest by a *single dot*, which is called a *period*, or full point; and that a *paragraph* means one of those collections, or blocks, of *sentences* which are divided from the rest of the work by beginning *a new line* a little *further in* than the lines in general; and, of course, all this part, which I have just now written, beginning with "*I have put my work into the form*," is a *paragraph*.

In a confident reliance on your attentiveness, industry, and patience, I have a hope not less confident of seeing you a man of real learning, employing your time and talents in aiding the cause of truth and justice, in afford-

ing protection to defenceless innocence, and in drawing down vengeance on lawless oppression; and, in that hope, I am your happy, as well as affectionate, father,

WILLIAM COBBETT.

LETTER II.

DEFINITION OF GRAMMAR, AND OF ITS DIFFERENT BRANCHES, OR PARTS.

MY DEAR JAMES:

1. In the foregoing Letter I have laid before you some of the inducements to the study of Grammar. In this I will define, or describe, the thing called *Grammar;* and also its different *Branches*, or *Parts*.

2. Grammar, as I observed to you before, teaches us *how to make use of words;* that is to say, it teaches us how to make use of them in a proper manner, as I used to teach you how to sow and plant the beds in the garden; for you could have thrown about seeds and stuck in plants of some sort or other, in some way or other, without any teaching of mine; and so can anybody, without rules or instructions, put masses of words upon paper; but to be able to choose the words which ought to be employed, and to place them where they ought to be placed, we must become acquainted with certain principles and rules; and these principles and rules constitute what is called Grammar.

3. Nor must you suppose, by-and-by, when you come to read about *Nouns* and *Verbs* and *Pronouns*, that all this tends to nothing but mere ornamental learning; that it is not altogether necessary, and that people may write to be understood very well without it. This is not the case; for, without a good deal of knowledge relative to these same Nouns and Verbs, those who write are never

sure that they put upon paper what they mean to put upon paper. I shall, before the close of these Letters, show you that even very learned men have frequently written, and caused to be published, not only what they did not mean, but the very contrary of what they meant; and if errors, such as are here spoken of, are sometimes committed by learned men, into what endless errors must those fall who have no knowledge of any principles or rules, by the observance of which the like may be avoided! Grammar, perfectly understood, enables us not only to express our meaning fully and clearly, but so to express it as to enable us to defy the ingenuity of man to give to our words any other meaning than that which we ourselves intend them to express. This, therefore, is a science of substantial utility.

4. As to the different *Branches* or *Parts* of Grammar, they are *four;* and they are thus named: *Orthography*, *Prosody*, *Etymology*, and *Syntax*.

5. There are two of these branches on which we have very little to say, and the names of which have been *kept* in use from an unwillingness to give up the practice of former times; but, as it is usual to give them a place in books of this kind, I will explain to you the nature of all the four branches.

6. ORTHOGRAPHY is a word made up of two Greek words, which mean *spelling*. The use of foreign words, in this manner, was introduced at the time when the English language was in a very barbarous state; and, though this use has been continued, it ought to be a rule with you, always, when you either write or speak, to avoid the use of any foreign or uncommon word, if you can express your meaning as fully and clearly by an English word in common use. However, *Orthography* means neither more nor less than the very humble business of putting *letters* together properly, so that they shall form *words*. This is so very childish a concern that I will not appear to

suppose it necessary for me to dwell upon it; but as you will, by-and-by, meet with some directions, under the head of Etymology, in which *Vowels* and *Consonants* will be spoken of, I will here, for form's sake, just observe that the letters, A, E, I, O, and U, are *Vowels*. Y, in certain cases, is also a *Vowel*. All the rest of the letters of the alphabet are *Consonants*.

This "very humble business" of spelling, however, must not be passed over so lightly; for it is a subject of very great difficulty to many persons. It is notorious that many of our ablest English authors were never able to spell or punctuate correctly, and that the correctness of their printed books, in this respect, is entirely owing to the skill of the compositor. Some of their manuscripts might, indeed, be very aptly compared to the communication of Tom Hood's witty but illiterate correspondent, who, on writing him a long letter without any points whatever, jotted them all down in a row at the end of his letter, and told him to "pepper and salt" as he pleased. It is the compositor that does the "peppering and salting," and much more, for many a writer of large pretensions.

The orthography of our English words, from their various derivation and the variety of sounds given to the letters of the alphabet, is perhaps more difficult than that of the words of any other modern tongue; and I wish to indicate here the very best and simplest way of learning it, together with the punctuation of the sentences—I mean by DICTATIONS. It is not necessary to have a teacher for this purpose; anybody who can read correctly can dictate to you. All you have to do is to write down the words and points that are slowly read to you from a book, and when you have written about a page, take the printed book and compare your words and points with those in the book, and correct accordingly. This is *the* cure for all spelling-reform nonsense. Write page after page to dictation, and you will soon find it all come very natural—you will wonder how anybody could ever think of spelling the words otherwise than the way they *are* spelled, or how they *could* be spelled otherwise.

The old method—still practiced in our public schools—of giving out columns of single and separate words to be spelled, verbally and in writing, many of them such as may never be seen twice again in a lifetime, is of very little value; for it is disjointed, dry, and pointless; whereas, by dictating sentences from a book, the

scholar learns: 1st, to spell the words in common use; 2d, to spell words according to their meaning (there, their; hair, hare; pear, pair); 3d, to associate words with ideas, thus instinctively and imperceptibly learning their proper meaning and right use; and, 4th, he acquires a *feeling* or *taste* for correct language; words and sentences are impressed forcibly on his mind by hearing, seeing, and writing them. Besides, he learns in this way, better than in any other, a knowledge of punctuation, which in English is different with different writers; in fact, every English writer has his own style of punctuating, for this is generally a matter of taste and feeling. In writing to dictation, the work done by the scholar is nearly the same as that done by the compositor, who is the best speller and punctuator in the world. Therefore, get somebody to dictate to you every day a page, or half a page, from a book, and you will, in a few months, acquire a better knowledge of orthography and punctuation than if you had spelled your way through a dozen spelling-books.

7. PROSODY is a word taken from the Greek language, and it means not so much as is expressed by the more common word PRONUNCIATION; that is to say, the business of using the proper *sound*, and employing the *due length of time*, in the uttering of syllables and words. This is a matter, however, which ought not to occupy much of your attention, because *pronunciation* is learned as birds learn to chirp and sing. In some counties of England many words are pronounced in a manner different from that in which they are pronounced in other counties; and between the pronunciation of Scotland and that of Hampshire the difference is very great indeed. But, while all inquiries into the causes of these differences are useless, and all attempts to remove them are vain, the differences are of very little real consequence. For instance, though the Scotch say *coorn*, the Londoners *cawn*, and the Hampshire folks *carn*, we know they all *mean* to say *corn*. Children will pronounce as their fathers and mothers pronounce; and if, in common conversation, or in speeches, the matter be good and judiciously arranged, the facts clearly stated, the arguments conclusive, the

words well chosen and properly placed, hearers whose approbation is worth having will pay very little attention to the accent. In short, it is sense, and not sound, which is the object of your pursuit; and, therefore, I have said enough about *Prosody*.

Here is a circumstance that suggests a by no means unfavorable commentary on the difference between the pronunciation of English in this country and in England: Mr. James Paul Cobbett, son of William Cobbett, has added to a late edition of this grammar, a sixteen-page chapter on pronunciation, pointing out the various *classes of words* commonly mispronounced by *classes* and *counties of people* in England. After carefully noting them all, I have come to the conclusion that the whole batch is utterly useless for our people, as I do not know of a single *class* of people in this country who make *any one* of the same mispronunciations. Many of the mistakes are, it is true, made here, too; as, bood for bud; doon for done; aboove for above; faythor for father; awch for arch; glawss for glass; but they are not made by *classes* of people; they are, in fact, made by none but a few illiterate and pretentious people.

The most common mistake made by people in this country consists in misplacing the *accent* of words; as, in-dus'-try for in'-dus-try; in-ter-est'-ing for in'-ter-est-ing. All these may be corrected by reference to the dictionary, in which the pronunciation of every word is properly marked. The stress of the voice always falls on that syllable having the accent-mark (′); thus, per'-emp-to-ry, not per-emp'to-ry. I have read somewhere that, on one occasion, when Mr. Sumner's colleague in the Senate said he hoped that the honorable gentlemen would make an *in'quiry* into some matter, Mr. Sumner whispered to him: "inqui'ry."

By-the-bye, there is one other mistake in pronunciation, which is very common among Americans, in the Eastern States at least, and that is pronouncing such words as *new*, *dew*, *stew*, as if they were written *noo*, *doo*, *stoo*. They must be pronounced like *few* and *view*. The same error is made in such words as *duty*, *gratitude*, where the *u* must be long, as in *useful*.

There is something else that usually comes under this heading. The Greek word *prosodia* means, literally, "belonging to song or hymn," and is usually employed to signify that part of grammar which treats of the rules of rhythm in metrical compositions. Cobbett, it is well known, had very little admiration for

poetry, and no doubt considered it a waste of time to say anything about its laws; but, though perhaps not one in a hundred of those who study this book will ever attempt to write poetry, every intelligent person ought to *know* something of its laws; and I shall, therefore, at the end of the book, after more necessary matters have been mastered, attempt to show what a simple matter this is, as far as English is concerned.

8. ETYMOLOGY is a very different matter; and, under this head, you will enter on your study. This is a word which has been formed out of two Greek words; and it means the *pedigree* or *relationship of words*, or, the manner in which one word grows out of, or comes from, another word. For instance, the word *walk* expresses an action, or movement, of our legs; but, in some cases we say *walks*, in others *walked*, in others *walking*. These three latter words are all different from each other, and they all differ from the original word, *walk;* but the action or movement, expressed by each of the four, is precisely the same sort of action or movement, and the three latter words grow out of, or come from, the first. The words here mentioned differ from each other with regard to the letters of which they are composed. The difference is made in order to express differences as to the *Persons* who walk, as to the *Number* of persons, as to the *Time* of walking. You will come, by-and-by, to the principles and rules according to which the varying of the spelling of words is made to correspond with these and other differences; and these principles and rules constitute what is called *Etymology*.

9. SYNTAX is a word which comes from the Greek. It means, in that language, *the joining of several things together;* and, as used by grammarians, it means those principles and rules which teach us how to put words together so as to form *sentences*. It means, in short, *sentence-making*. Having been taught by the rules of *Etymology* what are the relationships of words, how words grow out of each other, how they are varied in their

letters in order to correspond with the variation in the circumstances to which they apply, *Syntax* will teach you how to give all your words their *proper* situations or places, when you come to put them together into sentences. And here you will have to do with *points* as well as with words. The *points* are four in number, the *Comma*, the *Semi-Colon*, the *Colon*, and the *Period*. Besides these points, there are certain *marks*, such as the *mark of interrogation*, for instance; and to use these points and marks properly is, as you will by-and-by find, a matter of very great importance.

10. I have now given you a description of Grammar, and of its separate Branches or Parts. I have shown you that the first two of these Branches may be dismissed without any further notice; but very different indeed is the case with regard to the latter two. Each of these will require several Letters; and these Letters will contain matter which it will be impossible to understand without the greatest attention. You must read soberly and slowly, and you must think as you read. You must not hurry on from one Letter to another, as if you were reading a history; but you must have patience to get, if possible, at a clear comprehension of one part of the subject before you proceed to another part. When I was studying the French language, the manner in which I proceeded was this: when I had attentively read over, three times, a lesson, or other division of my Grammar, I wrote the lesson down upon a loose sheet of paper. Then I read it again several times in my own hand-writing. Then I copied it, in a very plain hand, and without a blot, into a book, which I had made for the purpose. But if, in writing my lesson down on a loose sheet of paper, I committed one single error, however trifling, I used to tear the paper, and write the whole down again; and, frequently, this occurred three or four times in the writing down of one lesson. I, at first, found this labor very irksome;

but, having imposed it on myself as a duty, I faithfully discharged that duty; and, long before I had proceeded half way through my Grammar, I experienced all the benefits of my industry and perseverance.

This was, no doubt, how Cobbett, in his soldier days, learned to spell and punctuate; for what he did was as good as writing so many dictations. If any scholar feels like following his example, he may lighten the labor and secure nearly equal benefit by writing the lessons down as dictations.

LETTER III.

ETYMOLOGY.

The different Parts of Speech, or Sorts of Words.

MY DEAR JAMES:

11. In the second Letter I have given you a description of *Etymology*, and shown you that it treats of the *pedigree*, or *relationship*, of words, of the nature of which relationship I have given you a specimen in the word *walk*. The next thing is to teach you the *principles* and *rules*, according to which the spelling and employing of words are varied in order to express the various circumstances attending this relationship. But, before I enter on this part of my instructions, I must inform you that there are several *distinct sorts* of words, or, as they are usually called, *Parts of Speech;* and it will be necessary for you to be able, before you proceed further, to distinguish the words belonging to each of these Parts of Speech from those belonging to the other parts. There are *Nine* Parts of Speech, and they are named thus:

ARTICLES,	NOUNS,
PRONOUNS,	ADJECTIVES,
VERBS,	ADVERBS,
PREPOSITIONS,	CONJUNCTIONS,

INTERJECTIONS.

12. Before the sergeant begins to teach young soldiers their *exercise* of the musket, he explains to them the different parts of it; the butt, the stock, the barrel, the loops, the swivels, and so on; because, unless they know these by their names, they cannot know how to obey his instructions in the handling of the musket. Sailors, for the same reason, are told which is the tiller, which are the yards, which the shrouds, which the tacks, which the sheets, which the booms, and which are each and every part of the ship. Apprentices are taught the names of all the tools used in their trade; and ploughboys the names of the various implements of husbandry. This species of preliminary knowledge is absolutely necessary in all these callings of life; but not more necessary than it is for you to learn, before you go any further, how *to know the sorts of words one from another*. To teach you this, therefore, is the object of the present letter.

13. ARTICLES. There are but *three* in our language; and these are, *the*, *an*, and *a*. Indeed, there are but two, because *an* and *a* are the same word, the latter being only an abbreviation, or a shortening, of the former. I shall, by-and-by, give you rules for the using of these Articles; but my business in this place is only to teach you how to know one sort of words from another sort of words.

14. NOUNS. The word *Noun* means *name*, and nothing more; and *Nouns* are the *names of persons and things*. As far as persons and other animals and things that we can *see* go, it is very easy to distinguish *Nouns;* but there are many *Nouns* which express what we can neither see, nor hear, nor touch. For example: *Conscience*, *Vanity*, *Vice*, *Sobriety*, *Steadiness*, *Valour;* and a great number of others. Grammarians, anxious to give some easy rule by which the scholar might distinguish *Nouns* from other words, have directed him to put the words, *the good*, before any word, and have told him that,

if the three words make *sense*, the last word is a *Noun*. This is frequently the case; as, the good *house*, the good *dog;* but the good *sobriety* would not appear to be very *good sense*. In fact there is no rule of this kind that will answer the purpose. You must employ your *mind* in order to arrive at the knowledge here desired.

15. Every word which stands for a person or any animal, or for any thing of *substance*, dead or alive, is a *Noun*. So far the matter is very easy. Thus, *man*, *cat*, *tree*, *log*, are Nouns. But when we come to the words which are the names of things, and which things are not *substances*, the matter is not so easy, and it requires a little sober thought. This word *thought*, for example, is a *Noun*.

16. The only sure rule is this: that a word which stands for any thing that has *an existence* is a Noun. For example: *Pride*, *Folly*, *Thought*, *Misery*, *Truth*, *Falsehood*, *Opinion*, *Sentiment*. None of these have any *substance*. You cannot see them, or touch them; but they all have an *existence*. They all *exist* in the world; and, therefore, the words which represent them, or stand for them, are called Nouns. If you be still a little puzzled here, you must not be impatient. You will find the difficulty disappear in a short time, if you exert your powers of thinking. Ask yourself what *existence* means. You will find that the words, *very*, *for*, *think*, *but*, *pretty*, do not express any thing which has an *existence*, or a *being;* but that the words, *motive*, *zeal*, *pity*, *kindness*, do express things which have a *being*, or existence.

17. PRONOUNS. Words of this sort *stand in the place of Nouns*. Their name is from the Latin, and it means *For-nouns*, or *For-names;* that is to say, these words, called Pronouns, are used *for*, or *instead of*, Nouns. *He*, *She*, *Her*, *Him*, *Who*, for example, are Pronouns. The use of them is to prevent the repetition of Nouns, and to make speaking and writing more rapid and less

encumbered with words. An example will make this clear to you in a minute. Thus:

18. A woman went to a man, and told *him* that *he* was in great danger of being murdered by a gang of robbers. *who* had made preparations for attacking *him*. *He* thanked *her* for *her* kindness, and, as *he* was unable to defend *himself*, *he* left *his* house and went to a neighbor's.

19. Now, if there were no Pronouns, this sentence must be written as follows:—A woman went to a man, and told *the man*, that *the man* was in great danger of being murdered by a gang of robbers; as *a gang of robbers* had made preparations for attacking *the man*. *The man* thanked *the woman* for *the woman's* kindness; and as *the man* was unable to defend *the man's self*, *the man* left *the man's* house and went to a neighbor's.

20. There are several different classes of Pronouns; but of this, and of the manner of using Pronouns, you will be informed by-and-by. All that I aim at here is to enable you to form a clear idea with regard to the difference in the sorts of words, or Parts of Speech.

21. ADJECTIVES. The word *Adjective*, in its full, literal sense, means *something added to something else.* Therefore, this term is used in Grammar as the name of that Part of Speech which consists of words which are added, or put, to Nouns, in order to express something relating to the Nouns, which something could not be expressed without the help of *Adjectives*. For instance, there are several turkeys in the yard, some black, some white, some speckled; and, then, there are large ones and small ones of all the colours. I want you to go and catch a *turkey;* but I also want you to catch a *white* turkey, and not only a white turkey, but a *large* turkey. Therefore, I add, or *put to* the Noun, the words *white* and *large*, which, therefore, are called *Adjectives.*

22. Adjectives sometimes express the *qualities* of the Nouns, to which they are put; and this being very fre-

quently their use, some grammarians have thrown aside the word Adjectives, and have called words of this sort, *Qualities*. But this name is not sufficiently comprehensive; for there are many words which are Adjectives which have nothing to do with the *quality* of the Nouns to which they are put. *Good* and *bad* express qualities, but *long* and *short* merely express dimension, or duration, without giving any intimation as to the quality of the things expressed by the Nouns to which they are put; and yet *long* and *short* are Adjectives. You must read very attentively here, and consider soberly. You must keep in mind the above explanation of the *meaning* of the word Adjective; and if you also bear in mind that words of this sort always express some quality, some property, some appearance, or some distinctive circumstance, belonging to the Nouns to which they are put, you will very easily, and in a very short space of time, be able to distinguish an Adjective from words belonging to any other Part of Speech.

23. VERBS. Grammarians appear to have been at a loss to discover a suitable appellation for this important sort of words, or Part of Speech; for the word *Verb* means nothing more than *Word*. In the Latin it is *verbum*, in the French it is *verbe;* and the French, in their Bible, say *Le Verbe*, where we say *The Word*. The truth is that there are so many properties and circumstances, so many and such different powers and functions, belonging to this Part of Speech, that the mind of man is unable to bring the whole of them into any short and precise description. The first grammar that I ever looked into told me that "a *Verb* is a word which signifies to *do*, to *be*, or to *suffer*." What was I to understand from this laconic account?

24. Verbs express all the different *actions* and *movements* of all creatures and of all things, whether alive or dead. As, for instance, to *speak*, to *bark*, to *grow*, to

moulder, to *crack*, to *crumble*, and the like. In all these cases there is *movement* clearly understood. But in the cases of, to *think*, to *reflect*, to *remember*, to *like*, to *detest*, and in an infinite number of cases, the *movement* is not so easily perceived. Yet these are all *Verbs*, and they do indeed express *movements* which we attribute to the *mind*, or the *heart*. But what shall we say in the cases of to *sit*, to *sleep*, to *rot*, and the like? Still these are all *Verbs*.

25. Verbs are, then, a sort of words, the use of which is to express the *actions*, the *movements*, and *the state or manner of being*, of all creatures and things, whether animate or inanimate. In speaking with reference to a man, to *fight* is an action; to *reflect* is a movement; to *sit* is a state of being.

26. Of the manner of using Verbs you will hear a great deal by-and-by; but what I have here said will, if you read attentively, and take time to consider, be sufficient to enable you to distinguish Verbs from the words which belong to the other Parts of Speech.

27. ADVERBS are so called because the words which belong to this Part of Speech are *added to verbs*. But this is an inadequate description; for, as you will presently see, they are sometimes otherwise employed. You have seen that Verbs express *actions*, *movements*, and *states of being;* and it is very frequently the use of Adverbs to express *the manner* of actions, movements, and states of being. Thus: the man fights *bravely;* he reflects *profoundly;* he sits *quietly*. In these instances the Adverbs perform an office, and are placed in a situation, which fully justify the name that has been given to this sort of words. But there are many Adverbs which do not express the manner of actions, movements, or states of being, and which are not added to verbs. For instance: "*When* you sow small seeds, make the earth *very* fine, and if it have, *of late*, been dry weather, take care to press the earth *extremely* hard upon the seeds." Here

are four Adverbs, but only the last of the four expresses any thing connected with a verb. This shows that the name of this class of words does not fully convey to our minds a description of their use.

28. However, with this name you must be content; but you must bear in mind that there are Adverbs of *time*, of *place*, and of *degree*, as well as of manner; and that their business is to express, or describe, some circumstances in addition to all that is expressed by the Nouns, Adjectives, and Verbs. In the above sentence, for example, the words *when*, *very*, *of late*, and *extremely*, add greatly to the precept, which, without them, would lose much of its force.

29. PREPOSITIONS. The Prepositions are, *in*, *to*, *for*, *from*, *of*, *by*, *with*, *into*, *against*, *at*, and several others. They are called *Prepositions* from two Latin words, meaning *before* and *place;* and this name is given them because they are in most cases *placed before* Nouns and Pronouns; as, "Indian corn is sown *in* May. *In* June, and the three following months, it is carefully cultivated. When ripe, *in* October, it is gathered *in* the field, *by* men who go *from* hill *to* hill *with* baskets, *into* which they put the ears. The leaves and stalks are then collected *for* winter use; and they not only serve as food *for* cattle and sheep, but are excellent *in* the making *of* sheds *to* protect animals against the inclemency *of* the weather."

30. Prepositions are not very numerous, and, though you will be taught to be very careful in using them, the above sentence will be quite sufficient to enable you to know the words belonging to this Part of Speech from the words belonging to any other Part of Speech.

Notice that the word is from "prae," *before*, and "positio," *a placing*. Now take any article of furniture near you—the desk, for instance—and think of all the *relations of position* with regard to it and something else. The book is *in* the desk, *on* the desk, *over* the desk, *above*, *under*, *beneath* or *below* the desk, *near*

the desk, *against* the desk, *beside* the desk, *within* or *without* the desk, and so on. Still, other relations are sometimes expressed by prepositions as well as that of position; as, *by* the desk, *of* the desk, *to* the desk, *for* the desk; but the majority of them show some *relation* of *position* between things and actions, or between persons and actions, or between things and states. This word *between*, for instance, is a preposition. Like other words used in grammar, its name, *preposition*, does not *express completely* the true nature of it.

31. CONJUNCTIONS are so called because they *conjoin*, or *join together*, words, or parts of sentences; as, "Peas *and* beans may be severed from the ground before they be quite dry; *but* they must not be put into sacks or barns until perfectly dry, *for*, if they be, they will mould." The word *and* joins together the words peas and beans, and, by the means of this *junction*, makes all the remaining part of the sentence apply to both. The word *but* connects the first with the second member of the sentence. The word *for*, which is sometimes a Conjunction, performs, in this case, the same office as the word *but:* it continues the connection; and thus does every part of the sentence apply to each of the two nouns which are the subject of it.

What a deal of useless learning we find in the ordinary grammars about this simple matter of conjunctions! They speak of conjunctions which are mere connectives, of co-ordinate and subordinate connectives, of copulative, adversative, and alternative conjunctions; then of subordinate connectives which join heterogeneous elements, and these subordinate connectives again divided into those which unite substantive clauses, those which unite adjective clauses, and those which unite adverbial clauses! What are children to make of all these hard words? Or, supposing they are made to understand the words, will it enable them to use the word *and*, for instance, more correctly by informing them that it is a *copulative* conjunction?

32. INTERJECTIONS. This name comes from two Latin words: *inter*, which means *between*, and *jectio*, which means *something thrown*. So that the full, literal mean-

ing of the word is *something thrown between.* The Interjections are *Ah! Oh! Alas!* and such like, which, indeed, are not *words*, because they have no definite meaning. They are mere *sounds*, and they have been mentioned by me merely because other grammarians have considered them as being a Part of Speech. But this one notice of them will be quite sufficient.

Here Cobbett's defective knowledge of Latin crops out, for *jectio* does not mean *something thrown*, but merely *the act of throwing.* But he is quite right in setting down interjections as forming no part of grammar. A writer in Chambers's Encyclopedia hits the mark still more effectively when he says that "they are, in fact, more akin to the sounds emitted by the lower animals than to articulate speech." Yet most grammarians take the trouble to set them down in classes, those that express surprise, those that express fear, and so on; as if the veriest boor that ever hopped over a clod would not know how to utter an exclamation expressing fear or surprise when he felt it! It is something like the Irishman's "teaching ducks to swim."

33. Thus, then, you are now able to distinguish, in many cases at least, to what Part of Speech belongs each of the several words which may come under your observation. I shall now proceed to the Etymology of each of these Parts of Speech. As we have done with the *Interjections*, there will remain only *eight* Parts to treat of, and this I shall do in eight Letters, allotting one Letter to each Part of Speech.

Here it seems proper to say to the thoughtful scholar that a word may (as remarked by Mr. White) belong to almost ANY part of speech, according to its use. We say *dog* is a noun; and so it is when it means an animal of the dog species; but it may be a verb or an adjective; as, he will *dog* me to my home; here is a *dog* cart. In this very phrase, "dog species," it is an adjective. Take, again, the word *but.* I will give it to you of four different parts of speech in four different senses. "I will go, *but* I will return. He is *but* five years old. The goat will *but* his head against you. He always has a *but* in his sayings." And the word could no doubt be used in still other parts of speech. If you cannot make these out now, wait a little; you will be able to do so by-and-by.

Spelled with two t's, there are three different *butts*, with three different meanings; the butt of ridicule, the butt of a segar, the butt of wine. Then, again, a word may be of two different parts of speech with a different accent, as, I *re-cord'* the deed; this is the *rec'-ord*. You see, therefore, every thing depends on the *sense* or the *use* made of a word; and you see, too, the utter uselessness of learning by heart instead of by reason. In learning any art or science, an ounce of understanding is worth a ton of memory.

LETTER IV.

ETYMOLOGY OF ARTICLES.

MY DEAR JAMES:

34. In Letter III., paragraph 13, you have seen what sort of words ARTICLES are; that is to say, you have there learned how to distinguish the words belonging to this Part of Speech from words belonging to other Parts of Speech. You must now turn to Letter II., paragraph 8. Having read what you find there under the head of *Etymology*, you will see at once, that my business, in this present Letter, is to teach you those principles and rules according to which Articles are varied in order to make them suit the different circumstances which they are used to express.

35. You have seen that there are but *three* Articles, namely, A or AN, and THE. The two former are, in fact, the *same word*, but of this I shall say more presently. They are called *indefinite* Articles, because they do not *define*, or *determine*, what particular object is spoken of. The Nouns, to which they are prefixed, only serve to point out the *sort* of person or thing spoken of, without defining *what* person or *what* thing; as, *a tree is blowed down.* From this we learn that *some* tree is blowed down, but not *what* tree. But the definite Article THE determines the particular object of which we speak; as, the tree *which*

stood close beside the barn is blowed down. In this last instance, we are not only informed that a tree is blowed down, but the sentence also informs us what particular tree it is. This Article is used before nouns in the plural as well as before nouns in the singular number. It is sometimes used before words expressive of degrees of comparison; as, *the best, the worst, the highest, the lowest.* When we use a noun in the singular number to express a whole species, or sort, we use the definite Article; thus, we say, *the oak* is a fine tree, when we mean that oaks are fine trees.

36. The Article A becomes AN when this Article comes immediately before *any* word which begins with a *vowel.* This is for the sake of the *sound,* as *an adder, an elephant, an inch, an oily seed, an ugly hat.* The word *an* is also used before words which begin with an *h* which is *mute;* that is to say, which, though used in writing, is *not sounded* in speaking; as, *an hour.* This little variation in the article is, as I said before, for the sake of the *sound;* for it would be very disagreeable to say, *a adder, a elephant, a inch, a oily seed, a ugly hat, a hour,* and the like. But *a* is used in the usual way before words which begin with an *h* which is sounded in speaking; as, *a horse, a hair,* and the like. The indefinite Article can be used before nouns in the *singular number only.* There is a seeming exception to this rule in cases where the words *few* and *many* come before the noun; as, a *few* horses; a *great many* horses; but, in reality, this is not an exception, because the words *few* and *many* mean *number;* thus, a *small number* of horses, a *great number* of horses; and the indefinite Article agrees with this word *number,* which is understood, and which is in the *singular.*

It is remarkable that a man of Cobbett's discernment did not see through a certain inconsistency in the strict or literal application of this rule, the more especially as he explicitly declares that the change is made for the sake of *the sound.* He, like a thousand

others to the present day, followed out the letter of the rule and violated its spirit. For a word may begin with a vowel and yet have a *consonant sound;* and in this case the article must *not* be changed. Does it not sound much better to say, "a useful book," than "an useful book?" "such a one," than "such an one?" And it will be seen that when we say *a useful book, a one, a union, a ewe, a European*, and the like, we really conform to the *spirit* of the rule; for in all these cases the words begin with the SOUND of a consonant; as, *a yuseful book, a wone, a yunion, a yewe, a yeuropean.*

And this also clearly illustrates something else that has been left mysteriously indefinite in many grammars: "The vowels are *a, e, i, o, u*, and sometimes *w* and *y*." What a puzzle this used to be to me in my grammar-studying days! There was the rule, plain enough; but *when* w and y were consonants, I knew no more than the man in the moon! I suppose that these writers of grammars repeat this rule, one after another, without knowing anything about it themselves. Now the reason here given why the indefinite article must remain unchanged before words beginning with a vowel and having a *y* or *w* sound, explains the whole matter; namely, that *y* and *w* at the BEGINNING of a syllable are consonants, but in the MIDDLE or at the END of a syllable are vowels. In the word *sympathy*, for instance, both *y's* are vowels, because they are equal to *i's;* in the word *yesterday*, the first is a consonant, and the second a vowel. It is precisely the same with the *w;* in the words *new, few, pew*, the *w's* are vowels, being equal to *u's;* in the word *window*, the first is a consonant and the second a vowel.

But there is another rule concerning words beginning with *h*, a rule of which Cobbett and many other writers of his day seem to have been unaware—although I have no doubt they unconsciously obeyed it—which is also formed for the sake of the sound. In these four words, for instance, *history, historical, hero, heroic*, the *h* is uniformly sounded, or aspirated. Yet we say *an historical fact, an heroic poem, a history, a hero.* How does this come? It is because we must say *an* before words beginning with *h* aspirate, *when the accent of such words falls on the* SECOND SYLLABLE. That is the rule. Say, therefore, *an hotel, an hereditary prince*, and not, as many do, *a hotel, a hereditary prince;* for the former *sounds* better.

I may here add that the tendency now-a-days is to sound the *h* in some words in which it was formerly silent: a humble man, a hospital, a hostler. I suppose Dickens's Uriah Heep has made most people disgusted with "an 'umble man." And it is perhaps

worth remarking here that many Americans make a serious mistake when they believe that all Englishmen drop their aitches, and put them in where they ought not to do so. The latter is never done by anybody in England but illiterate Londoners, and the former seldom by Englishmen of any culture.

I notice that recent grammarians follow Noah Webster in setting down articles as adjectives. It is true that these words always modify nouns in some way; but I see no advantage in setting them down among a class of words which generally signify *the kind* or *quality* of things, thus rendering the adjective itself all the more difficult to define. Besides, the articles have characteristics entirely their own, which can be remembered the better by keeping them apart. We shall see this more clearly by-and-by.

LETTER V.

ETYMOLOGY OF NOUNS.

37. THIS, my dear James, is a Letter of great importance, and, therefore, it will require great attention from you. Before you proceed further, you will again look well at Letter II., paragraph 8, and Letter III., paragraphs 14, 15, and 16, and there read carefully everything under the head of *Nouns*.

38. Now, then, as Letter III. has taught you how to distinguish Nouns from the words which belong to the other Parts of Speech, the business here is to teach you the principles and rules according to which Nouns are to be varied in the letters of which they are composed, according to which they are to be used, and according to which they are to be considered in their bearings upon other words in the sentences in which they are used.

39. In a Noun there are to be considered the *branches*, the *numbers*, the *genders*, and the *cases*; and all these must be attended to very carefully.

40. THE BRANCHES. There are two; for Nouns are

some of them PROPER and some COMMON. A Noun is called *proper* when it is used to distinguish one particular individual from the rest of the individuals of the same species or kind; as *James, Botley, Hampshire.* The Noun is called *common* when it applies to all the individuals of a kind; as, *man, village, county. Botley* is a proper Noun, because all villages have not this name; but *village* is a common noun, because all villages are called by that name: the name is *common* to them all. Several persons have the name of *James*, to be sure, and there is a *Hampshire* in America as well as in England; but, still, these are proper names, because the former is not common to *all* men, nor the latter to *all* counties. Proper Nouns take no articles before them, because the extent of their meaning is clearly pointed out in the word itself. In *figurative* language, of which you will know more by-and-by, we sometimes, however, use the article; as, "Goldsmith is a very pretty poet, but not to be compared to *the* Popes, *the* Drydens, or *the* Otways." And again; "I wish I had the wit of *a Swift.*" We also use the definite article before proper Nouns when a common Noun is understood to be left out; as, *The Delaware*, meaning the *River* Delaware. Also when we speak of more than one person of the same name; as, *the Henries, the Edwards.*

A very important difference in the use of proper and common nouns is, that the former are written with a capital letter, and the latter are not. This is the general rule, and it is generally observed; but some writers begin every word they think important with a capital letter, and nobody is more peculiar in this respect than Cobbett himself. He writes *noun*, you see, with a capital, although it is a common noun. Formerly every noun used to be written with a capital letter, as is done in German till this day. Thomas Carlyle is another singular punctuator and capitalizer; but he is singular in all things.

41. THE NUMBERS. These are the *Singular* and the *Plural.* The Singular is the original word; and, in general, the Plural is formed by adding an *s* to the singu-

lar, as *dog, dogs.* But though the greater part of our Nouns form their plurals from the singular in this simple manner, there are many which do not; while there are some Nouns which have no plural number at all, and some which have no singular. Therefore, considering the above to be the First Rule, I shall add other rules with regard to the Nouns which do not follow that Rule.—The Second Rule. Nouns, the singular numbers of which end in *ch, s, sh,* or *x,* require *es* to be added in order to form their plural number; as, *church, churches; brush, brushes; lass, lasses; fox, foxes.*—The Third Rule is that Nouns which end in *y,* when the *y* has a consonant coming immediately before it, change the *y* into *ies* in forming their plurals; as, *quantity, quantities.* But you must mind that if the *y* be not immediately preceded by a consonant, the words follow the *First Rule,* and take only an *s* in addition to their singular; as, *day, days.* I am the more anxious to guard you against error as to this matter, because it is very common to see men of high rank and profession writing *vallies, vollies, attornies, correspondencies, conveniencies,* and the like, and yet all these are erroneous. *Correspondence* and *inconvenience* should have simply an *s;* for they end in *e,* and not in *y.*—The Fourth Rule is, that Nouns which end in a single *f,* or in *fe,* form their plurals by changing the *f,* or *fe,* into *ves;* as, *loaf, loaves; wife, wives.* But this rule has exceptions, in the following words, which follow the *First Rule: Dwarf, scarf, mischief, handkerchief, chief, relief, grief,* and others. The two last are seldom used in the plural number; but, as they sometimes are, I have included them.—The Fifth Rule is, that the following Nouns have their plural in *en; man, men; woman, women; ox, oxen; child, children.* And *brethren* is sometimes used as the plural of *brother.*—The Sixth Rule is, that all which nature, or art, or habit, has made plural, have no singular; as, *ashes, annals, bellows, bowels, thanks, breeches, entrails, lungs, scissors,*

snuffers, *tongs*, *wages*, and some others. There are also some Nouns which have no plurals, such as those which express the qualities, or propensities, or feelings, of the mind or heart; as, *honesty*, *meekness*, *compassion*. There are, further, several names of herbs, metals, minerals, liquids, and of fleshy substances, which have no plurals; to which may be added the names of almost all sorts of grain. There are exceptions here; for while *wheat* has no plural, *oats* has seldom any singular. But all these words, and others which are irregular, in a similar way, are of such very common use that you will hardly ever make a mistake in applying them; for I will not suppose it possible for my dear James to fall into either the company or the language of those who talk, and even write, about *barleys*, *wheats*, *clovers*, *flours*, *grasses*, and *malts*. There remain to be noticed, however, some words which are too irregular in the forming of their plurals to be brought under any distinct head even of irregularity. I will, therefore, insert these as they are used in both numbers.

SINGULAR.	PLURAL.	SINGULAR.	PLURAL.
Die,	Dice,	Goose,	Geese.
Mouse,	Mice,	Penny,	Pence,
Louse,	Lice,	Tooth,	Teeth,
Deer,	Deer,	Foot,	Feet.

Die, dice. This is the little cubic implement of the gamester; but the more worthy implement of the die-sinker is regular; *die, dies.* You must not confound this with the *dye* and *dyes* of the dyer. It is customary to change *penny* to *pence* when speaking of a sum of money; but, in speaking of penny-pieces, the word is regular; as, I have a pocketful of pennies. By-the-bye, all such words as this word *pocketful* are also regular; three *pocketfuls*, four *spoonfuls*, five *shovelfuls*. Three *pocketsful* would be quite another thing. Then again, we must, from the nature of the words, say *mothers-in-law*, *cousins-german*, *courts-martial;* for the words *in-law*, *german*, and *martial*, are adjectives or qualifying words, and adjectives, in English, never make any change to express number. *Englishman* and *Frenchman* become *Englishmen* and *Frenchmen;*

but not *all* the nationalities ending in *man* become *men;* there are the *Romans*, the *Normans*, and the *Germans*, brave manly races, no doubt, but who will say that the *Mussulmans*, *Turkomans* and *Ottomans* deserve to be called men?

Most of the nouns ending in *o*, add *es* to form the plural; as, negro, negroes. There are only a few exceptions; as, folio, quarto, duodecimo, piano, nuncio, cameo, which follow the general rule. I think it useless to mention every one of the exceptions; for, in the first place, usage is gradually changing the form of some of these words (motto, portico); and, in the second place, the reader can always, when necessary, find the desired information by reference to the dictionary. "I always *did* admire that speech!" were the sarcastic words of Mr. Butler in reply to one of Mr. Bingham's speeches. I may say the same thing, unsarcastically, of the reply of a young candidate for the bar, who, on being asked some isolated, unimportant question, said, "I could find that out in two minutes by reference to an encyclopedia."

There are some nouns, with a plural form but a singular meaning, that are always used in the singular. "The *molasses* is sticky. The *measles* is spreading. What is the *news?* He has made a *series* of blunders. The *pains* he has taken to repair them is remarkable. *Mathematics* (physics, optics, &c.) is an interesting science." Look, therefore, to the *meaning* and not the *form* of the word.

Deer, *sheep*, *swine*, *vermin*, are the same in both singular and plural; but *snipe*, *trout*, *salmon*, *fish*, and the like, become plural when *number* is signified, and singular when *quantity* is signified. "Here are two snipes; I have shot a quantity of snipe. Here are three fishes, three salmons; I have caught a lot of fish, of salmon." *Dozen* and *pair* are used like *hundred* and *thousand;* that is, singular with any other number, but plural without any other number. "I saw *dozens* of those creatures; they walked in *pairs;* I shot five *dozen* partridges and bought six *pair* of pigeons. Five *hundred* men; there were *hundreds* of men."

In some compound nouns, both parts are made plural: man-servant, men-servants; woman-servant, women-servants; knight-templar, knights-templars. To prevent a confusion of things, we must add 's to figures and letters to indicate the plural: "I want three 5's and four 6's. Mind your p's and q's, and dot your i's." There are a number of names of persons and things in war affairs that do not make any change for the plural; as,

300 foot (meaning foot-soldiers, or infantry).

43. While, however, I lay down this rule as required by strict grammatical correctness, I must not omit to observe that the license allowed to figurative language enables us to give the masculine or feminine gender to inanimate objects. This has justly been regarded as a great advantage in our language. We can, whenever our subject will justify it, transform into masculine, or into feminine, nouns which are, strictly speaking, neuter; and thus, by giving the functions of life to inanimate objects, enliven and elevate our style, and give to our expressions great additional dignity and force.

This is the figure called personification, which may be illustrated by such examples as these: "Grim-visaged *War* hath smoothed *his* wrinkled front." "*Peace* hath *her* victories no less renowned than *War*." "I care not, *Fortune*, what you me deny; you cannot rob me of free-*Nature's* grace; you cannot shut the windows of the sky, through which *Aurora* shows *her* brightening face." Notice that a noun personified is always spelled with a capital letter; and that the noun is made masculine or feminine according to its nature.

Some grammarians speak of a fourth gender, the *common* gender. Nouns that are common to both genders, they call such; as, friend, parent, cook, slave. But there is really no necessity for such a distinction. When I speak of a friend, I certainly know whether that friend is man or woman, and it is very easy to let my hearer or reader know, too, if necessary. If I do not indicate it by the pronoun, my hearer or reader may assume that the friend is man or woman, as he thinks fit; but he cannot think of him or her as both at once. Indeed the gender is usually indicated by the context; that is, by the parts of the discourse preceding and succeeding the word in question. I can hardly speak of a person without using *he* or *she*. The Germans generally add *in* to the masculine noun to make it feminine, as, Freund, Freundin; the French generally add *e* to the masculine form; as, servant, servante; and the only form in English that is regular is adding *ess* to the masculine, or changing its ending into *ess;* as, mayor, mayoress; hunter, huntress; actor, actress; count, countess; duke, duchess. As this, however, can be applied to but comparatively few words in our language, we are obliged to make use of various expedients to indicate gender; as, dog-fox, bitch-fox;

cock-sparrow, hen-sparrow; he-goat, she-goat; male cook, female cook. Generally, however, in speaking of animals, and also of infants, the distinction of sex is not observed; that is to say, these are usually spoken of in the neuter gender. "What a handsome bird *it* is! Look at that dog! What a noble creature *it* is! Did you see the baby? What an interesting child *it* is!" When we speak of any bird or animal distinguished for its boldness, size, or other quality peculiar to the male, we usually give it the masculine gender, even if its sex be not known. Such are, for instance, the horse or steed, the eagle, the condor, the mastiff, the St. Bernard or Newfoundland dog, and the like. Of course, all animals are personified in fables.

As the words *male* and *female* carry a rather animalish significance with them, we sometimes say a *lady-friend*, a *gentleman-rider*, a *boy-singer*. Somebody has observed that the words over the public-school entrances, "Entrance for males," "Entrance for females," sound as if they were entrances for so many little he-bears and she-bears, and therefore prefers "Entrance for boys," "Entrance for girls." It is far better to speak, for instance, of a country being governed by a woman than by a female.

44. THE CASES. The word *case*, as applied to the concerns of life, has a variety of meanings, or of different shades of meaning; but its general meaning is *state of things*, or *state of something*. Thus we say, "In *that case*, I agree with you." Meaning, "that being *the state of things*, or that being the *state of the matter*, I agree with you." Lawyers are said "to make out *their case*;" or not to make out *their case*;" meaning the *state of the matter* which they have undertaken to prove. So, when we say that a horse is *in good case*, we mean that he is in a *good state*. Nouns may be in different *states*, or *situations*, as to other Nouns, or other words. For instance, a Noun may be the name of a person who *strikes* a horse, or of a person who *possesses* a horse, or of a person whom a horse *kicks*. And these different situations, or states, are, therefore, called *cases*.

45. You will not fully comprehend the use of these distinctions till you come to the Letter on *Verbs*; but it

is necessary to explain here the nature of these *cases*, in order that you may be prepared well for the use of the terms, when I come to speak of the Verbs. In the Latin language each Noun has several *different endings*, in order to denote the different cases in which it may be. In our language there is but one of the cases of Nouns which is expressed or denoted by a change in the ending of the Noun; and of this change I will speak presently.

46. There are three Cases: the *Nominative*, the *Possessive*, and the *Objective*. A Noun is in the *Nominative* case when it denotes a person, or thing, which *does* something or *is* something; as, *Richard strikes; Richard is good.*

47. A Noun is in the *Possessive* case when it names a person or thing that *possesses* some other person or thing, or when there is one of the persons or things *belonging* to the other; as, *Richard's hat;* the *mountain's top;* the *nation's fleet.* Here *Richard*, *mountain*, and *nation*, are in the *possessive case*, because they denote persons or things which *possess* other persons or things, or have other persons or things *belonging to* them. And here is that change in the ending of the Noun, of which I spoke above. You see that *Richard*, *mountain*, *nation*, has, each of them, an *s* added to it, and a mark of *elision* over; that is to say, a *comma*, placed above the line, between the last letter of the word and the *s*. This is done for the purpose of distinguishing this case from the plural number; or, at least, it answers the purpose in all cases where the plural of the Noun would end in an *s;* though there are different opinions as to the origin of its use. In Nouns which do not end their plural in *s*, the mark of elision would not appear to be absolutely necessary. We might write *mans* mind, *womans* heart, but it is best to use the mark of elision. When plural Nouns end with *s*, you must not add an *s* to form the possessive case, but put the elision mark only after the *s* which ends

the Noun; as, *mountains'* tops; *nations'* fleets; *lasses'* charms. Observe, however, that, in *every* instance, the possessive case may be expressed by a turn of the words; as, *the hat of Richard; the top of the mountain; the fleet of the nation; the mind of man;* and so on. The Nouns, notwithstanding this turn of the words, are still in the possessive case; and, as to when one mode of expression is best, and when the other, it is a matter which must be left to taste.

48. A noun is in the *Objective* case when the person or thing that it names or denotes is the *object* or *end* of some act or of some movement, of some kind or other; Richard *strikes Peter;* Richard gave a blow *to Peter;* Richard goes *after Peter;* Richard *hates Peter;* Richard *wants arms;* Richard seeks *after fame;* falsehood leads *to mischief;* oppression *produces resistance.* Here you see that all these Nouns in the objective case are the *object,* the *end,* or the *effect,* of something *done* or *felt* by some person or thing, and which other person or thing is in the nominative case.

That is to say, a noun is always the object of one of two things, a transitive verb or a preposition. I don't think there is anything that enables one to understand this matter of case so well as a proper comprehension of the difference between the transitive and the intransitive verb. I know I never understood it until I learned what a transitive verb was.—We have seen that verbs are words expressing *action* or a *state of being.* Now watch. "I *walk* in the field; I *run* every day; I *dream* very often; I *live* in Hoboken." Here the verbs *walk, run, dream, live,* express an action which does not pass from the actor or subject; it is confined to him; does not *pass over* to any thing; it is therefore intransitive. "I walk a *horse;* I run a *grist-mill;* I dream bad *dreams;* I live the *life* down." Here the action passes from the actor to something else; it *goes over* to something; the verb is, therefore, *transitive.* Now wherever this is the case, wherever the action passes to some object, that object or thing or noun is in the objective case. Again: "The boy is choking"—"the boy is choking the cat." In the first instance, the verb is intransitive; in the second, it is transitive, and "cat" is conse-

quently in the objective case. Besides the transitive verb, there is, as I have said, only one other thing that can put a noun in the objective case, and that is the *preposition*, which always *governs* the objective case, or puts whatever thing follows it in the objective case. You notice this in the above examples of Cobbett's; the noun each time comes after a transitive verb or a preposition. In the examples I gave you with *the desk* (Letter III, par. 29), that word is invariably in the objective case. As to the nominative case (the subject), the name of the person or thing that *does*, *is*, or *suffers* something is in that case. Notice that a noun following the verb *to be* is *always* in the nominative case. The Germans, in their expressive language, call these three cases the *who-case*, the *whose-case*, and the *whom-case*. Just try this, and you will see that the nominative answers to *Who?* the possessive to *Whose?* and the objective to *Whom?*

LETTER VI.

ETYMOLOGY OF PRONOUNS.

MY DEAR JAMES:

49. You will now refer to paragraphs 17, 18, and 19, in Letter III; which paragraphs will refresh your memory as to the general nature and use of *Pronouns*. Then, in proceeding to become well acquainted with this Part of Speech, you will first observe that there are four classes, or descriptions, of Pronouns: first, the *Personal;* second, the *Relative;* third, the *Demonstrative;* and, fourth, the *Indefinite*.

50. In PERSONAL PRONOUNS there are four things to be considered: the person, the number, the gender, and the case.

51. There are *three persons*. The Pronoun which represents, or stands in the place of, the name of the person who speaks, is called the *first person;* that which stands in the place of the name of the person who is spoken to, is called the *second person;* that which stands

in the place of the name of the person who is spoken of, is called the *third person.* For example: "*I* am asking *you* about *him.*" This circumstance of *person* you will by-and-by find to be of great moment; because, as you will see, the *verbs* vary their endings sometimes to correspond with the *person* of the Pronoun; and, therefore you ought to pay strict attention to it at the outset.

52. The *number* is either singular or plural, and the Pronouns vary their spelling to express a difference of number; as in this table, which shows, at once, all the persons and all the numbers.

	SINGULAR.	PLURAL.
First person	I,	We.
Second person	Thou,	You.
Third person	He,	They.

53. The next thing is the *gender.* The Pronouns of the first and second person have no changes to express gender; but the third person singular has changes for that purpose: *he, she,* or *it;* and I need not point out to you the cases where one of these ought to be used instead of the other.

54. The *case* is the last thing to be considered in personal Pronouns. The meaning of the word *case,* as used in the rules of Grammar, I have fully explained to you in Letter V, paragraph 44. In paragraphs 45, 46, 47, and 48, in the same Letter, I have treated of the distinction between the cases. Read all those paragraphs again before you proceed further: for now you will find their meaning more clearly explained to you; because the personal Pronouns, and also some of the other Pronouns, have *different endings,* or are composed of *different letters,* in order to point out the different cases in which they are: as, *he, his, him.*

55. The personal Pronouns have, like the nouns, three cases: the *Nominative,* the *Possessive,* and the *Objective.*

The following table exhibits the whole of them at one view, with all the circumstances of person, number, gender, and case.

SINGULAR NUMBER.

		Nominative.	*Possessive.*	*Objective.*
First Person		I,	My, Mine,	Me.
Second Person		Thou,	Thy, Thine,	Thee.
Third Pers.	Masc. Gen.	He,	His,	Him.
	Femin. "	She,	Her, Hers,	Her.
	Neuter "	It,	Its,	It.

PLURAL NUMBER.

		Nominative.	*Possessive.*	*Objective.*
First Person		We,	Our, Ours,	Us.
Second Person		You,	Your, Yours,	You.
Third Pers.	Masc. Gen.	They,	Their, Theirs,	Them.
	Femin. "	They,		
	Neuter "	They,		

56. Upon this table there are some remarks to be attended to. In the possessive cases of *I*, *Thou*, *She*, *We*, *You*, and *They*, there are two different words: as, *My*, or *Mine;* but you know that the former is used when followed by the name of the person or thing possessed; and that the latter is used when not so followed; as, "This is *my pen;* this pen is *mine*." And it is the same with regard to the possessive cases of *Thou*, *She*, *We*, *You*, and *They*.

The same grammarians that wish to call every word that stands before a noun an *adjective*, call these words, *my*, *thy*, *his*, *your*, *their*, possessive adjectives; they call them such when coming directly before a noun, and pronouns when standing alone. I know no change more utterly useless and confusing. Do they not always stand in the place of nouns in the possessive case? "I met Tom Jones, and gave him a message from *his* father." Does this *his* not stand for *Tom's*, a noun in the possessive case? When Billy Clutterbuck says, "This is *my* dog," does it not mean, This is Billy Clutterbuck's dog?

57. *Thou* is here given as the *second person singular;* but common custom has set aside the rules of Grammar in this case; and though we, in particular cases, still make use of *Thou* and *Thee*, we generally make use of *You* instead of either of them. According to ancient rule and custom this is not correct; but what a whole people adopts and universally practises must, in such cases, be deemed correct, and to be a superseding of ancient rule and custom.

58. Instead of *you* the ancient practice was to put *ye* in the nominative case of the second person plural; but this practice is now laid aside, except in cases which very seldom occur; but whenever *ye* is made use of, it must be in the *nominative*, and *never* in the *objective, case.* I may, speaking to several persons, say, "*Ye* have injured me," but not "I have injured *ye.*"

There is nothing that more strikingly displays the spirit of caste in Germany than the fact that there are *four* different ways in German of saying *you*, according to the rank or social position of the person addressed (Sie, du, ihr, er). In English, we say *you* to the President, and *you* to a beggar; *you* to a king, and *you* to an assemblage of kings; and this is characteristic of the sturdy love of fair play among the English race. In the Prussian army, the officer addresses the common soldier in the third person; *he* shall do so and so. Among German students, there are only two classes worthy of respect; those that *are* students, and those that *have been* students; all the rest are cattle.—*Ye* is never used now except in the solemn style, nominative plural: O ye boys of America, beware of

the cheap story-papers, and the cheap and nasty story-books, for they carry the seeds of a disease that kill soul and body.

It is a remarkable fact that many of our obsolete expressions are retained for the solemn style. *Thou, thy, thee* are now used in prayer, and in solemn compositions, such as Coleridge's Hymn to Mont Blanc, or Milton's Paradise Lost.

59. The words *self* and *selves* are sometimes added to the personal Pronouns; as *myself, thyself, himself;* but, as these compounded words are liable to no variations that can possibly lead to error, it will be useless to do any thing further than just to notice them.

60. The Pronoun *it*, though a *personal* Pronoun, does not always stand for, or at least appear to stand for, any *noun* whatever; but is used in order to point out *a state of things*, or the *cause* of something produced. For instance: "*It* freezed hard last night, and *it* was so cold, that *it* was with great difficulty the travellers kept on their journey." Now, *what* was it that freezed so hard? Not the *frost;* because the frost is the effect, and not the cause of freezing. We cannot say that it was the *weather* that freezed; because the freezing constituted in part the weather itself. No; the Pronoun *it* stands, in this place, for *state of things*, or *circumstances;* and this sentence might be written thus: "The freezing was so hard last night, and the cold was so severe, that the travellers found great difficulty in keeping on their journey." Let us take another example or two: "*It* is a frost this morning. *It* will rain to-night. *It* will be fine to-morrow." That is to say, "A state of things called frost exists this morning; a state of things called rain will exist to-night; and to-morrow a state of things called fine weather." Another example: "*It* is delightful to see brothers and sisters living in uninterrupted love to the end of their days." That is to say, "The state of things which exhibits brothers and sisters living in uninterrupted love to the end of their days is delightful to see." The Pronoun

it is, in this its impersonal capacity, used in a great variety of instances; but I forbear to extend my remarks on the subject here; because those remarks will find a more suitable place when I come to another part of my instructions. I have said enough here to prevent the puzzling that might have arisen from your perceiving that the Pronoun *it* was sometimes used without your being able to trace its connection with any noun either expressed or understood

61. In order, however, further to illustrate this matter in this place, I will make a remark or two upon the use of the word *there*. Example: "*There are* many men, who have been at Latin schools for years, and who, at last, cannot write six sentences in English correctly," Now, you know, the word *there*, in its usual sense, has reference to *place*; yet it has no such reference here. The meaning is that "Many men *are in existence* who have been at Latin schools." Again: "*There never was* any thing so beautiful as that flower." That is to say, "Any thing so beautiful as that flower *never existed*, or never *was in being*."

It may, perhaps, be useful for you to know (especially if you intend to pass an examination) that the word *there* in the sentences here given is called an *expletive*, which means a word used merely to fill up a vacancy. You can always leave it out without altering the sense. "There is a tree in the garden" is nothing but "a tree is in the garden." And you will now, perhaps, be better able to understand Pope's satirical lines on the works of poor authors:

> "While *expletives* their feeble aid do join,
> And ten slow words oft creep in one dull line."

62. We now come to the RELATIVE PRONOUNS, of which class there are only *three*; namely, *Who*, *Which*, and *That*. The two latter always remain the same, through all numbers, genders, and cases; but the Pronoun *who* changes its endings in order to express the possessive and objective cases; as, *who*, *whose*, *whom*.

63. These Pronouns are called *relative*, because they always *relate* directly to some noun or some personal Pronoun, or to some combination of words, which is called the *antecedent;* that is to say, the person or thing *going before.* Thus: "The *soldier who* was killed at the siege." *Soldier* is the antecedent. Again: "The men, if I am rightly informed, *who* came hither last night, *who* went away this morning, *whose* money you have received, and to *whom* you gave a receipt, are natives of South America." *Men* is here the *antecedent;* and in this sentence there are all the variations to which this Pronoun is liable.

64. *Who*, *whose*, and *whom* cannot be used correctly as relatives to any Nouns or Pronouns which do not represent *men*, *women*, or *children.* It is not correct to say, the horse, or the dog, or the tree, *who* was so and so; or to whom was done this or that; or whose color, or any thing else, was such or such. But the word *That*, as a relative Pronoun, may be applied to nouns of all sorts; as, the *boy that* ran; the *horse that* galloped; the *tree that* was blowed down.

The real reason for this use of the word *that*, however, is because we must sometimes find a pronoun that will stand for both *men and animals* together: "The horses and the riders *that* we saw are the favorites." And concerning the pronoun *who*, a change has taken place since Cobbett's time: we can now use it in the possessive case (whose) with reference to things as well as persons. "The mountain whose top is covered with snow," is considered easier and more elegant than "The mountain the top of which is covered with snow." The poets began to use this form, and prose-writers now use it too. By-the-way, you will notice that Cobbett is a little peculiar in using some irregular verbs in the regular form; as, *blowed* and *froze* for *blown* and *froze.* More of this farther on.

65. *Which*, as a relative Pronoun, is confined to irrational creatures, and here it may be used as a relative indifferently with *that;* as, the *horse which* galloped; the

tree which was blowed down. This application of the relative *which* solely to irrational creatures is, however, of modern date; for, in the Lord's Prayer, in the English Church Service, we say, "Our Father *which* art in heaven." In the American Liturgy this error has been corrected; and they say, "Our Father *who* art in heaven."

66. I cannot, even for the present, quit these relative Pronouns without observing to you that they are words of vast importance, and that more errors, and errors of greater consequence, arise from a misapplication of them than from the misapplication of almost all the other classes of words put together. The reason is this, they are *relatives*, and they frequently stand as the representatives of that which has gone before, and which stands in a distant part of the sentence. This will be more fully explained when I come to the *Syntax* of Pronouns; but the matter is of such great moment that I could not refrain from giving you an intimation of it here.

67. The DEMONSTRATIVE PRONOUNS are so called because they more particularly mark or demonstrate the nouns before which they are placed, or for which they sometimes stand. They are, *This*, *These*, *That*, *Those*, and *What*. The use of them is so well known, and is liable to so little error, that my chief object in giving them this separate place is to show you the difference between *That*, when a *relative*, and when *not a relative*. Take an example: "*That* man is not the man, as far as I am able to discover, *that* came hither last night." The first of these *Thats* does not *relate* to the man; it merely points him out; but the latter *relates* to him, carries you back to him, and supplies the place of repetition. This same word, *That*, is sometimes a *Conjunction;* as, "*That* man is not the man, as far as I can discover, *that* came hither last night, and *that* was so ill *that* he could hardly walk." The relative is repeated in the third *That;* but

the fourth *That* is merely a conjunction serving to *connect* the effect of the illness with the cause.

"I say that that *that* that that author uses is false." Try and discover the four different parts of speech represented by the word *that* in this sentence.—*This*, *that*, and their plural, *these*, *those*, are, like the articles, called limiting adjectives when used directly before nouns: *this* hat, *these* hats. When used with reference to things pointed at, *these* refers to things nearer at hand than *those*.

68. Perhaps a profound examination of the matter would lead to a proof of *That* being always a Pronoun; but, as such examination would be more curious than useful, I shall content myself with having clearly shown you the difference in its offices, as a *relative*, as a *demonstrative*, and as a *conjunction*.

69. *What*, together with *who*, *whose*, *whom*, and *which*, are employed in *asking questions*; and are sometimes ranged under a separate head, and called *Interrogative* Pronouns. I have thought this unnecessary; but here is an observation of importance to attend to; for *which*, though as a *relative* it cannot be applied to the intellectual species, is, as an interrogative, properly applied to that species; as, "*Which* man was it who spoke to you?"

70. *What* sometimes stands for both noun and relative Pronoun; as, "*What* I want is well known." That is to say, "*The thing which* I want is well known." Indeed, *what* has, in all cases, this extended signification; for when, in the way of inquiry as to words which we have not clearly understood, we say, *What?* our full meaning is, "Repeat to us *that which* you have said," or, "the *words which* you have spoken."

In this sentence, "I gave him *what* (that which) he wanted," *what* is a relative pronoun; but in this sentence, "I gave him *what* funds he wanted," it is an adjective. Notice that we always say *that*, never *what*, after *every thing*, *any thing*, *nothing*, *something*, *all things*.

71. The INDETERMINATE PRONOUNS are so called

because they express their objects in a general and indeterminate manner. Several of them are also *adjectives*. It is only where they are employed alone, that is to say, without nouns, that they ought to be regarded as Pronouns. For instance: "*One* is always hearing of the unhappiness of *one* person or *another*." The first of these *ones* is a Pronoun; the last is an Adjective, as is also the word *another*; for a noun is *understood* to follow, though it is not expressed. These pronouns are as follows: *One*, *any*, *each*, *none*, *some*, *other*, *every*, *either*, *many*, *whoever*, *whatever*, *neither*, and some few others, but all of them words invariable in their orthography, and all of very common use.

LETTER VII.

ETYMOLOGY OF ADJECTIVES.

MY DEAR JAMES:

72. In Letter III, paragraph 21, I have described what an *Adjective* is. You will, therefore, now read that paragraph carefully over, before we proceed in studying the contents of the present Letter.

73. The Adjectives have no changes to express gender or case; but they have changes to express *degrees of comparison*. As Adjectives describe the qualities and properties of nouns, and as these may be possessed in a degree higher in one case than in another case, such words have degrees of comparison; that is to say, changes in their endings, to suit these varying circumstances. A tree may be *high*, but another may be *higher*, and a third may be the *highest*. Adjectives have, then, these three degrees: the first degree, or rather, the primitive word, called the *Positive*; the second, the *Comparative*; the third, the *Superlative*. For the forming of these degrees I shall

give you *four rules;* and if you pay strict attention to these rules, you will need to be told very little more about this Part of Speech.

74. *First Rule.* Adjectives in general, which end in a consonant, form their comparative degree by adding *er* to the positive, and form their superlative degree by adding *est* to the positive; as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Rich,	Richer,	Richest.

75. *Second Rule.* Adjectives, which end in *e*, add, in forming their comparative, only an *r*, and in forming their superlative, *st;* as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Wise,	Wiser,	Wisest.

76. *Third Rule.* When the positive ends in *d*, *g*, or *t*, and when these consonants are, at the same time, preceded by a *single vowel*, the consonant is doubled in forming the comparative and superlative; as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Red,	Redder,	Reddest.
Big,	Bigger,	Biggest.
Hot,	Hotter,	Hottest.

But, if the *d*, *g*, or *t*, be preceded by another consonant, or by more than one vowel, the final consonant is not doubled in the forming of the two latter degrees; as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Kind,	Kinder,	Kindest.
Neat,	Neater,	Neatest.

77. *Fourth Rule.* When the positive ends in *y*, preceded by a consonant, the *y* changes into *ie* in the other degrees.

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Lovely,	Lovelier,	Loveliest.
Pretty,	Prettier,	Prettiest.

78. There are some Adjectives which can be reduced to no rule, and which must be considered as irregular; as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Good,	Better,	Best.
Bad,	Worse,	Worst.
Little,	Less,	Least.
Much,	More,	Most.

79. Some Adjectives can have no degrees of comparison, because their signification admits of no augmentation; as, *all, each, every, any, several, some;* and all the numerical Adjectives; as, *one, two, three; first, second, third.*

But there are some other adjectives that do not admit of comparison. Consider, for a moment, such words as *true, round, square, perfect, dead.* Properly speaking, nothing can be truer, rounder, squarer, more perfect, or deader than another; yet, in popular speech, these words are often used in the comparative or superlative degree. How often we hear people say, "I never saw any thing more perfect;" "this figure is not quite so round as that;" and the like. I do not mean to say that such expressions are absolutely unpermissible; only that they are not strictly correct. To say "more nearly round" or "more nearly perfect" would be more nearly correct. These expressions, however, occur in the rapid flow of conversation, and perhaps express the idea intended better than a more correct (notice these very words) or more choice expression. Editors sometimes speak of a political question as "the deadest of all dead issues;" which is very forcible language; and there is a comparison implied in the familiar expressions, "dead as a door-nail; dead as Julius Caesar."— I may here mention that the word *old*, in its regular form, *old, older, oldest*, is used with reference to persons and things in general; while the form, *elder, eldest*, is used to distinguish kinsfolk or historical personages: my elder brother or nephew, my eldest sister or cousin; the elder Pliny, the elder Brutus, the elder or younger Pitt.

Far, farther, farthest are used exclusively with reference to *distance;* but we sometimes use the form *further*, to indicate *something more*, or to point out that we have *something more* to say on a subject. The latter form is also sometimes used as an adjective; have you any *further* objection?

80. Adjectives which end in *most* are superlative, and admit of no change; as, *utmost*, *uppermost*, *innermost*.

81. However, you will observe that all Adjectives which admit of comparison may form their degrees by the use of the words *more* and *most;* as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Rich,	More rich,	Most rich.
Tender,	More tender,	Most tender.

When the positive contains but *one syllable*, the degrees are usually formed by adding to the positive according to the four rules. When the positive contains *two syllables*, it is a matter of taste which method you shall use in forming the degrees. The *ear* is, in this case, the best guide. But when the positive contains *more than two* syllables, the degrees must be formed by the use of *more* and *most*. We may say *tender* and *tenderest*, *pleasanter* and *pleasantest*, *prettier* and *prettiest;* but who could tolerate *delicater* and *delicatest?*

Nobody but Thomas Carlyle, who uses *beautifulest*, *wonderfulest*, and the like. To use another of Carlyle's Germanisms, there is no question but this usage is *unright*.

LETTER VIII.

ETYMOLOGY OF VERBS.

My dear James:

82. The first thing you have to do in beginning your study, as to this important Part of Speech, is to read again very slowly and carefully paragraphs 23, 24, 25, and 26, in Letter III. Having, by well attending to what is said in those paragraphs, learned to distinguish *Verbs* from the words belonging to other Parts of Speech, you will now enter, with a clear head, on an inquiry into the

variations to which the words of this Part of Speech are liable.

83. Sorts of Verbs. Verbs are considered as *active*, *passive*, or *neuter*. A Verb is called active when it expresses an action which is produced by the nominative of the sentence; as, "Pitt *restrained* the Bank." It is passive when it expresses an action which is received, or endured, by the person or thing which is the nominative of the sentence; as, "the Bank *is restrained*." It is neuter when it expresses simply the state of being, or of existence, of a person or thing; as, "Dick *lies* in bed;" or, when it expresses an action *confined within the actor*.

84. It is of great consequence that you clearly understand these distinctions, because I shall, by-and-by, use these terms very frequently. And in order to give you a proof of the necessity of attending to these distinctions, I will here give you a specimen of the errors which are sometimes committed by those who do not understand Grammar. This last-mentioned Verb, *to lie*, becomes, in the past time, *lay*. Thus: "Dick *lies* on a bed now, but some time ago, he *lay* on the floor." This verb is often confounded with the Verb *to lay*, which is an active *Verb*, and which becomes, in its past time, *laid*. Thus: "I *lay* my hat on the table to-day, but, yesterday, I *laid* it on the shelf." Let us take another instance, in order the more clearly to explain this matter. A Verb may sometimes be what we call a *neuter* Verb, though it expresses an *action*; but this happens when the action is *confined within the actor*; that is to say, when there is no object *to which the action passes*. *Strike* is clearly an active Verb, because something is *stricken*; a stroke is *given to*, or *put upon*, something. But in the case of *to rise*, though there is an *action*, it passes on to no object; as, *I rise early*. Here is no object to which the action passes. But *to raise* is an active Verb, because the action passes on to an object; as, I *raise a stick*, I *raise my hand*, I *raise*

Cobbett makes his mistake: he calls the verb *to rise* neuter, while it is nothing of the sort; it is simply intransitive, and active. The most recent classification of verbs is into *active-transitive*, *active-intransitive*, and *neuter*. He *kicks* the pony; he *rises;* he *lives*. Cobbett, no doubt, followed the grammarians and dictionary-makers of his time.

85. Having thus given you the means of distinguishing the *sorts* of Verbs, I now proceed to matters which are common to all the sorts. There are four things to be considered in a verb; the *person*, the *number*, the *time*, and the *mode*.

86. The Person.—Read again Letter VI, on the Etymology of Pronouns. You will there clearly see the use of this distinction about *Persons;* and, as I have told you, you will find that it is a matter of great consequence; because it will now, at once, be evident to you that, unless the distinction of person be attended to, almost every sentence must be erroneous.

87. The Verb must *agree* in *person* with the *Noun* or the *Pronoun* which is the nominative of the sentence. Look back at Letter V, and at paragraphs 44, 45, 46, and 47, in order to refresh your memory as to the *nominative* and other cases. The Verb, then, must *agree* with the nominative; as, "I *write;* he *writes*." To say, "I *writes;* he *write;*" these would be both erroneous.

88. Look back at the explanation about the *persons* in the Etymology of Pronouns in Letter VI. There are *three persons;* but our Verbs have no variation in their spelling, except for *the third person singular*. For we say, "I *write*, you *write*, we *write*, they *write;*" and only "he, she, or it *writes*." This, then, is a very plain matter.

89. Number is a matter equally plain, seeing that our Verbs do not, except in one or two instances, vary their endings, to express number. But when several nouns or pronouns come together, care must be taken to make the Verb *agree* with them; as, "Knight and Johnstone *resist*

the tyrants." Not *resists*. But this will be more fully dwelt on in the Syntax.

90. THE TIME.—The Verb has variations to express the *time* of an action; as, "Sidmouth *writes* a Circular Letter; Sidmouth *wrote* a Circular Letter; Sidmouth *will write* a Circular Letter." Again: "The Queen *defies* the tyrants; the Queen *defied* the tyrants; the Queen *will defy* the tyrants." The *Times* of a Verb are, therefore, called the *present*, the *past*, and the *future*.

91. THE MODES.—The *Modes* of Verbs are the *different manners* of expressing an action or a state of being, which manners are sometimes *positive*, sometimes *conditional*, and sometimes *indeterminate;* and there are *changes* or *variations*, in the spelling, or writing, of the Verb, or of the little words used with the Verb, in order to express this difference in *manner* and sense. I will give you an instance: "He *walks* fast." "If he *walk* fast, he will fatigue himself." In most other languages the Verb changes its form very often and very much to make it express the different modes. In ours it does not; because we have little words called *signs*, which we use with the Verbs instead of varying the form of the Verbs themselves. To make this matter clear, I will give you an example of the English compared with the French language in this respect.

E.	F.
I march,	*Je marche.*
I marched,	*Je marchais.*
I might march,	*Je marchasse.*
I should march,	*Je marcherais.*

There are other variations in the French Verb; but we effect the purposes of these variations by the use of the signs, *shall*, *may*, *might*, *could*, *would*, and others.

92. The Modes are four in number; the *Infinitive*, the *Indicative*, the *Subjunctive*, and the *Imperative*. Besides

these, there are the two *Participles*, of which I shall speak presently.

93. The *Infinitive Mode* is the Verb in its primitive state; as, *to march*. And this is called the *Infinitive* because it is without bounds or limit. It merely expresses the action of marching, without any constraint as to person or number or time. The little word *to* makes, in fact, a *part of the Verb*. This word *to* is, of itself, a *preposition;* but, as prefixed to Verbs, it is merely a *sign* of the Infinitive Mode. In other languages there is no such sign. In the French, for instance, *aller* means *to go;* *écrire* means *to write*. Thus, then, you will bear in mind that in English, the *to* makes a part of the Verb itself, when in the *Infinitive Mode*.

94. The *Indicative Mode* is that in which we express an action, or state of being, positively; that is to say, without any *condition*, or any dependent circumstance. It merely *indicates* the action or state of being, *without being subjoined* to anything which renders the action or state of being dependent on any other action or state of being. Thus: "*He writes.*" This is the Indicative.

95. But the *Subjunctive Mode* comes into use when I say, "If he *write*, the guilty tyrants will be ready with their dungeons and axes." In this case there is something *subjoined;* and therefore this is called the *Subjunctive Mode*. Observe, however, that in our language there is no very great use in this distinction of modes; because, for the most part, our little *signs* do the business, and they never vary in the letters of which they are composed. The distinction is useful only as regards the employment of Verbs without the *signs*, and where the signs are left to be understood; as in the above case, "If he (*should*) *write*, the guilty tyrants will be ready." And observe, further, that when the *signs* are used, or understood, the Verb retains its original or primitive form throughout all the persons, numbers, and times.

96. The *Imperative Mode* is mentioned here merely for form's sake. It is that state of the Verb which *commands, orders, bids, calls to*, or *invokes;* as, *come* hither; *be* good; *march* away; *pay* me. In other languages there are changes in the spelling of the Verbs to answer to this mode; but in ours there are none of these; and therefore the matter is hardly worth notice, except as a mere matter of form.

97. The *Participles*, however, are different in point of importance. They are of two sorts, the *active* and the *passive*. The former ends always in *ing*, and the latter is generally the same as the *past time* of the Verb out of which it grows. Thus: *working* is an active participle, and *worked* a passive participle. They are called participles because they *partake* of the qualities of other Parts of Speech as well as of Verbs. For instance: "I am *working; working* is laudable; a *working* man is more worthy of honor than a titled plunderer who lives in idleness." In the first instance, *working* is a Verb, in the second a *Noun*, in the third an *Adjective*. So in the case of the passive participle: I *worked* yesterday; that is *worked* mortar. The first is a Verb, the last an Adjective.

After the indicative, grammarians now insert another mood, called the *potential* mood, which indicates power, permission, possibility, necessity, determination, duty. This mood Cobbett runs into the subjunctive, after the manner of the French. It is that form which necessitates one of "those powerful little words," as he calls them, *may, might, can, must, will, shall, should, would.* This matter of mood, which is quite a difficult subject for beginners, became much clearer to me when I saw how the Germans termed their moods in their expressive language. They call the infinitive mood the *ground-form;* the indicative the *reality-form;* the potential the *possibility-form;* the subjunctive, the *doubt-form;* and the imperative the *commanding-form.* Like the *who-case*, the *whose-case*, and the *whom-case*, these words are far more expressive than the Latin terms we use, which ought to have been left where they belonged, in Latin.

You will perhaps be surprised to see *will* and *shall, would* and

should, set down as belonging to the potential mood. You will say they belong to the future and the conditional. So they do; but they belong to the potential, too, as I shall show you by-and-by. Take these two examples of the difference between the future and the potential: "I shall write (future) to you, if I can. I *will write* (potential) to you, come what may. You *will do* (future) that to-morrow. You *shall do* (potential) as I tell you." This is one of the most difficult matters in English grammar; a matter which, Cobbett says, foreigners never learn rightly, but which natives learn to use rightly from infancy, and do so without ever thinking of the matter. Extensive reading of good authors and extensive intercourse with good speakers are among the best means of learning the correct use of these words. I have read of a Frenchman who, on falling into the river, exclaimed: "I *will* drown, and nobody *shall* help me!" More of this anon. (Note to paragraph 258.)

98. Thus have I gone through all the circumstances of change to which Verbs are liable. I will now give you the complete *conjugation* of a Verb. To *conjugate*, in its usual acceptation, means to *join together*; and, as used by grammarians, it means to place under one view all the *variations* in the form of a Verb; beginning with the Infinitive Mode and ending with the Participle. I will now lay before you, then, the *conjugation* of the Verb *to work*, exhibiting that Verb in all its persons, numbers, times, and modes.

INFINITIVE MODE.

To Work.

INDICATIVE MODE.

	Singular.	*Plural.*
Present Time.	1st Person. I work,	We work.
	2d Person. Thou workest,	You work.
	3d Person. He, she, or it works.	They work.
Past Time.	—I worked,	We worked.
	—Thou workedst,	You worked.
	—He worked,	They worked.
Future Time.	—I shall or will work,	We shall or will work.
	—Thou shalt or wilt work,	You shall or will work.
	—He shall or will work,	They shall or will work.

SUBJUNCTIVE MODE.

If I work, or may, might, could, would, or should work.
If thou work, or may " " " work.
If he, she, or it work, or may " " " work.
If we work, or may " " " work.
If you work, or may " " " work.
If they work, or may " " " work.

IMPERATIVE MODE.

Let me work,	Let us work.
Work thou,	Work you.
Let him work,	Let them work.

PARTICIPLES.

Active.—Working.
Passive.—Worked.

99. Some explanatory remarks are necessary here. The third person singular of the Indicative present used to be written with *eth;* as, *worketh;* but this spelling has long been disused. The *past time* may be formed by *did;* as, *did work*, instead of *worked;* and *do work* may be used in the present time; but, in fact, these little words are a great deal more than mere marks of the *times*. They are used in one time to express the negative of another, or to affirm with more than ordinary emphasis.

100. Grammarians generally make a present and a past time under the Subjunctive Mode; but the truth is that any of the *signs* may apply to the present, past, or future of that mode. These are little words of vast import and of constant use; and though that use is so very difficult to be learned by foreigners, we ourselves never make mistakes with regard to it. The Verb *to be* alone changes its form in order to make a past time in the Subjunctive Mode.

101. As to the *Imperative Mode*, where the pronouns *thou* and *you* are put after the Verb, we seldom put the *thou* and the *you*. We make use of the Verb only, which is quite sufficient.

102. Some grammarians put in their conjugations what they call the *compound times;* as, I *have worked*, I *had worked*, I *shall have worked*, I *may have worked*, and so on. But this can only serve to fill up a book; for all these consist merely in the introduction and use of the Verb *to have* in its various parts. In the above conjugation all the *changes* or *variations* of the Verb are exhibited; and it is those changes and variations which, under the present head, form the important object of our inquiry.

Well, at the risk of incurring the reproach of merely "filling up a book," or, as the reviewers call it, "padding a book," I shall give you this one verb entire, in its present form, with its present names for moods and tenses. Do not be afraid; it will not confuse you, if you will only be patient. There are about six or seven thousand verbs in our language, and they are all, except in the past tense and past participle, conjugated like this. It is in these last two parts that the irregular verbs vary. You cannot utter a single sentence, however short, without a verb; so, surely, you ought to see this important part of speech from head to foot. Besides, I believe that our present form of laying out the verb is simpler than it was in Cobbett's time, for the tenses are so arranged that they are more easily remembered. (See next page.)

You will notice that the compound forms are, as Cobbett says, nothing but the past participle, *worked*, and the various forms of the verb *to have*. But the *seeing* it will help you to *remember* it. As to the tenses, consider for a moment how many kinds of time there are in nature. What is the time called in which you now are? What time is that you had yesterday? What time is to-morrow? Well, there are three kinds, *present*, *past*, and *future;* and in grammar you may say there are really only *three* tenses, with a *tail* to each of them, a *perfect* tail; and this perfect tail is the compound form of the verb. It is nothing but present, present-*perfect;* past, past-*perfect;* future, future-*perfect*. As to the using of them, you will learn that when we come to the Syntax. Then you will notice that there are five moods, just as there are five continents, five oceans, five races of men, and five zones. Notice that the subjunctive has no changes whatever in its endings. This mood, of which common people and common writers know nothing, and which, some writers think, will finally disappear altogether, is

Complete conjugation of the active verb To Work.

INFINITIVE MOOD.

Present tense—To work. *Present perfect tense*—To have worked.

INDICATIVE MOOD.

SIMPLE TENSES.	COMPOUND TENSES.
Present tense.	*Present perfect tense.*
I worked,	I have worked.
Thou workest,	Thou hast worked.
He works,	He has worked.
We work,	We have worked.
You work,	You have worked.
They work,	They have worked.
Past tense.	*Past perfect tense.*
I work,	I had worked.
Thou workedst,	Thou hadst worked.
He worked,	He had worked.
We worked,	We had worked.
You worked,	You had worked.
They worked,	They had worked.
Future tense.	*Future perfect tense.*
I shall work,	I shall have worked.
Thou wilt work,	Thou wilt have worked.
He will work,	He will have worked.
We shall work,	We shall have worked.
You will work,	You will have worked.
They will work,	They will have worked.
Present tense conditional.	*Perfect tense conditional.*
I should work,	I should have worked.
Thou wouldst work,	Thou wouldst have worked.
He would work,	He would have worked.
We should work,	We should have worked.
You would work,	You would have worked.
They would work,	They would have worked.

POTENTIAL MOOD.

Present tense.	*Present perfect tense.*
I may, can, will work,	I may, can, will have worked.
Thou mayst, canst, shalt work,	Thou mayst, canst, shalt have worked.
He may, can, shall work,	He may, can, shall have worked.
We may, can, shall work,	We may, can, shall have worked.
You may, can, shall work,	You may, can, shall have worked.
They may, can, shall work,	They may, can, shall have worked.
Past tense.	*Past perfect tense.*
I might, could, should work,	I might, could, should have worked.
Thou mightst, couldst, shouldst work,	Thou mightst, couldst, shouldst have worked.
He might could, should work,	He might, could, should have worked.
We might, could, should work,	We might, could, should have worked.
You might, could, should work,	You might, could, should have worked.
They might, could, should work,	They might, could, should have worked.

SUBJUNCTIVE MOOD.

Present tense.	*Present perfect tense.*
If I work,	If I have worked.
thou work,	thou have worked.
he work,	he have worked.
we work,	we have worked.
you work,	you have worked.
they work,	they have worked.
Past tense.	*Past perfect tense.*
If I worked,	If I had worked.
thou worked,	thou had worked.
he worked,	he had worked.
we worked,	we had worked.
you worked,	you had worked.
they worked,	they had worked.

IMPERATIVE MOOD.

Work! Work thou!

PARTICIPLES.

Present participle.	*Past participle.*	*Present perfect* (participial form).
Working.	Worked.	Having worked.

used to mark a certain uncertainty or contingency which the indicative cannot well mark, and is used not only after *if*, but after *though*, *although*, *lest*, *unless*, *provided that*, and various other expressions indicating uncertainty. The only verb in our whole language which makes a complete change in the subjunctive is the verb *to be*, and that becomes if I *be*, if I *were*. Cobbett follows the conjugation of the French verb in using the verb *let* in the imperative. "Let me work" is not the imperative of the verb *to work*, but the imperative of the verb *to let;* as is the case with everything that follows *let;* let me eat, let me drink, let me be. No English verb needs more than the one word in the imperative, for the subject or pronoun *you* is generally unexpressed, or left understood. It is sometimes used for emphasis or contrast; as, "Work *you!* *I* shall not work." As to those two great stumbling-blocks of many persons, *shall* and *will*, *should* and *would*, all you have to do here is to notice that, in the future and conditional tenses, *shall* and *should* are GENERALLY used in the first person singular and plural—that is, after *I* and *we*—and that *will* and *would* are GENERALLY used in the other persons.

103. The Verbs *to have* and *to be* are of great use in our language. They are called *auxiliary verbs*. *To let* and *to do* are also called *auxiliaries*, but they are of far less importance than *to have* and *to be*. Before, however, I say more on the subject of these auxiliaries, I must speak of all the Verbs as *regular* or *irregular*, just observing here that the word *auxiliary* means *helper*, or *helping*.

104. Verbs are called *regular* when they have their changes or variations according to a certain *rule* or manner. Thus: "I *walk*, I *walked;* I *work*, I *worked*." But I cannot say, "I *writed*." I must say, "I *wrote*." Now observe that we call *regular Verbs* all those which end their *past time* of the *Indicative* and their *passive participle* in *ed;* and if you now look back at the conjugation of the Verb *to work*, you will find that it is a regular Verb. Indeed this is the case with almost all Verbs. But there are some little *irregularities* even here, and they must be very well attended to, because a want of attention to them leads to very great errors even as to spelling.

105. These little irregularities I shall notice under five separate heads; and if you should forget, at any time, what has been said on the subject, a reference to these will in a moment set you right.—I. The Verb *to work* is *perfectly* regular, for it has *ed* added to it in order to form the *past time*, and also in order to form the *passive participle*. It is the same with the Verbs *to walk*, *to turn*, *to abandon*, and many others. But if the *Infinitive*, that is to say, the primitive or original word, end in *e*, then *d* only is added in the past time and participle, and *st* instead of *est* after *thou*; as in the case of *to move*, which becomes *moved* and *movest*. You have seen, also, in the case of the Verb *to work*, that we add only an *s* to form the third person singular of the present of the Indicative; *he works*. But if the Infinitive end in *h*, *s*, *x*, or *z*, then *es* must be added; as, *to wish*, *he wishes*; *to toss*, *he tosses*; *to box*, *he boxes*; *to buzz*, *he buzzes*.—II. When the Infinitive ends in *y*, and when that *y* has a *consonant immediately before it*, the *y* is changed into *ie*, to form the third person singular of the present of the Indicative; as *to reply*, *he replies*. But (and I beg you to mark it well) if the ending *y* have *a vowel immediately before it*, the Verb follows the general rule in the formation of the third person singular of the present of the Indicative; as *to delay*, *he delays*; and not *he delaies*. It is the same in the second person singular; as, *to reply*, *thou repliest*, *to delay*, *thou delayest*.—III. When the Infinitive ends in *y* with a consonant immediately before it, the past time of the Indicative and the passive participle are formed by using an *i* instead of the *y*; as, *to reply*, *he replied*; *to deny*, *it was denied*. But if the *y* be preceded by a vowel, *ed* is added to the *y* in the usual manner; as, *to delay*, *he delayed*.—IV. The *active participle*, which always ends in *ing*, is in general formed by simply adding the *ing* to the Infinitive; as, *to work*, *working*; *to talk*, *talking*. But if the Infinitive end in a single *e*, the *e* is

dropped; as, *to move, moving.* The Verb *to be* is an exception to this; but then that is an *irregular* Verb. It is

Say silent *e*, and the rule will hold good throughout. The *e* is not silent in *be*, and is therefore not dropped in *being*. It is never retained, even where one part of speech is converted into another, except where the omission of it might cause a doubtful pronunciation; as, peace, peaceable; change, changeable.

when the Infinitive ends in a *single e*, mind; for if the *e* be double, the general rule is followed; as, *to free, freeing.* When the infinitive ends in *ie*, those letters are changed into *y* in the forming of the active participle; as, *to lie, lying.*—V. When the Infinitive ends in a *single consonant*, which has a *single vowel immediately before it*, the final consonant is doubled, not only in forming the active participle, but also in forming the past time of the Indicative, and the passive participle; as, *to rap, rapping;* I *rapped*, it was *rapped.* But, observe well, this rule holds good only as to words of *one syllable;* for if the Infinitive of the Verb have more than one syllable, the consonant is not doubled *unless the accent be on the last syllable;* and the accent means the main force, weight, or sound of the voice in pronouncing the word. For instance, in the word *to open*, the accent is on the *first* syllable; and therefore we write, *opening, opened.* But when we come to the Verb *to refer*, where we find the accent on the last syllable, we write, *referring, referred.*

It is, perhaps, worth while noticing that these are principles that apply not only to the verbs, but to various other parts of speech; in fact, principles that run through the whole language. Just as, with nouns, the word ending in *y* preceded by a consonant changes the *y* into *ie* (lady, ladies), but does not change the *y* if preceded by a vowel (valley, valleys); so with verbs, I carry, he carries; I obey, he obeys; so with adjectives, happy, happier; gay, gayer. And as we have seen that adjectives of one syllable, ending in a consonant preceded by a single vowel double the consonant in the comparative and superlative degrees (hot, hotter, hottest), but do not do so if preceded by a double vowel or by none at all (neat, neater; rich, richer), so it is with verbs, of similar ending, in the

past tense and in the participles, rap, rapped, rapping; cheat, cheated, cheating; work, worked, working. It is something that is demanded by the pronunciation of the words; for if we did not double the final consonant in words of this kind, we should have to say *hō'ter* instead of *hot'ter*, *rā'ping* instead of *rap'ping*. And this reminds me to say that it is of the utmost importance for you to study and understand the marking and accentuation of words in the dictionary; for if you wish to pronounce the English language correctly, you will find it necessary to consult the dictionary very frequently. The most learned Englishman or American that lives, or has ever lived—not excepting Doctor Johnson or Noah Webster himself—is, or has been, constantly obliged to consult the dictionary for the correct pronunciation of English words.

How different, in this respect, is the German language! In that language there is but one single word irregularly pronounced; le-ben'-dig, instead of le'-ben-dig, like le'ben. And as to the meaning, every German word explains itself; so that no German boy or man need ever look into a dictionary to find out the meaning or the pronunciation of a word in his language. Every word in that language is spelled, too, as it is pronounced. But the grammatical construction of the language is far more difficult than ours. Mr. White confesses that, in order to learn German, the *grammar* of the language must be studied. I will go so far as to say, that an Englishman or American who studies the grammar of that language thoroughly well, will never need much further study of the grammar of his mother-tongue.

106. These irregularities, though very necessary to be attended to, do not prevent us from considering the Verbs which are subject to them as *regular Verbs*. The mark of a regular Verb is that its *past time* and *passive participle* end in *ed*; every Verb which does not answer to this mark is *irregular*.

107. There are many of these *irregular Verbs*, of which I shall here insert a complete list. All the irregularities (except the little irregularities just mentioned) which it is possible to find in an English Verb (the *auxiliary Verbs* excepted) are in the *past time* and the *passive participle* only. Therefore, it will be sufficient to give a list, showing, in those two instances, what are the irregularities of each Verb; and, in order to render this list

INFINITIVE.	PAST TIME.	PARTICIPLES.
to meet,	I met,	I have met.
to overcome,	I overcame,	" overcome.
to overdo,	I overdid,	" overdone.
to pay,	I paid,	" paid.
to put,	I put,	" put.
to read,	I read,	" read.
to rend,	I rent,	" rent.
to ride,	I rode,	" ridden.
to ring,	I rang,	" rung.
to rise,	I rose,	" risen.
to run,	I ran,	" run.
to say,	I said,	" said.
to see,	I saw,	" seen.
to seek,	I sought,	" sought.
to sell,	I sold,	" sold.
to send,	I sent,	" sent.
to set,	I set,	" set.
to shake,	I shook,	" shaken.
to shear,	I sheared,	" shorn.
to shed,	I shed,	" shed.
to show,	I showed,	" shown.
to shrink,	I shrank,	" shrunk.
to shoe,	I shod,	" shod.
to shoot,	I shot,	" shot.
to shut,	I shut,	" shut.
to sing,	I sang,	" sung.
to sink,	I sank,	" sunk.
to sit,	I sat,	" sat.
to slay,	I slew,	" slain.
to sleep,	I slept,	" slept.
to slide,	I slid,	" slidden.
to slit,	I slit,	" slit.
to smite,	I smote,	" smitten.
to speak,	I spoke,	" spoken.
to speed,	I sped,	" sped.

INFINITIVE.	PAST TIME.	PARTICIPLES.
to spend,	I spent,	I have spent.
to spin,	I span,	" spun.
to spit,	I spat,	" spat.
to spread,	I spread,	" spread.
to stand,	I stood,	" stood.
to steal,	I stole,	" stolen.
to stick,	I stuck,	" stuck.

to strike,	I struck,	" stricken.
to swear,	I swore,	" sworn.
to take,	I took,	" taken.
to teach,	I taught,	" taught.
to tear,	I tore,	" torn.
to tell,	I told,	" told.
to think,	I thought,	" thought.
to tread,	I trod,	" trodden.
to understand,	I understood,	" understood.
to wear,	I wore,	" worn.
to win,	I won,	" won.
to wind,	I wound,	" wound.
to write,	I wrote,	" written.

108. It is usual with grammarians to insert several Verbs in their *List of Irregulars* which I have *not* inserted here. But I have, in the above list, placed every Verb in our language which is really irregular. However, I will here subjoin a list of those Verbs which are, by some grammarians, reckoned irregular; and then I will show you, not only that they are not irregular, strictly speaking, but that you ought by all means to use them in a regular form.

LIST OF VERBS WHICH, BY SOME PERSONS, ARE ERRONEOUSLY DEEMED IRREGULARS.

INFINITIVE.	PAST TIME.	PARTICIPLES.
to awake,	I awoke,	I have awaked.
to bereave,	I bereft,	" bereft.
to blow,	I blew,	" blown.
to build,	I built,	" built.
to burn,	I burnt,	" burnt.
to burst,	I burst,	" burst.
to cast,	I cast,	" cast.
to chide,	I chid,	" chidden.
to cling,	I clung,	" clung.
to creep,	I crept,	" crept.
to crow,	I crew,	" crowed.
to curse,	I curst,	" curst.
to dare,	I dared,	" dared.
to deal,	I dealt,	" dealt.
to dig,	I dug,	" dug.
to dip,	I dipt,	" dipt.
to draw,	I drew,	" drawn.
to dream,	I dreamt,	" dreamt.
to dwell,	I dwelt,	" dwelt.
to freeze,	I froze,	" frozen.
to geld,	I gelt,	" gelt.
to gild,	I gilt,	" gilt.
to gird,	I girt,	" girt.
to grow,	I grew,	" grown.
to hang,	I hung,	" hung.
to help,	I helpt,	" helpt.
to hew,	I hewed,	" hewn.
to kneel,	I knelt,	" knelt.
to knit,	I knit,	" knit.
to lade,	I laded,	" laden.
to leap,	I leaped,	" leapt.
to light,	I lit,	" lighted.

INFINITIVE.	PAST TIME.	PARTICIPLES.
to load,	I loaded,	I have loaden or laden.
to mean,	I meant,	I have meant.
to mow,	I mowed,	" mown.
to overflow,	I overflowed,	" overflown.
to saw,	I sawed,	" sawn.
to shave,	I shaved,	" shaven.
to shred,	I shred,	" shred.
to shine,	I shone,	" shone.
to sling,	I slung,	" slung.
to slink,	I slunk,	" slunk.
to slip,	I slipt,	" slipt.
to smell,	I smelt,	" smelt.
to snow,	it snowed,	it has snown.
to sow,	I sowed,	I have sown.
to spell,	I spelt,	" spelt.
to spill,	I spilt,	" spilt.
to split,	I split,	" split.
to spring,	I sprang,	" sprung.
to stamp,	I stampt,	" stampt.
to sting,	I stung,	" stung.
to strew,	I strewed,	" strewn.
to strow,	I strowed,	" strown.
to stride,	I strode,	" stridden.
to string,	I strung,	" strung.
to strip,	I stript,	" stript.
to strive,	I strove,	" striven.
to sweep,	I swept,	" swept.
to swell,	I swelled,	" swollen.
to swim,	I swam,	" swum.
to swing,	I swung,	" swung.
to thrive,	I throve,	" thriven.
to throw,	I threw,	" thrown.
to thrust,	I thrust,	" thrust.
to wax,	I waxed,	" waxen.
to weave,	I wove,	" woven.

INFINITIVE.	PAST TIME.	PARTICIPLES.
to weep,	I wept,	I have wept.
to whip,	I whipt,	" whipt.

103. The greater part of these verbs have become irregular by the bad practice of *abbreviating* or *shortening* in writing. We are always given to cut our words short; and, with very few exceptions, you find people writing *lov'd, mov'd, walk'd;* instead of *loved, moved, walked.* They wish to make the *pen* correspond with the *tongue;* but they ought not then to write the word *the* at full length, nor the word *of*, nor any other little word; for scarcely ever are these words *fully sounded* in speaking. From *lov'd, mov'd, walk'd*, it is very easy to slide into *lovt, movt, walkt.* And this has been the case with regard to *curst, dealt, dwelt, leapt, helpt*, and many others in the last inserted list. It is just as proper to say *jumpt*, as it is to say *leapt;* and just as proper to say *walkt* as either; and thus we might go on, till the orthography of the whole language were changed. When the love of contraction came to operate on such Verbs as *to burst* and *to light*, it found such a clump of consonants already at the end of the words that it could add none. It could not enable the organs even of English speech to pronounce *burst'd, light'd.* It therefore made really short work of it, and, dropping the last syllable altogether, wrote *burst* and *light* in the past time and passive participle. But is it not more harmonious, as well as more correct, to say, "the bubble is almost *bursted*," than it is to say, "The bubble is almost *burst?*" And as to *hang*, is it not better to say *hanged* than *hung?* "I will be *hanged* if I do," is a very common phrase, and is it not better than it would be to say, "I will be *hung* if I do?" Many of these Verbs, by being very difficult to contract, have, as in the case of *to hang, to swing*, and the like, reduced the shorteners to the necessity of changing almost all the letters of the

words; as, to *dare*, *durst*; but is it not better to say I *dared* than I *durst?* This habit of contracting or shortening is a very mischievous habit. It leads to the destruction of all propriety in the use of letters; and instead of *a saving of time*, it produces, by the puzzling that it gives rise to, a great *loss of time*. Hoping that what I have here said will be a warning to you against the cutting of words short, I have only to add, on the subject of *irregular verbs*, that those in the last list are to be used in the regular form, and that the only real irregulars are those of the first list. Nay, I have, after all, left some Verbs in the first list which *may* be used in the regular form; as, *past*, which may be, in the participle, *passed*, and with full as much propriety.

The fact that this second series of verbs, which Cobbett declares ought to be used in the regular form, are now almost all used in that form, is a pretty good proof of the soundness of his judgment. There is a strong tendency now-a-days to make irregular verbs regular, as well as to make irregularly-pronounced words regular. Mr. White is singular in his notions on this subject. He dislikes all departures from old-established pronunciations; calls them "book-talk, not free, manly speech." Though the people of the town of Derby, for instance, pronounce the name of their town just as it is spelled, he thinks the aristocratic pronunciation "Darby" is the proper one, because it has support in other words pronounced in the old style, such as *clark* for *clerk*, *clargy* for *clergy*, *sarjeant* for *serjeant*. And yet he seems to agree with Walker that *vurgin* and *vurtue* instead of *virgin* and *virtue* have "a grossness approaching to vulgarity!" Is not the one just as bad as the other? nay, worse; for the *i* in these words, like that in *thirst* and *girl*, has, in everybody's mouth, something of the sound of the *u*. Ought we, in order to satisfy a peculiarity or nicety of taste, to retain an irregular pronunciation in particular words, which gives endless trouble to thousands of teachers and millions of children? I am all the more surprised at this peculiar notion of Mr. White's, as he seems willing to abolish every change in the ending of words in order to simplify the grammar: even the *m* in *whom* he is willing to discard. There is no use in talking about it; it is quite natural that a practical, progressive, reading people like the Americans should pronounce words as they are spelled. We no longer hear housewife pro-

nounced *huzzif*, as in England; or, haunt pronounced *hant*. Nor do I think there is any loss whatever, but a gain, in so pronouncing. "Derby" sounds just as good as "Darby;" "clerk" as good as "clark;" "Berkeley" as "Barkeley."

Simplicity is, in fact, the order of the day; it is the tendency of the age in all things; for modern progress, modern ideas, are rendering all mankind more neighborly, more brotherly, more nearly akin to each other. Mr. White is inclined to think that those we call irregular verbs are the real strong ones, and the others the weak. I notice that my little girl, five years old, frequently makes irregular verbs regular (I drinked, I eated, etc.), although she never hears them so used. This to me is a proof that there is a natural tendency in the language to regularity of construction. And indeed there is a reason for this change, as for all changes, in our language—a satisfactory, a compensatory reason; for most of the old irregular forms are needed for other and different service: they are wanted for qualificative and figurative use. Let us take some of these very verbs in the second list—to burn, to chide, to gild, to gird, to hew, to load, to shave, to spill, to weave—and we shall see that though used in the regular form as verbs, the IRREGULAR FORM IS USED AS ADJECTIVES. I burned the cork; here is burnt cork;—he chided the children; there they go, like a chidden train;—she gilded the faces of the sleepers; she wears gilt lace;—he girded himself for the combat; here is a sea-girt isle;—he hewed the stone; here is a temple built of hewn stone; and so on. Though we speak of having worked hard, of having melted the ice, and of having swelled the tide of prosperity, yet we speak of wrought iron, of a swollen flood, and of molten lead. Though we say that "she knitted the stockings" and "he freighted the vessel," we say that "her brows were knit" and "the enterprise was fraught with misfortune." Thus we see that the irregular form of the verb has been turned into an adjective, and the regular form retained as a verb.

The old form is also needed to form nouns as well as adjectives. "During the *past* year, he has often *passed* me without a glance; but, never mind; the *past* is forgotten." And the old form is sometimes used to show a difference of meaning as compared with the regular form; for "he *durst* not do it" is quite a different thing from "he dared not do it;" the former indicating that he had not the permission to do it, and the latter that he had not the courage.—Having forgotten what Cobbett said above of the verb *to pass*, I struck it out of the list of irregulars, as it is never now

used irregularly. Otherwise I should have let it stand. It is, however, the only verb I did strike out.

110. Auxiliary Verbs.—In the present Letter, paragraph 103, I opened this part of my subject. The word *let* is the past time and the passive participle of the Verb *to let.* It is used as an auxiliary, however, in the *present time;* and only in the *imperative mode;* as, *Let me go; let us go; let him go.* That is to say, *Leave me to go, leave us to go, leave him to go.* Perhaps the meaning, *fully* expressed, would be, Act in such a way that I may be left to go, or suffered to go.

The peculiarity of this verb *to let* is, that like a dozen other irregular verbs, it may be used in all the tenses without undergoing any change of form; as, I *let* him come now; I *let* him come yesterday; I *have let* him come. I *put* it away now; I *put* it away yesterday; I *have put* it away. So with *cut, cast, hit,* and others.

111. The auxiliary *do,* which, for the past time, becomes *did,* is part of the Verb *to do,* which in its past time is *did,* and in its passive participle *done.* In this sense, it is not an *auxiliary,* but a *principal* Verb, and its meaning is equal to that of *to execute,* or *to perform;* as, I *do my work,* I *execute my work,* I *perform my work.* As an auxiliary or *helper,* it seems to denote the *time* of the principal Verb; as, I *do* walk; I *did* walk; and, we may say, I *do execute my work,* or, I *do do my work.* In this last example, the first *do* is an auxiliary, and the last *do* a principal Verb. However, as I said before, *do* and *did,* used as auxiliaries, do a great deal more than merely express *time.* In fact, they are not often used for that purpose only. They are used for the purpose of affirming or denying in a manner peculiarly strong; as, I *do* work, means, that I work, notwithstanding all that may be, or may have been said, or thought, to the contrary; or it means, that I work *now,* and have not done it at some other stated or supposed time. It is the same, with the exception of time, as to the use of *did.* These are

amongst those little words of vast import, the proper force and use of which foreigners scarcely ever learn, and which we learn from our very infancy.

This is, I think, the proper place to state that the English verb has, in fact, *five* forms in the *present* tense—something which, I believe, is not found in the verbs of any other modern tongue:

He works, common form.
He is working, progressive form.
He does work, emphatic form.
He worketh, solemn form.
He doth work, solemn emphatic form.

All these forms convey a different shade of meaning, and are used under different circumstances, which will be explained by-and-by. I will only say here that the first three are the most frequently used. The French and the Germans have only one form for the whole five: il travaille, er arbeitet. They have, it is true, the progressive form, too, but it is seldom used by the French and hardly ever by the Germans.

Now, concerning *do*, you must notice that, as an auxiliary, it is used chiefly in NEGATIVE and INTERROGATIVE sentences:

He works, he is working, *affirmative.*
He *does* not work, *negative.*
Does he work? *interrogative.*

It is never used in affirmative sentences except for emphasis. The French and the Germans, for the last two forms, simply say: He works not, Works he? We use this form when we speak solemnly or earnestly: He works not; He comes not; I see him not. Notice that when any other auxiliary is used (have, be, must, may, etc.), we cannot use *do* in either negative or interrogative sentences: "I have not seen him. He must not go. Am I your friend? May I speak?" To say, therefore, "I did not have a penny," is not so good as, "I had not a penny."

112. The Verbs *to have* and *to be* are the two great auxiliaries. These words demand an extraordinary portion of your attention. They are *principal* Verbs as well as auxiliaries. The Verb *to have*, as a principal Verb, signifies *possession;* as, *I have a pen*, that is to say, *I possess a pen.* Then, this is a word of very great use indeed in its capacity of principal Verb; for we say, *I have a headache, I have a hatred* of such a thing, *I have a*

mind to go; and hundreds of similar phrases. I *possess* a headache has the same *meaning;* but the other is more agreeable to the natural turn of our language. As *auxiliary*, this Verb is absolutely necessary in forming what are called the *compound times* of other Verbs, and those times are called *compound* because they are formed of *two* or *more Verbs.* Suppose the subject to be of *my working*, and that I want to tell you that my work is *ended*, that I have *closed* my work, I cannot, in a short manner, tell you this without the *help* of the Verb *to have.* To say, *I work*, or *I worked*, or *I will work;* these will not answer my purpose. No: I must call in the *help* of the Verb *to have*, and tell you I *have* worked. So, in the case of the past time, I must say, I *had* worked; in the future, I *shall have* worked; in the subjunctive mode, I must say, I may, might, could, or should *have* worked. If you reflect a little, you will find a *clear reason* for employing the Verb *to have* in this way; for when I say, "I *have worked*," my words amount to this: that the *act of working* is now *in my possession.* It is *completed.* It is a thing *I own*, and therefore I say, *I have* it.

113. The Verb *to be* signifies *existence*, when used as a principal Verb. "*To be* ill, *to be* well, *to be* rich, *to be* poor," mean to *exist* in illness, in health, in riches, in poverty. This Verb, in its *compound times*, requires the *help* of the Verb *to have;* as, I *have been*, I *had been*, I shall *have been*, and so on. As *auxiliary*, this Verb is used with the *participles* of other Verbs; as, *to be working*, he *is* working, it *is* worked. Now you will perceive, if you reflect, that these phrases mean as follows: *existing in work, he exists in work, it exists in a worked state.* Both these Verbs are sometimes used, at one and the same time, as auxiliaries to other principal Verbs; as, *I have been writing; I have been imprisoned;* and so on; and, upon patient attention to what has already been said, you will find that they retain upon all occasions their full

meaning, of *possession* in the one case, and of *existence* in the other.

114. Now, my dear James, if I have succeeded in making clear to you the *principle* out of which the use of these words, as auxiliaries, has arisen, I have accomplished a great deal; for, if well grounded in that *principle*, all the subsequent difficulties will speedily vanish before you.

115. I now proceed to close this long and important Letter, by presenting to you the conjugation of these two Verbs, both of which are *irregular*, and every irregularity is worthy of your strict attention.

INFINITIVE MODE.

To Have.

INDICATIVE MODE.

	Singular.	*Plural.*
Present Time.	1st Person. I have,	We have.
	2d Person. Thou hast,	You have.
	3d Person. He, she, or it has	They have.
Past Time.	— I had, or hath],	We had.
	— Thou hadst,	You had.
	— He, she or it had,	They had.
Future Time.	— I shall, or will have,	We shall, or will have.
	— Thou shalt, or wilt have,	You shall, or will have.
	— He, she, or it shall or will have],	They shall, or will have.

SUBJUNCTIVE MODE.

Present Time.	If I have, or may, might, could, or should have.
	If thou have, or may " " " have.
	If he, she, or it have, or may " have.
	If we have, or may " " have.
	If you have, or may " " have.
	If they have, or may " " have.

IMPERATIVE MODE.

Let me have,	Let us have.
Have thou,	Have you.
Let him, her, or it have,	Let them have.

PARTICIPLES.

Active.—Having.
Passive.—Had.

116. Though I have inserted *hath* in the third person singular of the present of the indicative, it is hardly ever used. It is out of date, and ought to be wholly laid aside.

117. The Verb *to be* is still more irregular, but a little attention to its irregularities will prevent all errors in the use of it.

INFINITIVE MODE.

To Be.

INDICATIVE MODE.

	Singular.	*Plural.*
Present Time.	1st Person. I am,	We are.
	2d Person. Thou art,	You are.
	3d Person. He, she, or it is,	They are.
Past Time.	— I was,	We were.
	— Thou wast,	You were.
	— He, she, or it was,	They were.
Future Time.	— I shall, or will be,	We shall, or will be.
	— Thou shalt, or wilt be,	You shall, or will be.
	— He, she, or it shall, or will be,	They shall, or will be.

SUBJUNCTIVE MODE.

Present Time.	If I be, or may, might, would, could, or should be.
	If thou be, or may " " " " be.
	If he, she, or it be, or may " " be.
	If we be, or may " " " be.
	If you be, or may " " " be.
	If they be, or may " " " be.
Past Time.	If I were.
	If thou were.
	If he, she, or it were.
	If we were.
	If you were.
	If they were.

IMPERATIVE MODE.

Let me be,	Let us be.
Be thou,	Be you.
Let him, her, or it, be,	Let them be.

PARTICIPLES.

Present.—Being.
Past.—Been.

118. In the Subjunctive Mode I have made use of the conjunction *if* throughout all the conjugations of Verbs. But a Verb may be in that mode without an *if* before it. The *if* is only *one* of the marks of that mode. A Verb is always in that mode when the *action or state of being* expressed by the Verb is expressed *conditionally*, or when the action or state of being is, in some way or other, *dependent* on some other action or state of being. But of this I shall speak more at large when I come to the *Syntax* of Verbs.

119. There remain a few words to be said about the *signs*, the *defective Verbs*, and the *impersonal Verbs*. The signs, *may*, *might*, *can*, *could*, *will*, *would*, *shall*, *should*, and *must*, have all, originally, been Verbs, though they are now become defective in almost all their parts, and serve only as signs to other Verbs. *Will*, indeed, is part of a regular Verb; as, *to will*, they *willed*, they are *willing*, they *will be willing*. The word *would* is certainly the past time and passive participle of the same Verb; and, indeed, it is used as a principal Verb now, in certain cases; as, "I *would* he were rich." That is to say, I *desire*, or am *willing*, or, it is *my will*, that he *should be* rich. But deep inquiries regarding the origin of these words are more curious than useful. A mere idea of the nature of their origin is enough. The Verb *ought* is a Verb defective, in most of its parts. It certainly, however, is no other than a part of the Verb *to owe*, and is become *ought* by corruption. For instance; "I *ought* to write to you,"

means that "I owe the performance of the act of writing to you." *Ought* is made use of only in the *present time*, and for that reason a great deal has been lost to our language by this corruption. As to the Verbs which some grammarians have called *impersonal*, there are, in fact, no such things in the English language. By *impersonal Verb* is meant a Verb that has no *noun* or *pronoun* for its nominative case; no person or thing that is the actor, or receiver of an action, or that is in being. Thus: "it *rains*," is by some called an *impersonal* Verb; but the pronoun *it* represents the person. Look again at Letter VI, and at paragraphs 60 and 61. You will there find what it is that this *it*, in such cases, represents.

120. Thus I have concluded my Letter on the Etymology of Verbs, which is by far the most important part of the subject. Great as have been my endeavors to make the matter clear to you, I am aware, that, after the *first reading* of this Letter, your mind will be greatly confused. You will have had a glimpse at everything in the Letter, but will have seen nothing clearly. But, my dear James, lay the book aside for a day or two; then read the whole Letter again and again. Read it early, while your mind is clear, and while sluggards are snoring. Write it down. Lay it aside for another day or two. Copy your own writing. *Think* as you proceed; and, at the end of your copying, you will understand clearly all the contents of the Letter. Do not attempt to study the Letter *piece by piece*. In your readings, as well as in your copyings, go clean throughout. If you follow these instructions, the remaining part of your task will be very easy and pleasant.

As to this last piece of advice, I cannot agree with Cobbett. Reading the whole letter at once is the very way to get a confused impression of the whole subject; just as going through a whole museum at once leaves a confused impression of everything and a distinct impression of nothing. No; go through one roomful of

curiosities at one visit; master the whole collection step by step; and when you have got it pretty clear in your mind, then you may go over it all at one run.

To complete this, the most important part of etymology, I must give you a full view of a passive verb, or rather of a verb in the passive voice. Just devote one little half-hour to it in the early morning, when your mind is fresh; and you will see its nature clearly; compare it with the same verb in the active voice, and you will get a fair idea of what a verb in the passive voice is. For, to make the matter all the more plain, I see no reason why this same verb *to work*, which I have given you in the active voice, should not be given in the passive, too; for we often say, He *is worked* to death; the mine *was* well *worked;* the problem *has been worked* out, and so on. Besides—and this is a secret which every school-boy does not know—there must, in the conjugation of every passive verb, be displayed a complete conjugation of the verb *to be;* so here we kill two birds with one stone.

Complete Conjugation of the Passive Verb To be worked:

INFINITIVE MOOD.

SIMPLE TENSES.	COMPOUND TENSES.
Present tense.	*Present perfect tense.*
To be worked.	To have been worked.

INDICATIVE MOOD.

Present tense.	*Present perfect tense.*
I am worked,	I have been worked.
Thou art worked,	Thou hast been worked.
He is "	He has been "
We are "	We have been "
You are "	You have been "
They are "	They have been "
Past tense.	*Past perfect tense.*
I was worked,	I had been worked.
Thou wast worked,	Thou hadst been worked.
He was "	He had been "
We were "	We had been "
You were "	You had been "
They were "	They had been "
Simple future tense.	*Perfect future tense.*
I shall be worked,	I shall have been worked.
Thou wilt be worked,	Thou wilt have been worked.
He will be "	He will have been "
We shall be "	We shall have been "
You will be "	You will have been "
They will be "	They will have been "
Present conditional form.	*Perfect conditional form.*
I should be worked,	I should have been worked.
Thou wouldst be worked,	Thou wouldst have been worked.
He would be "	He would have been "
We should be "	We should have been "
You would be "	You would have been "
They would be "	They would have been "

POTENTIAL MOOD.

Present tense.

I may be worked,
Thou mayst be worked,
He may be "
We may be "
You may be "
They may be "

Present perfect tense.

I may have been worked.
Thou mayst have been worked.
He may have been "
We may have been "
You may have been "
They may have been "

Past tense.

I might be worked,
Thou mightst be worked,
He might be "
We might be "
You might be "
They might be "

Past perfect tense.

I might have been worked.
Thou mightst have been worked.
He might have been "
We might have been "
You might have been "
They might have been "

SUBJUNCTIVE MOOD.

Present tense.

If I be worked,
thou be worked,
he be "
we be "
you be "
they be "

Present perfect tense.

If I have been worked.
thou have been worked.
he have been "
we have been "
you have been "
they have been "

Past tense.

If I were worked,
thou were worked,
he were "
we were "
you were "
they were "

Past perfect tense,

If I had been worked.
thou had been "
he had been "
we had been "
you had been "
they had been "

IMPERATIVE MOOD.

Be worked, or, Be thou worked.

PARTICIPLES.

Present—Being worked, *Past*—Having been worked.

LETTER IX.

ETYMOLOGY OF ADVERBS.

121. In Letter III, and in paragraphs 27 and 28, you will find a description of this Part of Speech. Read again those two paragraphs, in order to refresh your memory. There is not much to be said about Adverbs under the head of Etymology. They are words liable to few variations. Adverbs are very numerous, and may be divided into five principal classes: that is to say, Adverbs of *time*, of *place*, of *order*, of *quality*, and of *manner*.

This last class, which is the most numerous, is composed of those which are derived immediately from adjectives, and which end in *ly;* as, *especially, particularly, thankfully.*

122. These Adverbs, ending in *ly*, are, for the most part, formed by simply adding *ly* to the adjective; as, *especial* becomes *especially;* but if the adjective end in *y*, that *y* is changed into *i* in forming the Adverb; as, *happy, happily; steady, steadily.* If the adjective end in *le*, the *e* is dropped in forming the Adverb; as, *possible, possibly.*

123. Some few Adverbs have *degrees of comparison;* as, *often, oftener, oftenest;* and those which are derived from irregular adjectives are irregular in forming their degrees of comparison; as, *well, better, best.*

124. Some Adverbs are *simple* or *single;* others *compound.* The former consist of *one word*, the latter of *two* or more words; as, *happily; at present; now-a-days;* which last means *at the days that now are.* Another Adverb of this description is, *by-and-by;* which is used to express, *in a short time;* and literally it means *near and near;* because *by* itself, as an Adverb, means *near, close, beside.* When Adverbs are compound, the words composing them ought to be connected by a *hyphen*, or hyphens, as in the above examples of *now-a-days* and *by-and-by.*

I must here explain to you two important things, of which Cobbett makes no mention: the PHRASE and the CLAUSE. In the sentence, "I shall return *immediately*," the word immediately is simply an adverb of time, modifying the verb *shall return;* but when I change the adverb into several words, as, "I shall return *in an instant*," it becomes a PHRASE, an *adverbial phrase.* Phrases are used to express all that adverbs are used to express, and nearly all adverbs can be turned into adverbial phrases. The adverb *now* may be changed into *at this moment* or *at present; beautifully* may be rendered by *in a beautiful manner; here* may be turned into *at this place; in a quiet way* may be rendered by *quietly;* and so on. And here I must show you that there are many cases where we

prefer the *adverbial phrase* to the *adverb*. To what part of speech do you think the words *silly*, *kindly*, *friendly*, belong? They look like adverbs, do they not? But they are not, as you will find by trial: a silly boy, a kindly gentleman, a friendly lady. Shall I then say, The boy speaks sillily? The gentleman acts kindlily? The lady received us friendlily? These expressions are not absolutely incorrect; they are better than with the adjective, The boy speaks silly, etc.; but they do not *sound* agreeable; so we prefer the adverbial PHRASE: The boy speaks *in a silly manner;* the gentleman acts *in a kindly manner;* the lady received us *in a friendly manner*, or *in a friendly way*. Observe, too, that you ought never to put a preposition before an adverb of place; as, *to here*, *from there*. You must use a *phrase*, and say, *to this place*, *from that city*, etc., always naming the place referred to. Never say *from whence*, *from thence;* but simply whence, thence.

Now for the CLAUSE. The difference between the *phrase* and the *clause* is this: the clause always has a subject and predicate (nominative and verb), the phrase never has either. "I shall return *when I please*." Here, instead of the phrase *in an instant*, we have an *assertion*, with subject (I) and predicate (please), which cannot be changed for a single word. This is called an *adverbial* CLAUSE; *adverbial* because it modifies the verb of the first clause; for the sentence now contains two clauses, and is changed from a simple into a complex sentence. Every sentence must have at least *one* clause, while there may not be a single phrase in ten consecutive sentences. A clause may be not only *adverbial*, but *objective*, *participial*, *infinitive*, or *relative*. "He asked *what I was doing*," objective clause; "He came in *as I was going away*," participial clause; "He wants *to see what will come of it*," infinitive clause; "The boy *who learns English* is my son," relative clause; and so on. Observe the following three examples, and you will see how the *adverb* may be turned into an *adverbial phrase*, and the latter into an *adverbial clause:*

Speak *distinctly.*
Speak *in a distinct manner.*
Speak *so that you may be understood.*

It is worth noticing that some adverbs help to *join* clauses as well as to express *time* or *place*, and are therefore called *conjunctive* adverbs: I shall return *when* he returns. I will tell you *where* we are going. Others, again, express negation, affirmation, or cause, and are called adverbs of negation, of affirmation, or of cause; as, (1) *no*, *not*, *never;* (2) *yes*, *yea*, *truly*, *certainly;* (3) *why*, *wherefore*,

therefore. *No,* coming immediately before a noun, is, of course, an adjective; as, *No* person under 25 years of age can become a member of Congress. Observe that *all* adverbs ending in *ly* are compared with *more* and *most*, or *less* and *least;* as, handsomely, more handsomely, most handsomely;—handsomely, less handsomely, least handsomely. Do you remember the names of these three degrees? An adverb modifies a verb, an adjective, or another adverb. To what part of speech, then, does the word *the* belong, in such phrases as, "the more the merrier," "the longer the better"?

LETTER X.

ETYMOLOGY OF PREPOSITIONS.

125. Letter III, paragraphs 29 and 30, has taught you of what description of words *Prepositions* are. The chief use of them is to express the different *relations* or *connections* which nouns have with each other, or in which nouns stand with regard to each other; as, John gives money *to* Peter; Peter receives money *from* John. It is useless to attempt to go into curious inquiries as to the *origin* of Prepositions. They never change their endings; they are always written in the same manner. Their *use* is the main thing to be considered; and that will become very clear to you, when you come to the Syntax.

126. There are two *abbreviations*, or *shortenings*, of Prepositions, which I will notice here, because they are in constant use, and may excite doubts in your mind. These are *a* and *o';* as, I am *a* hunting; he is *a* coming; it is one *o'*clock. The *a* thus added is *at*, without doubt; as, I am *at* hunting; he is *at* coming. Generally this is a vulgar and redundant manner of speaking; but it is *in use.* In mercantile accounts you will frequently see this *a* made use of in a very odd sort of way; as, "Six bales marked 1 *a* 6." The merchant means, "Six bales marked from 1 *to* 6." But this I take to be a relic of the Norman French, which was once the law and mercantile language

of England; for, in French, *a* with an accent, means *to* or *at*. I wonder that merchants, who are generally men of sound sense, do not discontinue the use of this mark of affectation. And, I beg you, my dear James, to bear in mind, that the *only* use of words is *to cause our meaning to be clearly understood;* and that the best words are those which are familiar to the ears of the greatest number of persons. The *o'* with the mark of elision means *of*, or *of the*, or *on*, or *on the;* as, *two o'clock*, which is the same as to say two *of the* clock, or two *according to* the clock, or two *on the* clock.

127. As to the Prepositions which are joined to verbs or other words; as, to *outlive*, to *undervalue*, to be *overdone*, it would be to waste our time to spend it in any statements about them; for these are *other words* than to *live*, to *value*, to be *done*. If we were to go, in this way, into the subject of the *composition* of words, where should we stop? Thank*ful*, thank*less*, with*out*, with*in;* these are all *compound* words, but, of what *use* to us to enter on, and spend our time in, inquiries of mere curiosity? It is for monks and for Fellows of English colleges, who live by the sweat of other people's brows, to spend their time in this manner, and to call the result of their studies *learning;* for you, who will have to earn what you eat and what you drink and what you wear, it is to avoid everything that tends not to real utility.

It may, however, not be quite useless to mention the names given to the parts of derived words. Kind, un-kind, kind-ness. The original word is called the *root;* the syllable placed before the root is called the *prefix;* and the syllable added to the root is called the *suffix*. Although any word having a prefix or a suffix may be called a compound word, we generally call those words compound which are formed by uniting two or more whole words; as, workshop, schoolmaster, army-chest. And as to which compound words take a hyphen, and which do not, this depends a good deal upon the shape of the first and the last letter of the two words united. For instance, *churchyard* needs no hyphen, because

the two parts are sufficiently separated by the ascending *h* and the descending *y;* but *church-bell* or *church-hymn* must be so separated, because the parts of the word would otherwise not be sufficiently distinct.

As to the correct use of prepositions generally, there is no guide equal to the *feeling* for propriety acquired by much reading and speaking, and by frequent hearing of good speakers. Well do I remember that, among my most advanced scholars in Germany, almost the only mistake they finally made was in the use of the prepositions, showing that this was the last difficulty to be mastered. It was sometimes a matter so peculiar, so delicate, so difficult to choose the right preposition, that I was myself obliged to repeat a sentence aloud several times before I could hit on the right word.

Do not forget that the preposition governs the objective case—I send *for* HIM—nor that the same word may sometimes belong to another part of speech: I send for him, *for* I cannot do without him. Notice that people are said to be *in* any place, but that they go *into* a place. We are *in* the garden, we are going *into* the house. In the Broadway stages there stands, over the fare-box, this sentence: "Put the exact fare in the box." It should be *into* the box; for, though the money may be *in* the box, it is put *into* it.—Do not suppose that every preposition must be a *little* word; for *concerning*, *respecting*, *regarding*, *notwithstanding* are also prepositions. Observe, too, that nine *phrases* out of ten begin with a preposition.

In regard to the expressions, *a-hunting*, *a-coming*, and the like, Cobbett can not mean that these are vulgar and redundant,—which is what, at first, I thought he meant,—but that *at hunting*, *at coming*, are so. The other expression is perfectly legitimate, and used by the best authors. You may say, therefore, that something or anything is a-doing, a-making, a-building, a-ripening, a-brewing, and so on.

LETTER XI.

ETYMOLOGY OF CONJUNCTIONS.

128. In Letter III, paragraph 31, you have had a description of this sort of words, and also some account of the *uses* of them. Some of them are called *copulative* Conjunctions, and others *disjunctive*. They all serve to *join together* words, or parts of sentences; but the former express *an union* in the actions, or states of being, expressed by the verb; as, you *and* I talk. The latter a *disunion*; as, you talk, *but* I act. The words of this Part of Speech never vary in their endings. They are always spelled in one and the same way. In themselves they present no difficulty; but, as you will see by-and-by, to use them properly, with other words, in the forming of sentences, demands a due portion of your attention and care.

You see Cobbett says "an union." Can you tell why this is wrong? If not, look at Letter IV, paragraph 36 (note).

LETTER XII.

CAUTIONARY REMARKS.

MY DEAR JAMES:

129. Before we enter on SYNTAX, let me give you a *caution* or two with regard to the contents of the foregoing LETTERS.

130. There are some words which, under different circumstances belong to more than one Part of Speech, as, indeed, you have seen in the *Participles*. But this is by no means confined to that particular description of words.

I *act.* Here *act* is a verb; but "the act performed by me" shows the very same word in the capacity of a noun. The message was sent *by* him; he stood *by* at the time. In the first of these examples *by* is a preposition; in the last an adverb. Mind, therefore, that it is *the sense in which the word is used, and not the letters of which it is composed*, that determines what is the Part of Speech to which it belongs.

131. Never attempt to *get by rote* any part of your instructions. Whoever falls into that practice soon begins to esteem the powers of *memory* more than those of *reason;* and the former are despicable indeed when compared with the latter. When the fond parents of an eighth wonder of the world call him forth into the middle of the parlor to repeat to their visitors some speech of a play, how angry would they be if any one were to tell them that their son's endowments equalled those of a parrot or a bullfinch! Yet a German bird-teacher would make either of these more perfect in this species of oratory. It is this mode of teaching, which is practised in the great schools, that assists very much in making dunces of lords and country squires. They "*get their lessons;*" that is to say, they repeat the *words* of it; but, as to its *sense* and *meaning*, they seldom have any understanding. This operation is sometimes, for what reason I know not, called getting a thing *by heart.* It must, I should think, mean *by hear't;* that is to say, by *hear it.* That a person may get and retain and repeat a lesson in this way, without any effort of the mind, is very clear from the fact, of which we have daily proof, that people sing the words and the tune of a song with perfect correctness, at the very time that they are most seriously thinking and debating in their minds about matters of great importance to them.

132. I have cautioned you before against studying the foregoing instructions piecemeal; that is to say, *a little*

bit at a time. Read a letter *all through* at once; and, now that you have come to the end of my instructions on Etymology, read all the Letters through at once: do this repeatedly; taking care to proceed slowly and carefully; and, at the end of a few days, all the matters treated of will form a connected whole in your mind.

133. Before you proceed to the Syntax, *try yourself a little*, thus: Copy a short sentence from any book. Then write down the words, one by one, and write against each what Part of Speech *you think* it belongs to. Then look for each word in the dictionary, where you will find the several Parts of Speech denoted by little letters after the word: *s.* is for substantive, or noun; *pro.* for pronoun; *a.* for article; *v. a.* for verb active; *v. n.* for verb neuter; *adj.* for adjective; *adv.* for adverb; *pre.* for preposition; *con.* for conjunction; *int.* for interjection. It will give you great pleasure and encouragement when you find that you are right. If you be sometimes wrong, this will only urge you to renewed exertion. You will be proud to see that, without any one at your elbow, you have really acquired something which you can never lose. You will begin, and with reason, to think yourself learned; your sight, though the objects will still appear a good deal confused, will dart into every part of the science; and you will pant to complete what you will be convinced you have successfully begun.

This is Mr. White's much-ridiculed and thoroughly-despised *parsing* exercise. Of course, carried on as it is at the public-schools, with little or no real understanding of the matter, and with a kind of rapid, mechanical, parrot-like repetition of grammatical terms, it is worse than useless. But I am convinced that, properly considered, and understandingly carried out, this exercise is of positive value. To a boy or girl of proper age, it may be made indeed, tolerably interesting. Let us look at a single little sentence. "Boys love swimming."

Boys is a common noun, third person, plural number, masculine gender. nominative case.

Love is a regular transitive verb, active voice, third person, plural number, present tense, indicative mood.

Swimming is a common (or participial) noun, third person, singular number, objective case.

Now, take each one of these definitions, and ask *why?* and if you can answer properly, then the exercise has become of real and substantial benefit to you. Why a *common* noun? Because it is a *general* name, and not a *particular* one. Why *third* person? Because it is spoken of. Why *plural* number? Because it means more than one. Why *masculine* gender? Because it is the name of males. Why *nominative* case? Because it is the subject of the sentence; and so on. If I had said, "Boys love *to swim*," the object, *to swim*, would be called a verbal noun.

LETTER XIII.

SYNTAX GENERALLY CONSIDERED.

MY DEAR JAMES:

134. In Letter II, paragraph 9, I shortly explained to you the meaning of the word SYNTAX, as that word is used in the teaching of grammar. Read that paragraph again.

135. We are, then, now entering upon this branch of your study; and it is my object to teach you how to give all the words you make use of their proper situation when you come to put them into sentences. Because, though every word that you make use of may be correctly spelled; that is to say, may have all the letters in it that it ought to have, and no more than it ought to have; and though all the words may, at the same time, be the fit words to use in order to express what you wish to express; yet, for want of a due observance of the principles and rules of Syntax, your sentences may be incorrect, and, in some cases, they may not express what you wish them to express.

136. I shall, however, carry my instructions a little

further than the construction of independent sentences. I shall make some remarks upon the manner of *putting sentences together;* and on the things necessary to be understood, in order to enable a person to write a series of sentences. These remarks will show you the use of figurative language, and will, I hope, teach you how to avoid the very common error of making your writing confused and unintelligible.

LETTER XIV.

SYNTAX.

The Points and Marks made use of in Writing.

MY DEAR JAMES:

137. There are, as I informed you in paragragh 9, Letter II, *Points* made use of in the making, or writing, of sentences; and, therefore, we must first notice these; because, as you will soon see, the sense, or meaning, of the words is very much dependent upon the points which are used along with the words. For instance: "*You will be rich if you be industrious, in a few years.*" Then again: "*You will be rich, if you be industrious in a few years.*" Here, though in both sentences the words and also the order of the words are precisely the same, the meaning of one of the sentences is very different from that of the other. The first sentence means that you will, *in a few years' time*, be rich, if you be industrious *now*. The second sentence means that you will be rich, *some time or other*, if you be industrious *in a few years from this time*. And all this great difference in meaning is, as you must see, produced solely by the difference in the situation of the *comma*. Put another comma after the last word *industrious*, and the meaning becomes *dubious*.

A memorable proof of the great importance of attending to *Points* was given to the English nation in the year 1817. A committee of the House of Lords made a report to the House, respecting certain political clubs. A secretary of one of those clubs presented a petition to the House, in which he declared positively, and offered to prove at the bar, that a part of the report was *totally false.* At first their Lordships blustered; their high blood seemed to boil; but, at last, the Chairman of the Committee apologized for the report by saying that there ought to have been *a full-point* where there was only a *comma!* and that it was this which made that false which would otherwise have been, and which was intended to be, true!

138. These Points being, then, things of so much consequence in the forming of sentences, it is necessary that I explain to you the use of them, before I proceed any farther. There are four of them: the *Full-point*, or *Period;* the *Colon;* the *Semi-colon;* the *Comma.*

139. The *Full-point* is a single dot, thus [.], and it is used at the end of every complete sentence. That is to say, at the end of every collection of words which make a full and complete meaning, and is not necessarily connected with other collections of words. But a sentence may consist of several *members* or *divisions*, and then it is called a *compound* sentence. When it has no divisions, it is called a *simple* sentence. Thus: "The people suffer great misery." This is a simple sentence; but, "The people suffer great misery, and daily perish for want," is a compound sentence; that is to say, it is compounded, or made up, of two simple sentences.

140. The *Colon*, which is written thus [:], is next to the full-point in requiring a complete sense in the words. It is, indeed, often used when the sense is complete, but when there is something still behind, which tends to make the sense fuller or clearer.

141. The *Semi-colon* is written thus [;], and it is used to set off, or divide, simple sentences, in cases when the comma is not quite enough to keep the meaning of the simple sentences sufficiently distinct.

142. The *Comma* is written thus [,], and is used to mark the shortest pauses in reading, and the smallest divisions in writing. It has, by some grammarians, been given as a rule to use a comma to set off every part of a compound sentence, which part has in it a *verb* not in the infinitive mode; and, certainly, this is, in general, proper. But it is not always proper; and, besides, commas are used, in numerous cases, to set off parts which have no verbs in them; and even to set off single words which are not verbs; and of this the very sentence which I am now writing gives you ample proof. The comma marks the shortest pause that we make in speaking; and it is evident that, in many cases, its use must depend upon taste. It is sometimes used to give *emphasis*, or *weight*, to the word after which it is put. Observe, now, the following two sentences: "I was very well and cheerful last week; *but*, am rather feeble and low-spirited now." "I am very willing to yield to your kind requests; *but*, I will set your harsh commands at defiance." Commas are made use of when phrases, that is to say, portions of words, are throwed into a sentence, and which are not absolutely necessary to assist in its grammatical construction. For instance: "There were, *in the year* 1817, petitions from a million and a half of men, who, *as they distinctly alleged*, were suffering the greatest possible hardships." The two phrases, in *italics*, may be left out in the reading, and still the sentence will have its full grammatical construction.

Here Cobbett shows he made no distinction between a phrase and a clause. It is true that in a popular sense any number of words may be called a phrase; as, "How do you do? Good-bye." But in grammar this word has a particular sense, and these last-

mentioned expressions do not agree with it. "In the year 1817" is a phrase, and "as they distinctly alleged" is a clause, because the former has neither subject nor predicate and the latter has both. I must say, too, that at the present day no corrector for the press (proof-reader) would allow those commas to stand after those *buts*. Further, *throwed* instead of *thrown* is not yet in common use; but I am inclined to think it will soon be, just like *sawed* instead of *sawn*, or *crowed* instead of *crew*.

143. Let us now take a compound sentence or two containing all the four points. "In a land of liberty it is extremely dangerous to make a distinct order of the profession of arms. In absolute monarchies this is necessary for the safety of the prince, and arises from the main principle of their constitution, which is that of governing by fear; but in free states the profession of a soldier, taken singly and merely as a profession, is justly an object of jealousy. In these states no man should take up arms, but with a view to defend his country and its laws: he puts off the citizen when he enters the camp: but it is because he is a citizen, and would continue *so*, that he makes himself for a while a soldier. The laws therefore and constitution of these kingdoms know no such state as that of a perpetual standing soldier, bred up to no other profession than that of war; and it was not till the reign of Henry VII. that the kings of England had so much as a guard about their persons." This passage is taken from Blackstone's Commentaries, Book I. Chap. 13. Here are four complete sentences. The first is a simple sentence. The other three are compound sentences. Each of these latter has its members, all very judiciously set off by points. The word *so*, in the third sentence, ought to be *such*, or the words *a citizen* ought to be repeated. But, with this trifling exception, these are very beautiful sentences. Nothing affected or confused in them: all is simple, clear, and harmonious.

144. You will now see that it is quite impossible to give any *precise rules* for the use of these several points.

Much must be left to taste: something must depend upon the weight which we may wish to give to particular words, or phrases; and something on the seriousness, or the levity, of the subject on which we are writing.

145. Besides these points, however, there are certain grammatical signs, or marks, which are made use of in the writing of sentences: the mark of *parenthesis*, the mark of *interrogation*, the mark of *exclamation*, the *apostrophe*, otherwise called the mark of elision, and the *hyphen*.

146. The mark of *Parenthesis* consists of two curved strokes, drawed across the line of writing, or of print. Its use is to enclose a phrase throwed in hastily to assist in elucidating our subject, or to add force to our assertions or arguments. But, observe, the parenthesis ought to be very sparingly used. It is necessarily an *interrupter;* it breaks in upon the regular course of the mind: it tends to divert the attention from the main object of the sentence. I will give you, from Mr. TULL, Chap. XIII, an instance of the omission of the parenthesis, and also of the proper employment of it. "PALLADIUS thought also, with others of the ancients, that Heaven was to be frightened with red cloth, with the feathers or the heart of an owl, *and a multitude of such ridiculous scarecrows*, from spoiling the fruits of the fields and gardens. The ancients having no rational principles, or theory of agriculture, placed their chief confidence in magical charms and enchantments, which he, who has the patience or curiosity to read, may find, under the title aforementioned, in CATO, in VARRO (*and even* COLUMELLA *is as fulsome as any of them*), all written in very fine language; which is most of the erudition that can be acquired as to field husbandry, from the Greek and Latin writers, whether in verse or prose." For want of the mark of parenthesis in the first of these sentences, we almost think, at the close of it, that the author is speaking of the *crows*, and not of

Heaven, being frightened from spoiling the fruits of the fields and the gardens. But with regard to the use of the parenthesis, I shall speak, perhaps, more fully by-and-by: for the employment of it is a matter of some importance.

It is, perhaps, worth mentioning that this word parenthesis, like all the words ending in *is*, changes the *i* into *e* in the plural: parentheses, crises, theses. So that we must speak of a word or sentence being enclosed in parentheses, not parenthesis.

147. The mark of *Interrogation*, which is written thus [?], is used when a question is asked; as, "*Who has my pen?*" "*What man is that?*" In these and numerous other cases, the mark is not necessary to our clearly comprehending the meaning of the writer. But this is not always the case. "What does he say? Put the horse into the stable." Again: "What does he say? Put the horse into the stable?" In *speaking*, this great difference in the meaning, in this instance, would be fully expressed by the voice and manner of the speaker; but, in writing, the mark of interrogation is, you see, absolutely necessary in order to accomplish the purpose.

148. The mark of *Exclamation*, or *Admiration*, is written thus [!], and, as its name denotes, is used to distinguish words or sentences that are exclamatory, from such as are not: "*What do you say! What do you say?*" The difference in the sense is very obvious here. Again: "*He is going away to-night! He is going away to-night.*" The last simply states the fact; but the first, besides stating the fact, expresses *surprise* at it.

149. The *Apostrophe*, or mark of *Elision*, is a comma placed above the line, thus ['']. Elision means a *striking out;* and this mark is used for that purpose; as, *don't* for *do not;* tho' for though; *lov'd* for *loved.* I have mentioned this mark, because it is used properly enough in *poetry;* but, I beg you never to use it in prose in one single instance during your whole life. It ought to be

called the mark not of *elision*, but of *laziness* and *vulgarity*. It is necessary as the mark of the possessive case of nouns, as you have seen in Letter V, paragraph 47. That is its use, and any other employment of it is an abuse.

150. The *Hyphen* or *Conjoiner* is a little line used to connect words, or parts of words; as in *sea-fish*, *water-rat*. For here are two distinct words, though they, in these instances, make but one. Sometimes the hyphen is used to connect many words together: "The never-to-be-forgotten cruelty of the borough-tyrants." When, in writing, or in printing, the line ends with part of a word, a hyphen is placed after that part, in order to show that that part is to be joined, in the reading, with that which begins the next line.

151. These are all the *grammatical* marks; but there are others used in writing for the purpose of saving time and words. The mark of *quotation* or of *citing*. This mark consists of *two commas* placed thus: "There were many men." It is used to enclose words taken from other writings or from other persons' discourse; and, indeed, it is frequently used to enclose certain sentences, or words, of the writer, when he wishes to mark them as wholly distinct from the general course of any statement that he is making, or of any instruction that he is giving. I have, for instance, in the writing of these Letters to you, set off many of my examples by marks of *quotation*. In short, its use is to notify to the reader that such and such words, or such and such sentences, are not to be looked upon as forming part of the regular course of those thoughts which are at the present time coming from the mind of the writer.

152. This mark [¶] is found in the Bible. It stands for *paragraph*. This [§] is sometimes used instead of the word *section*. As to stars [*] and the other marks which are used for the purpose of leading the eye of the reader to *notes*, in the same page, or at the end of the

book, they are perfectly arbitrary. You may use for this purpose any marks that you please. But let me observe to you here, that *notes* ought seldom to be resorted to. Like parentheses, they are *interrupters*, and much more troublesome interrupters, because they generally tell a much longer story. The employing of them arises, in almost all cases, from confusion in the mind of the writer. He finds the matter *too much for him.* He has not the talent to work it all up into one lucid whole; and, therefore, he puts part of it into *notes.* Notes are seldom *read.* If the text, that is to say, the main part of a writing, be of a nature to engage our earnest attention, we have not time to stop to read the notes: and if our attention be not earnestly engaged by the text, we soon lay down the volume, and of course read neither notes nor text.

153. As a mark of *abbreviation*, the full point is used; as, "Mr. Mrs." But I know of hardly any other words that ought to be abbreviated; and if these were not it would be all the better. People may indulge themselves in this practice, until at last they come to write the greater part of their words in single letters. The frequent use of abbreviation is always a mark of slovenliness and of vulgarity. I have known lords abbreviate almost the half of their words: it was, very likely, because they did not know how to spell them to the end. Instead of the word *and*, you often see people put &. For *what reason* I should like to know. But to this & is sometimes added a *c;* thus, &c. *And* is in Latin *et*, and *c* is the first letter of the Latin word *cætera*, which means *the like*, or *so on.* Therefore this *&c.* means *and the like*, or *and so on.* This abbreviation of a foreign word is a most convenient thing for such writers as have too much indolence or too little sense to say fully and clearly what they ought to say. If you *mean* to say *and the like*, or *and so on*, why not say it? This abbreviation is very frequently

made use of without the writer having any idea of its import. A writer on grammar says, "When these words are joined to *if*, *since*, *&c.*, they are adverbs." But where is *the like* of *if*, or of *since?* The best way to guard yourself against the committing of similar errors is *never* to use this abbreviation.

154. The use of CAPITALS and *italics* I will notice in this place. In the books printed before the middle of the last century, a capital letter was used as the first letter of *every noun.* Capitals are now used more sparingly. We use them at the beginning of every paragraph, let the word be what it may; at the beginning of every sentence which follows a full-point; at the beginning of all *proper names;* at the beginning of all adjectives growing out of the names of countries, or nations; as, the *English* language; the *French* fashion; the *American* government. We use capitals, besides, at the beginning of any word, when we think the doing of it likely to assist in elucidating our meaning, but in general we use them as above stated. The use of *italic* characters in print is to point out, as worthy of particular attention, the words distinguished by those characters. In writing with a pen, a stroke is drawn under such words as we wish to be considered to be in *italics.* If we wish words to be put in SMALL CAPITALS, we draw two strokes under them; if in FULL CAPITALS, we draw three strokes under them.

155. The last thing I shall mention, under this head, is the *caret* [A], which is used to point upwards to a part which has been omitted, and which is inserted between the line, where the caret is placed, and the line above it. Things should be called by their right names, and this should be called the *blunder-mark.* I would have you, my dear James, scorn the use of this thing. *Think* before you write; let it be your custom to *write correctly* and in a *plain hand.* Be as careful that neatness, gram-

mar, and sense prevail, when you write to a blacksmith about shoeing a horse, as when you write on the most important subjects, and when you expect what you write to be read by persons whose good opinion you are most anxious to obtain or secure. Habit is powerful in all cases; but its power in this case is truly wonderful. When you write, bear constantly in mind that some one is to *read* and to *understand* what you write. This will make your handwriting, and also your meaning, *plain*. Never think of *mending* what you write. Let it go. No patching; no *after pointing*. As your pen moves, bear constantly in mind that it is making strokes which are to remain *for ever*. Far, I hope, from my dear James will be the ridiculous, the contemptible affectation, of writing in a slovenly or illegible hand; or that of signing his name otherwise than in plain letters.

156. In concluding this Letter, let me caution you against the use of what, by some, is called the *dash*. The dash is a stroke along the line; thus, "I am rich—I was poor—I shall be poor again." This is wild work indeed! Who is to know what is intended by the use of these *dashes?* Those who have thought proper, like Mr. Lindley Murray, to place the *dash* amongst the *grammatical points*, ought to give us some rule relative to its different longitudinal dimensions in different cases. The *inch*, the *three-quarter-inch*, the *half-inch* the *quarter-inch;* these would be something determinate; but, "*the dash*," without measure, must be a most perilous thing for a young grammarian to handle. In short, "*the dash*" is a cover for ignorance as to the use of points, and it can answer no other purpose.—A dash is very often put in crowded print, in order to save the room that would be lost by the breaks of distinct paragraphs. This is another matter. Here the dash comes *after a full-point*. It is the using of it in the body of a sentence against which I caution you.

As to the "no patching; no after-pointing," this is all very well for those who are endowed with uncommon talent for composition; but everybody cannot be a Shakespeare or a Cobbett. It is well known that Pope corrected and recorrected, polished and repolished his lines "many a time and oft," and I have heard that Schiller and other good writers have done the same thing; Macaulay, for instance. You will have written many a page before you acquire such sureness of hand and perfect power of expression as never to need to change a word or add a point on looking over what you have written. In this very paragraph I had first written "everybody cannot be Shakespearcs or Cobbetts;" but, on looking it over, I saw that *everybody*, the *subject*, is singular, and that therefore the *attribute* ought to agree with it. The eye often detects errors committed by the ear or the tongue; and the ear often detects errors committed by the hand or the pen.

Cobbett's advice concerning the dash is, I think, by no means to be followed. His contempt for this mark is one of his crotchets, of which he had quite a large stock. The dash is now universally used by good writers, and is, in its proper place, conducive to clearness; it is, in fact, quite as good a point as any other. There are some persons—especially half-educated young boarding-school misses—who clap in a dash for almost every pause; but this is no reason why it should not be used in its proper place, which is either immediately before some expression tending to complete the thought, or to enclose some explanatory clause thrown in like a parenthesis. The first case may be illustrated by the dash on page 10, immediately before the words "I mean dictation," and the second case by the above expression concerning half-educated young misses. To be sure, there are cases in which another point may, perhaps, be used with equal propriety; but this mark is now generally recognized as a proper mark in punctuation, and you may use it whenever you think proper.

The very best way of learning punctuation is, as I have elsewhere said, by writing to dictation. By the frequent writing down of other people's points, one gets a good general knowledge of the whole subject, and then one gradually forms a style of one's own. For it is well known that in the English language punctuation is, to a great extent, a matter of taste; and Cobbett himself, as you must have seen by this time, is quite peculiar in *his* taste in this matter. He uses far more points than most other writers, especially commas, and he capitalizes far more words than most

others writers. This he does for the sake of emphasis, or of prominence; as, for instance, in the names of the parts of speech throughout this whole grammar. He overdoes this matter I think, and he uses too many italics; for in most sentences the proper emphasis must be left to the reader.

I notice that the tendency in our modern newspapers is to drop as many points as possible. Whether this is done to save space, time, and labor, or whether it is done for the sake of improvement, I do not know; but I do know that the punctuating of our New York editor of to-day presents a remarkable contrast to that of Cobbett; for you may see any day in the leading columns of the *Herald*, the *Tribune*, or the *Times*, sentences of seven or eight lines, with all manner of phrases and clauses, without a single point of any description, except a period at the end. I suppose they will leave that out too, by-and-by. I once heard of a painter who put a period between every word of the sign which he was painting, but put no point at the end. On being reproached with this, he exclaimed: "Why, every fool knows enough to stop when he comes to the end!" I suppose our New York editor would excuse his omission of points on the same principle, that every one should know enough to stop where he ought to stop. Cobbett committed, I think, the opposite error: he seems to have attempted to put a point after every word, or nearly every word, where a pause occurs; which is something that ought not to be done, and indeed never is nor can be done. Those pauses occurring where there are no points are rhetorical pauses, which the feeling or instinct of every good reader leads him to make. We often pause, for instance, for the sake of emphasis; as after *points*, *feeling* and *instinct* in the preceding sentence.

The matter of simple, compound, and complex sentences, which Cobbett merely touches, is very important to those who intend to pass an examination in grammar; for a knowledge of it is necessary in Analysis, and all those who pretend to have a "teaching" knowledge of grammar must know how to analyze. I will therefore try to give a little fuller explanation of it. "I study." This is a simple sentence, because it consists of but one simple proposition or assertion, having but one subject and one predicate. "I study and Charles plays." Here there are *two distinct* propositions, or *two distinct* clauses; hence the sentence is compound. (Mark that word *distinct*.) "When I study, Charles plays." Here there are also two clauses, but not distinct; they are dependent, or rather one depends on the other; hence the sentence is called

complex. The clause that makes complete sense (Charles plays), is the chief clause, and the other is the dependent one. You perceive that the dependent clause simply shows *when* Charles plays; therefore the main thing is the playing of Charles, and the other simply shows the time of his playing. When there is but one proposition or statement, the sentence is simple; when there are two or more distinct or separate propositions, the sentence is compound; but when there are two or more propositions, one depending on the other, the sentence is complex. "Every morning at five o'clock we walk into the forest beyond the river." Here is but one simple statement, *we walk*, and the rest consists of modifying phrases. We walk. When? Every morning. At what part of the morning? At five o'clock. Where? Into the forest. Where is the forest? Beyond the river.

Here is a good, though somewhat mechanical rule, for determining the nature of a sentence: Any sentence that you may cut into two sentences by placing a period after any word in it, is compound; any sentence, consisting of two or more clauses, which you can not thus cut into two sentences, is complex. A sentence consisting of but *one* proposition, having but *one* subject or predicate, is simple. Of Cobbett's three sentences, at the beginning of this paragraph 156, the first is complex, the second compound, the third simple.

And now I see that I have to explain something else that is necessary to a knowledge of Analysis,— I mean the classification of sentences into declarative, interrogative, exclamatory and imperative. "I study" is called a simple *declarative* sentence; declarative, because it declares or affirms something. Nine out of ten of all the sentences we utter are declarative. "Do I study?" is a simple *interrogative* sentence; interrogative, because it asks a question. An interrogation may sometimes be merely a forcible way of declaring something; as, Should any man be deprived of his liberty because he is black? But this is a figure, as you will see by-and-by. "How I love to study!" is a simple *exclamatory* sentence; exclamatory, because it contains an exclamation. "Study, and get on in the world!" is a compound *imperative* sentence; imperative, because it contains a command or an entreaty. Thus, we find that a sentence that declares or affirms anything is declarative; that one that asks a question is interrogative; that one that contains an exclamation is exclamatory; and that one that contains a command or an entreaty is imperative. Let me give you three more examples, covering the whole ground:

John Brown was hanged. (Simple declarative sentence.)
Was John Brown hanged? (Simple interrogative sentence.)
What a spectacle for men and angels! John Brown hanged and Jefferson Davis pardoned! (Compound exclamatory sentence.)
Hang John Brown, and pardon Jefferson Davis. (Compound imperative sentence.)

LETTER XV.

SYNTAX, AS RELATING TO ARTICLES.

MY DEAR JAMES:

157. Before you proceed to my instructions relative to the employing of Articles, you will do well to read again all the paragraphs in Letter IV. Our Articles are so few in number, and they are subject to so little variation in their orthography, that very few errors can arise in the use of them. But, still, errors may arise; and it will be necessary to guard you against them.

158. You will not fall into very gross errors in the use of the Articles. You will not say, as in the erroneous passage cited by DOCTOR LOWTH, "And I persecuted this way unto *the* death," meaning *death generally;* but you may commit errors less glaring. "The Chancellor informed the Queen of it, and she immediately sent for *the* Secretary and Treasurer." Now, it is not certain here, whether the Secretary and Treasurer be not one and the same person; which uncertainty would have been avoided by a repetition of the Article: "*the* Secretary and *the* Treasurer:" and you will bear in mind that, in every sentence, the very first thing to be attended to is *clearness as to meaning.*

159. Nouns which express the whole of a species do not, in general, take the definite Article; as, "*Grass* is good for horses, and *wheat* for men." Yet, in speaking of

the appearance of the face of the country, we say, "*The* grass looks well; *the* wheat is blighted." The reason of this is that we are, in this last case, limiting our meaning to *the* grass and *the* wheat which are on the ground at this time. "How do *hops* sell? *Hops* are dear; but *the* hops look promising." In this respect there is a passage in Mr. Tull which is faulty. "Neither could weeds be of any prejudice to *corn*." It should be "*the* corn;" for he does not mean corn universally, but *the* standing corn, and *the* corn amongst which weeds grow; and, therefore, the definite Article is required.

160. "Ten shillings *the* bushel," and like phrases, are perfectly correct. They mean, "ten shillings *by the* bushel, or *for the* bushel." Instead of this mode of expression we sometimes use, "ten shillings *a* bushel:" that is to say, ten shillings *for a* bushel, or a bushel *at a time*. Either of these modes of expression is far preferable to *per* bushel; for the *per* is not English, and is, to the greater part of the people, a mystical sort of word.

161. The indefinite Article *a*, or *an*, is used with the words day, month, year, and others; as, once *a* day; twice *a* month; a thousand pounds *a* year. It means *in a* day, *in a* month, *in* or *for a* year; and though *per annum* means the same as this last, the English phrase is, in all respects, the best. The same may be said of *per cent.*, that is *per centum*, or, in plain English, *for the hundred*, or *a hundred:* by ten *per centum* we mean *ten for the hundred*, or *ten for a hundred;* and why can we not, then, say, in plain English, what we mean?

162. When there are several nouns following the indefinite Article, care ought to be taken that it *accord with them*. "*A* dog, cat, owl, and sparrow." *Owl* requires *an;* and, therefore, the Article must be repeated in this phrase; as, *a* dog, *a* cat, *an* owl, and *a* sparrow.

163. Nouns, signifying fixed and settled collections of individuals, as *thousand, hundred, dozen, score*, take the

indefinite Article, though they are of plural meaning. It is a certain *mass*, or *number*, or *multitude*, called a *score;* and so on; and the Article agrees with these understood words, which are in the singular number.

In a recent announcement of a new novel by Robert Buchanan, the publishers quote this one line concerning it from the London *Spectator:* "The work of a genius and a poet,"—which is in itself a sufficient comment on the discriminating taste of the publisher and the culture of the critic. But I suppose a man may be a good publisher or a good critic, and yet not know how to write or to select good English.

You must say either "the first and the second class," or "the first and second classes;" not "the first and second class," which would mean *one* class that is both first and second. Take one or two similar examples: "I have read the first and the second chapter, or the first and second chapters; strike out the first and the second line, or the first and second lines." You may say, "the north and south line," because this is one line that runs north and south; but you cannot say "the north and west line." It will not do to say "the two first classes," because there cannot be any such thing as two *first* classes; but "the first two classes," which means simply the two classes that come first in order. So with other similar expressions; as, the first two pages, the first two days, &c. You must say, "He is a better speaker than writer," not "than a writer." "He is a statesman and historian," not "a statesman and an historian." "*Wanted*—A clerk and copyist." How often such an expression is used to mean two persons, whereas it really means one! "There lives in this town a philosopher and a poet." The predicate shows that one person is meant, while the subject indicates two. Mr. White quotes the following announcement from a street-car: "Passengers are requested not to hold conversation with either conductor or driver;" and then says: "Now this implies that there are two conductors and two drivers, and that the passengers are asked not to talk, or, in elegant phrase, 'hold conversation,' with either of them. The simple introduction of *the* rectifies the phrase: 'not to hold conversation with either *the* conductor or *the* driver.'"

I saw the other day in Pearl Street, New York, a place with this sign: "Hatters, Tailors, and Factory Stoves." This really means that the owner of the place has hatters and tailors to sell, as well as factory stoves. It might pass with the sign of the pos-

sessive: "Hatters', Tailors', and Factory Stoves;" but this, too, is bad, because hatters and tailors cannot be placed in the same category with a factory. It should be "Stoves for Hatters, Tailors, and Manufacturers," or "Hatters', Tailors', and Manufacturers' Stoves." But this would probably be too long for the stove-maker; so he preferred writing nonsense. This trying to make everything short is the root of these errors. Here is a man in Beekman Street who calls his Eating-House a "Commercial Lunch!" What kind of a compound may a *commercial* lunch be? Is it not a lunch made of various articles of commerce: beeswax, potatoes, turpentine, pig-iron, and leather? Of course he means a Lunch for Commercial People, or Lunch for Business Men, or still better, Business Men's Lunch; but this, no doubt, was too long for him.

LETTER XVI.

SYNTAX, AS RELATING TO NOUNS.

MY DEAR JAMES

164. Read again Letter V, the subject of which is the Etymology of Nouns. Nouns are *governed*, as it is called, by verbs and prepositions; that is to say, these latter sorts of words *cause nouns to be in such or such a case;* and there must be a *concord*, or an *agreement*, between the Nouns and the other words, which, along with the Nouns, compose a sentence.

165. But these matters will be best explained when I come to the *Syntax of Verbs*, for, until we take the verb into account, we cannot go far in giving rules for the forming of sentences. Under the present head, therefore, I shall content myself with doing little more than to give some farther account of the manner of using the *possessive case* of Nouns; that being the only *case* to denote which our Nouns *vary their endings.*

166. The possessive case was pretty fully spoken of by me in the Letter just referred to; but there are certain

other observations to make with regard to the using of it in sentences. When the Noun which is in the possessive case is expressed by a circumlocution, that is to say by many words in lieu of one, the sign of the possessive case is joined to the last word; as, "*John*, the old farmer's, wife." "*Oliver*, the spy's, evidence." It is however much better to say, "The wife of *John*, the old farmer." The "evidence of *Oliver*, the spy."

167. When two or more Nouns in the possessive case follow each other, and are joined by a conjunctive conjunction, the sign of the possessive case is, when the thing possessed is the same, put to the last noun only; as, "Peter, Joseph, and Richard's estate." In this example, the thing possessed being one and the same thing, the sign applies equally to each of the three possessive Nouns. But "Peter's, Joseph's, and Richard's estate," implies that *each* has an estate; or, at least, it will admit of that meaning being given to it, while the former phrase will not.

168. Sometimes the sign of the possessive case is left out, and a *hyphen* is used in its stead; as, "Edwards, the *government-spy*." That is to say, "the government's spy;" or, "the spy *of the* government." These two words, joined in this manner, are called a *compound* Noun; and to this compounding of Nouns our language is very prone. We say "*chamber-floor*, *horse-shoe*, *dog-collar*;" that is to say, "*chamber's* floor, *horse's* shoe, *dog's* collar."

169. This is an advantage peculiar to our language. It enables us to say much in few words, which always gives strength to language; and, after *clearness*, strength is the most valuable quality that writing or speaking can possess. "The Yorkshiremen flew to arms." If we could not compound our words, we would have to say, "The men of the shire of York flew to arms." When you come to learn French, you will soon see how much the English language is better than the French in this respect.

170. You must take care, when you use the possessive case, not to use after it words which create a confusion in meaning. HUME has this sentence: "They flew to arms and attacked *Northumberland's* house, *whom* they put to death." We know what is *meant*, because *whom* can relate to *persons* only; but if it had been an attack on Northumberland's *men*, the meaning would have been that the *men were put to death.* However, the sentence, as it stands, is sufficiently incorrect. It should have been: "They flew to arms, and attacked the house of Northumberland, whom they put to death."

171. A passage from DOCTOR HUGH BLAIR, the author of *Lectures on Rhetoric*, will give you another instance of error in the use of the possessive case. I take it from the 24th Lecture: "In comparing Demosthenes and Cicero, most of the French critics are disposed to give the preference to the latter. P. Rapin, the Jesuit, in the parallels which he has drawn between some of the most eminent Greek and Roman writers, uniformly decides in favor of the Roman. For the preference which he gives to Cicero, he assigns and lays stress on one reason, of a pretty extraordinary nature, viz., that Demosthenes could not possibly have so clear an *insight* as Cicero *into* the manners and passions of men. Why? because *he* had not the advantage of *perusing Aristotle's Treatise on Rhetoric*, wherein, says our critic, *he* has fully laid open that *mystery;* and to support this weighty argument, *he* enters into a controversy with A. Gellius, in order to prove that Aristotle's Rhetoric was not published till after Demosthenes had spoken, *at least*, his most considerable orations." It is surprising that the Doctor should have put such a passage as this upon paper, and more surprising that he should leave it in this state after having perused it with that care which is usually employed in examining writings that are to be put into print, and especially writings in which every word is expected to be

used in a proper manner. In Bacon, in Tull, in Blackstone, in Hume, in Swift, in Bolingbroke: in all writers, however able, we find errors. Yet, though many of their sentences will not stand the test of strict grammatical criticism, the *sense* generally is clear to our minds; and we read on. But, in this passage of Dr. Blair, *all is confusion:* the mind is puzzled: we at last hardly know *whom* or *what* the writer is talking about, and we fairly come to a stand.

172. In speaking of the many faults in this passage, I shall be obliged to make here observations which would come under the head of pronouns, verbs, adverbs, and prepositions. The first two of the three sentences are in themselves rather obscure, and are well enough calculated for ushering in the complete confusion that follows. The *he*, which comes immediately after the word *because*, may relate to Demosthenes; but to what Noun does the second *he* relate? It would, when we first look at it, seem to relate to the same Noun as the first *he* relates to; for the Doctor cannot call *Aristotle's Treatise on Rhetoric* a *he*. No: in speaking of this the Doctor says "*wherein*;" that is to say, *in which*. He means, I dare say, that the *he* should stand for *Aristotle*; but it does not stand for Aristotle. This Noun is not a *nominative* in the sentence; and it cannot have the pronoun relating to it as such. This *he* may relate to *Cicero*, who may be supposed to have laid open a mystery in the perusing of the treatise; and the words which follow the *he* would seem to give countenance to this supposition; for *what* mystery is meant by the words "*that* mystery?" Is it the mystery of *rhetoric*, or the mystery *of the manners and passions of men?* This is not all, however; for the Doctor, as if bewitched by the love of confusion, must tack on another long member to the sentence, and bring forward another *he* to stand for *P. Rapin*, whom and whose argument we have, amidst the general confusion, wholly forgotten.

There is an error also in the use of the active participle *perusing.* "Demosthenes could not have so complete an insight as Cicero, because he *had not* the advantage of *perusing.* That is to say, the advantage of being engaged in *perusing.* But this is not what is meant. The Doctor means that he *had not had* the advantage of *perusing;* or, rather, that he *had not* the advantage *of having perused.* In other words, that Demosthenes could not have, or possess, a certain kind of knowledge at the time when he made his orations, because at that time, he had not, or did not possess, the advantage of *having perused,* or having *finished to peruse,* the treatise of Aristotle. Towards the close of the last sentence the adverb "*at least*" is put in a wrong place. The Doctor means, doubtless, that the adverb should apply to *considerable,* and not to *spoken;* but, from its being improperly placed, it applies to the latter, and not to the former. He means to say that Demosthenes had spoken the most considerable, *at least,* of his orations; but as the words now stand, they mean that he had *done the speaking part to them,* if he had done nothing more. There is an error in the use of the word "*insight,*" followed, as it is, by "*into.*" We may have a *look,* or *sight, into* a house, but not an *insight.* This would be to take an *inside view of an inside.*

173. We have here a pretty good proof that a knowledge of the Greek and Latin is not sufficient to prevent men from writing bad English. Here is a *profound scholar,* a teacher of Rhetoric, discussing the comparative merits of Greek and Latin writers, and disputing with a French critic; here he is writing English in a manner more incorrectly than you will, I hope, be liable to write it at the end of your reading of this little book. Lest it should be supposed that I have taken great pains to hunt out this erroneous passage of Doctor Blair, I will inform you that I have hardly looked into his book. Your brothers, in reading it through, marked a great number

of erroneous passages, from amongst which I have selected the passage just cited. With what propriety, then, are the Greek and Latin languages called the "*learned* languages?"

We take the form *'s* from the Germans, and hence it is called the Saxon possessive; we take the form *of the* from the French, and hence it is called the Norman possessive. You will notice that the Saxon possessive is used, generally, in speaking of *living* things, and the other in speaking of things *without life:* "the man's hat, the horse's tail, the cow's horns; the top of the house, the lid of the kettle, the color of the apple;" but this is by no means *always* the case, for we can speak of the *mountain's top* and of the *roar of the lion.* Sometimes we are obliged to use the Norman possessive to avoid a misconstruction, as in the case of "the house of Northumberland," above quoted.

There is another peculiar use of the possessive case, which Cobbett has not mentioned. "He spoke of *John's* (*his*) going to college. There is no doubt of the *bill's* passing the House." We often see the objective used in such cases, instead of the possessive; but the latter is correct. Just as we say "a friend of mine, of thine, of his, of hers, of yours, of theirs," so we say "a soldier of the king's, a horse of my neighbor's, a book of George's." So Cobbett ought to have said above, "this erroneous passage of Doctor Blair's."

You notice that the only case-change an English noun can undergo is the addition of 's in the possessive. In both English and French the nominative and objective cases of nouns are invariable. Not so in German. The following sentence will show you at a glance the difference between our language and the German in this respect:

nom.	obj.	nom.	obj.
The *boy* loves the *traveler.*		*The traveler* loves *the boy.*	
Der *Knabe* liebt den *Reisenden.*		*Der Reisende* liebt *den Knaben.*	

Here is a curious passage on this subject from Mr. White's "Everyday English"—a passage which, to prevent a confusion of apostrophes, I give in one paragraph, with none but Mr. White's points, except the dash at the beginning and at the end:

—The Board of Civil Service Examiners at Washington gave, as a test of the knowledge of the use of the apostrophe as a sign of the possessive case, the following sentence: "The Commissioner of Custom's decisions are correct," requiring the apostrophe to be

placed after "Customs." A dispute having arisen upon the point, and it being contended that the proper form was "The Commissioner's (of Customs) decisions are correct," an officer of the Treasury Department submitted the question to me for an opinion.—

And Mr. White declares that the decision of the Civil Service Board is correct. Now I am positive that, in this case, both Mr. White and the Board of Examiners are wrong. It is when a word or title is in the possessive case PLURAL that we put merely an apostrophe after the *s;* as, the Examiners' duties; the Commissioners' affairs; but the term "Commissioner of Customs" is *not* plural, any more than "Secretary of the Treasury" is plural. We say "The Secretary of the Treasury's report;" and if the Saxon possessive is to be used, grammar *demands* that we say "The Commissioner of Customs's decisions;" for the sign of the possessive is for the *whole expression*, and not simply for *customs*. An apostrophe alone may be placed after *Customs*, because it will *sound* better, but not because it is *grammatical*.

But why use this form at all? Has it not been from a desire to avoid just such awkward expressions that the Norman possessive has come into use? Does it not sound much better to say "The decisions of the Commissioner of Customs" than "The Commissioner of Customs's decisions?"—By the bye, is it not somewhat remarkable, not to say absurd, that the Board of Examiners should give applicants for inferior offices questions such as they themselves are in dispute about, and concerning which even critics in language are at variance?

LETTER XVII.

SYNTAX, AS RELATING TO PRONOUNS.

MY DEAR JAMES:

174. You will now read again Letter VI. It will bring you back to the subject of pronouns. You will bear in mind that personal Pronouns *stand for*, or in the *place of*, nouns; and that the greatest care ought always to be taken in using them, because, being small words, and in

frequent use, the proper weight of them is very often unattended to.

175. You have seen in the passage from Doctor Blair, quoted in the foregoing Letter, what confusion arises from the want of taking care that the Pronoun relate *clearly* to its nominative case, and that it be not left to be understood to relate to anything else. Little words, of great and sweeping influence, ought to be used with the greatest care; because errors in the using of them make such great errors in point of meaning. In order to impress, at the outset, these precepts on your mind, I will give you an instance of this kind of error from ADDISON; and, what is well calculated to heighten the interest you ought to feel upon the occasion, is, that the sentence which contains the error is, by Doctor Blair, held forth to students of languages, in the University of Edinburgh, as *a perfect model of correctness and of elegance.* The sentence is from Addison's Spectator, Number 411. "There are, indeed, but very few who know how to be idle and innocent, or have a relish of any pleasures that are not criminal; every diversion *they* take is at the expense of some one virtue or other, and *their* very first step out of business is into vice or folly." Dr. Blair says: "Nothing can be more elegant, or more finely turned, than this sentence. It is neat, *clear*, and musical. We could hardly alter one word, or displace one member, without spoiling it. Few sentences are to be found more finished, or more happy." See Blair's 20th Lecture on Rhetoric.

176. Now, then, my dear little James, let us see whether we plain English scholars have not a little more judgment than this professor in a *learned* University, who could not, you will observe, be a *Doctor*, until he had preached a sermon in the Latin language. What does the pronoun *they* mean in this sentence of Mr. Addison? What noun does it *relate to;* or *stand for?* What noun is the *nomi-*

native of the sentence? The nominative of the sentence is the word *few*, meaning *few persons*. Very well, then, the Pronoun *they* relates to this nominative; and the meaning of the sentence is this: "That but few persons know how to be idle and innocent; that *few persons* have a relish of any pleasures that are not criminal; that every diversion *these few persons* take is at the expense of some one virtue or other, and that the very first step *of these few persons* out of business is into vice or folly." So that the sentence says *precisely the contrary* of what the author meant; or, rather, the whole is perfect nonsense. All this arises from the misuse of the Pronoun *they*. If, instead of this word, the author had put *people in general*, or *most people*, or *most men*, or any word or words of the same meaning, all would have been right.

177. I will take another instance of the consequence of being careless in the use of personal Pronouns. It is from JUDGE BLACKSTONE, Book II, Chapter 6. "For the custom of the manor has, in both cases, so far superseded the will of the lord, that, provided the services be performed, or stipulated for by fealty, he cannot, in the first instance, refuse to admit the heir of *his* tenant upon *his* death; nor, in the second, can *he* remove *his* present tenant so long as *he* lives." Here are *lord*, *heir*, and *tenant*, all confounded. We may *guess* at the Judge's meaning; but we cannot say that we *know* what it is; we cannot say that we are *certain whose* life, or *whose* death, he is speaking of.

178. Never write a personal Pronoun, without duly considering *what noun* it will, upon a reading of the sentence, be *found to relate to*. There must be a noun, expressed or understood, to which the Pronoun clearly relates, or you will not write sense. "The *land-holder* has been represented as a monster which must be hunted down, and the *fund-holder* as a still greater evil, and both have been described as rapacious creatures, who

take from the people fifteen pence out of every quartern loaf. *They* have been told that Parliamentary Reform is no more than a half measure, changing only one set of thieves for another; and that *they* must go to the land, as nothing short of that would avail *them*." This is taken from the memorable report of a committee of the House of Lords, in 1817, on which report the cruel dungeon bill was passed. Now, to *what nouns* do these Pronouns relate? Who are the *nominatives* in the first sentence? The *land-holder* and the *fund-holder*, to be sure; and, therefore, to them do the Pronouns relate. These lords mean, doubtless, that the *people* had been told that the *people* must go to the land; that nothing else would avail the *people;* but, though they *mean* this, they do not *say* it; and this part of their report is as false in grammar as other parts of the report were in fact.

179. When there are two or more nouns connected by a copulative conjunction, and when a Personal Pronoun is made use of to relate to them, or stand for them, you must take care that the personal Pronoun *agree* with them in number. "He was fonder of nothing than of *wit* and *raillery;* but he is far from being happy in it." This Doctor Blair, in his 19th Lecture, says of Lord Shaftesbury. Either *wit* and *raillery* are one and the same thing, or they are different things; if the former, one of the words is used unnecessarily; if the latter, the Pronoun ought to have been *them* and not *it*.

"I learned from Macaulay . . . . . never to be afraid of using the same word or name over and over again, if by that means anything could be added to clearness or force. Macaulay never goes on, like some writers, talking about 'the former' and 'the latter,' 'he, she, it, they,' through clause after clause, while his reader has to look back to see which of several persons it is that is so darkly referred to. No doubt a pronoun, like any other word, may often be repeated with advantage, if it is perfectly clear who is meant by the pronoun. And with Macaulay's pronouns, it is always perfectly clear who is meant by them."—E. A.

Freeman, in the *International Review.* Quoted by A. S. Hill. I have frequently noticed that there is a misty uncertainty as to the meaning of sentences in which "the former" and "the latter" occur. How often one is obliged to stop for a moment, and consider which *is* "the former" and which "the latter"! I do not say you must not use these words; Cobbett, you see, uses them quite clearly in this last paragraph; but it is, generally, better to repeat the words for which they stand.

180. When, however, the nouns take the disjunctive conjunction *or*, the Pronoun must be in the singular; as, "When he shoots a partridge, a pheasant, or a woodcock, he gives it away."

181. Nouns of number, or multitude, such as *Mob*, *Parliament*, *Rabble*, *House of Commons*, *Regiment*, *Court of King's Bench*, *Den of Thieves*, and the like, may have Pronouns agreeing with them either in the singular or in the plural number; for we may, for instance, say of the House of Commons, "*They* refused to hear evidence against Castlereagh when Mr. Maddox accused him of having sold a seat;" or, "*It* refused to hear evidence." But we must be uniform in our use of the Pronoun in this respect. We must not, in the same sentence, and applicable to the same noun, use the singular in one part of the sentence and the plural in another part. We must not, in speaking of the House of Commons, for instance, say, "*They* one year voted unanimously that cheap corn was an evil, and the next year *it* voted unanimously that dear corn was an evil." There are persons who pretend to make very nice distinctions as to the cases when these nouns of multitude ought to take the singular, and when they ought to take the plural, Pronoun; but these distinctions are too nice to be of any real use. The rule is this: that nouns of multitude *may* take *either* the singular, or the plural, Pronoun; but not both in the same sentence.

This will never do; it is far too indefinite. The pronoun standing for a noun of multitude is used in the singular if the idea of

unity is to be conveyed, and in the plural if the idea of *plurality* is to be conveyed. Let me illustrate with some of these very nouns which Cobbett so sarcastically huddles together: "The mob now began to scatter in every direction, and *they* set up a hideous yell as *they* moved off. The mob came on in one compact body, and *it* did not fail to press *itself* through the gates of the palace. He hated the rabble, because *they* hated him. The rabble of New York *has* a language and a literature of *its* own. The House of Commons could not agree on any measure of Reform; so they were dismissed by the king. The House of Commons was unanimous in condemning the obstructing Irish members, and *it* suspended them for two weeks. When the Court of King's Bench passed sentence on Mr. Cobbett, *it* refused to reconsider *its* decision. I have been informed that there was some difference of opinion in the Court of King's Bench concerning Mr. Cobbett's case, though *they* refused to reconsider *their* decision. Here is a den of thieves; suppress *it*. We came upon a den of thieves, who were so numerous that we did not venture to attack *them*." Thus, you see, that the singularity or plurality of the pronoun standing for a noun of multitude depends entirely upon whether an idea of *unity* or of *plurality* is to be conveyed.

182. As to *gender*, it is hardly possible to make a mistake. There are no terminations to denote gender, except in the third person singular, *he*, *she*, or *it*. We do, however, often *personify* things. Speaking of a *nation*, we often say *she*; of the *sun*, we say *he*; of the *moon*, we say *she*. We may personify things at our pleasure; but we must take care to be consistent, and not call a thing *he*, or *she*, in one part of a sentence, and *it* in another part. The occasions when you ought to personify things, and when you ought not, cannot be stated in any *precise rule*. Your own taste and judgment will be your best guides. I shall give you my opinion about figures of speech in a future Letter.

In an article on Longfellow, in the North American Review for July, 1882, the writer speaks of meeting "Mrs. William Cullen Bryant and her daughter, and others of my countrymen," but you can hardly make such a blunder as that.

183. Nouns which denote sorts, or kinds, of living crea-

tures, and which do not of themselves distinguish the male from the female, such as *rabbit, hare, hog, cat, pheasant, fowl*, take the neuter Pronoun, unless we happen to know the gender of the individual we are speaking about. If I see you with a cock pheasant in your hand, I say, "Where did you shoot *him?*" but if you tell me you have a *pheasant*, I say, "Where did you shoot *it?*" (See paragraphs 42 and 43.)

184. The personal Pronouns in their *possessive case* must, of course, agree in number and gender with their correspondent nouns or Pronouns: "John and Thomas have been so foolish as to sell *their* land and to purchase what is called stock; but their sister, who has too much sense to depend on a bubble for her daily bread, has kept *her* land; *theirs* is gone forever; but *hers* is safe." So they must, also, in their *objective case:* "John and Thomas will lose the interest of their money, which will soon cease to be paid to *them.* The rents of their sister will be regularly paid to *her;* and Richard will also enjoy his income, which is to be paid to *him* by his sister." If there be nouns of both genders used before Pronouns, care must be taken that no confusion or obscurity arise from the misuse of the Pronoun. HUME says: "They declared it treason to attempt, imagine, or speak evil of the king, queen, or *his* heirs." This has, at least, a meaning, which shuts out the heirs of the queen. In such a case the feminine as well as the masculine pronoun should be used: "*his* or *her* heirs."

185. Take care, in using the personal Pronouns, not to employ the *objective case* where you ought to employ *the nominative;* and take care also of the *opposite error.* "Him strikes I: Her loves he." These offend the ear at once. But when a number of words come in between the discordant parts, the ear does not detect the error. "It was some of those who came hither last night, and went away this morning, who did the mischief, and not

my brother and *me.*" It ought to be "my brother and *I.*" For I am not, in this instance, the *object* but the *actor*, or supposed actor. "Who broke that glass?" "It was *me.*" It ought to be *I;* that is to say, "It was *I who broke it.*" Fill up the sentence with all the words that are understood; and if there be errors, you will soon discover them. After the words *than* and *as*, this error, of putting the objective for the nominative, is frequently committed; as, "John was very rich, but Peter was richer than *him;* and, at the same time, as learned as *him*, or any of his family." It ought to be richer than *he;* as learned as *he;* for the full meaning here is, "richer than *he was;* as learned as *he was.*" But it does not always happen that the nominative case comes after *than* or *as.* "I love you more than *him;* I give you more than *him;* I love you as well as *him;*" that is to say, I love you more than *I love him;* I give you more than *I give to him;* I love you as well as *I love him.* Take away *him* and put *he*, in all these cases, and the grammar is just as good, only the *meaning is quite different.* "I love you as well as *him*," means that I love you as well *as I love him;* but "I love you as well as *he*," means, that I love you as well *as he loves you.*

186. You see, then, of what importance this distinction of *cases* is. But you must not look for *this word*, or *that word*, coming before or coming after to be *your guide.* It is reason which is to be your sole guide. When the person or thing represented by the Pronoun is the *object*, then it must be in the objective case; when it is the *actor*, or when it is merely the person or thing said *to be* this or that, then it must be in the nominative case. Read again paragraphs 46, 47, and 48, of Letter V.

187. The errors committed with regard to the confounding of cases arise most frequently when the Pronouns are placed, in the sentences, at a great distance from the words which are connected with them, and which

determine the case. "*He* and his sister, and not their uncle and cousins, the estate was given to." Here is nothing that *sounds* harsh; but, bring the Pronoun close to the preposition that demands the objective case; say the estate was given *to he;* and then you perceive the grossness of the error in a moment. "The work of national ruin was pretty effectually carried on *by* the ministers; but more effectually by the paper-money makers than *they.*" This does not hurt the ear; but it ought to be *them;* "more effectually than *by them.*"

188. The Pronouns *mine, thine, theirs, yours, hers, his,* stand frequently by themselves; that is to say, not followed by any noun. But then the noun is *understood.* "That is *hers.*" That is to say, her *property;* her *hat,* or whatever else. No difficulty can arise in the use of these words.

Except one. Some people erroneously write these words with an apostrophe; *our's,* etc. A gentleman once showed me a letter which he considered perfect. So it was; all except the last two words, which were written thus: "Your's truely."

189. But the use of the personal Pronoun *it* is a subject of considerable importance. Read again paragraphs 60 and 61, Letter VI. Think well upon what you find there; and when you have done that, proceed with me. This Pronoun with the verb *to be* is in constant use in our language. To say, "Your uncle *came* hither last night," is not the same thing as to say, "*It was* your uncle *who came* hither last night," though the *fact* related be the same. "*It is I* who write" is very different from "*I write,*" though in both cases, my writing is the fact very clearly expressed, and is one and the same fact. "*It is those men* who deserve well of their country," means a great deal more than "*Those men* deserve well of their country." The principal verbs are the same; the prepositions are the same; but the real meaning is different. "*It is* the dews and showers *that* make the grass grow,"

is very different from merely observing, "*Dews and showers make* the grass grow."

190. Doctor Lowth has given it as his opinion, that it is *not correct* to place plural nouns or pronouns after the *it*, thus used; an opinion which arose from the want of a little more reflection. The *it* has nothing to do, grammatically speaking, with the rest of the sentence. The *it*, together with the verb *to be*, express *states of being*, in some instances, and in others this phrase serves to mark, in a strong manner, *the subject*, in *a mass*, of what is about to be affirmed or denied. Of course, this phrase, which is in almost incessant use, may be followed by nouns and pronouns in the singular, or in the plural number. I forbear to multiply examples, or to enumerate the various ways in which this phrase is used, because one grain of reasoning is worth whole tons of memory. The *principle* being once in your mind, it will be ready to be applied to every class of cases, and every particular case of each class.

An example, however, often sticks where the principle fails to do so. "It is I; it is thou; it is he; it is she; it is we; it is you; it is they; it is the devil; it is the devils." These are all correct; because *it* is the subject, *is* is the predicate, and what follows is the attribute, which may be singular or plural.—I cannot help remarking that the pause after "thus used" in the third line of the above paragraph is a capital example of the place where the dash ought to be used.

191. For want of reliance on principles, instead of examples, how the latter have swelled in number, and grammar-books in bulk! But it is much easier to quote examples than to lay down principles. For want of a little thought as to the matter immediately before us, some grammarians have found out "an *absolute case*," as they call it; and Mr. Lindley Murray gives an instance of it in these words: "Shame *being* lost, all virtue is lost." The full meaning of the sentence is this: *It being*, or *the*

state of things being such, that "shame *is* lost, all virtue is lost."

This "shame being lost" is called by some grammarians a participial phrase; by others, an abridged participial clause, standing for "As shame is lost." Therefore, "all virtue is lost, as shame is lost;" the second clause modifying the first. "On arriving in London, I went to see Madame Tussaud's Exhibition." These first four words form another such participial phrase or abridged participial clause, modifying *went:* "I went, on arriving in London (when I arrived in London), to see Madame Tussaud's Exhibition."—This *absolute case* is something like what other grammarians call the *independent* case: "Charles, mind what you are about. Sir, I deny the charge. I have seen a wax figure of Cobbett, boys, at Madame Tussaud's Exhibition." *Charles*, *Sir*, *boys*, are here said to be in the *independent* case, because they have no bearing on any other part of the sentence. These words may, however, be resolved into the *nominative* case, thus: To you, whose name is Charles, I have this to say: mind what you are about. To you, who are a Sir—to you, who are boys, etc. Remember, therefore, that any word standing *alone* like these, or in an exclamation—O Roscoe! Roscoe! what an ass you have made of yourself!—is said to be in the *independent* case.

192. Owing to not seeing the use and power of this *it* in their true light, many persons, after long puzzling, think they must make the pronouns which immediately follow conform to the cases which the verbs and prepositions of the sentence demand. "It is *them*, and not the people, whom I address myself *to*." "It was *him*, and not the other man, that I sought *after*." The prepositions *to* and *after* demand an objective case; and they have it in the words *whom* and *that*. The Pronouns which follow the *it* and the verb *to be* must *always* be in the *nominative case*. And, therefore, in the above examples, it should be, "It is *they*, and not the other people;" "It was *he*, and not the other man."

193. This *it* with its verb *to be* is sometimes employed with the preposition *for*, with singular force and effect. "*It is for* the guilty to live in fear, to skulk and to hang

their heads; but *for* the innocent *it is* to enjoy ease and tranquillity of mind, to scorn all disguise, and to carry themselves erect." This is much more forcible than to say, "The guilty generally live in fear," and so on, throughout the sentence. The word *for*, in this case, denotes appropriateness, or fitness; and the full expression would be this: "To the *state of being*, or *state of things* called guiltiness, to live in fear *is fitting*, or is *appropriate*." If you pay attention to the *reason* on which the use of these words is founded, you will never be at a loss to use them properly.

194. The word *it* is the greatest troubler that I know of in language. It is so small, and so convenient, that few are careful enough in using it. Writers seldom spare this word. Whenever they are at a loss for either a nominative or an objective to their sentence, they, without any kind of ceremony, clap in an *it*. A very remarkable instance of this pressing of poor *it* into actual service, contrary to the laws of grammar and of sense, occurs in a piece of composition, where we might, with justice, insist on correctness. This piece is on the subject of grammar; it is a piece written by a *doctor of divinity*, and read by him to students in grammar and language in an academy; and the very sentence that I am now about to quote is selected, by the author of a grammar, as testimony of high authority in favor of the excellence of his work. Surely, if correctness be ever to be expected, it must be in a case like this. I allude to two sentences in the "Charge of the Reverend Doctor Abercrombie to the Senior Class of the Philadelphia Academy," published in 1806; which sentences have been selected and published by Mr. Lindley Murray, as a testimonial of the *merits* of his grammar; and which sentences are, by Mr. Murray, given to us in the following words: "The unwearied *exertions* of this gentleman *have* done more towards elucidating the obscurities, and embellishing the structure

of our language, than any *other writer* on the subject. *Such a work* has long been wanted; and, from the success with which *it* is executed, cannot be too highly appreciated."

195. As, in the learned Doctor's opinion, obscurities can be elucidated, and, as, in the same opinion, MR. MURRAY is an able hand at this kind of work, it would not be amiss were the grammarian to try his skill upon this article from the hand of his dignified eulogist; for here is, if one may use the expression, a constellation of obscurities. Our poor oppressed *it*, which we find forced into the Doctor's service in the second sentence, relates to "*such a work*," though this work is nothing that has an existence, notwithstanding it is said to be "*executed*." In the first sentence, the "exertions" become, all of a sudden, a "*writer*;" the *exertions* have done more than "any *other* writer;" for, mind you, it is not the *gentleman* that has done anything; it is "the *exertions*" that *have* done what is said to be done. The word *gentleman* is in the possessive case, and has nothing to do with the action of the sentence. Let us give the sentence a turn, and the Doctor and the grammarian will hear how it will sound. "This gentleman's *exertions* have done more than any *other writer*." This is upon a level with "This gentleman's *dog* has killed more hares than any *other sportsman*." No doubt DOCTOR ABERCROMBIE *meant* to say, "the exertions of this gentleman have done more *than those* of any other writer. Such a work as this gentleman's has long been wanted: his work, seeing the successful manner of its execution, cannot be too highly commended." *Meant!* No doubt at all of that! And when we hear a Hampshire ploughboy say, "Poll Cherrycheek have giv'd I thick handkecher," we know very well that he *means* to say, "Poll Cherrycheek has given me this handkerchief;" and yet, we are but too apt to *laugh at him*, and to call him *ignorant*; which is wrong; be-

cause he has no pretensions to a knowledge of grammar, and he may be very skillful as a ploughboy. However, we will not laugh at Doctor Abercrombie, whom I knew, many years ago, for a very kind and worthy man, and who baptized your elder brother and elder sister. But if we may, in any case, be allowed to laugh at the ignorance of our fellow-creatures, that case certainly does arise when we see a professed grammarian, the author of voluminous precepts and examples on the subject of grammar, producing, in imitation of the possessors of invaluable medical secrets, testimonials vouching for the efficacy of his literary panacea, and when, in those very testimonials, we find most flagrant instances of bad grammar.

196. However, my dear James, let this strong and striking instance of the misuse of the word *it* serve you in the way of caution. Never put an *it* upon paper without thinking well of what you are about. When I see many *its* in a page, I always tremble for the writer.

197. We now come to the second class of Pronouns; that is so say, the Relative Pronouns, of which you have had some account in Letter VI, paragraphs 62, 63, 64, 65, and 66; which paragraphs you should now read over again with attention.

198. *Who*, which becomes *whose* in the possessive case, and *whom* in the objective case, is, in its use, confined to rational beings; for though some writers do say, "the country *whose* fertility is great," and the like, it is not correct. We must say, "the country the fertility of *which*." But if we *personify*; if, for instance, we call a nation a *she*, or the sun a *he*, we must then, if we have need of relative Pronouns, take these, or the word *that*, which is a relative applicable to rational as well as irrational and even inanimate beings.

It is now correct to say "the country whose fertility is great;" for it is a much more direct and easy way of speaking than the other. This form was begun by the poets, and is now constantly used by prose-writers.

199. The errors which are most frequent in the use of these relative Pronouns arise from not taking care to use *who* and *whom*, when they are respectively demanded by the verbs or prepositions. "*To who* did you speak? *Whom* is come to-day?" These sentences are too glaringly wrong to pass from our pens to the paper. But, as in the case of personal Pronouns, when the relatives are placed, in the sentence, at a distance from their antecedents, or verbs or prepositions, the ear gives us no assistance. "*Who*, of all the men in the world, do you think I *saw*, the other day? *Who*, for the sake of his numerous services, the office was given to." In both these cases it ought to be *whom*. Bring the verb in the first, and the preposition in the second case, closer to the relative; as, *who I saw; to who the office was given;* and you will see the error at once. But take care! "*Whom* of all men in the world, do you think *was* chosen to be sent as an ambasssador? *Whom*, for the sake of his numerous services, *had* an office of honor bestowed upon him." These are nominative cases, and ought to have *who;* that is to say, "*who was chosen; who had an office.*" I will not load you with numerous examples. Read again about the *nominative* and *objective* cases in Letter V. Apply your *reason* to the subject. *Who* is the nominative, and *whom* the objective. Think well about the matter, and you will want no more examples.

200. There is, however, an erroneous way of employing *whom*, which I must point out to your particular attention, because it is so often seen in very good writers, and because it is very deceiving. "The Duke of Argyle, *than whom* no man was more hearty in the cause." "Cromwell, *than whom* no man was better skilled in artifice." A hundred such phrases might be collected from Hume, Blackstone, and even from Doctors Blair and Johnson. Yet they are bad grammar. In all such cases, *who* should be made use of; for it is *nominative* and not

objective. "No man was more hearty in the cause *than he was;* no man was better skilled in artifice *than he was.*" It is a very common Parliament-house phrase, and therefore presumptively *corrupt;* but it is a Doctor Johnson phrase too; "Pope, *than whom* few men had more vanity." The Doctor did not say, "Myself, *than whom* few men have been found more base, having, in my Dictionary, described a pensioner as a slave of state, and having afterwards myself become a pensioner."

201. I differ, as to this matter, from Bishop Lowth, who says that "the relative *who*, having reference to no verb or preposition understood, but only to its antecedent, when it follows *than*, is *always in the objective case;* even though the Pronoun, if substituted in its place, would be in the nominative." And then he gives an instance from Milton. "Beelzebub, *than whom*, Satan except, none higher sat." It is curious enough that this sentence of the Bishop is, itself, ungrammatical! Our poor unfortunate *it* is so placed as to make it a matter of doubt whether the Bishop meant it to relate to *who*, or to *its antecedent.* However, we know his meaning; but, though he says that *who*, when it follows *than*, is always in the objective case, he gives us no *reason* for this departure from a clear general principle; unless we are to regard as a reason the example of Milton, who has committed many hundreds, if not thousands, of grammatical errors, many of which the Bishop himself has pointed out. There is a sort of side-wind attempt at a reason in the words, "having reference to no *verb* or *preposition* understood." I do not see the *reason*, even if this could be; for it appears to me impossible that a Noun or Pronoun can exist in a grammatical state without having reference to some *verb* or *preposition*, either expressed or understood. What is meant by Milton? "Than Beelzebub none *sat* higher, except Satan." And when, in order to avoid the repetition of the word Beelzebub, the relative

becomes necessary, the full construction must be, "no devil sat higher *than who* sat, except Satan;" and not "no devil sat higher *than whom* sat." The supposition that there can be a Noun or Pronoun which has reference to *no verb*, and *no preposition*, is certainly a mistake.

Mr. Swinton quotes these two sentences about Pope and Beelzebub, and then says: "This construction must be regarded as anomalous; but it has been used by so many reputable authors that we can scarcely refuse to accept it." It seems to me that this is one of those cases where long usage has made a faulty expression *appear* or *sound* correct; just as there are many people who think "it is me" sounds much better than "it is I." I am sure "than whom" is now much more rarely used than formerly.

202. *That*, as a relative, may, as we have seen, be applied either to persons or things; but it has no possessive case, and no change to denote the other two cases. We say, "the man *that gives*, and the man *that* a thing is given *to*." But there are some instances when it can hardly be called proper to use *that* instead of *who* or *whom*. Thus, directly after a proper name, as in HUME: "The Queen gave orders for taking into custody the Duke of Northumberland, who fell on his knees to the Earl of Arundel, *that* arrested him." *Who* would have been much better, though there was a *who* just before in the sentence. In the same author: "Douglas, *who* had prepared his people, and *that* was bent upon taking his part openly." This never ought to be, though we see it continually. *Either* may do; but *both* never ought to be relatives of the same antecedent, in the same sentence. And, indeed, it is very awkward, to say the least of it, to use *both* in the same sentence, though relating to different antecedents, if all these be names of rational beings. "The Lords, *who* made the first false report, and the Commons, *that* seemed to vie with their Lordships in falsehood, became equally detested." *That*, as a relative, cannot take the preposition or verb immediately before it. I may say "The man *to whom* I gave a book;" but I cannot say, "the

man *to that* I gave a book;" nor "the knife *to that* I put a handle." "Having defeated *whom*, he remained quiet;" but we cannot, in speaking of persons, say, "Having defeated *that*, he remained quiet."

203. *Which*, as a relative Pronoun, is applied to irrational beings only, and, as to those beings, it may be employed indifferently with *that*, except in the cases where the relative comes directly after a *verb* or a *preposition*, in the manner just spoken of. We say, "the town, the horse, the tree, *which;* or *to which;*" and so on. And we say, "the town, the tree, the horse, *that;*" but not *to* or *for that.*

204. We may, in speaking of nouns of multitude, when the multitude consists of rational creatures, and when we choose to consider it as a *singular* noun, make use of *who* or *whom*, or of *which*, just as we please. We may say, "the crowd *which* was going up the street;" or "the crowd *who* was going up the street;" but we cannot make use of both in the same sentence and relating to the same noun. Therefore, we cannot say, "the crowd *who* was going up the street and *which* was making a great noise." We must take the *who*, or the *which*, in both places. If such noun of multitude be used in the *plural number*, we then go on with the idea of the rationality of the individuals in our minds; and therefore we make use of *who* and *whom*. "The assembly, *who* rejected the petition, but to *whom* another was immediately presented."

205. *Who*, *whose*, *whom*, and *which*, are employed in asking questions; to which, in this capacity, we must add *what*. "*Who* is in the house? *Whose* gun is that? *Whom* do you love best? *What* has happened to-day?" *What* means, generally, as a relative, "*the thing which;*" as, "Give me what I want." It may be used in the nominative and in the objective case: "What happens to-day may happen next week; but I know not to *what* we shall

come at last;" or, "*The thing which* happens to-day may happen next week; but I know not *the thing which* we shall come to at last."

This little word *what* may, sometimes, curiously enough, be both subject and object in the same sentence. "Give what is proper. Tell me what was done." In the first sentence, *what* is the object of *give* and the subject of *is proper;* and may be set down as equal to *that which*. In the second sentence, *what* is the object of *tell* and the subject of *was done; me* being the indirect object, or adverbial phrase, meaning *to me*. You may also say that the whole clause *what was done* is the object of *tell*, and call it an objective clause.

Notice that the relative pronoun is sometimes omitted, but only in the objective case; as, You are the boy (whom) I mean; this is the book (that) I want. This omission of words, which grammarians call an ellipsis, is very common in our tongue; as, Dinner done, we walked into the garden; that argument granted, I proceed to the next.

The place of the relative pronoun is a mighty important matter. Somebody sent Mr. White this striking instance of such misplacement: "Just now, I saw a man talking to the Rev. Mr. Blank, who was so drunk that he could hardly stand." The last two clauses were intended, of course, to come after *man*, who was drunk, and not the reverend gentleman Here are some striking examples from Greene's Grammar: "Mr. Brown needs a physician who is sick. The oranges came in a basket which we ate. Found, a gold watch by a gentleman with steel hands. A man brought home my Newfoundland dog in his shirt-sleeves." These last two sentences have no relative pronoun, but they are good examples of misplacement of words. "I told you to do that this morning" is a very different thing from "I told you, this morning, to do that."

Here is an advertisement which I have just noticed in the *Tribune:* "Conditioned scholars coached for fall examinations during the summer months at Tarrytown." These words, as they stand, mean that the scholars are to be coached (that is, prepared) for fall examinations, taking place during the summer months at Tarrytown; but the advertiser did not mean anything of the kind. He meant to say, "Conditioned scholars coached, during the summer months, at Tarrytown, for fall examinations." You will say that the fall examinations could not be during the *summer* months. No; but the words say so.

206. *Which*, though in other cases it cannot be employed as a relative with nouns which are the names of rational beings, is, with such nouns, employed in asking questions; as, "The tyrants allege that the petition was disrespectful. *Which* of the tyrants?" Again: "One of the petitioners had his head cleaved by the yeomanry. *Which?*" That is to say, "Which of the petitioners was it?"

207. *What*, when used in asking for a repetition of what has been said—as, *what?*—means, "Tell me *that which*, or *the thing which*, you have said." This word is used, and with great force, in the way of exclamation: "What! rob us of our right of suffrage, and then, when we pray to have our right restored to us, shut us up in dungeons!" The full meaning is this: "*What do they do?* They rob us of our right."

208. It is not, in general, advisable to crowd these relatives together; but it sometimes happens that it is done. "*Who*, *that* has any sense, can believe such palpable falsehoods? *What*, *that* can be invented, can disguise these falsehoods? By *whom*, *that* you ever heard of, was a pardon obtained from the mercy of a tyrant? Some men's rights have been taken from them by force and by genius, but *whose*, *that* the world ever heard of before, were taken away by ignorance and stupidity?"

209. *Whosoever*, *whosesoever*, *whomsoever*, *whatsoever*, *whichsoever*, follow the rules applicable to the original words. The *so* is an adverb, which, in its general acceptation, means *in like manner;* and *ever*, which is also an adverb, means, at *any time*, at *all times*, or *always*. These two words, thus joined in *whosoever*, mean, *who in any case that may be;* and so of the other three words. We sometimes omit the *so*, and say, *whoever*, *whomever*, *whatever*, and even *whosever*. It is a mere abbreviation. The *so* is understood; and it is best not to omit to write it. Sometimes the *soever* is separated from the Pronoun:

"*What* man *soever* he might be." But the main thing is to understand the *reason* upon which the use of these words stands; for, if you understand that, you will always use the words properly.

210. The DEMONSTRATIVE PRONOUNS have been described in Letter VI, paragraph 67; and I have very little to add to what is there said upon the subject. They never change their endings to denote gender or case; and the proper application of them is so obvious that it requires little to be said about it. However, we shall hear more of these Pronouns when we come to the Syntax of *Verbs*. One observation I will make here, however, because it will serve to caution you against the commission of a very common error. You will hardly say, "*Them* that write;" but you may say, as many do, "We ought always to have great regard *for them* who are wise and good." It ought to be, "*for those* who are wise and good;" because the word *persons* is understood: "*those persons* who are wise and good;" and it is bad grammar to say, "*them persons* who are wise and good." But observe, in *another sense*, this sentence would be correct. If I be speaking of *particular persons*, and if my object be to make you understand that they are *wise and good*, and also that *I love them;* then I say, very correctly, "I love *them*, who are wise and good." Thus: "The father has two children; he loves *them*, who are wise and good; and they love him, who is very indulgent." It is the *meaning* that must be your guide, and *reason* must tell you what is the meaning. "*They*, who can write, save a great deal of bodily labor," is very different from "*Those* who can write save a great deal of bodily labor." The *those* stands for *those persons;* that is to say, *any persons*, *persons in general*, who can write: whereas, the *they*, as here used, relates to some particular persons; and the sentence means that these particular persons *are able to write*, and, by that means, *they* save a great deal of bodily labor. DOCTOR BLAIR, in

his 21st Lecture, has fallen into an error of this sort: thus, "These two paragraphs are extremely worthy of MR. ADDISON, and exhibit a style, which *they*, who can successfully imitate, may esteem themselves happy." It ought to be *those* instead of *they*. But this is not the only fault in this sentence. Why say "*extremely* worthy?" *Worthiness* is a quality which hardly admits of *degrees*, and surely it does not admit of *extremes!* Then, again, at the close: to *esteem* is to *prize*, to *set value on*, to *value highly*. How, then, can men "*esteem* themselves happy?" How can they *prize themselves* happy? How can they *highly value themselves* happy? My dear James, let chambermaids, and members of the House of Commons, and learned Doctors, write thus: be you content with plain words which convey your meaning; say that a thing is *quite worthy* of a man; and that men may *deem* themselves happy.—It is truly curious that LINDLEY MURRAY should, even in the *motto* in the title-page of his *English Grammar*, have selected a sentence containing a *grammatical error;* still more curious that he should have found this sentence in DOCTOR BLAIR'S Lectures on Language; and most curious of all that this sentence should be intended to inculcate the *great utility of correctness* in the composing of sentences. Here, however, are the proofs of this combination of curious circumstances: "*They* who are learning to compose, and arrange their sentences with accuracy and order, are learning, at the same time, to think with accuracy and order." Poh! Never think a man either learned or good merely on account of his being called a Doctor.

211. The INDETERMINATE PRONOUNS have been enumerated in Letter VI, parapraph 71. They are sometimes *Adjectives*, as is stated in that paragraph. *Whoever*, *whatever*, and *whichevcr* (that is, *whosoever*, *whatsoever*, *whichsoever*), though relatives, are indeterminate too. But, indeed, it signifies little how these words are *classed*. It

is the *use* of them that we ought to look to. *Every*, which I have now reckoned amongst these Pronouns, is never, now-a-days, used *without a noun*, and is therefore, in fact, an *adjective*. The error that is most frequently committed in using these Pronouns is the putting of the *plural* verb or *plural* Pronoun after nouns preceded by *every*, *each*, or *either;* especially in the case of *every:* as, "*every* man; *every* body; *every* house." These are understood to mean, all the *men*, all the *people*, all the *houses;* but, only *one man*, *one body*, *one house*, is spoken of, and therefore the verb ought to be in the singular; as, "everybody *is* disgusted;" and not "every body *are* disgusted."

212. Before you use any of these words, you should think well on their *true meaning;* for, if you do this, you will seldom commit errors in the use of them. Doctor Johnson, in his Rambler, No. 177, has this passage: "*Every one* of these virtuosos looked on all his associates as wretches of depraved taste and narrow notions. *Their* conversation was, *therefore*, fretful and waspish, *their* behavior brutal, *their* merriment bluntly sarcastic, and *their* seriousness gloomy and suspicious." Now these *theirs* certainly relate to *every one*, though the author meant, without doubt, that they should relate to *the whole body of virtuosos*, including the *every one*. The word *therefore* adds to the confusion. The virtuosos were, *therefore*, fretful and waspish. *What for?* Was it because *every one* saw his associates in a bad light? How can my thinking meanly of others make *their* conversation fretful? If the Doctor had said, "*These virtuosos looked on each other*" . . . the meaning would have been clear.

213. The Pronoun *either*, which means *one of* two, is very often improperly employed. It is sometimes used to denote one of *three* or *more*, which is always incorrect. We say, "*either* the *dog*, or the *cat*;" but not "*either* the *dog*, the *cat*, or the *pig*.' Suppose some one to ask me which I choose to have, mutton, veal, or woodcock; I

answer *any one* of them; and not *either* of them. Doctor Blair has used *any one* where he ought to have used *either:* "The *two words* are not altogether synonymous; yet, in the present case, *any one* of them would have been sufficient."

214. In concluding this Letter on the Syntax of Pronouns, I must observe that I leave many of these indeterminate Pronouns unnoticed in a particular manner. To notice every one individually could answer no purpose except that of swelling the size of a book; a thing which I most anxiously wish to avoid.

Sometimes one cannot help using EITHER . . . OR with reference to one of *three* things. Expressions like the following will be found in the works of the best authors: Either the Romans, the Greeks, or the Persians. Neither the planters, the poor whites, nor the blacks.

Nearly all the grammars set down the rule that one must use *each other* with reference to *two* persons, and *one another* with reference to *more than two.* I have not, however, found a single author, good or bad, that adheres to this rule. When you are speaking of three persons, it is perhaps better to say, "They love one another," than "They love each other;" but sometimes these words have to be repeated so frequently that it would be very disagreeable to use always the same word. In Punch's Address to Brother Jonathan, these words occur almost interchangeably: "Let us quarrel, American kinsmen. Let us plunge into war. We have been friends too long. We have too highly promoted *each other's* wealth and prosperity. We are too plethoric; we want depletion; to which end let us cut *one another's* throats. Let us sink *each other's* shipping, burn *each other's* arsenals, destroy *each other's* property at large. Let our banks break while we smite and slay *one another.* Let us maim and mutilate *one another;* let us make of *each other* miserable objects," etc.—Notice that *each* has a restricting sense, and *every* an extended or general one. "He examined each one; he examined every one." The first means *each single one;* the second means *them all,* in a general sense. "Here are ten lazy boys; give each one a caning. Give a caning to every lazy boy in the school."

That error of making verbs and pronouns agree with *each* and *every,* as if these words were plural, is as common to-day as it was in Cobbett's time. How often we hear such expressions as,

"Everybody have their faults—Every one are dissatisfied—Let each boy and girl take up their pens," etc. These are all wrong. Even if the noun with *each* or *every* be repeated, the verb or pronoun must be in the singular; as, "Each day and each hour *has its* duties; every man and woman *has his* or *her* peculiarities; every window and every house-top *was* crowded with spectators." Because, in these instances, the predicate or verb is *understood* after the first noun: Every window was crowded and every house-top was crowded.

LETTER XVIII.

SYNTAX, AS RELATING TO ADJECTIVES.

215. By this time, my dear James, you will hardly want to be reminded of the nature of Adjectives. However, it may not be amiss for you to read again attentively the whole of Letter VII.

216. Adjectives, having no relative effect, containing no representative quality, have not the dangerous power, possessed by pronouns, of throwing whole sentences into confusion, and of perverting or totally destroying the writer's meaning. For this reason, there is little to be said respecting the using of Adjectives.

217. When you make use of an Adjective in the way of comparison, take care that there be a congruity, or fitness, in the things or qualities compared. Do not say that a thing is *deeper* than it is *broad* or *long;* or that a man is *taller* than he is *wise* or *rich*. HUME says, "The principles of the Reformation were deeper in the prince's mind than to be *easily eradicated*." This is *no comparison* at all. It is nonsense.

218. When Adjectives are used as *nouns*, they must, in all respects, be treated as nouns. "The guilty, the innocent, the rich, the poor, are mixed together." But we cannot say "a guilty," meaning to use the word *guilty* as a noun.

219. If wo or more Adjectives be used as applicable to the same noun, there must be a comma, or commas, to separate them; as, "a poor, unfortunate man;" unless *and* or *or* be made use of, for then the comma or commas may be omitted; as, "a lofty and large and excellent house."

220. Be rather sparing than liberal in the use of Adjectives. One which expresses your meaning is better than two, which can, at best, do no more than express it, while the additional one may possibly do harm. But the error most common in the use of Adjectives is the endeavoring to strengthen the Adjective by putting an adverb before it, and which adverb conveys the notion that the quality or property expressed by the Adjective admits of degrees; as, "*very* honest, *extremely* just." A man may be *wiser* than another *wise* man; an act may be *more wicked* than another *wicked* act; but a man cannot be more *honest* than another; every man who is not *honest* must be *dishonest;* and every act which is not *just* must be *unjust.* "*Very* right," and "*very* wrong," are very common expressions, but they are both incorrect. Some expressions may be *more common* than others; but that which is *not right* is *wrong;* or that which is *not wrong* is *right.* There are here no intermediate degrees. We should laugh to hear a man say, "You are a *little* right, I am a *good deal wrong;* that person is honest in a *trifling degree;* that act was *too* just." But our ears are accustomed to the adverbs of exaggeration. Some writers deal in these to a degree that tires the ear and offends the understanding. With them, everything is *excessively* or *immensely* or *extremely* or *vastly* or *surprisingly* or *wonderfully* or *abundantly,* or the like. The notion of such writers is that these words give *strength* to what they are saying. This is a great error. Strength must be found in the *thought,* or it will never be found in the *words.* Big-sounding words, without thoughts corresponding, are effort without effect.

221. Care must be taken, too, not to use such adjectives as are improper to be applied to the nouns along with which they are used. "*Good* virtues; *bad* vices; *painful* tooth-aches; *pleasing* pleasures." These are staringly absurd; but, amongst a select society of empty heads, "*moderate* Reform" has long been a fashionable expression; an expression which has been well criticised by asking the gentlemen who use it how they would like to obtain *moderate justice* in a court of law, or to meet with *moderate chastity* in a wife.

222. To secure yourself against the risk of committing such errors, you have only to take care to ascertain the full meaning of every word you employ.

To show you how easy our English is, in this part of its grammar, as compared with other languages, I shall ask you to look at this one little sentence: "The good boy loves a good book and a good friend; to good bread and butter he gives not a thought." Here the adjective *good* occurs four times without ever once changing its form; now you will see that this little word, in this one little sentence, changes *five* different times in German: Der gute Knabe liebt ein gutes Buch und einen guten Freund; gutem Brod und guter Butter gibt er keinen Gedanken. What do you think of that, my lad? Would you not think that the poor German, when he speaks, would be constantly thinking of his genders, numbers, and cases? Would you not think he would be apt to get things mixed? But he doesn't; he speaks his language in correct form, as naturally as a canary-bird sings in correct tune; for he has learned to speak as the canary has learned to sing.

This is why some writers, like Mr. Grant White, say that the English language has *no* grammar; that is, because its words have few or no declensions, or changes to indicate person, number, gender, case, mood, and tense. It has, however, a grammar of its own; and the proof of it is this: Notwithstanding the fact that it has so few declensions, as compared with German, it is just as hard, if not harder, for an adult German to learn to speak and write our English in a perfectly correct and idiomatic manner, as it is for an adult American or Briton to learn to speak and write German in a similar manner. Of the two or three millions of native Germans who are now in the United States, how many of

them, do you think, are able to speak our English in such a manner as to have their words taken down on the spot, and printed just as spoken? I do not think there are half a dozen; I know of but one; and that is Mr. CARL SCHURZ. When I say *native* Germans, I mean, of course, those who, like him, have come to this country and learned the language after attaining manhood. Those who come here in infancy, or in childhood, become, in fact, Americans. Of the others, not one in ten thousand ever learns to speak like a native. As an offset to Mr. Schurz, we have at least one American who may be said to have spoken and written German as perfectly as Mr. Schurz speaks and writes English; and that is our lamented BAYARD TAYLOR.

It is very easy to learn enough English to talk about one's daily wants; to ask for meat and drink; to count money; to buy and sell; and to inquire one's way; it is far easier for a German to learn this much in English than for an American to learn as much in German; but it is, I think, as hard for the German to *master* the English as it is for the Englishman to *master* the German. The German language, in utterance and in construction, is, like the people who speak it, almost as regular, formal, and law-conforming as mathematics; while our English, in utterance and in construction, is, like the typical Englishman, though grounded in law and principle, essentially a mass of peculiarities, irregularities, and eccentricities.

LETTER XIX.

SYNTAX, AS RELATING TO VERBS.

223. Let us, my dear James, get well through this Letter; and then we may, I think, safely say that we know something of grammar: a little more, I hope, than is known by the greater part of those who call themselves Latin and Greek scholars, and who dignify their having studied these languages with the name of "*Liberal Education.*"

224. There can be no sentence, there can be no sense in words, unless there be a *Verb* either expressed or understood. Each of the other Parts of Speech may alter-

nately be dispensed with; but the Verb never can. The Verb being, then, of so much importance, you will do well to read again, before you proceed further, paragraphs 23, 24, 25, and 26, in Letter III, and the whole of Letter VIII.

225. Well, then, we have now to see how Verbs are used in sentences, and how a misuse of them affects the meaning of the writer. There must, you will bear in mind, always be a Verb expressed or understood. One would think that this was not the case in the direction written on a post letter. "To John Goldsmith, Esq., Hambledon, Hampshire." But what do these words really mean? Why, they mean, "This letter *is to be delivered* to John Goldsmith, who *is* an Esquire, who *lives* at Hambledon, which *is* in Hampshire." Thus, there are no less than five Verbs where we thought there was no Verb at all. "Sir, I beg you to give me a bit of bread." The sentence which follows the *Sir* is complete; but the *Sir* appears to stand wholly without connection. However, the full meaning is this: "I beg you, who *are a* Sir, to give me a bit of bread." "What, John?" That is to say, "What *is* said by you, whose name *is* John?" Again, in the date of a letter; "Long Island, March 25, 1818." That is: "*I am now writing* in Long Island; this *is* the twenty-fifth day of March, and this month *is* in the one thousand eight hundred and eighteenth year of the Christian era."

226. Now, if you take time to reflect a little on this matter, you will never be puzzled for a moment by those detached words, to suit which grammarians have invented *vocative cases* and *cases absolute*, and a great many other appellations, with which they puzzle themselves, and confuse and bewilder and torment those who read their books. (See paragraph 191.)

227. We *almost always*, whether in speaking or in writing, leave out some of the words which are necessary to a

full expression of our meaning. This leaving out is called the *Ellipsis*. *Ellipsis* is, in geometry, an *oval* figure; and the compasses, in the tracing of the line of this figure, do not take their full sweep all round, as in the tracing of a *circle*, but they make *skips* and *leave out* parts of the area, or surface, which parts would be included in the circle. Hence it is, that the *skipping over*, or *leaving out*, in speaking or in writing, is called het *Ellipsis;* without making use of which, we, as you will presently see, scarcely ever open our lips or move our pens. "He told me that he had given John the gun which the gunsmith brought the other night." That is: "He told *to* me that he had given *to* John the gun, which the gunsmith brought *to this place*, or hither, *on* the other night." This would, you see, be very cumbrous and disagreeable; and, therefore, seeing that the *meaning* is quite clear without the words marked by italics, we *leave these words out.* But we may easily go too far in this elliptical way, and say: "He told me he had given John the gun the gunsmith brought the other night." This is leaving the sentence too bare, and making it to be, if not nonsense, hardly sense.

228. Reserving some further remarks, to be made by-and-by, on the Ellipsis, I have now to desire that, always, when you are examining a sentence, you will take into your view the words that are *left out.* If you have any doubt as to the correctness of the sentence, fill it up by putting in the left-out words, and, if there be an error you will soon discover it.

229. Keeping in mind these remarks on the subject of *understood words*, you will now listen attentively to me, while I endeavor to explain to you the manner in which *Verbs* ought to be used in sentences.

230. The first thing is to come at a clear understanding with regard to the *cases* of nouns and pronouns as connected, in use, with *Verbs* and *prepositions;* for on this

connection depends a great deal. Verbs *govern*, as it is called, nouns and pronouns; that is to say, they sometimes cause, or make, nouns or pronouns to be in a certain case. *Nouns* do not vary their endings to denote different cases; but *pronouns* do; as you have seen in Letter VI. Therefore, to illustrate this matter, I will take the pronoun personal of the third person singular, which in the nominative case is *he*, possessive case *his*, objective case *him*.

231. When *a man* (it is the same with regard to any other person or thing) is the *actor*, or *doer*, the *man* is in the nominative case, and the corresponding pronoun is *he*; "*He* strikes." The same case exists when the man is the *receiver* or *endurer*, of an action. "*He* is stricken." It is still the same case when the man is said *to be* in any state or condition. "*He* is unhappy." Indeed, there is no difference in these two latter instances; for "*he is* stricken" is no other than to say that "he *is* in a state or condition called *stricken*." Observe, too, that in these two latter instances, the *he* is followed by the Verb *to be:* he *is* stricken, he *is* unhappy; and observe, moreover, that whenever the Verb *to be* is used, the *receiver*, or *be-er* (if I may make a word) is, and must be, in the *nominative case*. But now let me stop a little to guard you against a puzzle. I say, "the Verb *to be*;" but I do not mean *those two words* always. When I say the Verb *to be*, I may mean, as in the above examples, *is*. This is the Verb *to be* in the third person singular. "I *write*." I should say that here is the pronoun *I* and the Verb *to write;* that is to say, it is the Verb *to write* in one of its forms. The *to* is the sign of the infinitive mode; and the Verb in that state is the root, or the foundation, from which all the different parts or forms proceed. Having guarded ourselves against this puzzler, let us come back to our nominative case. The *actor*, the *doer*, the *receiver of an action*, the *be-er*, must always be in the nominative case;

and it is called nominative case because it is that state, or situation, or case, in which the person or thing is *named* without being pointed out as the *object*, or *end*, of any foregoing action or purpose; as, "*he* strikes; *he* is stricken; *he* is unhappy." This word *nominative* is not a good word; *acting and being* case, would be much better. This word nominative, like most of the terms used in teaching grammar, has been taken from the Latin. It is bad; it is inadequate to its intended purpose; but it is *used;* and if we understand its meaning, or, rather, what it is designed to mean, its intrinsic insufficiency is of no consequence. Thus, I hope, then, that we know what the *nominative* is. "He writes; he sings; he is sick; he is well; he is smitten; he is good;" and so on, always with a *he.*

232. But (and now pay attention) if the *action pass* from the *actor to a person or thing acted upon*, and if there be no part of the Verb *to be* employed, then the person or thing acted upon is in the *objective* case; as, "He smites *him;* he strikes *him;* he kills *him.*" In these instances we wish to show, not only an action that is performed and the person who performs it, but also the person *upon whom* it is performed. Here, therefore, we state the *actor*, the *action*, and the *object;* and the person or thing which is the object, is in the *objective case.* The Verb is said, in such instances, *to govern* the noun or pronoun; that is to say, to make it, or force it, to be in the objective case; and to make us use *him* instead of *he.*

This is simply another way of saying that the transitive verb puts the noun or pronoun which follows it in the objective case, and that a sentence with a transitive verb must consist of *subject*, *predicate*, and *object;* as, Garfield defeated Hancock. (See par. 48.)

233. However, I remember that I was very much puzzled on account of these cases. I saw that when "Peter was *smitten*," Peter was in the *nominative case;* but that when any person or thing "*had smitten* Peter," Peter was

in the *objective case.* This puzzled me much; and the loose and imperfect definitions of my grammar-book yielded me no clue to a disentanglement. Reflection on the *reason* for this apparent inconsistency soon taught me, however, that, in the first of these cases, Peter is merely *named,* or *nominated* as the *receiver* of an action; and that, in the latter instance, Peter is mentioned as the *object* of the action *of some other person* or thing, expressed or understood. I perceived that, in the first instance, "*Peter is smitten,*" I had a complete sense. I was informed as to the person who had received an action, and also as to what sort of action he had received. And I perceived that, in the second instance, "*John has smitten Peter,*" there was an actor who took possession of the use of the Verb, and made Peter the object of it; and that this actor, *John,* now took the *nominative,* and put Peter in the objective case.

234. This puzzle was, however, hardly got over when another presented itself: for I conceived the notion that Peter was in the nominative *only because no actor was mentioned at all in the sentence;* but I soon discovered this to be an error; for I found that "Peter is smitten *by John,*" still left Peter *in the nominative;* and that, if I used the pronoun, I must say, "*he* is smitten by John;" and not "*him* is smitten by John."

235. Upon this puzzle I dwelt a long time: a whole week, at least. For I was not content unless I could reconcile everything to *reason;* and I could see no reason for this. Peter, in this last instance, appeared to be the *object,* and there was the *actor,* John. My *ear,* indeed, assured me that it was right to say, "*He* is smitten by John;" but my reason doubted the information and assurances of my ear.

236. At last, the little insignificant word *by* attracted my attention. This word, in this place, is a *preposition.* Ah! that is it! prepositions *govern* nouns and pronouns;

that is to say, *make them to be in the objective case!* So that John, who had plagued me so much, I found to be in the objective case; and I found that, if I put him out, and put the pronoun in his place, I must say, "Peter is smitten *by him.*"

237. Now, then, my dear James, do you clearly understand this? If you do not, have patience. Read and think, and weigh well every part of what I have here written: for, as you will immediately see, a clear understanding with regard to the *cases* is one of the main inlets to a perfect knowledge of grammar.

As soon as a verb is changed from the active-transitive to the passive voice, the *object* becomes the *subject* of the sentence; as, "He loves her," active; "She is loved by him," passive.

Be careful to observe the difference between the *object* and the *attribute.* I remember I could not, for a long time, see the difference in such sentences as these: "He is a Jew. She loves a Jew." I thought that "a Jew" was, in both instances, the object of the verb; but it is not. When I came to learn German, I saw the difference at once, and the matter became clear to me. Er ist ein Jude. Sie liebt einen Juden. You see that "loves" is a *transitive* verb, whereas "is" is a neuter, or intransitive one. The objective case follows a *transitive* verb, never a *neuter* or *intransitive* one. What follows the neuter verb, therefore, or any verb *naming* or *nominating* anybody, is not the object, not anything in the objective case; but the *attribute*—so called because it generally *attributes* something to somebody—and, if a noun, is always in the nominative case. "He is *a man;* he is *manly;* he stands *a freeman;* he remains *a prince;* he seems *poor;* he appears *wealthy;* he looks *handsome;* he is called *The Great Unknown;* he is appointed *judge;* he is elected *governor*"—in all these cases, what follows the verb is an attribute or quality, and, wherever it is a noun, it is in the nominative case. Remember, therefore, that nouns following such verbs as *be, become, seem, appear, stand, walk,* and the passive verbs *is called, is named, is styled, is appointed, is elected, is made,* are always in the nominative case, and are termed the *attribute,* or, by some grammarians, the *complement,* of the sentence.

238. Verbs, of which there must be one, at least, expressed or understood, in every sentence, must *agree* in

person and in *number* with the nouns or pronouns which are the *nominatives* of the sentence; that is to say, the Verbs must be of the same person and same number as the nominatives are. Verbs frequently change their forms and endings to make themselves *agree* with the *nominatives*. How necessary it is, then, to know what is, and what is not, a nominative in a sentence! Let us take an example. "John smite Peter." What are these words? *John* is a noun, *third person*, singular number, nominative case. *Smite* is a Verb, *first person*, singular number. *Peter* is a noun, third person, singular number, objective case. Therefore, the sentence is incorrect; for the *nominative*, *John*, is in the *third* person, and the Verb is in the *first;* while both ought to be in the *same person*. The sentence ought to be, "John *smites* Peter;" and not "John *smite* Peter."

239. This is, to be sure, a very glaring error; but still it is no more than an error, and is, in fact, as excusable as any other grammatical error. "The men lives in the country." Here the Verb *lives* is in the *singular* number, and the noun *men*, which is the nominative, is in the *plural* number. "The men *live* in the country," it ought to be. These errors stare us in the face. But when the sentences become longer, and embrace several nominatives and Verbs, we do not so readily perceive the errors that are committed. "The intention of the act of Parliament, and not its several penalties, *decide* the character of the corrupt assembly by whom it was passed." Here the noun *penalties* comes so near to the Verb *decide* that the ear deceives the judgment. But the noun *intention* is the nominative to the Verb, which therefore ought to be *decides*. Let us take a sentence still more deceiving. "Without the aid of a fraudulent paper-money, the tyrants never could have performed any of those deeds by which their safety *have been* endangered, and which *have*, at the same time, made them detested." *Deeds* is the nomina-

tive to the last *have* and its principal Verb; but *safety* is the nominative to the first *have;* and therefore this first *have* ought to have been *has.* You see that the error arises from our having the plural noun *deeds* in our eye and ear. Take all the rest of the sentence away, and leave "*safety have* been" standing by itself, and then the error is as flagrant as "*John smite Peter.*" Watch me now, in the next sentence. "It must be observed that land fell greatly in price as soon as the cheats began to draw in their paper-money. In such cases the quantity and quality of the land is the same as it was before; but the price is reduced all of a sudden, by a change in the value and power of the money, which becomes very different from what it was." Here are two complete sentences, which go very glibly off the tongue. There is nothing in them that offends the ear. The first is, indeed, correct; but the last is a mass of error. *Quantity and quality*, which are the *nominatives* in the first member of the sentence, make, together, a *plural*, and should have been followed, after the word *land*, by *are* and not by *is;* and the *it was*, which followed, should, of course, have been *they were.* In the second member of the sentence, *value and power* are the nominatives of *becomes*, which, therefore, should have been *become;* and then, again, there follows an *it was*, instead of *they were.* We are misled, in such cases, by the nearness of the singular noun, which comes in between the nominatives and the Verbs. We should not be likely to say, "Quantity and quality *is;* value and power *becomes.*" But when a singular noun comes in between such nominatives and the Verbs, we are very apt to be thinking of that noun, and to commit error. When we once begin, we keep on; and if the sentence be long, we get together, at last, a fine collection of Verbs and pronouns, making as complete nonsense as heart can wish. Judge Blackstone, in the 4th Book, Chapter 33, says, "The very *scheme and model*

of the administration of common justice, between party and party, *was* entirely settled by this king; and *has* continued nearly the same to this day." *Administration of common justice* was full upon the judge's ear; down he clapped *was;* and *has* naturally followed; and thus, my dear son, in grammar as in moral conduct, one fault almost necessarily produces others.

240. Look, therefore, at your *nominative*, before you put a *Verb* upon paper; for, you see, it may be *one word*, or *two* or *more words*. But observe, if there be two or more singular nouns or pronouns, separated by *or*, which, you know, is a *disjoining* conjunction; then, the Verb must be in the singular; as, "A soldier, *or* a sailor, who *has* served his country faithfully, *is* fairly entitled to a pension; but who will say that a prostituted peer, a pimp, *or* a buffoon, *merits* a similar provision from the public?"

241. It sometimes happens that there are, in the nominative, two or more nouns, or pronouns, and that they are in *different numbers*, or in *different persons;* as, "*The minister* or *the borough-tyrants.*" These nouns cannot have the Verb to *agree* with them *both*. Therefore if it be the conspiring of these wretches against the liberties of the people, of which we have to speak, we cannot say, "The minister or the borough-tyrants *conspire;*" because the Verb would not then *agree* in number with the noun *minister;* nor can we say *conspires;* because the Verb would not agree with the noun *borough-tyrants*. Therefore, we must not write such sentences; we must say, "The minister *conspires*, or the borough-tyrants *conspire*, against the liberties of the people." Repetition is sometimes disagreeable to the ear; but it is better to repeat, be it ever so often, than to write bad grammar, which is only another term for nonsense.

242. When nominatives are separated by *nor*, the rule of *or* must be followed. "Neither man *nor* beast *is* safe in such weather;" and not *are* safe. And if nominatives

of different numbers present themselves, we must not give them a Verb which *disagrees* with either the one or the other. We must not say: "Neither the halter *nor* the bayonets *are* sufficient to prevent us from obtaining our rights." We must avoid this bad grammar by using a different form of words; as, "We are to be prevented from obtaining our rights by neither the halter nor the bayonets." And why should we *wish* to write bad grammar, if we can express our meaning in good grammar?

243. If *or* or *nor* disjoin nouns and pronouns of different *persons*, these nouns and pronouns, though they be all of the same *number*, cannot be the nominative of one and the same Verb. We cannot say, "They or I *am* in fault; I, or they, or he, *is* the author of it; George or I *am* the person." Mr. Lindley Murray says that we *may* use these phrases; and that we have only to take care that the Verb agrees with that person which *is placed nearest* to it; but he says, also, that it would be *better* to avoid such phrases by giving a different turn to our words. I do not like to leave anything to chance or to discretion when we have a clear principle for our guide. Fill up the sentences, and you will see what pretty work there is. "They *am* in fault, or I *am* in fault; I *is* the author, or they *is* the author, or he *is* the author; George *am* the person, or I *am* the person." Mr. Murray gives a similar latitude as to the Verbs used with a mixture of plurals and singulars, as mentioned in the foregoing paragraph. The truth, I suspect, is, that Mr. Murray, observing that great writers frequently committed these errors, thought it prudent to give up the cause of grammar, rather than seem to set himself against such formidable authority. But if we follow this course, it is pretty clear that we shall very soon be left with no principle and no rule of grammar.

The grammarians declare that you may say, "Either he or I am the guilty one;" or, "He is the guilty one, or I am;" "You or

William is to go;" or, "You are to go, or William is." The eye or the ear often decides which is best. "You must not tell us what *you* or *anybody* else *thinks*," seems more compact than "You must not tell us what *you think*, or what *anybody* else *thinks*." If one of the nominatives be negatively used, the verb must be in the singular. Thus, "He, and nôt I, is chosen;" "I, and not they, am to go." These are, indeed, correct; and yet I think it is better to say, He is chosen, and not I; I am to go, and not they. I beg you to notice how frequently and nicely Cobbett uses the subjunctive *be* after *if* and *though*, which is correct, and which now, unfortunately, is falling out of use among common writers.

244. The nominative is frequently a noun of *multitude*; as, *mob*, *parliament*, *gang*. Now, where this is the case, the Verb is used in the singular or in the plural, upon precisely the same principles that the pronouns are so used; and as these principles, together with ample illustrations by the way of example, have been given you in Letter XVII, paragraph 181, I need say nothing more of the matter. I will just observe, however, that *consistency*, in the use of the Verb, in such cases, is the main thing to keep in view. We may say, "The gang of borough-tyrants *is* cruel;" or, "that the gang of borough-tyrants *are* cruel;" but if we go on to speak of their notoriously brutal ignorance, we must not say, "The gang of borough-tyrants *is* cruel, and *are* also notoriously as ignorant as brutes." We must use *is* in both places, or *are* in both places.

245. In looking for the nominative of a sentence, take care that the *relative pronoun* be not a stumbling-block, for relatives have no changes to denote *number* or *person*; and though they may sometimes appear to be of themselves nominatives, they never can be such. "The men *who are* here, the man *who is* here; the cocks *that crow*, the cock *that crows*." Now, if the relative be the nominative, why do the Verbs *change*, seeing that here is *no change in the relative?* No: the Verb, in pursuit of its nominative, runs through the relatives to come at their

antecedents, *men, man, cocks, cock.* Bishop Lowth says, however, that "the relative is the nominative when no other nominative comes between it and the Verb;" and Mr. Murray has very faithfully copied this erroneous observation. "*Who is* in the house? *Who are* in the house? *Who strikes* the iron? *Who strike* the iron? *Who was* in the street? *Who were* in the street?" Now, here is, in all these instances, no other nominative between the relative and the Verb; and yet the Verb is continually varying. Why does it vary? Because it disregards the relative and goes and finds the antecedent, and accommodates its number to that antecedent. The antecedents are, in these instances, understood: "What *person is* in the house? What *persons are* in the house? What *person strikes* the iron? What *persons strike* the iron? What *person was* in the street? What *persons were* in the street?" The Bishop seems to have had a misgiving in his mind, when he gave this account of the nominative functions of the *relative;* for he adds, "the relative is of the *same person* as the antecedent; and the Verb *agrees with it* accordingly." Oh! oh! but the relative is *always the same*, and is of *any* and of *every number* and *person.* How then can the Verb, when it makes *its changes* in number and person, be said to *agree* with the relative? Disagree, indeed, with the relative the Verb cannot any more than it can with a preposition; for the relative has, like the preposition, no changes to denote cases; but the danger is that in certain instances the relative may be *taken for a nominative*, without your looking after the antecedent, which is the real nominative, and that thus, not having the number and person of the antecedent clearly in your mind, you may give to the Verb a wrong number or person. It is very seldom that those who lay down erroneous rules furnish us with examples by the means of which we are enabled to detect the error of these rules; yet, Mr. Murray has, in the present case,

done this most amply. For in another part of his book he has these two examples: "I am the general *who give* the orders to-day. I am the general *who gives* the orders to-day." Here the antecedent as well as the relative are precisely the same; the order of the words is the same; and yet the words are different. *Why?* Because, in the first example, the pronoun *I* is the nominative, and in the second, the noun *general.* The first means, "*I*, who am the general here, *give* the orders to-day." The second means, "The general who *gives* the orders to-day is I." Nothing can more clearly show that the relative cannot be the nominative, and that to consider it as a nominative must lead to error and confusion. You will observe, therefore, that when I, in the Etymology and Syntax as relating to relative pronouns, speak of relatives *as being in the nominative case*, I mean that they relate *to nouns or to personal pronouns which are in that case.* The same observation applies to the other cases.

I am strongly inclined to think that Cobbett is in error here. The relative pronoun must have person, number, gender, and case, like any other pronoun; and *who* is undoubtedly always of the same person and number as the word to which it relates. Let us put it directly after all the three persons, singular and plural:

It is I who speak,	or It is I who am speaking.
It is thou who speakest,	" It is thou who art speaking.
It is he who speaks,	" It is he who is speaking.
It is we who speak,	" It is we who are speaking.
It is you who speak,	" It is you who are speaking.
It is they who speak,	" It is they who are speaking.

Now here each *who* is of the same person as the pronoun or word to which it relates, and consequently the verb agrees with it. Strangely enough, the relative pronoun may, as Cobbett says, be of any person; but that does not prevent it from agreeing with its antecedent. I used to think that *who* was always of the *third* person, referring always to somebody spoken of; but now I see that it may be of the *first* person, referring to somebody who is speaking. Nevertheless, we do sometimes hear, It is I who speaks German; it is you who speaks Spanish; it is you that speaks

French. This may be explained by supposing that the full meaning of the words is: It is I who am the person that speaks German; it is you who are the person that speaks Spanish. And here again each *who* is of the same person as the antecedent.

246. We are sometimes embarrassed to fix precisely on the nominative, when a sort of *addition* is made to it by words expressing persons or things that accompany it; as, "The Tyrant, with the Spy, *have* brought Peter to the block." We hesitate to determine whether the *Tyrant* alone is in the nominative, or whether the nominative includes the Spy; and of course we hesitate which to employ, the *singular* or the *plural* Verb; that is to say, *has* or *have*. The meaning must be our guide. If we mean that the act has been *done* by the Tyrant *himself*, and that the Spy has been a mere *involuntary* agent, then we ought to use the singular; but if we believe that the Spy has been a *co-operator;* an *associate;* an *accomplice;* then we must use the plural of the Verb. "The Tyrant with his Proclamation *has* produced great oppression and flagrant violations of law." *Has*, by all means, in this case; because the proclamation is a mere instrument. Give the sentence a turn: "The Tyrant *has* produced great oppression and flagrant violations of the law with his proclamation." This is good; but "the Tyrant *has* brought Peter to the block with the Spy," is bad; it sounds badly; and it is bad sense. It does not say what we mean it should say. "A leg of mutton, with turnips and carrots, *is* very good." If we mean to say that a leg of mutton when cooked with these vegetables, is good, we must use *is;* but if we be speaking of the goodness of a leg of mutton *and* these vegetables taken together, we must use *are*. When *with* means *along with, together with*, in *company with*, and the like, it is nearly the same as *and;* and then the plural Verb must be used. "*He*, with his bare hand, *takes* up hot iron." Not, "he, with his bare hand, *take* up." "He, with his brothers, *are*

able to do much." Not, "*is* able to do much." If the pronoun be used instead of *brothers*, it will be in the objective case: "He, with *them*, are able to do much." But this is no impediment to the including of the noun (represented by *them*) in the nominative. *With*, which is a preposition, takes the objective case after it; but if the persons or things represented by the words coming after the preposition form part of the actors in a sentence, the understood nouns make part of the nominatives. "The bag, with the guineas and dollars in it, *were* stolen." For if we say *was* stolen, it is *possible* for us to mean that the *bag only* was stolen. "Sobriety, with great *industry and talent*, *enable* a man to perform great deeds." And not *enables*; for sobriety *alone* would not enable a man to do great things. "The borough-tyranny, with the paper-money makers, *have* produced misery and starvation." And not *has*; for we mean that the two have *co-operated*. "Zeal, with discretion, *do* much;" and not, does much; for we mean, on the contrary, that it *does nothing*. It is the meaning that must determine which of the numbers we ought, in all such cases, to employ.

The grammarians are now unanimous in declaring that a phrase beginning with the preposition *with*, coming directly after the subject, does *not* affect the verb, or predicate; as, The vessel, with her crew, *was* lost; the regiment, with its officers, *was* captured; the house, with its contents, *has* been sold; the minister, with his cabinet, has resigned; the emperor, with his family, has been assassinated; Cobbett, with his Grammar, *has* done much good. Therefore, it is correct to say, The tyrant, with the spy, has brought Peter to the block; he, with his brothers, has done much; the bag, with the guineas and dollars in it, was stolen; zeal, with discretion, does much. Because, in these instances, "with the spy" and "with his brothers" indicate, like the phrase *with his proclamation*, merely instruments; and the sentence about the bag of money means simply that the bag was stolen with what it contained. The sentence about sobriety means that this virtue, employed or combined with other qualities, enables a man to

perform great deeds; and that about zeal with discretion must be regarded in the same way. Besides, the preposition *with* puts the *spy* and the *brothers*, the *guineas* and the *dollars*, the *industry* and the *talent*, in the objective case; and how can any thing in the *objective* case be the *subject*, which is always in the *nominative* case? What Cobbett says about the sentence, "He, with his brothers, are able to do much," is about as good an example of sophistry as any thing I know. For an expression of this kind, see Cobbett's account of the sand-hill as an educator, Life, page 261.

The same is the case with sentences in which the phrase *as well as* occurs. Clay, as well as Webster, *was* a great orator; Charles, as well as his brother, *was* successful in business; the father, as well as his son, *is* in fault; the minutest insect, as well as the largest quadruped, *derives* its life from the same Omnipotent Source.

247. The Verb *to be* sometimes comes between two nouns of different numbers. "The great evil *is* the borough-debt." In this sentence there is nothing to embarrass us; because *evil* and *borough-debt* are both in the singular. But, "the great evil *is* the *taxes*," is not so clear of embarrassment. The embarrassment is the same, when there is a singular noun on one side, and two or more singulars or plurals on the other side; as, "The curse of the country *is* the profligacy, the rapacity, the corruption of the law-makers, the base subserviency of the administrators of the law, and the frauds of the makers of paper-money." Now, we mean, here, that these things *constitute*, or *form*, or *make up*, a curse. We mean that the curse *consists* of these things; and if we *said* this, there would be no puzzling. "The evil *is* the taxes." That is, the taxes constitute the evil; but we cannot say, "the evil *are* the taxes;" nor can we say, that the "curse *are* these things." Avoid, then, the use of the Verb *to be* in all such cases. Say, the curse of the country consists of, or arises *from*, or is produced *by*. Dr. Blair, in his 19th Lecture, says: "A feeble, a harsh, *or* an obscure style, *are* always *faults*." The *or* required the singular Verb *is*; but *faults* required *are*. If he had put *is* and *faulty*, there would have been no doubt of his being

correct. But as the sentence now stands, there is great room for doubt, and, that, too, as to more than one point; for fault means *defect*, and a style, which is a *whole*, cannot well be called a *defect*, which mean a want of goodness in *a part*. Feebleness, harshness, obscurity, are *faulty*. But to call the style itself, to call the *whole thing* a *fault*, is more than the Doctor meant. The style may be *faulty*, and yet it may not be a fault. The Doctor's work is faulty; but, surely, the work is not a *fault!*

248. Lest you should be, in certain instances, puzzled to find your nominative case, which, as you now see, constitutes the main spring and regulator of every sentence, I will here point out to you some instances wherein there is used, apparently, neither Verb nor nominative. "*In general* I dislike to drink wine." This *in general* is no more, in fact, than *one word*. It means *generally*. But sometimes there is a Verb comes in: "generally speaking." Thus: "The borough-tyrants, generally *speaking*, are great fools as well as rogues." That is to say, "when *we* speak generally;" or, "if *we* are speaking generally;" or, "when *men* or *people* speak generally." For observe that there *never can be* a sentence without a Verb, expressed or understood, and that there *never can be* a Verb without a nominative case, expressed or understood.

249. Sometimes not only two or more nouns, or pronouns, may be the nominative of a sentence, but *many other words* along with them may assist in making a nominative; as, "Pitt, Rose, Steele, and their associates, giving to Walter a sum of the public money, as a reward for libelling the sons of the king, *was* extremely profligate and base." That is to say, this *act* of Pitt and his associates *was* extremely profligate and base. It is, when you come to inquire, the *act* which is the nominative, and all the other words only go to describe the origin and end of the act.

I doubt very much whether this sentence be correct. Following Cobbett's own instructions, let us shorten the sentence, and see how it will look then: "Pitt giving Walter a sum of money was extremely base." I think this neither looks nor sounds correct. It was *his* act, *Pitt's* act, which was base; and therefore it should be, "Pitt's giving Walter a sum of money was extremely base;" that is to say, Pitt's acting was base; for we cannot say, Pitt acting was base. We say, "Bacon's drawing up charges against Essex was extremely base; John Chinaman's working for low wages is the head and front of his offense;" and not, Bacon drawing up, etc.—By-the-bye, such sentences as, "The great evil is the taxes," are perfectly correct; for the subject is "the evil," which is singular, and it makes little matter what the attribute may be, for it has nothing to do with the verb. It is precisely the same form of expression which we use when we say, It is we; it is you; it is they; it is the boys; it is the rich; it is the wicked; it is the Italians; and so on.

250. You must take care that there be a nominative, and that it be clearly expressed or understood. "The Attorney-General Gibbs, whose malignity induced him to be extremely violent, and *was* listened to by the Judges." The first Verb *induced* has a nominative, namely, the *malignity* of the Attorney-General Gibbs; but the *was* has no nominative, either expressed or clearly understood; and we cannot, therefore, tell what or who it was that was listened to; whether the *malignity* of Gibbs, or *Gibbs himself*. It should have been, and *who*, or, and *he*, was listened to; and then we should have known that it was Gibbs himself that was listened to. The omitting of the nominative, five hundred instances of which I could draw from Judge BLACKSTONE and Doctor JOHNSON, arises very often from a desire to avoid a repetition of the noun or pronouns; but repetition is always to be preferred before obscurity.

251. Now, my dear James, I hope that I have explained to you, sufficiently, not only *what the nominative is*, but what are its powers in every sentence, and that I have imprinted deeply on your mind the necessity of keeping

the nominative constantly in your eye. For want of doing this, Judge BLACKSTONE has, in Book IV, Chap. 17, committed some most ludicrous errors. "Our ancient Saxon *laws* nominally punished theft with death, if above the value of twelve-pence; but the criminal was permitted to redeem *his* life by a pecuniary ransom; as among *their* German *ancestors*." What confusion is here? Whose ancestors? *Theirs*. Who are *they?* Why the *criminal*. *Theirs*, if it retate to anything, must relate to *laws;* and then the *laws* have *ancestors*. Then, *what* is it that was to be of above the value of twelve-pence? The *death*, or the *theft?* By, "*if above the* value of twelve-pence," the Judge, without doubt, meant, "*if the thing stolen were* above the value of twelve-pence;" but he says no such thing; and the meaning of the words is, if *the death* were above the value of twelve-pence. The sentence should have stood thus: "Our ancient Saxon laws nominally punished theft with death, if the thing stolen were above the value of twelve-pence; but the criminals were permitted to redeem their lives by a pecuniary ransom; as among their German ancestors." I could quote, from the same author, hundreds of examples of similar errors; but were there only this one to be found in a work which is composed of matter which was read, in the way of Lectures, by a professor of law, to students in the University of Oxford, even this one ought to be sufficient to convince you of the importance of attending to the precepts which I have given you relative to this part of our subject.

252. As to the *objective case*, it has nothing to do with *Verbs;* because a noun which is not in the nominative must be in the *objective;* and because Verbs do never vary their endings to make themselves *agree* with the objective. This case has been sufficiently explained under the head of *personal pronouns*, which have endings to denote it.

253. The *possessive case*, likewise, has nothing to do

with Verbs, only you must take care that you do not, in any instance, look upon it as a nominative. "The quality of the apples *were* good." No; it must be *was;* for *quality* is the nominative and *apples* the possessive. "The want of learning, talent, and sense *are* more visible in the two houses of Parliament than in any other part of the nation." Take care upon all such occasions. Such sentences are, as to grammatical construction, very deceiving. It should be "*is* more visible;" for *want* is the nominative; and *learning*, *talent*, and *sense* are in the possessive. The want of *learning*, and so on.

254. You now know all about the *person* and *number* of Verbs. You know the reasons upon which are founded their variations with regard to these two circumstances. Look, now, at the *conjugation* in Letter VIII, paragraph 98; and you will see that there remain the *Times* and *Modes* to be considered.

255. Of *Times* there is very little to be said here. All the fanciful distinctions of *perfect present*, *more past*, and *more perfect past*, and numerous others, only tend to bewilder, confuse, and disgust the learner. There can be but *three* times, the *present*, the *past*, the *future;* and, for the expressing of these, our language provides us with words and terminations the most suitable that can possibly be conceived. In some languages, which contain no little words such as our signs, *will*, *shall*, *may*, and so on, the Verbs themselves change their form in order to express what we express by the help of these signs. In French, for instance, there are *two past times*. I will give you an example in order to explain this matter. "The working men, every day, *gave* money to the tyrants, who, in return, *gave* the working men dungeons and axes." Now here is our word *gave*, which is the past time of the Verb *to give*. It is the same word, you see, in both instances; but you will see it different in the French. "Tous les jours, les ouvriers *donnaient* de

l'argent aux tyrants, qui, en retour, *donnèrent* aux ouvriers des cachots et des haches." You see that, in one place, our *give* is translated by *donnaient*, and in the other place, by *donnèrent*. One of these is called, in French, the *past imperfect*, and the other the *past perfect*. This distinction is necessary in the French; but similar distinctions are wholly unnecessary in English.

256. In the Latin language, the Verbs change their endings so as *to include in the Verbs themselves* what we express by our auxiliary Verb *to have*. And they have as many changes, or different endings, as are required to express all those various circumstances of time which we express by *work, worked, shall work, may work, might work, have worked, had worked, shall have worked, may have worked, might have worked*, and so on. It is, therefore, necessary for the Latins to have distinct appellations to suit these various circumstances of time, or states of an action; but such distinction of appellations can be of no use to *us*, whose Verbs never vary their endings to express time, except the single variation from the *present* to the *past;* for, even as to the *future*, the *signs* answer our purpose. In our compound times, that is to say, such as *I have worked*, there is the Verb *to have*, which becomes *had*, or *shall have*, and so on.

257. Why, then, should we perplex ourselves with a multitude of artificial distinctions, which cannot, by any possibility, be of any use in practice? These distinctions have been introduced from this cause: those who have written English Grammars have been taught Latin; and either unable to divest themselves of their Latin rules, or unwilling to treat with simplicity that which, if made somewhat of a mystery, would make them appear more *learned* than the mass of people, they have endeavored to make our simple language turn and twist itself so as to become as complex in its principles as the Latin language is.

258. There are, however, some few remarks to be made with regard to the *times* of Verbs; but before I make them, I must speak of the *participles*. Just cast your eye again on Letter VIII, paragraphs 97 and 102. Look at the conjugations of the Verbs *to work*, *to have*, and *to be*, in that same Letter. These *participles*, you see, with the help of *to have* and *to be*, form our *compound times*. I need not tell you that *I was working* means the same as *I worked*, only that the former supposes that something else was going on at the same time, or that something happened at the time I was working, or that, at least, there is some circumstance of action or of existence *collateral with my working;* as, "I was working *when he came; I was sick while* I was working; *it rained while* I was working; *she scolded while* I was working." I need not tell you the use of *do* and *did;* I need not say that *I do work* is the same as *I work*, only the former expresses the action more positively, and adds some degree of force to the assertion; and that *did work* is the same as *worked*, only the former is, in the past time, of the same use as *do* is in the present. I need not dwell here on the uses of *will*, *shall*, *may*, *might*, *should*, *would*, *can*, *could*, and *must;* which uses, various as they are, are as well known to us all as the uses of our teeth and our noses; and to misapply which words argues not only a deficiency in the reasoning faculties, but also a deficiency in instinctive discrimination. I will not, my dear James, in imitation of the learned doctors, pester you with a philological examination into the origin and properties of words, with regard to the use of which, if you were to commit an error in conversation, your brother Richard, who is four years old, would instantly put you right. Of all these little words I have said quite enough before; but when the Verbs *to have* and *to be* are used as *auxiliaries to principal Verbs*, and, especially, when the sentences are long, errors of great consequence may be com-

mitted; and, therefore, against these it will be proper to guard you.

And yet, here in the United States, there is no more common error than the confounding of *shall* and *will*. If you can stick the following rule fast in your mind, it will save you from making many mistakes in the use of these words:—I *shall*, you *will*, he *will*, are the forms of the FUTURE, and merely FORETELL what will take place; *I will*, *you shall*, *he shall*, are the forms of the POTENTIAL, and express WILL or DETERMINATION on the *part of the speaker*. The latter are equal to the German ich will, du sollst, er soll. Now try to repeat this rule without looking at the book. Turn it over in your mind, and try it in sentences of your own formation. In addressing other people, politeness often requires *will* instead of *shall*; as, "You will mark the packages 1, 2, 3;" not "You shall," which would be equal to a command.

An English nobleman, Sir E. W. Head, has written a whole book on these two mighty little words, "Shall and Will," from which the following "admirable statement of the true distinction between these auxiliaries"* is taken.

"*Will* in the first person expresses *a resolution* or *a promise:* 'I will not go' = *it is my resolution not to go.* 'I will give it you' = *I promise to give it you.* *Will* in the second person *foretells:* 'If you come at six o'clock, you will find me at home.' *Will* in the second person, in questions, anticipates *a wish* or *an intention:* Will you go to-morrow?' = *Is it your wish or intention to go to-morrow?*' *Will* in the third person *foretells*, generally implying an *intention* at the same time, when the nominative is a *rational* creature; 'He will come to-morrow,' signifies what *is to take place*, and that it is the *intention* of the person mentioned to come. 'I think it will snow to-day,' intimates what is, probably, *to take place.* *Will* must never be used in questions with nominative cases of the first person: 'Will we come to-morrow?' = *Is it our intention or desire to come to-morrow?* which is an absurd question. We must say, Shall we come to-morrow?

"*Would* is subject to the same rules as *will.* *Would* followed by *that* is frequently used (the nominative being expressed or understood) to express a *wish:* 'Would that he had died before this disgrace befell him!' = *I wish that he had died before this disgrace befell him.* *Would have*, followed by an infinitive, signifies a desire *to do* or *to make;* 'I would have you think of these things' = *I wish to make you think of these things.* *Would* is often used to express a

*A. S. Hill's Rhetoric, in which I found the above rule and this quotation.

custom: 'He would often talk about these things' = '*It was his custom to talk of these things.*

"*Shall* in the first person *foretells*, simply expressing *what is to take place:* 'I shall go to-morrow.' Notice that no *intention* or *desire* is expressed by *shall*. *Shall*, in the first person, in questions, asks permission: 'Shall I read?' = *Do you wish me*, or *will you permit me to read? Shall* in the second and third persons expresses *a promise, a command*, or *a threat:* 'You shall have these books to-morrow' = *I promise to let you have these books to-morrow.* 'Thou shalt not steal' = *I command thee not to steal.* 'He shall be punished for this' = *I threaten to punish him for this offense.*

"*Should* is subject to the same rules as *shall*. *Should* frequently expresses *duty:* 'You should not do so' = *It is your duty not to do so. Should* often signifies *a plan:* 'I should not do so' = *It would not be my plan to do so. Should* often expresses *supposition:* 'Should they not agree to the proposals, what must I do?' = *Suppose that it happen that they will not agree to the proposals.*"

If you wish any more on this Head, read any play of Shakespeare's, and take down every sentence with *will* or *shall*, *would* or *should*, and learn them by heart. Mr. White, speaking of this very matter, says admirably, "The best way is, to give yourself no trouble at all about your grammar. Read the best authors, converse with the best speakers, and know what you mean to say, and you will speak and write good English, and may let grammar go *to its own place!*" Jacob said to the angel, "I *will* not let thee go till thou hast blessed me." You would say to your servant, "I *shall* let you go if you do your duty." Consider the difference in meaning between these two.

259. *Time* is so plain a matter; it must be so well known to us, whether it be the *present*, the *past*, or the *future*, that we mean to express, that we shall hardly say, "*We work*," when we are speaking of our *having worked last year.* But you have seen in Letter XVI, paragraph 171 (look at it again), that Doctor Blair could make a mistake in describing *the time of an action.* Doctor Blair makes use of "it *had* been better omitted." Meaning that it *would have been* better to omit it. This is a sheer vulgarism, like, "I *had* as lief be killed as enslaved." Which ought to be, "I *would* as lief." But the most common error is the using of the Verb *to have*

with the passive participle, when the *past time*, simply, or the *infinitive* of the Verb ought to be used. "Mr. Speaker, I *expected* from the former language and positive promises of the Noble Lord and the Right Honorable the Chancellor of the Exchequer, to *have seen* the Bank paying in gold and silver." This is House-of-Commons language. Avoid it as you would avoid all the rest of their doings. I expected *to see*, to be sure, and not *have seen*, because the *have seen* carries *your act of seeing back beyond the period* within which it is supposed *to have been expected* to *take place*. "*I expected to have ploughed* my land last *Monday*." That is to say, "I *last Monday* was in the act of expecting to have ploughed my land *before that day*." But this is not what the writer means. He means to say that, last Monday, or before that day, he was in the act of expecting *to plough* his land on that day. "I called on him and *wished to have submitted* my manuscript to him." Five hundred such errors are to be found in Dr. Goldsmith's works. "I wished, *then* and *there*, *to submit* my manuscript to him." I wished *to do* something *there*, and did not *then* wish that I had *done* something before.

260. When you use the *active participle*, take care that the *times* be attended to, and that you do not, by misapplication, make confusion and nonsense. "I had not the pleasure of *hearing* his sentiments when I wrote that letter." It should be of *having heard;* because the *hearing* must be supposed to have been wanted *previous* to the act of writing. This word *wanted*, and the word *wanting*, are frequently misused. "All that was *wanting* was honesty." It should be *wanted*. "The Bank is weighed in the balance, and found wanting," and not *wanted*. Found to be *wanting*, or *in want;* in want of money to pay its notes.

261. I will not fatigue your memory with more examples relating to the *times* of Verbs. Consider well what you

mean; what you *wish to say.* Examine well into the true meaning of your words, and you will never make a mistake as to the times. "*I thought to have heard* the Noble Lord produce something like proof." No! my dear James will never fall into the use of such senseless gabble! You would think of *hearing* something; you would expect *to hear*, not *to have heard.* You would be *waiting to hear*, and not, like these men, be *waiting to have heard.* "*I should have liked to have been informed* of the amount of the Exchequer Bills." A phraseology like this can be becoming only in those Houses where it was proposed to relieve the distresses of the nation by setting the laborers to dig holes one day and fill them up the next.

262. It is erroneous to confound the *past time* with the *passive participle* of the Verb. But now, before I speak of this very common error, let us see a little more about the *participles.* You have seen, in Letter VIII, what the participles are; you have seen that *working* is the active participle, and *worked* the passive participle. We shall speak fully of the active by-and-by. The passive participle and the Verb *to be*, or some part of that Verb, make what is called the *passive Verb.* This is not a Verb which, *in its origin*, differs from an active Verb, in like manner as a *neuter* Verb differs from an active Verb. To *sleep* is neuter in its origin, and must, in all its parts, be neuter; but every active Verb *may* become a *passive Verb.* The passive Verb is, in fact, that state of an active Verb which expresses, as we have seen above, the action as being *received* or *endured;* and it is called *passive* because the *receiver* or *endurer* of the action is *passive;* that is to say, *does nothing.* "John *smites;* John *is smitten.*" Thus, then, the passive Verb is no other than the passive participle used along with some part of the Verb *to be.*

263. Now, then, let us see a specimen of the errors of which I spoke at the beginning of the last paragraph.

When the Verb is *regular*, there can be no error of this sort; because the past time and the passive participle are written in the same manner; as, "John *worked;* John *is worked.*" But, when the Verb is *irregular*, and when the past time and the passive participle are written in a manner different from each other, there is room for error, and error is often committed: "John *smote;* John *is smote.*" This is gross. It offends the ear; but when a company, consisting of men who have been enabled, by the favor of the late William Pitt, to plunder and insult the people, meet under the name of a Pitt Club, to celebrate the birthday of that corrupt and cruel minister, those who publish accounts of their festivities always tell us, that such and such toasts *were drank;* instead of *drunk.* I *drank* at my dinner to-day; but the milk and water which I *drank*, *were drunk* by me. In the lists of Irregular Verbs, in Letter VIII, the differences between the past times and the passive participles are all clearly shown. You often hear people say, and see them write, "We *have spoke;* it *was spoke* in my hearing;" but "we *have came;* it *was did*," are just as correct.

It may be well to notice that most of these verbs, like the German verbs from which they are derived, change the *i* to *a* in the past tense, and to *u* in the past participle. Say, therefore, I sing, sang, have sung; I spring, sprang, have sprung; I ring, rang, have rung; I swim, swam, have swum; I sink, sank, have sunk; and so on. But there are a few exceptions; as, to fling, to cling, to wring, to sting, which change the *i* to *u* in both the past tense and the past participle.

264. *Done* is the passive participle of *to do*, and it is very often misused. This *done* is frequently a very great offender against grammar. *To do* is the *act of doing.* We often see people write, "I *did* not speak, yesterday, so well as I wished to have *done.*" Now, what is meant by the writer? He means to say that he *did* not speak so well as he then *wished*, or was wishing, *to speak.*

Therefore, the sentence should be, "I did not speak yesterday so well as I wished *to do*." That is to say, "so well as I wished to do it;" that is to say, to do, or to perform, *the act of speaking.*

265. Take great care not to be too free in your use of the Verb *to do* in any of its times or modes. It is a nice little *handy* word, and, like our oppressed *it*, it is made use of very often when the writer is at a *loss* for what to put down. *To do* is to *act*, and, therefore, it never can, in any of its parts, supply the place of a *neuter* Verb. Yet, to employ it for this purpose is very common. Dr. BLAIR, in his 23rd Lecture, says: "It is somewhat unfortunate that this Number of the Spectator did not *end*, as it might very well have *done*, with the former beautiful period." That is to say, "done *it*." And, then, we ask: done what? Not the *act of ending;* because, in this case, there is *no action* at all. The Verb means *to come to an end; to cease; not to go any further.* This same Verb *to end*, is, sometimes, an active Verb: "I *end* my sentence;" and then the Verb *to do* may supply its place; as, "I have not ended my sentence so well as I might have *done;*" that is, done *it;* that is, done, or performed, the *act of ending.* But the Number of the Spectator was *no actor;* it was expected to *perform* nothing; it was, by the Doctor, wished to have *ceased* to proceed. "Did not *end* as it very well might have ended. . . ." This would have been correct; but the Doctor wished to avoid the *repetition*, and thus he fell into bad grammar. "Mr. Speaker, I do not *feel* so well satisfied as I should have *done*, if the Right Honorable gentleman had explained the matter more fully." You constantly hear talk like this amongst those whom the boroughs make law-givers. To *feel* satisfied is, when the satisfaction is to arise from conviction produced by fact or reasoning, a senseless expression; and to supply its place, when it is, as in this case, a neuter Verb, by *to do*, is as senseless. Done *what?*

Done *the act of feeling!* "I do not *feel* so well satisfied as I should have *done*, or *executed*, or *performed* the *act of feeling!*" What incomprehensible words! Very becoming in the creatures of corruption, but ridiculous in any other persons in the world.

266. But do not misunderstand me. Do not confound *do* and *did*, as parts of a *principal* Verb, with the same words, as parts of an *auxiliary*. Read again Letter VIII, paragraph 111. *Do* and *did*, as *helpers*, are used with neuter as well as with active Verbs; for here it is not their business to *supply the place* of other Verbs, but merely to add strength to affirmations and negations, or to mark time; as, "The sentence *does end;* I *do feel* easy." But *done*, which is the passive participle of the active Verb *to do*, can never be used as an auxiliary. The want of making this distinction has led to the very common error of which I spoke in the last paragraph, and against which I am very desirous to guard you.

267. In sentences which are *negative* or *interrogative*, *do* and *did* express *time;* as, "You *do* not *sleep; did* you not *feel?*" But they do not here *supply the place* of other Verbs; they merely help; and their assistance is useful only as to the circumstance of time; for we may say, "You *sleep* not; *felt* you not?" And if in answer to this question, I say, "I *did*," the word *feel* is understood; "I *did feel.*"

You will sometimes hear even Wall-street millionaires say, "I done it; he seen him; he is dead broke;" which is confounding the past participle and the past tense. You must say, I did it; I saw him; he is dead broken; or, rather, completely ruined. But here is a very important matter; something which Cobbett does not touch; something of prime importance. What is the difference between "I did it" and "I have done it?" between "I was in New York" and "I have been in New York?" between "I wrote the letter" and "I have written the letter?" When do you use the one and when the other? Think for a moment. Give your own explanation before reading mine. These two forms are

termed the past tense and the present perfect tense. Those who are "native and to the manner born" seldom confound these tenses, but foreigners constantly do. The distinction between them, however, is exceedingly plain. We use the past tense when speaking of anything that has happened in a *completely past time;* as, I did it yesterday; I was in New York last week; I wrote a letter last Thursday. We use the present perfect tense when speaking of anything that has happened in a time *not yet entirely past,* or in an *indefinite past time:* I have done it to-day; I have been in New York this week; I have written many letters; I have been in Paris. Both the Germans and the French can, in their languages, use either form for the same time; so that they can say, which we cannot, "I have been in New York yesterday: I have written a letter last week."

The past perfect, *I had done, I had written, I had been,* is used when speaking of something happening at a time farther back than or anterior to a given past time. For instance: While I am telling you of what happened to me in 1868 in London, and of my doing something there at that time, and of my writing a letter to somebody in that year, I suddenly inform you, for the better understanding of my narrative, that I *had been* in London before that year; that I *had done* something there before that time, and that I *had written* to somebody before writing at that time. This, you see, is past perfect time; it is going behind the past time of our narrative; and it is called the perfectly past time.

268. Well, then, I think, that as far as relates to the active Verb, the passive Verb, and the passive participle, enough has now been said. You have seen, too, something of the difference between the functions of the active Verb and those of the *neuter;* but there are a few remarks to be made with regard to the latter. A neuter Verb cannot have a noun or a pronoun in the objective case immediately after it; for though we say, "I *dream* a *dream,*" it is understood that my mind has been engaged *in* a dream. "I *live* a good *life,*" means that I am living in a good manner. "I *walk* my horse about," means that I lead or conduct my horse in the pace called a *walk.* Nor can a neuter Verb become *passive;* because a passive Verb is no other than a Verb describing an *action received*

or *endured.* "The noble earl, on returning to town, found that the noble countess *was eloped* with his grace." I read this very sentence in an English newspaper not long ago. It should be *had eloped;* for *was eloped* means that *somebody* had *eloped the countess;* it means that *she* had *received* or *endured,* from some actor, *the act of eloping,* whereas, she is the actress, and the act is confined to *herself.* The Verb is called neuter because the action does not pass over to anything. There are Verbs which are *inactive;* such as, to *sit,* to *sleep,* to *exist.* These are also neuter Verbs, of course. But *inactivity* is not necessary to the making of a Verb neuter. It is sufficient for this purpose that the action do not pass from the actor to any object.

These *inactive* verbs are the *real* neuter ones; for, in the use of them, the nominative is neither *acting* nor *acted on.* But we now set down the whole batch, neuter and intransitive, as intransitive verbs; and Cobbett simply shows, by this verb *to elope,* that we cannot use an intransitive verb in the passive voice; we can no more say *I am eloped* than we can say *I am sitted, I am slept,* or *I am existed.* There are a few intransitive verbs that seem an exception to this rule; but they are not. I mean the verbs *to come, to arrive, to go, to return, to fall, to rise,* and some others. Let me set them down in the two ways in which they are used:

He has come,	He is come.
He has arrived,	He is arrived.
He has gone,	He is gone.
He has returned,	He is returned.
He has fallen,	He is fallen.
He has risen,	He is risen.

In the second form, *He is come,* etc., the words *come, arrived, gone, returned, fallen, risen,* are not really participles, but adjectives, indicating *state;* so this form is not at all a passive form of the verb; it is simply neuter; for the subject is neither acting nor acted on. In the first form, *He has come,* etc., these words are participles, and the sentences indicate *action* completed. But I find I am anticipating; Cobbett says the same thing in the next paragraph but one. Just keep in mind that what he calls *neuter*

we now call *intransitive;* and that what he calls *active*, we now call *transitive.*

269. In the instance just mentioned, the error is flagrant: "*was eloped,*" is what few persons would put down in writing; yet anybody might do it upon *the authority of Dr. Johnson;* for he says in his Dictionary that *to elope* is an *active Verb*, though he says that it is synonymous with *to run away*, which, in the same Dictionary, he says, is a *neuter Verb.* However, let those who prefer Doctor Johnson's authority to the dictates of reason and common sense say that "his grace *eloped the countess;* and that, accordingly, the countess *was eloped.*"

270. The danger of error, in cases of this kind, arises from the circumstance of there being many Verbs which are active in one sense and neuter in another. The Verb to *endure*, for instance, when it means to *support*, to *sustain*, is active; as, "I *endure pain.*" But when it means to *last*, to *continue*, it is neuter; as, "The earth *endures* from age to age." In the first sense we can say, the pain is *endured;* but, in the last, we cannot say the earth *is endured* from age to age. We say, indeed, I *am fallen;* the colt *is grown*, the trees *are rotten*, the stone *is crumbled*, the post *is mouldered*, the pitcher *is cracked;* though to grow, to rot, to crumble, to moulder, to crack, are all of them *neuter Verbs.* But it is clearly understood here that we mean that the colt *is in a grown*, or *augmented state;* that the trees *are in a rotten state;* and so on; and it is equally clear that we could not mean that the countess was *in an eloped state.* "The noble earl found that the countess *was gone.*" This is correct, though *to go* is a neuter Verb. But *gone*, in this sense, is not the participle of the Verb *to go;* it is merely an *adjective*, meaning *absent.* If we put any word after it, which gives it a verbal signification, it becomes erroneous. "He found that the countess *was gone out of the house.*" That is to

say, was *absent out of the house;* and this is nonsense. It must, in this case be, "He found that the countess *had gone out of the house.*"

271. Much more might be said upon this part of my subject; many niceties might be stated and discussed; but I have said quite enough on it to answer every useful purpose. Here, as everywhere else, take time to *think.* There is a *reason* for the right use of every word. Have your *meaning* clear in your mind; know the *meaning* of all the words you employ; and then you will seldom commit errors.

272. There remains to be noticed the use of the *active participle,* and then we shall have a few, and only a few, words to say upon the subject of the *modes* of Verbs. As to the active participle, paragraph 97, in Letter VIII, will have told you nearly all that is necessary. We know well that *I am working* means that *I work,* and so on. There is great nicety in distinguishing the circumstances which call for the use of the one from those which call for the other: but, like many other things, though very difficult to explain by words, these circumstances are perfectly well understood, and scrupulously attended to, by even the most illiterate persons. The active participle is, you know, sometimes a *noun* in its functions; as, "*Working* is good for our health." Here it is the *nominative* case to the Verb *is.* Sometimes it is an adjective; as, "the *working* people." As a noun it may be in any of the three cases; as, "*Working* is good; the advantage of *working;* I like *working.*" It may be in the singular or in the plural: "The *working* of the mines; the *workings* of corruption." Of course it requires *articles* and *prepositions* as nouns require them. More need not be said about it; and, indeed, my chief purpose in mentioning the active participle in this place is to remind you that it may be a *nominative case* in a sentence.

273. The *modes* have been explained in Letter VIII,

paragraphs 92, 93, 94, 95, and 96. Read those paragraphs again. The *infinitive mode* has, in almost all respects, the power of a *noun*. "*To work* is good for our health." Here it is the nominative of the sentence. "To eat, to drink, and to sleep, *are* necessary." It cannot become a plural; but it may be, and frequently is, in the objective case; as, "*I want* to eat." The *to* is, in some few cases, omitted when the infinitive is in the objective case; as, "*I dare write.*" But, "I dare *to* write," is just as neat, and *more* proper. The *to* is omitted by the use of the *ellipsis;* as, "I like to shoot, hunt, and course." But care must be taken not to leave out the *to*, if you thereby make the *meaning doubtful.* Repetition is sometimes disagreeable, and tends to enfeeble language; but it is always preferable to obscurity.

Here is a little difficulty. Cobbett has repeatedly said that the nominative always follows the verb *to be;* and so it does; but it is not always so with the *infinitive* of this verb. Look at these two sentences:

I supposed it to be him.
I am supposed to be he.

In the first instance, the grammarians say that we must say *to be him*, because it follows a word in the objective case (it), and is the complement of that word; and in the second case we must say *to be he*, because it follows a word in the nominative case (I), and is the complement of that word. Observe that in the second example it is as if I said, "I am supposed to be *existing;*" and in the first, as if I said, "I supposed *something.*"

274. If you cast your eye once more on the conjugation of the Verb *to work*, in Letter VIII, you will see that I have there set down the three other modes with all their persons, numbers, and times. The *imperative mode* I despatched very quietly by a single short paragraph; and, indeed, in treating of the other two modes, the *indicative* and the *subjunctive*, there is nothing to do but to point out the trifling variations that our Verbs undergo in order to make them suit their forms to the differences of *mode.*

The indicative mode is that manner of using the Verb which is applied when we are speaking of an action without any other action being at all connected with it, so as to make the one a *condition* or *consequence* of the other. "He *works* every day; he *rides* out;" and so on. But, there may be a condition or a consequence dependent on this working and riding; and in that case these Verbs must be in the subjunctive mode; because the action they express *depends* on something else, going before or coming after. "If he *work* every day, *he shall be paid* every day; if he *ride* out, he will not be at home by supper time." The *s* is dropped at the end of the Verbs here; and the true cause is this, that there is a *sign* understood. If filled up, the sentence would stand thus: "If he *should work;* if he *should ride* out." So that, after all, the Verb has, in reality, *no change of termination to denote what is called mode.* And all the fuss which grammarians have made about the *potential* modes, and other fanciful distinctions of the kind, only serve to puzzle and perplex the learner.

275. Verbs in general, and, indeed, all the Verbs, except the Verb *to be*, have always the *same form* in the *present time of the indicative* and in that of *the subjunctive*, in all the persons, save the second and third person singular. Thus, we say, in the present of the indicative, *I work, we work, you work, they work;* and in the subjunctive the same. But we say, in the former, *thou workest, he works;* while, in the subjunctive, we say, *thou work, he work;* that is to say, thou *mayst work*, or mightst, or shouldst (and so on), work; and he *may* work, or might or should, as the sense may require. Therefore, as to all Verbs, except the Verb *to be*, it is *only in these two persons* that any thing can happen to render any distinction of mode necessary. But the Verb *to be* has more variation than any other Verb. *All other Verbs* have the same form in their indicative *present time* as in their *infinitive mode*,

with the trifling exception of the *st* and *s* added to the second and third person singular; as, to *have*, to *write*, to *work*, to *run;* I *have*, I *write*, I *work*, I *run*. But the Verb *to be* becomes, in the present time of its indicative, I *am*, thou *art*, he *is*, we *are*, you *are*, they *are;* which are great changes. Therefore, as the subjunctive, in all its persons, takes the infinitive of the Verb without any change at all, the Verb *to be* exhibits the use of this mode most clearly; for, instead of I *am*, thou *art*, he *is*, we *are*, the subjunctive requires, I *be*, thou *be*, he *be*, we *be;* that is to say, I *may* be, or *might* be; and so on. Look now at the *conjugation* of the Verb *to be*, in Letter VIII, paragraph 117; and then come back to me.

276. You see, then, that this important Verb, *to be*, has a form in some of its persons appropriated to the *subjunctive mode*. This is a matter of consequence. Distinctions, without differences in the things distinguished, are fanciful, and, at best, useless. Here is a real difference; a practical difference; a difference in the form of the word. Here is a *past time* of the subjunctive; a past time distinguished, in some of its persons, by a different manner of spelling or writing the word. If I *be;* if I *were;* if he *were;* and not if I *was*, if he *was*. In the case of other Verbs, the past of the indicative is the same as the past of the subjunctive; that is to say, the Verb is written in the same letters; but in the case of the Verb *to be* it is otherwise. If I *worked*, if I *smote*, if I *had*. Here the Verbs are the same as in I *worked*, I *smote*, I *had;* but in the case of the Verb *to be*, we must say, in the past of the indicative, I *was*, and in that of the subjunctive, if I *were*.

277. The question, then, is this: *What are the cases* in which we ought to use the subjunctive form? Bishop Lowth, and, on his authority, Mr. Lindley Murray, have said, that *some* conjunctions have a *government* of verbs; that is to say, *make them* or *force them to be* in the subjunctive mode. And then these gentlemen mention par-

ticularly the conjunctions, *if*, *though*, *unless*, and some others. But (and these gentlemen allow it), the Verbs which follow these conjunctions are not *always* in the subjunctive mode; and the using of that mode must depend, *not upon the conjunction*, but upon the sense of the whole sentence. How, then, can the conjunction *govern* the Verb? It is the sense, the meaning of the whole sentence, which must govern; and of this you will presently see clear proof. "*If* it be dark, do not come home. *If* eating *is* necessary to man, he ought not to be a glutton." In the first of these sentences, the matter expressed by the Verb *may be* or *may not be*. There exists an *uncertainty* on the subject. And if the sentence were filled up, it would stand thus: "If it *should be* dark, do not come home." But in the second sentence there exists no such uncertainty. We know, and all the world knows, that *eating is necessary to man*. We could not fill up the sentence with *should;* and, therefore, we make use of *is*. Thus, then, the conjunction *if*, which you see is employed in both cases, has nothing at all to do with the government of the verb. It is the sense which governs.

It is worth while, however, to notice the conjunctions that are said to govern the subjunctive: *though*, *although*, *unless*, *lest*, *until*, *till*, *whether*, *provided that*, *on condition that*,— because, when used, they generally indicate some uncertainty. When they do not do this, then the indicative must be used. Here is an example that will illustrate this. If I were speaking of the possibilities in the future career of a young man, I should naturally say: "Unless he *be* honest, he will never, though he *be* rich as Crœsus, be happy." But if I were speaking of a real person, who is actually rich as Crœsus, I should naturally say, "Though he *is* rich as Crœsus, he is not happy." Again: "Do not admit him, unless he *has* a ticket." Here we say *has*, because we anticipate something as *fact*. But, where there is a doubt, we use the subjunctive. "Do not give him the money, unless he *return* you the goods." When, therefore, anything is spoken of as *actual fact*, or as in *absolute existence*, the indicative is used. Those who have studied French will remember

that the French have also a number of words that govern the subjunctive, and in many, if not most, of the cases where they use the subjunctive, we do so too. Though he be a giant; unless he be attentive; lest he hurt you; provided that he pay you; on condition that he reward you; wait until he come. The French use the subjunctive in all these cases. They also use it after certain verbs, as we do too; as, "Be sure that he *lay* no hand on you; mind that he *do* not touch you." You have doubtless noticed this use of the subjunctive in such sentences as that of Cobbett himself in paragraph 250: "You must take care that there *be* a nominative, and that it *be* clearly expressed or understood." Some writers think that the subjunctive mode is fast passing out of use, and that it will soon be altogether obsolete. I can only say that if it do go out of use, we shall lose the means of indicating different shades of meaning in the words we use. I suppose one reason why it is going out of use is because the great army of newspaper-writers know nothing of it; they are obliged to write with such extraordinary rapidity and in such haste that they can't take time to consider fine shades or differences of meaning in the words they employ.—Notice that the difference between the indicative and the subjunctive, in all verbs except the verb *to be*, is simply this, that in the subjunctive THE ENDINGS ARE ALL OUT OFF. Cast your eye over the conjugations of *to work* and *to be worked.*

278. There is a great necessity for care as to this matter; for the meaning of what we write is very much affected when we make use of the modes indiscriminately. Let us take an instance. "Though her chastity *be* right and becoming, it gives her no claim to praise; because she would be criminal *if* she *were* not chaste." Now, by employing the subjunctive, in the first member of the sentence, we leave it *uncertain* whether *it* be *right* or *not* for her to be chaste; and by employing it in the second, we express a *doubt as to the fact* of her chastity. We mean neither of these; and, therefore, notwithstanding here are a *though* and an *if*, both the Verbs ought to be in the indicative. "Though her chastity *is* right and becoming, it gives her no claim to praise; because she would be criminal *if* she *was* not chaste." Fill up with the signs. "Though her chastity *may be* right; if she *should not be*

chaste;" and then you see, at once, what a difference there is in the meaning.

279. The subjunctive is necessarily always used where a *sign is left out;* as, "Take care that *he come* to-morrow, that *you be* ready to receive him, that *he be* well received, and that *all things be* duly prepared for his entertainment." Fill up with the *signs*, and you will see the *reason* for what you write.

280. The Verb *to be* is sometimes used thus: "*Were he* rich, I should not like him the better. *Were it* not dark, I would go." That is to say, *if* he *were; if* it *were.* "*It were* a jest, indeed, to consider a set of seat-sellers and seat-buyers as a lawful legislative body. *It were* to violate every principle of morality to consider honesty as a virtue, when not to be honest is a crime which the law punishes." The *it* stands for a great deal here. "Ridiculous, indeed, would the state of our minds be, if it *were* such as to exhibit a set of seat-sellers and seat-buyers as a lawful legislative body." I mention these instances because they appear *unaccountable;* and I never like to slur things over. Those expressions for the using of which we cannot give *a reason* ought not to be used at all.

There is another use of the verb *to be*, unnoticed by Cobbett, which may be spoken of here. It has long been a matter of controversy whether we should say, "the bridge is building," or "the bridge is being built;" "preparations are making," or "preparations are being made." Mr. White maintains that the former is the only proper form, and that the latter form is contrary to the genius of our language. And other critics are of the same opinion. Well, there is no use in talking of it now; it is too late to alter it; for this manner of speaking is now used by almost everybody that speaks or writes English. Every newspaper in the United States uses this form; and the truth is, it has become a necessity, for there are some cases in which no other form can be used without changing the meaning of the sentence. We can say, The house is building, the book is printing, the play is acting, the bread is baking, the clothes are making, and so on, in many other instances; but we cannot say, "The boy is whipping" or "The girl is

ruining" to signify that "The boy is being whipped" or "The girl is being ruined." No; it is no use trying to change this now; there are certain cases where we *must* use "is being;" it is in the very life-blood of the language; it is every-day English; and there is no taking it out. It is like the word *execute*, which originally meant, and still properly means, to put a *sentence* into force; but now it is used every day, in print and in conversation, to signify putting a person to death. And there is no doubt but it will continue to be so used to the end of time; for no dictum of the critics can change it.

It is worth while remarking, that in sentences like "The house is building," "the corn is thrashing," the words *building* and *thrashing* are not verbs, but nouns; for the original form was "in building," "in thrashing." The Germans have an entirely different verb for such expressions; for "The house is building" they say Das Haus *wird* gebaut, and not Das Haus *ist* gebaut, which latter means The house is built.

281. As to instances in which authors have violated the principles of grammar, with respect to the use of the modes, I could easily fill a book much larger than this with instances of this kind from Judge BLACKSTONE and Doctor JOHNSON. One only shall suffice. I take it from the Judge's first Book. "Therefore, *if* the king *purchases* lands of the nature of gavel-kind, where *all the sons inherit equally;* yet, upon the king's demise, *his eldest son* shall succeed to these lands *alone*." Here is fine confusion, not to say something inclining towards high treason; for, if the king's son be to inherit these *lands alone*, he, of course, is *not to inherit the crown*. But it is the Verb *purchases* with which we have to do at present. Now, it is notorious that the king *does not* purchase lands in gavel-kind, or any other lands; whereas, from the form of the Verb, it is taken for granted that he does it. It should have been, "If the king *purchase* lands;" that is to say, if *he were to purchase*, or if he *should purchase*.

282. Thus, my dear James, have I gone through all that appeared to me of importance relating to Verbs. Every part of the Letter ought to be carefully read, and

its meaning ought to be well weighed in your mind; but always recollect that, in the using of Verbs, that which requires your first and most earnest care is the ascertaining of the *nominative* of the sentence; for, out of every hundred grammatical errors, full fifty, I believe, are committed for want of due attention to this matter.

Let me say a word here which will make clear to you what the Germans mean by what they call genetic teaching; that is, unfolding a subject in such a way as to show how it originates and grows up to completion. The shortest possible sentence must have a subject and a predicate (nominative and verb); for although the one word, "Love!" is a sentence, the subject is understood: "Love thou!" The next step is the object: "Love thou me!" A sentence may, therefore, consist of merely subject and predicate, or of subject, predicate, and object.

The last is an imperative sentence; let us take a declarative one. "Men love." This is a sentence; it contains subject and predicate, and makes complete sense. "Men love women." This has subject, predicate, and object. Now we may go on adding words, phrases, and clauses, modifying each of these chief parts of the sentence, until we stretch it out into a compound or complex sentence. For a sentence, like a house, is just built up by successive additions. These additions are often called adjuncts; they consist of single words, of phrases and clauses. I shall add all I can to the separate words of this sentence; first modifying the subject by various single words, then by a phrase, then by a clause; and then I shall endeavor to do the same to the predicate and the object. Now observe, and you will see how a sentence grows:

Men love women.
The men love women.
The worthy men love women.
The very worthy men love women.
The very worthy men in this city love women.

The very worthy men in this city, who are noted for their excellent character, love women.

Here we have modified the subject, first by the definite article, then by an adjective, then we have modified the adjective by an adverb; then we have modified or limited the subject by a phrase, and finally by a clause. Now let ust try and do the same thing to the predicate and the object:.

Men love women.
Men love the women.
Men love the good women.
Men love the very good women.
Men love dearly the very good women.
Men love dearly the very good women of this city.
Men love dearly the very good women of this city, who are respected by all the world.

The whole sentence will therefore be: "The very worthy men in this city, who are noted for their excellent character, love dearly the very good women of this city, who are respected by all the world." This, therefore, has now become a complex sentence, of which the chief clause is, "Men love women," and all the rest modifies the subject, the predicate, and the object of this clause. Of course, it might be extended much farther; but this will do to show you how a sentence grows; or, if you please, how it is built up. Should you ever be requested to give a trial lesson in English grammar, in a class of scholars who have learned something of the subject, you cannot do better than show them, in this manner, how a sentence is formed.

LETTER XX.

SYNTAX, AS RELATING TO ADVERBS, PREPOSITIONS, AND CONJUNCTIONS.

283. After what has been said, my dear James, on the subject of the Verb, there remains little to be added. The *Adverbs*, *Prepositions*, and *Conjunctions*, are all words which never *vary their endings*. Their uses have been sufficiently illustrated in the Letters on the Syntax of Nouns, Pronouns, and Verbs. In a Letter, which is yet to come, and which will contain specimens of *false grammar*, the misuse of many words, belonging to these inferior Parts of Speech, will be noticed; but it would be a waste of your time to detain you by an elaborate account of that which it is, by this time, hardly possible for you not to understand.

284. Some grammarians have given *lists* of Adverbs,

Prepositions, and Conjunctions. For what *reason* I know not, seeing that they have not attempted to give lists of the words of other parts of speech. These lists must be *defective*, and, therefore, worse than no lists. To find out the meaning of single words, the *Dictionary* is the place. The business of grammar is to show the connection between words, and the manner of using words properly. The sole cause of this dwelling upon these parts of speech appears to me to have been a notion that they would seem to be *neglected*, unless a certain number of pages of the book were allotted to each. To be sure each of them is a part of speech, as completely as the little finger is a part of the body; but few persons will think that, because we descant very frequently, and at great length, upon the qualities of the head and heart, we ought to do the same with regard to the qualities of the little finger.

285. I omitted, in the Letter on Verbs, to notice the use of the word *thing;* and I am not sorry that I did, because by my noticing it in this concluding paragraph, the matter may make a deeper impression on your mind. *Thing* is, of course, a *noun.* A *pen* is a thing, and every animal, or creature, animate or inanimate, is a *thing.* We apply it to the representing of every creature in the universe, except to men, women, and children; and a *creature* is that which has been *created*, be it living, like a *horse*, or dead, like *dirt* or *stones.* The use of the word *thing*, as far as this goes, is plainly reconcilable to reason; but "to get drunk is a beastly *thing.*" Here is neither human being, irrational animal, nor inanimate creature. Here is merely *an action.* Well, then, this action is the *thing;* for, as you have seen in Letter XIX, paragraph 273, a verb in the infinitive mode has, in almost all respects, the functions and powers of *a noun.* "It was a most atrocious *thing* to uphold the Bank of England in refusing to give gold for its promissory notes, and to compel the nation to submit to the wrong that it sustained from that refusal."

The meaning is, that the whole of these measures or transactions constituted a most atrocious *deed* or *thing.*

Cobbett despatches the syntax of adverbs in half-a-dozen lines; and yet there is one little matter connected with the use of these words that has, perhaps, caused more uncertainty, perplexing uncertainty, than anything connected with grammar. We say, rightly, that he fights bravely and she sings finely; but shall I say that he looks bravely and that her voice sounds finely? I may say that he dances smoothly and that she plays sweetly; but shall I say that his coat feels smoothly and that she looks sweetly? If not, how am I to know when to use the adverb and when the adjective?

This, as I have said, is a matter which has puzzled many a student of grammar, and caused anxiety to many a young writer. Here is a rule which I have never seen in any grammar, but which, I think, will cover the majority of such cases, and is easily understood and remembered: After all the verbs referring to the FIVE SENSES, the adjective, and not the adverb, is to be used; as, It tastes *good;* it smells *nice;* it sounds *harsh;* it feels *smooth;* it looks *handsome.* Expressed in a larger and more comprehensive manner, the rule might stand thus: Wherever *manner* is to be expressed, use the adverb; wherever *quality* is to be expressed, use the adjective. Cobbett repeatedly uses the expression "talks *fine;*" meaning, of course, fine talk, and not the *manner* of speaking. In the same way, we must say, "I arrived here safe and sound," and not *safely* and *soundly;* for it is not the *manner* of arriving, but the *state* in which he arrived, that is meant.

I thought that Cobbett explained somewhere in this grammar the diference between *so* and *such;* but I cannot find it. Mr. Swinton says: "*So* has sometimes a pronominal use; as, 'Whether he is a genius or not, he is considered so'—(a genius)." I think this is an error; *so* is used *adjectively* and adverbially, not pronominally; *such* is used pronominally; as, Whether he be a genius or not, he is considered *such;* whether he be rich or not, he is considered *so.* (See paragraph 143.)

By the way, I ought to have stated in another place that it is correct to say, "Two and two *is* four; five times five *is* twenty-five;" for these are *abstract* numbers, and are looked upon as one sum. But if you make the numbers *concrete* or *denominate,* then you must use the verb in the plural; as, "Two horses and two horses *are* four horses; five times five horses *are* twenty-five horses."

LETTER XXI.

SPECIMENS OF FALSE GRAMMAR, TAKEN FROM THE WRITINGS OF DOCTOR JOHNSON, AND FROM THOSE OF DOCTOR WATTS.

MY DEAR JAMES:

The chief object of this Letter is to prove to you the necessity of using great care and caution in the construction of your sentences. When you see writers like Dr. Johnson and Dr. Watts committing grammatical errors, and, in some instances, making their words amount to nonsense, or at least making their meaning doubtful; when you see this in the author of a grammar and of a dictionary of the English language, and in the author of a work on the subject of logic; and when you are informed that these were two of the most learned men that England ever produced, you cannot fail to be convinced that constant care and caution are necessary to prevent you from committing not only similar, but much greater, errors.

Another object, in the producing of these specimens, is to convince you that a knowledge of the Latin and Greek languages does not prevent men from writing bad English. Those languages are, by impostors and their dupes, called "the *learned* languages;" and those who have paid for having studied them are said to have received "a *liberal* education." These appellations are false, and, of course, they lead to false conclusions. *Learning*, as a noun, means *knowledge*, and *learned* means *knowing*, or *possessed of knowledge*. Learning is, then, to be acquired by *conception;* and, it is shown in *judgment*, in *reasoning*, and in the various modes of employing it. What, then, can *learning* have to do with any particular tongue! Good grammar, for instance, written in Welsh, or in the language of the Chippewa savages, is more *learned* than bad grammar written in Greek. The learning is in the

mind and not in the *tongue;* learning consists of *ideas* and not of the *noise* that is made by the mouth. If, for instance, the Reports drawn up by the House of Commons, and which are compositions discovering in every sentence ignorance the most profound, were written in Latin, should we then call them *learned?* Should we say that the mere change of the words from one tongue into another made that learned which was before unlearned? As well may we say that a falsehood written in English would have been truth if written in Latin; and as well may we say that a certain handwriting is a learned handwriting, or, that certain sorts of ink and paper are *learned* ink and paper, as that a language, or tongue, is a learned language or tongue.

The cause of the use of this false appellation, "learned languages," is this, that those who teach them in England have, in consequence of their teaching, *very large estates in house and land,* which are public property, but which are now used for the sole benefit of those teachers, who are, in general, the relations or dependents of the aristocracy. In order to give a color of reasonableness to this species of appropriation, the languages taught by the possessors are called "the *learned* languages;" and which appellation is, at the same time, intended to cause the mass of the people to believe that the professors and learners of these languages are, in point of wisdom, far superior to other men; and to establish the opinion that all but themselves are *unlearned* persons. In short, the appellation, like many others, is a trick which fraud has furnished for the purpose of guarding the snug possessors of the property against the consequences of the people's understanding the matter.

It is curious enough that this appellation of "learned languages" is confined to the English nation and the American, which inherits it from the English. Neither in France, in Spain, in Italy, nor in Germany, is this false

and absurd appellation in use. The same motives have not existed in those countries. There the monks and other priests have inherited from the founders. They had not any occasion to resort to this species of imposition. But in England the thing required to be glossed over. There was something or other required in that country as an apology for taking many millions a year from the public to keep men to do no apparently useful thing.

Seeing themselves unable to maintain the position that the Latin and Greek are more "*learned* languages" than others, the impostors and their dupes tell us that this is not what they mean. They mean, they say, not that those languages are, *in themselves*, more learned than others: but that, to possess a knowledge of them is a proof that the possessor is a *learned man*. To be sure, they do not offer us any argument in support of this assertion; while it would be easy to show that the assertion must, in every case, be false. But let it suffice, for this time, that we show that the possession of the knowledge of those languages does not prevent men from committing numerous grammatical errors when they write in their native language.

I have, for this purpose, fixed upon the writings of Doctor Johnson and of Doctor Watts; because, besides its being well known that they were deeply skilled in Latin and Greek, it would be difficult to find two men with more *real* learning. I take also the two works for which they are respectively the most celebrated; the RAMBLER of Doctor Johnson, and the LOGIC of Doctor Watts. These are works of very great learning. The RAMBLER, though its general tendency is to spread a gloom over life, and to damp all enterprise, private as well as public, displays a vast fund of knowledge in the science of morals; and the LOGIC, though the religious zeal of its pious, sincere, and benevolent author has led him into the very great error of taking his examples of

self-evident propositions from amongst those, many of which great numbers of men think not to be self-evident, is a work wherein profound learning is conveyed in a style the most simple, and in a manner the most pleasing. It is impossible to believe that the LOGIC was not revised with great care: and, as to the RAMBLER, the biographer of its author tells us that the Doctor made *six thousand* corrections and alterations before the work was printed in volumes.

The RAMBLER is in *Numbers;* therefore, at the end of each extract from it, I shall put the letter R, and the *Number*. The LOGIC is divided into *Parts and Chapters*. At the end of each extract from it, I shall put L; and then add the *Part and Chapter*. I shall range the extracts under the names of the parts of speech to which the erroneous words respectively belong.

ARTICLES.

"I invited her to spend the day in viewing *a* seat *and gardens*."—R. No. 34.

"For all our speculative acquaintance with things should be made subservient to our better conduct in *the* civil and religious life."—L. Introduction.

The indefinite article *a* cannot, you kown, be put before a *plural* noun. We cannot say *a gardens;* but this is, in fact, said in the above extract. It should have been "a seat and *its* gardens." "*Civil* and *religious life*," in the second extract are general and indefinite. The article, therefore, was unnecessary, and is improperly used. Look back at the use of Articles, Letter IV.

NOUNS.

"Among the innumerable historical *authors, who* fill every nation with accounts of *their ancestors*, or undertake to transmit to futurity the events of *their* own time,

the greater part, when fashion and novelty have ceased to recommend *them*, are of no *other use* than *chronological memorials*, which necessity may sometimes require to be consulted."—R. No. 122.

This is all confusion. *Whose* ancestors? The *nation's* ancestors are meant; but the *author's* are expressed. The two *theirs* and the *them* clearly apply to the *same Noun*. How easily all this confusion would have been avoided by considering the nation as a singular, and saying *its ancestors!* In the latter part of the sentence, the *authors* are called *chronological memorials;* and though we may, in some cases, use the word *author* for *author's work;* yet, in a case like this, where we are speaking of the authors as *actors*, we cannot take such a liberty.

"Each of these *classes* of the human race has desires, fears, and conversation peculiar to *itself;* cares which *another* cannot feel, and pleasures which *he* cannot partake."—R. No. 160.

The noun of multitude, classes, being preceded by *each*, has the pronoun *itself* properly put after it; but the *he* does not correspond with these. It should have been *it*. With regard to these two extracts, see paragraph 181.

"His great ambition was to shoot flying, and he, therefore, spent whole days in the woods, pursuing *game*, which, before he was near enough to see *them*, his approach frighted away."—R. No. 66.

Game is not a noun of multitude, like *mob*, or *House of Commons*. There are different *games* or *pastimes;* but this word, as applied to the describing of *wild animals*, has no plural; and, therefore, cannot have a plural pronoun to stand for it.

"The obvious duties of piety towards God and love towards man, with the *governments* of all our inclinations and passions."—L. Part 4.

This plural is so clearly wrong that I need not show *why* it is wrong.

"And by *this mean* they will better judge what to choose."—L. Part 4.

Mean, as a noun, is never used in the *singular*. It, like some other words, has broken loose from all principle and rule. By universal acquiescence it is become always a plural, whether used with singular or plural pronouns and articles or not. Doctor Watts, in other instances, says, *this means*.

It is curious enough that we have several plural words like this, used in a *singular* manner. We not only say *this means*, but *this news*, *this series*, and *this species*. We say, "Great pains *is* taken, he has taken *much* pains;" because, in this sense, *pains* means *exertion*, *trouble;* while in the plural it means *bodily pains*. *Mean*, *means*, are properly used in the singular and plural when applied to the terms used in proportion. When you are speaking of various *distinct* things or operations, you ought to say, "By *these* means;" but when you are speaking of things or circumstances in a *mass*, you must say, "By *this means*." Such sentences as, "This *is* one means of gaining your end," and "The best means *is* by fair play," are perfectly correct.

"Having delayed to buy a coach myself, till I should have the lady's *opinion*, for *whose* use it was intended."—R. No. 34.

We know that *whose* relates to *lady*, according to the Doctor's meaning; but, grammatically, it does not. It relates to opinion. It should have been, "the opinion of the *lady*, for whose use." See Syntax of Nouns, Letter XVI, paragraphs 170, 171.

PRONOUNS.

"Had *the opinion* of my censurers been unanimous, *it* might have overset my resolutions; but, since I find them at variance with each other, I can, without scruple, neglect *them*, and follow my own imagination."—R. No. 23.

You see the Doctor has, in the last member of the sentence, the *censurers* in his eye, and he forgets his nomina-

tive, *opinion*. It is the opinion that was *not unanimous*, and not the censurers who were not unanimous; for they were unanimous in censuring.

"*They* that frequent the chambers of the sick will generally find the sharpest pains and most stubborn maladies among *them* whom confidence in the force of nature formerly betrayed *to* negligence or irregularity; and that superfluity of strength, which was at once *their* boast and *their* snare, has often, to the end, no other effect than that it continues *them* long in impotence and anguish."—R. No. 38.

The *they* and the first *them* ought to be *those;* the *to* ought to be *into*. The two *theirs* and the last *them* are not absolutely faulty, but they do not clearly enough relate to their antecedent.

"METISSA brought with her an old maid, recommended by her mother, *who* taught *her* all the arts of domestic management, and was, on every occasion, her chief agent and directress. *They* soon invented one reason or other to quarrel with all my servants, and either prevailed on me to turn *them* away, or treated *them* so ill that *they* left me of themselves, *and always supplied their places* with some brought from my wife's family."—R. No. 35.

Here is perfect confusion and pell-mell! *Which* of the two, the *old maid* or the *mother*, was it that taught the arts of domestic management? And which of the two was taught, *Metissa* or the *old maid?* "*They* soon invented." Who are *they?* Are there two, or all the three? And *who* supplied the places of the servants? The meaning of the *words* clearly is that *the servants themselves supplied the places*. It is very rarely that we meet with so bad a sentence as this.

"I shall not trouble you with a history of the stratagems practised upon my judgment, or the allurements tried upon my heart, which, if you have, in any part of your life, been acquainted with *rural politics*, you will

easily conceive. *Their* arts have no great variety, *they think nothing* worth *their care* but money."—R. No. 35.

"Their arts;" but *whose* arts? There is no antecedent, except "*rural politics;*" and thus, all this last sentence is perfect nonsense.

"But the fear of not being approved as just *copiers* of human manners is not the most important concern that *an author* of this sort ought to have before *him.*"—R. No. 4.

An author cannot be said to fear not to be approved as just *copiers.* The word *author* ought to have been in the plural, and *him* ought to have been *them.*

"The wit, whose vivacity condemns slower tongues to silence; the *scholar*, whose knowledge allows *no man* to think *he* instructs *him.*"—R. No. 188.

Which of the two is allowed? The *scholar* or the *no man?* Which of the two does *he* relate to? Which of the two does the *him* relate to? By a little *reflection* we may come at the Doctor's meaning; but if we may stop to discover the grammatical meaning of an author's *words*, how are we to imbibe the science which he would teach us?

"The state of the possessor of humble virtues, to the affector of great excellencies, is that of a small cottage of stone, to the palace raised with ice by the Empress of Russia; *it* was, for a time, splendid and luminous, but the first sunshine melted it to nothing."—R. No. 22.

Which, instead of *it*, would have made clear that which is now dubious, for *it* may relate to cottage as well as to palace; or it may relate to state.

We do not now say *excellencies*, but *excellences*, for the singular is *excellence*. *Excellencies* is the plural of *excellency*, which is now seldom used except as a title of honor. It is the same kind of error as Castlereagh's *indulgencies*, which you will see by-and-by.

"The *love of retirement* has, in all ages, adhered closely to those minds which have been most enlarged by knowl-

edge, or elevated by genius. Those who enjoyed *everything* generally supposed to confer happiness, have been forced to seek *it* in the shades of privacy."—R. No. 7.

To seek *what?* The *love of retirement*, or *everything?* The Doctor means *happiness*, but his *words* do not mean it.

"Those who enjoyed" ought to be "Those who have enjoyed;" because no particular time is mentioned. (See paragraph 261.)

"Yet there is a certain race of men *that* make it their duty to hinder the reception of every work of learning or genius, *who* stand as sentinels in the avenues of fame, and value themselves upon giving ignorance and envy the first notice of *a prey*."—R. No. 3.

That, or *who*, may, as we have seen, be the relative of a noun, which is the name of a rational being or beings; but *both* cannot be used, applicable to the *same noun* in the same sentence. Nor is "*a prey*" proper. *Prey* has *no plural.* It is like *fat, meat, grease, garbage*, and many other words of that description.

"For, among all the *animals* upon *which* nature has impressed *deformity* and *horror*, there was none *whom* he durst not encounter rather than a beetle."—R. No. 126.

Here are *whom* and *which* used as the relatives to the *same noun;* and, besides, we know that *whom* can, in no case, be a relative to irrational creatures, and, in this case, the author is speaking of such creatures only. "*Horror*" is not a thing that can be impressed upon another thing so as to be seen. Horror is a *feeling of the mind;* for, though we say "horror was *visible on his countenance*," we clearly mean that the outward *signs* of horror were visible. We cannot *see* horror as we can *deformity.* It should have been "*deformity* and *hideousness.*"

"To cull from the mass of *mankind* those individuals upon *which* the attention ought to be most employed."—R. No. 4.

The antecedent belongs to *rational* beings, and, therefore, the *which* should have been *whom.*

"This determination led me to Metissa, the daughter of Chrisophilus, *whose person* was at least without deformity."—R. No. 35.

The person of *which* of the two? Not of the old papa, to be sure; and yet this is what the *words* mean.

"To persuade *them who* are entering the world, that all are equally vicious, is not to awaken judgment."—R. No. 119.

Those persons who are entering the world, and not any *particular* persons of whom we have already been speaking. We cannot say *them persons;* and, therefore, this sentence is incorrect.

"Of these pretenders, it is fit to distinguish *those who* endeavor to deceive from *them who* are deceived."—R. No. 189.

"I have, therefore, given a place to what may not be useless *to them whose* chief ambition is to please."—R. No. 34.

The *thems* in these two sentences should be *those.* But "*them* who *are deceived*" has another sort of error attached to it, for the *who*, remember, is not, of itself, a *nominative.* The antecedent, as you have seen, must be taken into view. This antecedent, must be *the persons*, understood; and then we have *them persons are deceived.*

"Reason, as to the power and principles *of it*, is the common gift of God to man."—L. Introduction.

The *it* may relate to *power* as well as to *reason.* Therefore, it would have been better to say, "Reason, as to *its* power and principles;" for if clearness is always necessary, how necessary must it be in the teaching of logic!

"All the prudence that *any man* exerts in *his* common concerns of life."—L. Introduction.

Any man means, here, the same as *men in general*, and the concerns mean the concerns common to men in general; and therefore the article *the* should have been used instead of the pronoun *his.*

"It gives pain to the mind and memory, and exposes the unskillful *hearer* to mingle the superior and inferior particulars together; it leads *them* into a thick wood instead of open daylight, and places *them* in a labyrinth instead of a plain path."—L. Part 4, Chap 2.

The *grammar is clearly* bad; and the *rhetoric* is not quite free from fault. *Labyrinth* is the opposite of *plain path*, but *open daylight* is not the opposite of a *thick wood*. *Open plain* would have been better than *open daylight;* for open daylight may exist along with a thick wood.

VERBS.

"There are many things which we every day see others unable to perform, and, perhaps, have even miscarried ourselves in attempting; and yet *can* hardly *allow* to be difficult."—R. No. 122.

This sentence has in it one of the greatest of faults. The *nominative case* of *can allow* is not clear to us. This is a manner *too elliptical.* "*We* can hardly allow *them*," is what was meant.

"A man's eagerness *to do that good, to which he is not called*, will betray him into crimes."—R. No. 8.

The man is not called *to the good*, but to do the good. It is not my business, at this time, to criticise the *opinions* of Doctor Johnson; but I cannot refrain from just remarking upon this sentence, that it contains the sum total of *passive obedience* and *non-resistance.* It condemns all disinterested zeal and everything worthy of the name of patriotism.

"We are not compelled to toil through half a folio to be convinced that the author has *broke* his promise."—R. No. 1.

"The Muses, when they *sung* before the throne of Jupiter."—R. No. 3.

In the first of these, the *past time* is used where the

passive participle ought to have been used; and in the second, the *passive participle* is used in the place of the *past time*. *Broken* and *sang* were the proper words.

"My purpose *was*, after ten months more spent in commerce, *to have withdrawn* my wealth to a safer country." —R. No. 120.

The *purpose* was *present*, and therefore it *was* his purpose *to withdraw* his wealth.

"A man may, by great attention, persuade others that he really has the qualities that he presumes to boast; but the hour *will come* when he *should* exert them, and then whatever *he enjoyed* in *praise*, he *must suffer in reproach*." —R. No. 20.

Here is a complete confounding of times. Instead of *should*, it should be *ought to;* and instead of *enjoyed*, it should be *may have enjoyed*. The sense is bad, too; for how can a man *suffer in reproach what he has enjoyed in praise?*

"He had taught himself to think riches more valuable than nature *designed them*, and to expect from them . . . . ."—R. No. 20.

"I could prudently *adventure an inseparable union*."—R. No. 119.

"I propose *to endeavor the entertainment* of my countrymen."—R. No. 1.

"He may, by *attending the remarks*, which every paper will produce."—R. No. 1.

In each of these four sentences, a *neuter* verb has the powers of an *active* [transitive] verb given to it. Designed them *to be;* adventure *on;* endeavor to *entertain;* attending *to*." To *design a thing* is to draw it; to *attend a thing* is to wait on it. No case occurs to me, at present, wherein *adventure* and *endeavor* can be active [transitive] verbs; but, at any rate, they ought not to have assumed the active office here.

"*I was not condemned* in my youth to solitude, either

by indigence or deformity, *nor passed* the earlier part of life without the flattery of courtship."—R. No. 119.

The verb cannot change from a *neuter* to an *active* without a repetition of the *nominative*. It should have been, nor *did I pass;* or, nor *passed I.*

"ANTHEA *was content* to call a coach, and *crossed* the brook."—R. No. 34.

It should be "*she* crossed the brook."

"He will be welcomed with ardor, *unless* he *destroys* those recommendations by his faults."—R. No. 160.

"*If he thinks* his own judgment not sufficiently enlightened, he may rectify his opinions."—R. No. 1.

"*If* he *finds*, with all his industry, and all his artifices, that he cannot deserve regard, or cannot obtain it, he may let the design fall."—R. No. 1.

The subjunctive mode ought to be used in all these three sentences. In the first, the meaning is, "unless he *should* destroy." In the last two, the Doctor is speaking of his own undertaking; and he means, "the author, if he *should* think, if he *should* find; may then rectify his opinions; may then let fall his design." He therefore should have written, "if he *think;* if he *find.*"

"Follow solid argument wherever *it leads* you."—L. Part 3.

Wherever it *may lead* you, *shall lead* you, is meant; and, therefore, the subjunctive mode was necessary. It should have been, "wherever *it lead* you."

"See, therefore, that your general definitions, or descriptions, *are* as accurate as the nature of the thing will bear; see that your general divisions and distributions *be* just and exact; see that your axioms *be* sufficiently evident; see that your principles *be* well drawn."—L. Part 4.

All these members are correct, except the first, where the verb is put in the indicative mode instead of the *subjunctive.* All the four have the same turn; they are all in the same mode, or manner; they should, therefore, all

have had the verb in the *same form*. They all required the subjunctive form.

PARTICIPLES.

"Or, it is *the drawing* a conclusion, which was before either unknown or dark."—L. Introduction.

It should be "the drawing *of* a conclusion;" for, in this case, the active participle becomes a *noun*. "The *act* of drawing" is meant, and clearly understood; and we cannot say, "the *act drawing* a conclusion." When the article comes before, there must be the preposition after the participle. To omit the preposition in such cases is an error very common, and therefore I have noticed the error in this instance, in order to put you on your guard.

ADVERBS.

"For thoughts are *only* criminal when they are first *chosen*, and then voluntarily *continued*."—R. N. 8.

The *station*, or *place*, of the adverb is a great matter. The Doctor does not mean here that which his words mean. He means that "thoughts are criminal, *only when* they are first chosen and then voluntarily continued." As the words stand, they mean that "thoughts are *nothing else*, or *nothing more*, than criminal," in the case supposed. But here are other words not very properly used. I should like to be informed *how* a thought *can* be *chosen;* how that is possible; and also *how* we can *continue* a thought, or how we can *discontinue* a thought at our *will*. The science here is so very profound that we cannot see the bottom of it. Swift says, "whatever is *dark* is *deep*. Stir a puddle, and it is deeper than a well." Doctor Johnson deals too much in this kind of profundity.

There is no word in our language more frequently misused than this word *only*. People constantly write and speak such sentences

as these: "I have only received ten dollars. He only sells leather. He only speaks French;" and so on. The word *only* must be placed next to the word which it modifies: I have received only ten dollars; he sells only leather, or leather only; he speaks only French. As the sentences stand in the first instance, they do not mean what they are intended to mean: the first means, only *received* not spent or lost; the second, only *sells* leather, never buys any; the third only *speaks* French, never writes it.

"I have heard *how* some critics have been pacified with claret and a supper, and others laid asleep with the soft notes of flattery."—R. No. 1.

How means *the manner in which.* As, "*How* do you do?" That is, "*In what manner* do you carry yourself on?" But the Doctor tells us here, in other words, the precise *manner in which* the critics were pacified. The *how*, therefore, should have been *that.*

"I hope *not much* to tire those whom I shall not happen to please."—R. No. 1.

He did not mean that he did not *much hope*, but that he hoped not to *tire much.* "I hope I shall not *much tire* those whom I may not happen to please." This was what he meant; but he does not say it.

"And it is a good judgment alone can dictate how *far* to proceed in it and *when* to stop."—L. Part 4.

Doctor Watts is speaking here of writing. In such a case an adverb, like how *far*, expressive of longitudinal space, introduces a *rhetorical figure;* for the plain meaning is, that judgment will dictate *how much to write on it*, and not *how far to proceed in it.* The figure, however, is very proper, and much better than the literal words. But when a figure is *begun* it should be carried on throughout, which is not the case here; for the Doctor begins with a figure of longitudinal space, and ends with a figure of *time.* It should have been "*where* to stop." Or, "how *long* to proceed in it and *when* to stop." To tell a man *how far* he is to go into the Western countries of America, and *when* he is to stop, is a very different

thing from telling him *how far* he is to go and *where* he is to stop. I have dwelt thus on this distinction, for the purpose of putting you on the watch, and guarding you against confounding figures. The less you use them the better, till you understand more about them.

"*In searching out* matters of *fact* in times past or in distant places, in which case moral *evidence* is sufficient, and moral *certainty* is the utmost that can be attained, *here* we derive a greater assurance of the *truth of it* by a number of persons, or multitude of circumstances, concurring to bear *witness to it.*"—L. Part 3.

The adverb *here* is wholly unnecessary, and it does harm. But what shall we say of the *of it*, and the *to it?* What is the *antecedent* of the *it?* Is *matters of fact* the antecedent? Then *them*, and not *it*, should have been the pronoun. Is *evidence* the antecedent? Then we have circumstances bearing *witness to evidence!* Is *certainty* the antecedent? Then we have the *truth* of *certainty!* Mind, my dear James, this sentence is taken from a treatise on logic! How necessary it is, then, for *you* to be careful in the use of this powerful little word *it!*

PREPOSITIONS.

"And, as this practice is a commodious subject of raillery *to* the gay, and of declamation to the serious, it has been ridiculed . . . . ."—R. No. 123.

With the gay; for *to* the gay means that the raillery is *addressed* to the gay, which was not the author's meaning.

"When I was deliberating *to* what new qualifications I should aspire."—R. No. 123.

With regard to, it ought to have been; for we cannot *deliberate a thing* nor *to a thing.*

"If I am not commended *for* the beauty of my works, I may hope to be pardoned *for* their brevity."—R. No. 1.

We may commend him *for* the beauty of his works and we may *pardon* him *for* their brevity, if we deem the brevity *a fault;* but this is not what he means. He means that, at any rate, he shall have the *merit* of brevity. "If I am not commended for the beauty of my works, I may hope to be pardoned on *account of* their brevity." This was what the Doctor meant; but this would have marred a little the *antithesis;* it would have unsettled a little of the balance of that *see-saw* in which Dr. Johnson so much delighted, and which, falling into the hands of novel-writers and of Members of Parliament, has, by moving unencumbered with any of the Doctor's reason or sense, lulled so many thousands asleep! Dr. Johnson created a race of writers and speakers. "Mr. Speaker, that the state of the nation is very critical, all men must allow; but that it is wholly desperate, few men will believe." When you hear or see a sentence like this, be sure that the person who speaks or writes it has been reading Dr. Johnson, or some of his imitators. But, observe, these imitators go no further than the frame of the sentence. They, in general, take special care not to imitate the Doctor in knowledge and reasoning.

I have now lying on the table before me forty-eight errors, by Doctor Watts, in the use or omission of Prepositions. I will notice but two of them; the first is an error of commission, the second of omission.

"When we would prove the importance of any scriptural doctrine or duty, the multitude of texts wherein it is *repeated* and *inculcated upon* the reader seems naturally to instruct us that it is a matter of greater importance than other things which are but slightly or singly mentioned in the Bible."—L. Part 3.

The words *repeated* and *inculcated* both apply to *upon;* but we cannot *repeat* a thing *upon* a reader, and the words here used mean this. When several verbs or participles are joined together by a copulative conjunction,

care must be taken that the act described by each verb, or participle, be such as can be performed by the agent, and performed, too, in the manner, or for the purpose, or on the object, designated by the other words of the sentence.

The other instance of error in the use of the *Preposition* occurs in the very *first sentence* in the Treatise on Logic.

"Logic is the art of using reason well in our inquiries after truth, and the communication of it to others."—L. Introduction.

The meaning of the *words* is this: that "*Logic* is the art of using reason well in our inquiries after truth, and *is also* the communication of it to others." To be sure we do *understand* that it means that "Logic is the art of using reason well in our inquiries after truth, and *in* the communication of it to others;" but, surely, in a case like this, no room for doubt, or for hesitation, ought to have been left. Nor is "using reason *well*" a well-chosen phrase. It *may* mean *treating* it *well;* not *ill-treating* it. "Using reason *properly* or *employing* reason well," would have been better. For, observe, Doctor Watts is here giving a *definition* of the thing of which he was about to treat; and he is speaking to persons unacquainted with that thing; for as to those acquainted with it, no definition was wanted. Clearness, everywhere desirable, was here absolutely necessary.

CONJUNCTIONS.

"*As*, notwithstanding all that wit, or malice, or pride, or prudence, will be able to suggest, men and women must, at last, pass their lives together, I have never, *therefore*, thought those writers friends to human happiness who endeavor to excite in either sex a general contempt or suspicion of the other."—R. No. 149.

The *as* is unnecessary; or the *therefore* is unnecessary.

"But the happy historian has no *other* labor *than of gathering* what tradition pours down before him."—R. No. 122.

"Some have advanced, without due attention to the consequences of this notion, that certain virtues have their correspondent faults, and *therefore to exhibit* either apart is to deviate from probability."—R. No. 4.

"But if the power of example is so great as to take possession of the memory by a kind of violence, care ought to be taken *that*, when the choice is unrestrained, the best examples only should be exhibited; and *that which* is likely to operate so strongly should not be mischievous or uncertain in its effects."—R. No. 4.

It should have been, in the first of these extracts, "than *that* of gathering;" in the second, "and *that* therefore;" in the third, "and that *that* which is likely." If the Doctor wished to avoid putting *two thats* close together, he should have chosen another form for his sentence. The *that which* is a *relative*, and the conjunction *that* was required to go before it.

"It is, therefore, a useful thing, when we have a fundamental truth, we *use* the synthetic method to explain it."—L. Part 4.

It should have been *that* we use, or to use.

WRONG PLACING OF WORDS.

Of all the faults to be found in writing, this is one of the most common, and perhaps it leads to the greatest number of misconceptions. All the words may be the proper words to be used upon the occasion; and yet, by a *misplacing* of a part of them, the meaning may be wholly destroyed; and even made to be the contrary of what it ought to be.

"I asked the question with no other intention than to

set the gentleman free from the necessity of silence, and give him an opportunity of mingling on equal terms with a polite assembly, from which, *however uneasy*, he could not then *escape, by a kind introduction* of the only subject on which I believed him to be able to speak with propriety."—R. No. 126.

This is a very bad sentence altogether. "*However uneasy*," applies to *assembly*, and not to *gentleman*. Only observe how easily this might have been avoided. "From which *he, however uneasy*, could not then escape." After this we have "*he* could not then *escape, by a kind introduction*." We know what is *meant;* but the Doctor, with all his *commas*, leaves the sentence confused. Let us see whether we cannot make it clear. "I asked the question with no other intention than, by a kind introduction of the only subject on which I believed him to be able to speak with propriety, to set the gentleman free from the necessity of silence, and to give him an opportunity of mingling on equal terms with a polite assembly, from which he, however uneasy, could not then escape."

"Reason is the glory of human nature, and one of the chief eminences whereby we are raised above our fellow-creatures, the brutes, *in this lower world.*"—L. Introduction.

I have before showed an error in the *first* sentence of Doctor Watt's work. This is the *second* sentence. The words, "*in this lower world,*" are not words *misplaced* only; they are wholly *unnecessary*, and they do great harm; for they do these two things: first, they imply *that there are brutes in the higher world;* and, second, they excite a doubt, *whether we are raised above those brutes.*

I might, my dear James, greatly extend the number of my extracts from both these authors; but, these, I trust, are enough. I had noted down about two hundred errors in Doctor Johnson's Lives of the Poets; but afterwards

perceiving that he had revised and corrected the RAMBLER with *extraordinary care*, I chose to make my extracts from that work rather than from the Lives of the Poets.

DOUBLE-NEGATIVE AND ELLIPSIS.

Before I dismiss the specimens of bad grammar, I will just take, from TULL, a sentence which contains striking instances of the misapplication of *Negatives*, and of the *Ellipsis*. In our language *two negatives* applied to *the same verb*, or to the same words of any sort, amount to an *affirmative;* as, "Do *not* give him *none* of your money." That is to say, "*Give him some* of your money," though the contrary is meant. It should be, "*Do not* give him *any* of your money." Errors, as to this matter, occur most frequently when the sentence is formed in such a manner as to lead the writer out of sight and out of sound of the first negative before he comes to the point where he thinks a second is required; as, "*Neither* Richard nor Peter, as I have been informed, and indeed as it has been proved to me, *never* gave James authority to write to me." You see it ought to be *ever*. But in this case, as in most others, there requires nothing more than a little *thought*. You see clearly that two negatives, applied to the same verb, destroy the negative effect of each other. "I will *not never* write." This is the contrary of "I *will never* write."

The Ellipsis, of which I spoke in Letter XIX, paragraph 227, ought to be used with *great care*. Read that paragraph again; and then attend to the following sentence of Mr. TULL, which I select in order to show you that very fine thoughts may be greatly marred by a too free use of the Ellipsis.

"It is strange that *no* author should *never* have written fully of the fabric of ploughs! Men of *greatest* learning have spent their time in contriving instruments to measure

the immense distance of the stars, and in finding out the dimensions and *even weight* of the planets. They think it more eligible to study the art of ploughing the sea with ships than of tilling the land with ploughs. They bestow the utmost of their skill, learnedly to pervert the natural use of all the elements *for destruction* of their own species by the bloody art of war; and some waste their whole lives in studying how to arm death with new engines of horror, *and inventing* an infinite variety of slaughter; but think it beneath men of learning (who only are capable of doing it) to employ their learned labors in the invention of new, or *even improving* the old, instruments *for increasing of* bread."

You see the *never* ought to be *ever*. You see that the *the* is left out before the word *greatest*, and again before *weight*, and, in this last-mentioned instance, the leaving of it out makes the words mean the "*even* weight;" that is to say, not the *odd* weight; instead of "*even the* weight," as the author meant. The pronoun *that* is left out before "*of tilling;*" before destruction, the article *the* is again omitted; *in* is left out before *inventing*, and also before *improving;* and, at the close, *the* is left out before *increasing*. To see so fine a sentence marred in this way is, I hope, quite enough to guard you against the frequent commission of similar errors.

We often see the word *alone* wrongly used for *only;* as, "To which I am not alone bound by honor, but by law;" but Mr. TULL uses *only* instead of *alone*. He should have said, "who alone are capable of doing it."

LETTER XXII.

ERRORS AND NONSENSE IN A KING'S SPEECH.

MY DEAR JAMES:

In my first Letter, I observed to you that to the functions of statesmen and legislators was due the highest respect which could be shown by man to anything human; but I, at the same time, observed that, as the degree and quality of our respect rose in proportion to the influence which the different branches of knowledge naturally had in the affairs and on the conditions of men, so, in cases of imperfection in knowledge, or of negligence in the application of it, or of its perversion to bad purposes, all the feelings opposite to that of respect rose in the same proportion; and to one of these cases I have now to direct your attention.

The speeches of the king are read by him to the Parliament. They are composed by his ministers or select councillors. They are documents of great importance, treating of none but weighty matters; they are always styled *Most Gracious*, and are heard and answered with the most profound respect.

The persons who settle upon what shall be the topics of these speeches, and who draw the speeches up, are a Lord High Chancellor, a First Lord of the Treasury, a Lord President of the Council, three Secretaries of State, a First Lord of the Admiralty, a Master General of the Ordnance, a Chancellor of the Exchequer, and perhaps one or two besides. These persons are called, when spoken of in a body, *the Ministry*. They are all members of the king's constitutional council, called the *Privy Council*, without whose assent the king can issue no proclamation nor any order affecting the people. This council, Judge Blackstone, taking the words of Coke, calls

"a *noble*, *honorable*, and *reverend* assembly." So that, in the Ministry, who are *selected* from the persons who compose this assembly, the nation has a right to expect something very near to perfection in point of judgment and of practical talent.

How destitute of judgment and of practical talent these persons have been, in the capacity of statesmen and of legislators, the present miserable and perilous state of England amply demonstrates; and I am now about to show you that they are equally destitute in the capacity of writers. There is some poet who says,

> "Of all the arts in which the learn'd excel,
> The first in rank is that of *writing well*." *

And though a man may possess great knowledge, as a statesman and as a legislator, without being able to perform what this poet would call *writing well;* yet, surely, we have a right to expect in *a minister* the capacity of being able to write *grammatically;* the capacity of putting his own meaning clearly down upon paper. But, in the composing of a king's speech, it is not *one* man, but *nine* men, whose judgment and practical talent are employed. A king's speech is, too, a very *short* piece of writing. The topics are all distinct. Very little is said upon each. There is no reasoning. It is all plain matter of fact, or of simple observation. The thing is done with all the advantages of abundant time for examination and re-examination. Each of the ministers has a copy of the speech to read, to examine, and to observe upon; and when no one has anything left to suggest in the way of alteration or improvement, the speech is agreed to, and put into the mouth of the king.

Surely, therefore, if in any human effort perfection can be expected, we have a right to expect it in a king's

* Of all those arts in which the wise excel,
Nature's chief masterpiece is writing well.
Sheffield, Earl of Buckinghamshire.

speech. You shall now see, then, what pretty stuff is put together, and delivered to the Parliament, under the name of king's speeches.

The speech which I am about to examine is, indeed, a speech of the regent; but I might take any other of these speeches. I choose this particular speech because the subjects of it are familiar in America as well as in England. It was spoken on the 8th of November, 1814. I shall take a sentence at a time, in order to avoid confusion.

"My Lords and Gentlemen: It is with *deep regret* that *I am again obliged* to announce the continuance of his majesty's lamented indisposition."

Even in this short sentence there is something *equivocal;* for it *may* be that the prince's regret arises from *his being obliged* to announce, and not from the thing announced. If he had said, "With deep regret I announce," or, "I announce with deep regret," there would have been nothing equivocal. And, in a composition like this, all ought to be as clear as the pebbled brook.

"It *would have given* me great satisfaction to *have been enabled* to *communicate* to you the *termination* of the war between this country and the United States of America."

The double compound times of the verbs, in the first part of the sentence, make the words mean that it would, *before the prince came to the House*, have given him great satisfaction *to be* enabled to communicate; whereas he meant, "It would *now* have given me great satisfaction *to be enabled* to communicate." In the latter part of the sentence we have a little nonsense. What does *termination* mean? It means, in this case, *end* or *conclusion;* and thus the prince wished to *communicate an end* to the wise men by whom he was surrounded! To communicate is to *impart* to another any thing that we have in our possession or within our power. And so, the prince wished to *impart* the *end* to the noble lords and honorable gentlemen. He might wish to impart, or communicate

the *news*, or the *intelligence* of the *end;* but he could not *communicate* the *end itself.* What should we say, if some one were to tell us, that an officer had arrived, and *brought* home the termination of a battle, and *carried* it to Carlton House and *communicated* it to the prince? We should laugh at our informant's ignorance of grammar, though we should understand what he meant. And, shall we, then, be so partial and so unjust as to reverence in king's councillors that which we should laugh at in one of our neighbors? To act thus would be, my dear son, a base abandonment of our reason, which is, to use the words of Dr. Watts, the common gift of God to man.

"*Although* this war originated in *the most* unprovoked aggression on the part of *the Government* of the United States, and was calculated to promote the designs of the common enemy of Europe against the rights and independence of *all other nations*, I never have ceased to entertain a sincere desire to bring it to a conclusion *on just and honorable terms.*"

The *the most* would lead us to suppose that there had been *more than one* aggression, and that the war originated in the most unprovoked *of them;* whereas the prince's meaning was that the aggression was *an* unprovoked one, unprovoked in the superlative degree; and that, therefore, it was *a most* unprovoked aggression. The words *all other nations* may mean all nations *except England;* or, all nations *out of Europe;* or, all nations *other than the United States;* or, all nations *except the enemy's own nation.* Guess you which of these is the meaning; I confess that I am wholly unable to determine the question. But, what does the close of the sentence mean when taken into view with the *although* at the beginning? Does the prince mean that he would be justified in wanting to make peace on *unjust* and *dishonorable* terms *because* the enemy had been the aggressor? He might, indeed, wish to make it on terms

dishonorable, and even disgraceful, to the enemy; but could he possibly wish to make it on *unjust* terms? Does he mean that an aggression, however wicked and unprovoked, would give him a *right* to do *injustice?* Yet, if he do not mean this, what does he mean? Perhaps (for there is no certainty) he may mean that he wishes to bring the war to a conclusion as soon as he can get *just and honorable terms from the enemy;* but, then, what is he to do with the *although?* Let us try this: "I am ready," say you, "to make peace, *if you will give me just terms, although you are the aggressor.*" To be sure you are, *whether I be the aggressor or not!* All that you can possibly have the face to ask of me is *justice;* and, therefore, why do you connect your wish for peace with this *although?* Either you mean that my aggression gives you *a right* to demand of me *more than justice*, or you talk *nonsense.* Nor must we overlook the word "*government,*" which is introduced here. In the sentence before, the prince wished to communicate the end of the war between "*this country* and the *United States;*" but in this sentence we are at war with "the *Government* of the United States." This was a poor trick of sophistry, and as such we will let it pass; only observing that such low trickery is not very becoming in men selected from "*a noble, honorable,* and *reverend* assembly."

"I am *still* engaged in negotiations for this purpose."

That is, the purpose of bringing the war to a conclusion. A very good purpose; but why *still?* He had not told his nobles and his boroughmen that he *had been* engaged in negotiations. Even this short, simple sentence could not be made without fault.

"The success of them must, however, depend on my *disposition* being met *with* corresponding *sentiments* on the part of the enemy."

Now, suppose I were to say, "My wagon was met *with* Mr. Tredwell's coach." Would you not think that some-

body had met the wagon and coach, both going together the same way? To be sure you would. But if I were to say, "My wagon was met *by* Mr. Tredwell's coach," you would think that they had approached each other from different spots. And, therefore, the prince should have said, "met *by*." This sentence, however, short as it happily is, is too long to be content with one error. *Disposition*, in this sense of the word, means *state*, or *bent*, or *temper, of mind;* and the word *scntiments* means *thoughts*, or *opinions*. So, here we have a *temper of mind* met by *thoughts*. Thoughts may correspond or agree with a temper of mind; but how are they to *meet it?* If the prince had said, "My disposition being met *by* a corresponding disposition on the part of the enemy," he would have uttered plain and dignified language.

"The operations of his majesty's forces *by sea and land in the* Chesapeake, in the course of the present year, have been attended with most brilliant and successful results."

Were there only the *bad placing* of the different members of this sentence, the fault would be sufficient. But we do not know whether the prince means *operations by sea and land*, or *forces by sea and land*.

It seems to me there is another error here. The prince speaks of operations of "forces by sea and land in the Chesapeake." The Chesapeake is a bay. How can there be operations of forces by land *in the Chesapeake?* Does he mean the operations of the forces when they got to the bottom of the bay?

"The flotilla of *the enemy* in the Patuxent has been destroyed. The signal defeat of *their* land forces enabled a detachment of his majesty's army to take possession of the city of Washington; and the spirit of enterprise, which has characterized all the movements in this quarter, has produced on the inhabitants a *deep* and *sensible* impression of the calamities of a war in which they have been so wantonly involved."

Enemy is not a noun of multitude, like *gang* or *House of Commons*, or *den of thieves;* and, therefore, when used in the singular, must have singular pronouns and verbs to agree with it. *Their*, in the second of these sentences, should have been *his.* A *sensible* impression is an impression *felt;* a *deep* impression is one *more felt.* Therefore it was "a *sensible* and *deep* impression." But, indeed, *sensible* had no business there; for an impression that is deep *must be* sensible. What would you think of a man who should say, "I have not only been *stabbed*, but *my skin has been cut?*" Why, you would think, to be sure, that he must be a man selected from the noble, honorable, and reverend assembly at Whitehall!

"The expedition directed from Halifax to the northern coast of the United States has terminated in a manner *not less satisfactory.*"

Than *what?* The prince has told us, before this, of nothing that has terminated satisfactorily. He has talked of a brilliant result, and of an impression made on the inhabitants; but of *no termination* has he talked; nor has he said a word about *satisfaction.* We must always take care how we use, in one sentence, words which refer to anything said in former sentences.

"The successful course of this operation *has been followed* by the *immediate* submission of the extensive and important district east of the Penobscot *river to his majesty's arms.*"

This sentence is a disgrace even to a ministry with a JENKINSON at its head. What do they mean by *a course* being *followed* by a *submission?* And then, "*has been* followed by the *immediate* submission?" One would think that some French emigrant priest was employed to write this speech. He, indeed, would say, "*à été* suivie par la soumission immédiate." But when we make use of any word like *immediate*, which carries us back to the time and scene of action, we must use the *past time* of

the verb, and say, "*was* followed by the *immediate* submission." That is to say, *was then* followed by the *then* immediate; and not has *now* been followed by the then immediate submission. The close of this sentence exhibits a fine instance of want of skill in the *placing* of the parts of a sentence. Could these noble and reverend persons find no place but the *end* for "*to his majesty's arms?*" There was, but they could not see it, a place made on purpose, after the word *submission.*

It is unnecessary, my dear James, for me to proceed further with an exposure of the bad grammar and the nonsense of this speech. There is not, in the whole speech, one single sentence that is free from error. Nor will you be at all surprised at this, if ever you should hear those persons uttering their *own* speeches in those places which, when you were a naughty little boy, you used to call the "*Thieves' Houses.*" If you should ever hear them there, stammering and repeating and putting forth their nonsense, your wonder will be, not that they wrote a king's speech so badly, but that they contrived to put upon paper sentences sufficiently grammatical to enable us to guess at the meaning.

LETTER XXIII.

ON PUTTING SENTENCES TOGETHER, AND ON FIGURATIVE LANGUAGE.

MY DEAR JAMES:

I have now done with the subject of grammar, which, as you know, teaches us to use *words* in a proper manner. But though you now, I hope, understand how to avoid error in the forming of sentences, I think it right not to conclude my instructions without saying a few words upon the subject of adding sentence to sentence, and on the subject of *figurative language.*

Language is made use of for one of three purposes; namely, to *inform*, to *convince*, or to *persuade*. The first, requiring merely the talent of telling what we know, is a matter of little difficulty. The second demands *reasoning*. The third, besides reasoning, demands all the aid that we can obtain from the use of figures of speech, or, as they are sometimes called, *figures of rhetoric*, which last word means the power of persuasion.

Whatever may be the purpose for which we use language, it seldom can happen that we do not stand in need of more than one sentence; and, therefore, others must be added. There is no precise *rule;* there can be no precise rule, with regard to the manner of doing this. When we have said one thing, we must add another; and so on, until we have said all that we have to say. But we ought to take care, and great care, that if any words in a sentence relate, in any way, to words that have *gone before*, we make these words correspond grammatically with those foregoing words; an instance of the want of which care you have seen in paragraph 178.

The *order* of the matter will be, in almost all cases, that of your thoughts. Sit down *to write what you have thought*, and not *to think what you shall write*. Use the first words that occur to you, and never attempt to *alter a thought;* for that which has come of itself into your mind is likely to pass into that of another more readily and with more effect than anything which you can, by reflection, invent.

Never stop to *make choice of words*. Put down your thought in words just as they come. Follow the order which your thought will point out; and it will push you on to get it upon the paper as quickly and as clearly as possible.

Thoughts come much faster than we can put them upon paper. They produce one another: and the order of their coming is, in almost every case, the best possible

order that they can have on paper; yet, if you have several in your mind, rising above each other in point of force, the most forcible will naturally come the last upon paper.

Mr. Lindley Murray gives *rules* about *long sentences* and *short sentences*, and about a *due mixture* of long and short; and he also gives rules about the *letters* that sentences should *begin* with, and the *syllables* that they should *end* with. Such rules might be very well if we were to *sing* our writing; but when the use of writing is to *inform*, to *convince*, or to *persuade*, what can it have to do with such rules?

There are certain *connecting words* which it is of importance to use properly; such as *therefore*, which means *for that cause, for that reason.* We must take care, when we use such words, that there is *occasion for using them.* We must take care that when we use *but*, or *for*, or any other connecting word, the sense of our sentences requires such word to be used; for, if such words be improperly used, they throw all into confusion. You have seen the shameful effect of an *although* in the king's speech, which I noticed in my last Letter. The adverbs *when*, *then*, *while*, *now*, *there*, and some others, are connecting words, and not used in their strictly literal sense. For example: "Well, *then*, I will not do it." *Then*, in its literal sense, means, *at that time*, or *in that time; as*, "I was in America *then*." But "Well, *then*," means, "Well, *if that be so*," or "*let that be so*," or "*in that case.*" You have only to accustom yourself a little to reflect on the *meaning* of these words; for that will soon teach you never to employ them improperly.

A writing, or written discourse, is generally broken into *paragraphs.* When a new paragraph should begin, the nature of your thoughts must tell you. The propriety of it will be pointed out to you by the difference between the thoughts that are coming and those which have gone

before. It is impossible to frame rules for regulating such divisions. When a man divides his work into Parts, Books, Chapters, and Sections, he makes the division according to that which the matter has taken in his mind; and, when he comes to write, he has no other guide for the distribution of his matter into sentences and paragraphs.

Never write about any matter that you do not well understand. If you clearly understand all about your matter, you will never want thoughts, and thoughts instantly become words.

One of the greatest of all faults in writing and in speaking is this: the using of many words to *say little.* In order to guard yourself against this fault, inquire what is the *substance* or *amount* of what you have said. Take a long speech of some talking lord, and put down upon paper what the amount of it is. You will most likely find that the *amount* is very small; but, at any rate, when you get it, you will then be able to examine it, and to tell what it is worth. A very few examinations of this sort will so frighten you, that you will be forever after upon your guard against *talking a great deal* and *saying little.*

Figurative language is very fine when properly employed; but figures of rhetoric are edge-tools, and two-edged tools, too. Take care how you touch them! They are called *figures*, because they represent other things than the words in their literal meaning stand for. For instance: "The tyrants oppress and starve the people. The people would live amidst abundance, if those *cormorants* did not devour the *fruit* of their labor." I shall only observe to you, upon this subject, that, if you use figures of rhetoric, you ought to take care that they do not make nonsense of what you say; nor excite the ridicule of those to whom you write. Mr. Murray, in an address to his students, tells them "that he is about to offer them some advice with regard to their future *walks*

in the *paths* of literature." Now, though a man may *take a walk* along *a path*, a walk means also *the ground* laid out in a certain shape, and such a walk *is wider than a path*. He, in another part of this address, tells them that they are in the *morning* of life, and that that is the *season* for exertion. The morning, my dear James, is *not a season*. The *year*, indeed, has seasons, but the day has none. If he had said the *spring* of life, then he might have added the *season* of exertion. I told you they were *edge-tools*. Beware of them.

I am now, my dear son, arrived at the last paragraph of my treatise, and I hope that, when you arrive at it, you will understand grammar sufficiently to enable you to write without committing frequent and glaring errors. I shall now leave you, for about four months, to read and write English; to practise what you have now been taught. At the end of those four months I shall have prepared a Grammar to teach you the *French language*, which language I hope to hear you speak, and to see you write well, at the end of one year from this time. With English and French on your tongue and in your pen, you have a resource not only greatly valuable in itself, but a resource that you can be deprived of by none of those changes and chances which deprive men of pecuniary possessions, and which, in some cases, make the purse-proud man of yesterday a crawling sycophant to-day. Health, without which life is not worth having, you will hardly fail to secure by early rising, exercise, sobriety, and abstemiousness as to food. Happiness, or misery, is in the *mind*. It is the mind that lives; and the length of life ought to be measured by the number and importance of our ideas, and not by the number of our days. Never, therefore, esteem men merely on account of their riches or their station. Respect goodness, find it where you may. Honor talent wherever you behold it unassociated with vice; but honor it most when accompanied with exertion,

and especially when exerted in the cause of truth and justice; and, above all things, hold it in honor when it steps forward to protect defenceless innocence against the attacks of powerful guilt.

It is true that figures are edge-tools; but even edge-tools are perfectly safe in the hands of those who know how to use them. And with a little care and attention, anybody of common understanding may learn how to use the ordinary figures of rhetoric, which are powerful auxiliaries in rendering speech effective. There is nothing that impresses like figures. They are edge-tools in another sense; for they cut like swords and wound like daggers. Daniel O'Connell once silenced a troublesome opponent by suddenly turning on him and exclaiming: "Sit down, you pestiferous ramcat!" Lord Chatham finely designates the corrupt government contractor and jobber as "that blood-sucker, that muckworm that calls itself 'the friend of government.'" "One should never take a vacation till the sexton gives him one," is far more forcible than "One should never cease working till death." Instead of saying that one must not express high, noble thoughts before low, vulgar people, how much more expressive it is to say, "Do not cast pearls before swine." When Daniel Webster said of Alexander Hamilton, "He smote the rock of the national resources, and abundant streams of revenue burst forth; he touched the dead corpse of public credit, and it sprang upon its feet!" he uttered something far more impressive, far more forcible and beautiful, than if he had merely declared that Hamilton had improved the finances and strengthened the public credit of the country. Everybody, the most illiterate as well as the most learned, uses figures. The illiterate man uses them unconsciously; and so does the learned man in the ardor of speech; in fact, most people use them, and ought to use them, unconsciously; that is, without thinking that they are using figures. When a person exclaims, on seeing a large, fat man coming along, "Here comes Jumbo!" he never thinks that he is using a figure; and I have no doubt that even Cobbett himself, when he said that figures are edge-tools, never suspected that he was using a figure. Our greatest writers, especially the poets, are full of figures. Shakespeare bristles with them; his works have more figures, and more happily-used figures, than perhaps those of any other author. In Macbeth alone there are figures of almost every description. Just count the figures in the murder scene and in the interview between

Macbeth and his wife after the murder, and you will be amazed at their number and variety.

Of course, I do not pretend, in these few words at the end of the book, to teach you all about figures of rhetoric; but I wish to give you an *idea* of what they are, that you may not be entirely ignorant of the matter.

Though rhetoricians give names to a great number of deviations from the ordinary mode of expression, there are just about a dozen figures of rhetoric whose nature and use are worth studying. The others are common turnings and windings in language, in which nobody ever makes a mistake; but which, closely regarded, are made out to be figures, and dubbed with hard Greek names, the knowledge of which is of no possible use. Hence Butler's famous couplet:

> "For all a rhetorician's rules
> Teach nothing but to name his tools."

Of these dozen figures, the most common are the METAPHOR and the SIMILE. Definitions are hard, and sometimes very unsatisfactory; but when I say that the sentence "Doctor Johnson was a gnarled oak" contains a metaphor, and that the sentence "Doctor Johnson was like a gnarled oak" contains a simile, you will see at once what both are. "He is a lion," contains a metaphor; "he is like a lion" contains a simile. The metaphor is sometimes called an abridged simile, for it is *putting* one thing for another which it resembles, instead of saying it is *like* it. The simile is always introduced by the words *like*, or *so*, or words of similar import. "Charity, like the sun, brightens all it shines upon. A metaphor, like a beam of light, brightens and enlivens its object whenever it is used." When somebody cried out at the battle of Quebec, "They fly! they fly!" and General Wolff asked, "Who fly?" both used a figure; for men can only flee, not fly. When a little boy calls out, "Look at that frog! I will let this stone fly at his head!" he uses a figure; so that, long before he knows what metaphors are, he learns to use them rightly enough. Look at Coleridge's sentences about Cobbett, on page 210 of the Life, and you will find quite a number of metaphors.

There is another figure, called METONYMY, which looks, at first sight, like the metaphor; but which, on closer inspection, will be found to be essentially different. While the metaphor is really a departure from the ordinary form of speech, metonymy, which is termed a change of names, is one of the most ordinary expressions. "The kettle boils; the lamp burns; he smokes his pipe." Now, is

it the *kettle* that boils, or the *water* in it? the *lamp* that burns, or the *oil?* We use these expressions without ever thinking that we are using figurative language, for it is not a departure from the ordinary form of speech; it is everyday speech, everyday and common language. But, when we say, "Experience is the lamp by which my feet are guided;" or "We shall never light the pipe of peace until our rights are restored;" or "This was the rock on which he split;" the language rises at once in force and impressiveness, and we feel that there is a deviation from the common mode of expression. The former is metonymy, and the latter metaphor. "He is fond of his bottle; he drank three glasses; he keeps a good table;" these, you see, are merely a change of names. "The gin-palace is the recruiting-shop for the penitentiary; Senator Conkling sawed off the limb on which he sat; the politicians are hungry for office, for they have been fasting for twenty years;" these are metaphors, and you see they convey a picture to the mind which no other words can convey so well.

An ALLEGORY is a sort of continued metaphor, by which an imaginary history with a veiled meaning may be told. Macaulay says Bunyan's Pilgrim's Progress is the finest allegory which has been produced in two thousand years. For another fine example, see 80th Psalm.

PERSONIFICATION is the giving of life to inanimate things, or the giving of speech and reason to objects, insects, and animals, as in fables. Cobbett's story of the quarrel in the pot-shop has good examples of this figure. To personify is to speak, for instance, of winter and war as of a man; of spring and peace as of a woman. "Lo! steel-clad War his gorgeous standard rears!"

> "How sleep the brave, who sink to rest
> By all their country's wishes blest!
> When *Spring*, with dewy fingers cold,
> Returns to deck their hallowed mould,
> *She* there shall dress a sweeter sod
> Than *Fancy's* feet have ever trod."

There is another form of personification, a lower form, in which we give the qualities of beings to inanimate objects: we sometimes speak of a *raging* storm, a *cruel* disease, a *remorseless* sword, a *scornful* lip, a *dying* lamp, the *smiling* harvest, the *thirsty* ground, a *fearless* pen, the *babbling* brook.

SYNECDOCHE is taking a part for the whole, or the whole for a part; as, He has *a keen eye;* he has seen *eighty winters; all the world* runs after him.

INTERROGATION is asking a question which does not need an

answer; as, Can any man count the stars? Will not the Judge of all the earth do right? This is a favorite figure in oratory.

EXCLAMATION is the uttering of some expression of surprise, or of some emotion of the mind; as, What a piece of work is man! how noble in reason! how infinite in faculties! Would that some good angel had put Cobbett's grammar into that boy's hands!

IRONY is saying the opposite of what one means; as, Cobbett was remarkable for his meekness and humility! John Bull's Address to Brother Jonathan (par. 214) is a good example. See also page 193 of the Life. Here is another example:

> "So goes the world;—if wealthy, you may call
> *This*, friend; *that*, brother;—friends and brothers all.
> Though you are worthless, witless; never mind it:
> You may have been a stable-boy—what then?
> 'Tis *wealth*, good sir, makes *honorable men*."

ANTITHESIS is the comparing or placing in contrast of opposite qualities; as, Though poor, yet proud; though submissive, gay. The prodigal robs his heir, the miser robs himself. Antithesis is closely allied to epigram, which is a short, pithy saying; as, When you have nothing to say, say it. Wendell Phillips is noted for his epigrammatic style.

HYPERBOLE is some extravagant expression, employed to heighten the impression conveyed. Macbeth says that the great ocean will not wash his hand clean from the blood-stains on it, but that his hand will rather incarnadine the great ocean; while Lady Macbeth says that "all the sweets of Arabia will not sweeten this little hand." Antony's declaration that if he were an orator like Brutus, he would "make the stones of Rome rise in mutiny," is another good example. "Rivers of waters run down mine eyes," is the Psalmist's fine figure.

APOSTROPHE is a sudden turning off from the subject of discourse to address some absent or dead person or thing as present. When the news of Lord Byron's death came to England, John Jay, the famous preacher, spoke of him and his works in his pulpit; then he suddenly turned and addressed him as if he were present: "O Byron, hadst thou listened to the words of soberness and truth; hadst thou followed the counsels of the wise and good; hadst thou repressed thy passions, formed nobler aims and pursued a nobler ideal of life, what a different tale we would have had to tell! what a different example, for all generations, thy life would have afforded!" His apostrophe was something like this; it is twenty-five years since I read it; I give it as I remember it; I

only know it made a deep impression on me at the time. And Byron himself, in his wonderful Childe Harold, gives us perhaps the finest apostrophe in our language. He is speaking of the ocean, when he suddenly turns and addresses it in those noble lines beginning:

> "Roll on, thou deep and dark blue Ocean—roll!
> Ten thousand fleets sweep over thee in vain.
> Man marks the earth with ruin—his control
> Stops with the shore."

CLIMAX is rising from one point to another till the highest is reached, or descending from one point to another till the lowest is reached. I have read somewhere this capital example, which is said to be from a sermon on Christian progress by a negro preacher: "If you cannot fly, run; if you cannot run, walk; if you cannot walk, crawl; if you cannot crawl, *worm* it along!"

ALLITERATION is the repeating of the same letter at the beginning of each of two or more words in the same line or sentence.

> "Begot by butchers and by bishops bred,
> How high his highness holds his haughty head."
> "An Austrian army, awfully arrayed,
> Boldly by battery besiege Belgrade."

Besides these, there are figures of ETYMOLOGY and figures of SYNTAX. The former are hardly worth mentioning, being simply such changes in words as *o'er* for *over*, *tho'* for *though*, *'gainst* for *against*, *'tis* for *it is*, *withouten* for *without*, *enchain* for *chain*, and a few similar ones, all of which are called by the hardest of Greek names. These figures are simply deviations from the usual orthography of words, and are sometimes called figures of orthography. The figures of syntax are four in number: ELLIPSIS, PLEONASM, ENALLAGE, and HYPERBATON. The first, which has already been explained, consists, you will remember, in leaving understood some word or words; as, "This is the man I mean," instead of "whom I mean." Pleonasm is the opposite of this; that is, the using of superfluous words; and the most common example of it is in the use of the word *got*. "What have you got? I have got a book; you have got a horse." These *gots* may all be left out. The Bible is full of this figure, as indeed of all figures; as, "There shall not be left one stone upon another that shall not be thrown down. Oh ye inhabitants of the world, and dwellers on the earth!" Enallage may be said to be the name given to the grammatical mistakes which the poets are allowed to make, on account of the shackles in which they are obliged to walk. In Leigh Hunt's poem, "The Glove and the Lions," occur these lines:

> "De Lorge's love o'erheard the king, a beauteous, lively dame,
> With dark bright eyes, which always seemed the same."

Now, according to the rules of grammar, these lines declare that the king was a beauteous, lively dame; but the poet was obliged to write thus for the sake of the rhyme. This is called enallage. Milton's "Beelzebub than whom" may also be called enallage. Hyperbaton is somewhat similar to inversion, which latter consists in placing the predicate or the object before the subject; as, In came the king; down fell the supplicant; him I adore. Inversion is used to give force and emphasis to an expression; but hyperbaton is simply the transposition of a word or words for the sake of the measure; as, "While its song rolls the woods along," instead of "While its song rolls along the woods."

There is no better example of an awkward blunder in the use of figures than that of the man who prayed that "the word which had been preached might be like a nail driven in a sure place, sending its roots downward and its branches upward, spreading itself like a green bay-tree, fair as the moon, clear as the sun, and terrible as an army with banners!" A wonderful nail, indeed, this would be. Lord Cockburn, in his Memoirs, tells of a man who, on being asked at a public dinner to give a toast, exclaimed: "Here's to the moon, shining on the calm bosom of a lake!" The man thought, no doubt, that he was saying something figurative and fine. Franklin, in a toast he gave at a diplomatic dinner at Versailles, made use of the sun and moon in a very different manner. The British minister began with: "George III, who, like the sun in his meridian, spreads a luster throughout and enlightens the world." The French minister followed with: "Louis XVI, who, like the moon, sheds his mild and benignant rays on and influences the globe." Then our American Franklin gave: "George Washington, commander of the American army, who, like Joshua of old, commanded the sun and the moon to stand still, and they obeyed him!" Never were simile and metaphor more happily combined.

I cannot help thinking that, when Cobbett called figures double-edged tools, he had in mind the mischief which some of his own figures had played with himself on certain occasions. His likening of Doctor Rush to Doctor Sangrado cost him $5,000; his declaration that the appointment of Lord Hardwicke to the vice-royalty of Ireland was "putting the surgeon's apprentice to bleeding the hospital patients," cost him £500; and his comparison of Castlereagh's discipline of British troops to Napoleon's discipline of his conscripts, cost him £1,000 and an imprisonment of two years. Dog-

berry found comparisons "odorous;" Cobbett found them very expensive and very injurious. Defoe's figures served him even still worse; for his sarcastic irony in "The Shortest Way with the Dissenters" cost him his ears, exposure in the pillory, and the loss of his liberty for two years. The remorseless metaphor which Brougham applied to Canning, that he was guilty of the "most monstrous tergiversation [shuffling, shifting, twisting, turning] for office," caused that statesman, it is said, to take to his bed, and never to rise from it.

VERSIFICATION.

Now comes that mysterious matter, which I promised, at the beginning of the book, to give you an account of, versification. I said it is a simple matter; so it is; and yet many persons look upon it as something very complicated, far too difficult for common people to learn, and never studied by anybody but poets.

Verse is of two kinds, rhyme and blank verse. Rhyme consists of measured lines, every two of which ending with words or syllables of a similar sound; blank verse consists of lines with measure but no rhyme. Shakespeare's tragedies and Milton's Paradise Lost are in blank verse; Butler's Hudibras and Pope's translation of the Iliad—indeed almost all Pope's poems—are in rhyme. Blank verse gives the poet much more freedom and ease in the expression of his thoughts than rhyme; consequently our noblest poetry is in this form.

Although there are many kinds of measure or meter, there are rarely to be found in English poetry more than four kinds. These four are: the iambic, trochaic, anapestic, and dactylic measures; all hard names, but meaning easy things. Now, what makes these measures easy to learn is, that they go in pairs, and each one in each pair is the contrary or the opposite of the other.

Each line of poetry consists of a certain number of feet—and you may have them from one foot up to ten feet—and each foot consists of either two or three syllables. A foot in iambic measure is called an iambus; in trochaic measure, a trochee; in anapestic measure, an anapest; in dactylic measure, a dactyl. Now the iambus and the trochee are feet of two syllables, and the anapest and the dactyl are feet of three syllables. The two syllables of the iambus are short-long; as, re-call′, at-tend′. The two syllables of the trochee are long-short; as, ho′-ly, cy′-press. Therefore you see that the one is the opposite of the other. Counting the feet in a line of poetry, or pausing after each foot as you go along, is

called *scanning*. Now scan me the following verse, and tell me whether it is in iambic or trochaic measure:

The cur | few tolls | the knell | of part | ing day;
The low | ing herd | winds slow | ly o'er | the lea;
The plough | man home | ward plods | his wea | ry way,
And leaves | the world | to dark | ness and | to me.
Gray's Elegy in a Country Churchyard.

And tell me if the following stanza is in the same measure:

Once up | on a | mid-night | drea-ry,
While I | pon-der'd | weak and | wea-ry,
O-ver | many a | quaint and | cu-rious | vol-ume
Of for | got-ten | lore,
While I | nod-ded | near-ly | nap-ping,
Sud-den | ly there | came a | tap-ping,
As of | some one | gent-ly | rap-ping,
Rap-ping | at my | cham-ber | door.—*Poe's Raven.*

You see that in the first stanza the tone falls always on the second syllable, while in the second the tone falls always on the first. The first stanza, therefore, is in the iambic measure, and the second in the trochaic.

Now the other two measures are also opposites. Mark the following verse, and tell me whether it is made up of *short-short-long* feet (anapestic), or *long-short-short* feet (dactylic):

The As-syr | ian came down | like the wolf | on the fold,
And his co | horts were gleam | ing in pur | ple and gold;
And the sheen | of their spears | was like stars | on the sea
When the blue | wave rolls night | ly on deep | Ga-li-lee.
Byron's Destruction of Sennacherib.

Now observe that the feet in the following verse are the opposite or the reverse of the preceding:

Bird of the | wil-der-ness,
Blithe-some and | cum-ber-less,
Sweet be thy | ma-tin o'er | moor-land and | lea!
Em-blem of | hap-pi-ness,
Blest is thy | dwell-ing place—
Oh to a | bide in the | des-ert with | thee!
The Lark, by James Hogg.

The first of these last two stanzas is, therefore, in anapestic measure, and the second in dactylic. So that the four verses represent the iambic, the trochaic, the anapestic, and the dactylic measure; and you should learn all four by heart, as a guide in enabling you to determine the measure of other poems. Something that will help you to remember the dactylic measure is the derivation of the word dactyl, which is a Greek word signifying

finger. Now look at your forefinger, and see if it does not consist of *one long joint* and *two short ones* (cum'ber-less). So that I may say—although it sounds like an Irish bull—that this *foot* is so called because it is like a *finger.*

Of all the poems in the English language, nine out of ten are in the iambic measure, which is no doubt because that measure is most suited to the nature of our language. Poor Lord Surrey—who seems to have been a noble, chivalric character, something like Sidney; beheaded in the flower of his age by the brutal Henry VIII.—was the first to write in this measure. Nearly all our dramatic and epic poetry, in fact nearly all our great poems, are in this measure. All Shakespeare's blank-verse plays, Milton's Paradise Lost, Pope's Homer, Spenser's Faery Queene, Butler's Hudibras, and Bryant's Thanatopsis are in iambic measure. There is only one thing more to be said, and that is, that you will sometimes find a mixture of these various measures in one and the same poem; but some one measure is, however, usually so predominant as to give a character to the verse. Verse means poetry in general, but one single line of poetry is also called a verse.

THE SIX LESSONS.

LETTER XXIV.

SIX LESSONS, INTENDED TO PREVENT STATESMEN FROM USING FALSE GRAMMAR, AND FROM WRITING IN AN AWKWARD MANNER.

Harpenden, Hertfordshire, June 23, 1822.

MY DEAR JAMES:

In my first Letter, I observed that it was of the greatest importance that *statesmen*, above all others, should be able to *write well.* It happens, however, but too frequently, that that which should be, in this case as well as in others, is not; sufficient proof of which you will find in the remarks which I am now about to make. The *Letter to Tierney*—a thing which I foresaw would become of great and lasting importance; a thing to which I knew I should frequently have to recur with satisfaction—I wrote on the anniversary of the day on which, in the year 1810, I was sentenced to be imprisoned for two years, to pay a fine of a thousand pounds, and to be held in bonds of five thousand pounds for seven years, for having publicly, and in print, expressed my indignation at the flogging of English local-militia men in the town of Ely, under a guard of German soldiers. I thought of this at a time when I saw those events approaching which I was certain would, by fulfilling my predictions, bring me a compensation for the unmerited sufferings and insults heaped upon me with so unsparing a hand. For writing the present little work, I select the anniversary of a day which your excellent conduct makes me regard as amongst the most blessed in the calendar. Who, but myself, can imagine what I felt when I left you behind me at New

York! Let this tell my persecutors that *you* have made me more than amends for all the losses, all the fatigue, all the dangers, and all the anxieties attending that exile of which their baseness and injustice were the cause.

The bad writing, on which I am about to remark, I do not pretend to look on as the *cause* of the present public calamities, or of any part of them; but it is a proof of a *deficiency in that sort of talent* which appears to me to be necessary in men intrusted with great affairs. He who writes badly thinks badly. Confusedness in words can proceed from nothing but confusedness in the thoughts which give rise to them. These things may be of trifling importance when the actors move in private life; but when the happiness of millions of men is at stake, they are of an importance not easily to be described.

The pieces of writing that I am about to comment on I deem *bad writing;* and, as you will see, the writing may be bad, though there may be no *grammatical* error in it. The best writing is that which is best calculated to secure the object of the writer; and the worst, that which is the least likely to effect that purpose. But it is not in this extended sense of the words that I am now going to consider any writing. I am merely about to give specimens of badly-written papers, as a warning to the statesmen of the present day; and as proofs, in addition to those which you have already seen, that we ought not to conclude that a man has great abilities merely because he receives great sums of the public money.

The specimens, that I shall give, consist of papers that relate to measures and events of the very first importance. The first is the speech of the Speaker of the House of Commons to the regent, at the close of the first session of 1819, during which Mr. Peel's, or the Cash-Payment, Bill had been passed; the second is the answer of the regent to that speech; the first is the work of the House; the second that of the ministry.

In Letter XXII, I gave the reasons why we had a right to expect perfection in writings of this description. I there described the persons to whom the business of writing king's speeches belongs. The Speaker of the House of Commons is to be taken as the man of the greatest talent in that House. He is called the "First Commoner of England." Figure to yourself, then, the king on his throne, in the House of Lords; the lords standing in their robes; the Commons coming to the bar, with the Speaker at their head, gorgeously attired, with the mace held beside him; figure this scene to yourself, and you will almost think it sedition and blasphemy to suppose it possible that the speech made to the king, or that his majesty's answer, both prepared and written down long beforehand, should be anything short of perfection. Follow me, then, my dear son, through this Letter; and you will see that we are not to judge of men's talents by the dresses they wear, by the offices they fill, or by the power they possess.

After these two papers, I shall take some papers written by *Lord Castlereagh*, by the *Duke of Wellington*, and by the *Marquis Wellesley*. These are three of those persons who have, of late years, made the greatest figure in our affairs with foreign nations. The transactions which have been committed to their management have been such as were hardly ever exceeded in point of magnitude, whether we look at the transactions themselves or at their natural consequences. How much more fit than other men they were to be thus confided in; how much more fit to have the interest and honor of a great nation committed to their hands, you will be able to judge when you shall have read my remarks on those of their papers to which I have here alluded.

In the making of my comments, I shall insert the several papers, a paragraph or two, or more, at a time; and I shall *number* the paragraphs for the purpose of more easy reference.

LESSON I.

Remarks on the Speech of the Speaker of the House of Commons to the Prince Regent, which Speech was made at the close of the first Session of* 1819, *during which Session Peel's Bill was passed.

"May it please your Royal Highness,

1. "We, his Majesty's faithful Commons of the United Kingdom of Great Britain and Ireland in Parliament assembled, attend your Royal Highness with our concluding Bill of Supply.

2. "The subjects which have occupied our attention have been more numerous, more *various* and more important, *than are* usually submitted to the consideration of Parliament in *the same* Session."

It is difficult to say what is meant, in Paragraph No. 2, by the word *various*. The Speaker had already said that the *subjects* were more *numerous*, which was quite enough; for they necessarily *differed* from each other, or they were one and the same; and, therefore, the word *various* can in this place have no meaning at all, unless it mean that the subjects were *variegated* in themselves, which would be only one degree above sheer nonsense.

Next comes the "*than are*," without a nominative case. Chambermaids, indeed, write in this way, and, in such a case, "the dear unintelligible scrawl" is, as the young rake says in the play, "ten thousands times more charming" than correct writing; but from a Speaker in his robes we might have expected "than *those which* are usually submitted."

And what does the Speaker mean by "in *the same* Session?" He may mean "in *one and* the same Session;" but what business had the word *same* there at all? Could he not have said, "during *one* Session," or "during *a single* Session?"

3. "Upon many of these subjects we have been engaged in long and unwearied *examinations;* but such *has* been the pressure of

other business, and particularly of that which ordinarily belongs to a first Session of Parliament—and such the *magnitude* and *intricacy* of many of *those inquiries*, that the limits of the present Session have not allowed of bringing them to a close."

There is bad taste, at least, in using the word *examinations* in one part of the sentence, and the word *inquiries* in the other part, especially as the pronoun *those* was used in the latter case. The verb "has" agrees in number with the noun "*pressure;*" but the Speaker, notwithstanding the aid of his wig, was not able to perceive that the same verb did not agree in number with the nouns "magnitude *and* intricacy." "Such *has* been the pressure, and such *have* been the magnitude *and* intricacy."

4. "But, Sir, of those measures which we have completed, the most *prominent*, the most important, and, as we trust, in their consequences, the most *beneficial* to the public, are the measures which have grown out of *the consideration* of the present *state of the country—both in its currency* and *its* finances."

There is not here any positive error in grammar; but there is something a great deal worse; namely, unintelligible words. The epithet "*prominent*" was wholly unnecessary, and only served to inflate the sentence. It would have been prudent not to anticipate, in so marked a manner, *beneficial consequences* from Peel's Bill; but what are we to understand from the latter part of the sentence? Here are measures *growing out* of *the* consideration of *the state* of the country *in* its currency and finances. What! *The state* of the country *in its* currency? Or is it *the consideration* in its currency? And what had the word *both* to do there at all? The Speaker meant that the measures had grown out of, or, which would have been much more dignified, had been the result of *a* consideration of the present state of the country, with regard to its currency as well as with regard to its finances.

5. "Early, Sir, in the present Session, we *instituted* an inquiry *into* the effects produced *on the* exchanges with foreign countries,

and the state of the circulating medium, by the restriction on payments in cash *by* the Bank. This inquiry was *most anxiously* and *most deliberately* conducted, and *in its result* led to the *conclusion* that it was most desirable, quickly, but with due precautions, to return to our ancient and *healthful* state of currency:—*That* whatever *might* have been the expediency of the Acts for the suspension of payments of cash at the different periods at which they were enacted (and doubtless they *were expedient*), whilst the country was involved in the most expensive contest that ever weighed down the finances of any country—still *that*, the necessity for the continuance of these Acts having *ceased*, it became us with *as little delay as possible* (avoiding carefully the *convulsion* of *too rapid a transition*) to return to our ancient system; and that, if at any period, and under any circumstances, this return could be effected without national inconvenience, it was *at the present*, when this mighty nation, with a proud retrospect of the past, *after having* made the greatest efforts, and achieved the noblest objects, was *now reposing* in a confident, and, as we *fondly* hope, a well-founded expectation of a *sound* and *lasting* peace."

Here, at the beginning of this long and most confused paragraph, are two sentences, perfect rivals in all respects; each has 37 words in it; each has three blunders; and the one is just as obscure as the other. To "*institute*" is to *settle*, to *fix*, to *erect*, to *establish;* and not to *set about* or *undertake*, which was what was done here. If I were to tell you that I have *instituted* an inquiry into the qualities of the Speaker's speech, you would, though I am your father, be almost warranted in calling me an egregious coxcomb. But what are we to make of the "*and the*" further on? Does the Speaker mean that they instituted (since he will have it so) an inquiry *into the state* of the circulating medium, or into the *effects produced on the* circulating medium by the cash suspension? I defy any man living to say which of the two is meant by his *words*. And then we come to "*by* the Bank;" and here the only possible meaning of the words is, that the *restriction* was *imposed by the Bank;* whereas the Speaker means the restriction on payments made *at* the Bank. If *at*, instead

of *by*, had happened to drop out of the wig, this part of the sentence would have been free from error.

As to the second sentence in this Paragraph No. 5, I may first observe on the incongruity of the Speaker's two superlative adverbs. *Anxiously* means *with inquietude;* and *deliberately* means *coolly, slowly, warily*, and the like. The first implies a *disturbed*, the latter a *tranquil*, state of the mind; and a mixture of these it was, it appears, that produced Peel's Bill; this mixture it was which "*in its results*, LED to the *conclusion;*" that is to say, the result *led* to the *result;* result being conclusion, and conclusion being result. But tautology is, you see, a favorite with this son of the Archbishop of Canterbury, more proofs of which you have yet to witness. And why must the king be compelled to hear the phrase "*healthful* state of the currency," threadbare as it had long before been worn by HORNER and all his tribe of coxcombs of the Edinburgh Review? Would not "*our ancient currency*" have answered every purpose? And would it not have better become the lips of a person in the high station of Speaker of the House of Commons?

The remaining part of this paragraph is such a mass of confusion that one hardly knows where or how to begin upon it. The "*that*" after the *colon* and the *dash* seems to connect it with what has gone before; and yet what connection is there? Immediately after this "*that*" begins a *parenthetical phrase*, which is interrupted by a *parenthesis*, and then the parenthetical phrase goes on again till it comes to a *dash*, after which you come to the words that join themselves to the first "*that.*" These words are "still *that.*" Then, on goes the parenthetical phrase again till you come to "*it became us.*" Then comes more parenthetical matter and another parenthesis; and then comes "*to return to our ancient system.*" Take out all the parenthetical matter, and the paragraph will stand thus: "That it was desirable to return to our

ancient and healthful state of currency:—*that*—still *that*, it became us to return to our ancient system."

But only think of saying "whatever *might* have been the expediency of the acts;" and then to make a parenthesis directly afterwards for the express purpose of positively asserting that they "*were expedient*"! Only think of the necessity for the continuance of the acts having *ceased*, and of its being becoming in the Parliament to return to cash payments *as soon as possible*, and yet that a *convulsion was to* be apprehended from a *too rapid* transition; that is to say, from returning to cash payments *sooner* than *possible!*

After this comes a doubt whether the thing can be done at all; for we are told that the Parliament, in its wisdom, concluded that, if "*at any period* this return could be effected without *national inconvenience*, it *was* at the *present*." And then follows that piece of sublime nonsense about the nation's *reposing* in the *fond* (that is, *foolish*) hope of, not only a *lasting*, but also a *sound*, peace. A *lasting* peace would have been enough for a common man; but the son of an Archbishop must have it *sound* as well as lasting, or else he would not give a farthing for it.

6. "In considering, Sir, the state of our finances, and in minutely comparing our income with our expenditure, it appeared to us that the excess of our income was not *fairly adequate for* the *purposes* to which it was *applicable*—the gradual reduction of the national debt.

7. "It appeared to us that *a clear available surplus of* at least five millions ought to be set apart for that object.

8. "This, Sir, has been effected by the *additional imposition* of three millions of taxes."

The word "*fairly*," in Paragraph No. 6, is a redundancy; it is mere *slang*. "Adequate *for*" ought to be "adequate *to;*" and "*applicable*" is *inapplicable* to the case; for the money was *applicable* to *any purpose*. It should have been, "the purpose (and not the *purposes*)

for which it was *intended;*" or, "the purpose to which it was intended to be applied."

The 7th Paragraph is a heap of redundant Treasury-slang. Here we have *surplus;* that is to say, an *over*-quantity; but this is not enough for the Speaker, who must have it *clear* also; and not only clear, but *available;* and then he must have it *set apart* into the bargain! Leave out all the words in *italics*, and put *purpose* instead of *object* at the end; and then you have something like common sense as to the words, but still foolish enough as to the political view of the matter.

Even the 8th Paragraph, a simple sentence of fourteen words, could not be free from fault. What does the Speaker mean by an "*additional* imposition"? Did he imagine that the king would be fool enough to believe that the Parliament had *imposed* three millions of taxes without making an *addition* to former impositions? How was the imposition to be *other* than "additional?" Why, therefore, cram in this word?

9. "Sir, in adopting this course, his Majesty's faithful Commons did not *conceal from themselves* that *they* were calling upon the nation for a great exertion; but well knowing that *honor*, and *character*, and *independence* have at all times been the *first* and dearest objects of the hearts of Englishmen, *we felt assured* that there was no difficulty that the country could not encounter, and no pressure to which she would not willingly and cheerfully submit, to enable her to maintain, *pure* and *unimpaired*, that which *has* never yet been *shaken* or *sullied*—her public credit *and her national good* faith."

This is a sentence which might challenge the world! Here is, in a small compass, almost every fault that writing can have. The phrase "*conceal from themselves*" is an importation from France, and from one of the worst manufactories too. What is national "*honor*" but national "*character?*" In what do they differ? And what had "*independence*" to do in a case where the subject was the means of paying a debt? Here are *three* things named as

the "*first*" object of Englishmen's hearts. Which was the "*first*" of the three? Or were they the *first three?* To "*feel* assured" is another French phrase. In the former part of the sentence, the Parliament are a *they;* in the latter part they are a *we.* But it is the *figures of rhetoric* which are the great beauties here. First it is *Englishmen* who have such a high sense of *honor* and *character* and *independence.* Next it is the *country.* And next the country becomes a *she;* and in her character of female will submit to any "*pressure*" to enable her to "*maintain*" her *purity;* though scarcely anybody but the sons of Archbishops ever talk about *maintaining* purity, most people thinking that, in such a case, *preserving* is better. Here, however, we have *pure* and *unimpaired.* Now, *pure* applies to things liable to receive *stains* and *adulterations; unimpaired,* to things liable to be *undermined, dilapidated, demolished,* or *worn out.* So the Speaker, in order to make sure of his mark, takes them *both,* and says that the thing which he is about to name, "has never yet been *shaken* or *sullied*"! But what is this fine thing after all? Gad! there are *two* things; namely, "public credit *and* national good faith." So that, leaving the word *good* to go to the long account of redundancy, here is another instance of vulgarly-false grammar; for the two nouns, joined by the conjunction, require the verb *have* instead of *has.*

10. "Thus, Sir, I have *endeavored, shortly,* and I am aware *how imperfectly,* to notice the various duties which have devolved upon us, in one of the longest and most arduous sessions *in the records* of Parliament."

11. "The Bill, Sir, which it is my duty to present to your Royal Highness, is entitled, 'An Act for applying certain *monies* therein mentioned for the Service of the year 1819, and for further appropriating the supplies granted in this Session of Parliament.' To which, with all humility, we pray his majesty's royal assent."

Even here, in these common-place sentences, there must be something stupidly illiterate. The Speaker does not

mean that his "*endeavor*" was "*shortly*" made, or made in a *short manner*, but that his *notice* was made in a short manner; and, therefore, it ought to have been, "*to notice shortly*." if *shortly* it must be; yet, surely phraseology less grovelling might have been used on such an occasion. "*In* the longest session," and "in the records of Parliament," are colloquial, low and incorrect into the bargain; and as for "*monies*" in the last paragraph, the very sound of the word sends the mind to 'Change Alley, and conjures up before it all the noisy herd of Bulls and Bears.

There is, indeed, one phrase in this whole Speech (that in which the Speaker acknowledges the imperfectness of the manner in which he has performed his task) which would receive our approbation; but the tenor of the speech, the at once flippant and pompous tone of it, the self-conceit that is manifest from the beginning to the end, forbid us to give him credit for sincerity when he confesses his deficiencies, and tell us that the confession is one of those clumsy traps so often used with the hope of catching unmerited applause.

LESSON II.

Remarks on the Speech which the Prince Regent made to the Parliament on the occasion when the above Speech of the Speaker was made.

"My Lords and Gentlemen:

12. "It is with great regret that I *am again obliged* to announce to you the continuance of his Majesty's lamented indisposition.

13. "I cannot close this session of Parliament without expressing the satisfaction that I have derived from the zeal and assiduity with which you have applied yourselves to the several important objects which have come under your consideration.

14. "Your patient and laborious *investigation* of the state of the

circulation and *currency* of the kingdom demands my warmest acknowledgment; and I entertain a confident expectation that the measures *adopted*, as the result of *this inquiry*, will be productive of the most beneficial consequences."

The phrase pointed out by italics in the 12th Paragraph is *ambiguous;* and, as it is wholly superfluous, it has no business there. The 13th Paragraph (for a wonder!) is free from fault; but, in the 14th, why does the king make *two* of the "*circulation* and *currency*"? He means, doubtless, to speak of the thing, or things, in use as *money*. This was the *currency;* and what, then, was the "*circulation*"? It is not only useless to employ words in this way; it is a great deal worse; for it creates a confusion of ideas in the mind of the reader.

"*Investigation* and *inquiry*" come nearly to each other in meaning; but when the word "this," which had a direct application to what has gone before, was used, the word *investigation* ought to have followed it, and not the word *inquiry;* it being always a mark of great affectation and of false taste, when pains are taken to seek for synonymous words in order to avoid a repetition of sound. The device is *seen through*, and the littleness of mind exposed.

The *fine* word "*adopted*" is not nearly so good as the plain word *taken* would have been. The Parliament did *not adopt* the measures in question; they were their *own;* of their own invention; and, if I were here writing remarks on the measures, instead of remarks on the language in which they were spoken of, we might have a hearty laugh at the "*confident expectation*" which the king entertained of the "*most beneficial consequences*" of those measures, which were certainly the most foolish and mischievous ever taken by any Parliament, or by any legislative assembly, in the world.

"GENTLEMEN OF THE HOUSE OF COMMONS:

15. "I thank you for the supplies which you have granted for the service of the present year.

16. "I sincerely regret that the necessity should have existed of making any additions to the burthens of the people; but I anticipate the most important permanent advantages from the *effort* which you have thus made *for* meeting at once all the financial difficulties of the country; and I derive *much satisfaction* from the belief that the means which you have devised for this purpose are calculated to press as lightly on *all classes* of the community as could be expected when so great an effort was to be made."

Nobody, I presume, but kings say an "effort *for* meeting." Others say that they make an effort *to* meet. And nobody, that I ever heard of before, except *bill-brokers*, talks about *meeting* money demands. One cannot help admiring the satisfaction, nay, the "*much satisfaction*" that the king derived from the belief that the new taxes would press as *lightly as possible on all classes* of the community. I do not like to call this vulgar nonsense, because, though written by the ministers, it is spoken by the king. But, *what is it?* The additional load *must fall upon somebody;* upon some *class or classes;* and where, then, was the sense of expressing "*much satisfaction*" that they would fall lightly on all classes? The words "*as possible,*" which come after likely, do nothing more than make an addition to the confusion of ideas.

"My Lords and Gentlemen:

17. "I *continue* to receive from foreign powers *the strongest* assurances of their friendly disposition towards this country.

18. "I have observed with great concern the attempts which have recently been made in some of the manufacturing districts to take advantage of circumstances of local distress, to excite a spirit of disaffection to the institutions *and* government of the country. No object can be nearer my heart than to promote the *welfare* and *prosperity* of all classes of his majesty's subjects; but this cannot be effected without the maintenance of public order and tranquillity.

18. "You may rely, therefore, upon my *firm* determination to employ, for this purpose, the powers entrusted to me by law; and I have no doubt that, on your return to your several counties, you will use your utmost endeavors, in co-operating with the magis-

tracy, to defeat the machinations of those whose *projects*, if successful, could only aggravate the evils which *it professed* to remedy; and who, under the pretence of Reform, have *really no other* object *but* the subversion of our happy Constitution."

Weak minds, feeble writers and speakers, delight in *superlatives*. They have big sound in them, and give the appearance of *force;* but they very often betray those who use them into absurdities. The king, as in Paragraph No. 17, might *continue* to receive *strong* assurances; but how could he receive "*the strongest*" more than *once?*

In the 18th Paragraph we have "welfare *and* prosperity." I, for my part, shall be content with either (the two being the same thing), and if I find, from the acts of the government, reason to believe that one is really sought for, I shall care little about the other.

I am, however, I must confess, not greatly encouraged to hope for this, when I immediately afterwards hear of a "*firm* determination" to employ "*powers*," the nature of which is but too well understood. "*Determination*" can, in grammar, receive no additional force from having *firm* placed before it; but, in political interpretation, the use of this word cannot fail to be looked upon as evincing a little more of *eagerness* than one could wish to see apparent in such a case.

In these speeches, nouns, verbs, adjectives, and adverbs generally go, like crows and ravens, in pairs. Hence we have, in the 18th Paragraph, "the *institutions* and *government*" of the country. Now, though there *may* be *institutions* of the country, which do not form a part of its *government;* the government is, at any rate, *amongst* the country's institutions. If every institution do not form a part of the government, the government certainly forms a part of the institutions. But as the old woman said by her goose and gander, these words have been *a couple* for so many, many years, that it would be a sin to part them just at the last.

The gross grammatical errors in the latter part of the last paragraph, where the singular pronoun *it* represents the plural noun *projects*, and the verb *profess* is in the *past* instead of the *present* time, one can account for only on the supposition that the idea of *Reform* had scared all the powers of thought from the minds of the writers. This unhappy absence of intellect seems to have continued to the end of the piece; for here we have "no *other* object *but*," instead of no other object *than;* and the word "*really*" put into the mouth of *a king*, and on such an occasion, is something so *very low* that we can hardly credit our eyes when we behold it.

INTRODUCTION

To the Four Lessons on the productions of Lord Castlereagh, the Duke of Wellington, the Marquis Wellesley, and the Bishop of Winchester.

From the literary productions of *Speakers* and *Ministers*, I come to those of *Ambassadors*, *Secretaries of State*, *Viceroys*, and *Bishops*. In these persons, even more fully perhaps than in the former, we are entitled to expect proofs of great capacity as writers. I shall give you specimens from the writings of four persons of this description, and these four, men who have been intrusted with the management of affairs as important as any that the king of this country ever had to commit to the hands of his servants: I mean *Lord Castlereagh*, the *Duke of Wellington*, the *Marquis Wellesley*, and the *Bishop of Winchester;* the first of whom has been called the *greatest statesman*, the second the *greatest captain*, the third the *greatest viceroy*, the fourth the *greatest tutor*, of the age.

The passages which I shall first select from the writings of these persons are contained in state papers relating to the *Museums at Paris*.

And here, in order that you may be better able to judge of the writings themselves, I ought to explain to you the nature of the matters to which they relate, and the circumstances under which they were written. The *Museums at Paris* contained, in the year 1815, when the King of France was escorted back to that city by the armies of the Allies, a great many *statues* and *pictures*, which Napoleon had, in his divers conquests and invasions, taken from the collections of other countries, and carried to France. When, therefore, the Allies had, by their armies, possession of Paris, at the time just mentioned, they rifled these *Museums*, and took from them what had, or what they asserted had, belonged to the Allies respectively. The French contended that this was unjust, and that it was an act of pillage. They said, that, in 1814, when the Allies were also in possession of the capital of France, they put forward no claim to the things in question, which were, to all intents and purposes, military booty, or prize; and that for the Allies to make this claim now, was not only contrary to their own precedent of 1814, but that it was to assume the character of *enemies of France*, directly in the teeth of their own repeated declarations, in which they had called themselves friends and even *Allies* of France; and in direct violation of their solemn promises to commit against the French nation no act of hostility, and to treat it, in all respects, as a friend. The Allies had now, however, the *power* in their hands; and the result was the stripping of the Museums.

To characterize this act committed by those who entered France under the name of the *Allies* of the king and of the great body of his people, and who took possession of Paris in virtue of a convention which stipulated for the security of all *public property;* to characterize such an act is unnecessary; but we cannot help lamenting that the Ministers of England were open abettors, if not original instigators, in this memorable transaction, which, of

all the transactions of that time, seems to have created the greatest portion of rancor in the minds of the people of France.

That the English Ministers were the instigators appears pretty clearly from the seizure (which was by *force of arms*) having been immediately preceded by a paper (called a note) delivered by *Lord Castlereagh* in the name of the Prince Regent to the Ambassadors of the Allies, which paper was dated 11th Sept., 1815, and from which paper I am now about to give you a specimen of the *writing* of this Secretary of State.

LESSON III.

Remarks on Lord Castlereagh's Note of the 11th September, 1815, on the subject of the Museums at Paris.

This Note sets out by saying, that representations, on the subject of the Statues and Pictures, have been laid before the Ambassadors of the Allies, and that the writer had received the commands of the Prince Regent to submit, for the consideration of the Allies, that which follows. After some further matter, amongst which we find this "greatest statesman" talking of "the *indulgencies*" (instead of *indulgences*) to which the French had a right "to *aspire*" (instead of *to hope for*); after saying that the purity of the friendship of the Allies had been "proved *beyond a question*" by their last year's conduct, and "*still more*," that is to say, *farther* than *beyond*, by their this year's conduct; after talking about the "*substantial integrity*" of France, and thereby meaning that she was to be *despoiled of only a part* of her dominions; after talking about "*combining*" this "*integrity* with *such an adequate* system of temporary precaution as may *satisfy* what the Allies *owe to the security* of their own

subjects;" after all this, and a great deal more of the same description, we come to the paragraphs that I am now going to remark on. Observe, I continue the *numbering* of the paragraphs, as if the whole of the papers on which I am commenting formed but one piece of writing.

20. "Upon what principle can France, at the close of such a war, expect to sit down with the same extent of possessions which she held before the Revolution, and desire, at the same time, to retain the ornamental spoils of all other countries? Is it that there can exist a doubt of the issue of the contest, or of the power of the Allies to effectuate what justice and policy require? If not, upon what principle deprive France of her late territorial acquisitions, and preserve to her the *spoliations appertaining to those territories which* all modern conquerers have invariably *respected*, as inseparable from the country to which they belonged?

21. "The Allied Sovereigns have perhaps something to atone for to Europe, in consequence of the course pursued by them, when at Paris, during the last year. It is true, they never did so far make themselves parties in the *criminality* of this *mass of plunder* as to sanction *it* by any stipulation in their treaties; such a *recognition* has been on their part uniformly refused: but they certainly did use their influence to repress at that moment any agitation of their claims, in the hope that France, not less subdued by their generosity than by their arms, might be disposed to preserve inviolate a peace which had been studiously framed to serve as a bond of reconciliation between the nation and the king. They had also reason to expect that his Majesty would be advised voluntarily to restore a considerable *proportion*, at least, of these spoils, to their lawful owners.

22. "But the question is a very different one now, and to pursue the same course, under circumstances so essentially altered, would be, in the judgment of the Prince Regent, *equally unwise towards France, and unjust towards our Allies*, who have a direct interest in this question.

23. "His Royal Highness, in stating this opinion, feels it necessary to guard against the possibility of misrepresentation.

24. "Whilst he deems it to be the duty of the Allied Sovereigns not only not to obstruct, but facilitate, upon the present occasion, the *return of these objects* to the places *from whence* they were torn, it seems not less consistent with *their delicacy* not to suffer the *position* of their armies in France, *or the removal* of *these works*

from the Louvre, to become the means, either directly or indirectly, of bringing within *their* own dominions *a single article* which did not of right, at the period of *their conquest*, belong either to their respective family collections, or to the countries over which they now actually reign.

25. "Whatever value the Prince Regent might attach to such exquisite specimens of the fine arts, if otherwise acquired, he has *no wish to become possessed* of them at the expense of France, or rather of the countries to which they of a right belong, *more especially by following up a principle in war* which he considers as a reproach to the nation by which it has been adopted, and so far from wishing to *take advantage* of the occasion to *purchase* from the rightful owners *any articles* they might, from pecuniary considerations, be disposed *to part with*, his Royal Highness would, on the contrary, be disposed rather to afford the means of replacing them in those very temples and galleries of which they were so long the ornaments.

26. "*Were* it possible that his Royal Highness's sentiments towards the person and cause of Louis XVIII. could be brought into doubt, or that the *position* of his Most Christian Majesty *was* likely to be *injured* in the *eyes* of his own people, the Prince Regent would not come to this conclusion without the most painful reluctance; but, *on the contrary*, his Royal Highness believes that his Majesty will rise in the love and respect of his own subjects, in proportion as he *separates* himself from *these remembrances* of revolutionary warfare. These spoils, which impede a moral reconciliation between France and the countries she has invaded, are not necessary to record the exploits of her armies, which, notwithstanding the cause in which they were achieved, must ever make the arms of the nation respected abroad. But whilst these *objects* remain at Paris, constituting as it were the *title-deeds* of the countries which have been given up, the *sentiments of reuniting* these countries again to France will never be altogether extinct; nor will the *genius* of the French *people* ever completely *associate itself* with the more *limited existence* assigned to the *nation* under the Bourbons."

I shall say nothing of the *logic* of this passage; and I would fain pass over the real and poorly-disguised *motive* of the proceeding; but this must strike every observer.

It is the mere *writing*, which, at present, is to be the

principal object of our attention. To be sure, the sentiments, the very thoughts, in Paragraphs 24 and 25, which speak the soul, as they are conveyed in the language, of the sedentary and circumspect keeper of a huckster's stand, or the more sturdy perambulating bearer of a miscellaneous pack, do, with voice almost imperious, demand a portion of our notice; while, with equal force, a similar claim is urged by the *suspicions* in the former of these paragraphs, and the *protestations* in the latter, which present to the nations of Europe, and especially to the French nation, such a captivating picture of English *frankness* and *sincerity!*

But let us come to the *writing;* and here, in Paragraph 20, we have *spoliations* appertaining to territories, though *spoliation* means the *act of despoiling*, and never does or can mean the thing of which one has been despoiled; and next, we have the word *which*, relating to *spoliation*, and then the subsequent part of the sentence tells us that *spoliations* have invariably been *respected.*

In the 21st Paragraph, does the *it* relate to criminality or to mass of plunder? and what is meant by a *sanction* given to either? Could the writer suppose it possible that it was necessary to tell the Allies, themselves, that they had *not sanctioned* such things? And here, if we may, for a moment, speak of the *logic* of our "greatest statesman," the Allies *did sanction*, not *criminality*, not a *mass of plunder*, but the *quiet possession* of the specimens of art, by leaving, in 1814, that possession as they found it. At the close of this paragraph, we have *a proportion*, instead of *a part*, an error common enough with country fellows when they begin to *talk fine*, but one that surely ought to be absent from the most stately of the productions of a Secretary of State.

"Unwise *towards* France, and unjust towards the Allies," and "*equally*" too, is as pretty a specimen of what is called *twattle* as you will find; while "the *return*"

of these "*objects*," the not purloining of a "*single article*," the not wishing to "*take advantage*" and to "*purchase* any of the *articles* that the owners might wish to *part with*," form as fine an instance of the powers of the *plume de crasse*, or *pen of mud*, as you will be able to hunt out of the history of a whole year's proceedings at the Police Offices.

But, in Paragraph 24, we have "*their* conquest." The conquest of *whom* or *what?* That of *the Allies*, that of *their dominions*, or that of the "*objects*"? It is impossible to answer, except by guess; but it comes out, at any rate, that there was a *conquest;* and this "greatest statesman" might have perceived that this *one word* was a complete answer to all his assertions about plunder and spoliation; for that which is *conquered* is held *of right;* and the only want of right in the Allies, forcibly to take these "articles," arose from their having entered France as *Allies of the King of France*, and not as enemies and conquerers.

And what, in Paragraph 25, is meant by "*following up a principle in war*"? The phrase, "follow up a principle," is low as the dirt; it is chit-chat, and very unfit to be used in a writing of this sort. But, as to the sense; how could the regent, even if he had purchased the pictures, be said to *follow up* a principle "*in war*"? The meaning, doubtless, was that the regent had no wish to become possessed of these things at the expense of France, or, rather, at the expense of the countries to which they belonged, especially as he could not thus gratify his taste for the arts without acting upon a principle which *the French had acted on in war*. This meaning might, indeed, be supposed to be contained in the above phrase of Lord Castlereagh; but in a writing of this kind, ought anything be left to *supposition?*

The 26th Paragraph is an assemblage of all that is

incorrect, low, and ludicrous. The "*was*" after Christian Majesty ought to be *could be*, that is, "*were* it possible that his position *could be* likely to be injured;" and not "*were* it possible that his position *was* likely to be injured," which is downright nonsense. And then only think of an *injured position;* and of the king's *position* being injured "*in the eyes*" of his people! "But, *on the contrary.*" On the contrary *of what?* Look back, and see if it be possible to answer this question. Next comes the intolerable fustian of the king's "*separating himself* from *remembrances;*" and from this flight, down the "greatest statesman" pitches, robs the attorney's office, and calls the statues and pictures "*title deeds*, as it were;" and this "*as it were*" is, perhaps, the choicest phrase of the whole passage. But, in conclusion (for it is time to have done with it), what do you say to "the *sentiments of re-uniting* the countries to France"? And what do you say, then, to the "*genius*" (that is, the *disposition*) "of the French people *associating itself* with the *limited existence* assigned to the *nation* under the Bourbons"? What do you say of the man who could make use of these words, when his meaning was, "that, as long as these statues and pictures remained to remind the French people of the late extent of the dominions of France, their minds would not be completely reconciled to those more narrow limits, which had now been prescribed to her"? What do you say of the man who, having this plain proposition to state, could talk of the *genius* of the *people* associating itself with the more limited *existence* of the *nation*, the *nation* being *the people;* and therefore his meaning, if there can be any sense in the words, being, that the people as a nation had, under the Bourbons, had their *existence*, or length of life, abridged? What do you say, what can you say of such a man, but that nature might have made him for a valet, for a strolling player, and possibly for an auctioneer; but

never for a Secretary of State! Yet this man was *educated* at the *University of Cambridge.**

LESSON IV.

Remarks on a Dispatch of the Duke of Wellington (called the greatest Captain of the age) relative to the Museums at Paris.

Having, as far as relates to the *Museums*, taken a sufficient view of the writing of the *greatest Statesman* of the age, I now come to that of the "*greatest Captain.*" The writing that I am now about to notice relates to the same subject. The Captain was one of the *Commanders* at Paris, at the time above spoken of, and it is in that capacity that he writes. But we ought to observe, here, that he is not only a great Captain, but a great *Ambassador* also; and that he was Ambassador at the Congress of Vienna just before the time we are speaking of; and that he was formerly *Secretary of State* for Ireland.

The paper, from which I am about to make a quotation, is a "*dispatch*" from the "greatest Captain" to *Lord Castlereagh*, dated at Paris, 23rd September, 1815, soon after the museums had been rifled.

I shall not take up much of your time with the performance of this gentleman; a short specimen will suffice;

* This LESSON was written in June, 1822. On the 12th of August, 1822, this same Lord Castlereagh (being still Secretary of State) killed himself at North Cray, in Kent, by cutting his throat. A Coroner's Jury pronounced him to have been *insane;* and, which is very curious, a letter from the *Duke of Wellington* was produced to prove that the deceased *had been insane for some time.* Though, mind, he had been for some time, and *was when he cut his throat*, actually entrusted with the care and powers of the two other Secretaries' offices (they being absent), as well as those of the office of Foreign Affairs!

and that shall consist of the first three paragraphs of his "*dispatch.*"

"MY DEAR LORD:

27. "There has been *a good deal of discussion* here lately respecting the measures which I have been under the necessity of adopting, in order *to get for* the King of the Netherlands his pictures, etc., from the museums; and lest *these reports* should reach the Prince Regent, I *wish to trouble you*, for his Royal Highness's *information*, with the following statement of what has passed.

28. "Shortly after the arrival of the sovereigns at Paris, the minister of the King of the Netherlands *claimed* the pictures, etc., belonging to his sovereign, *equally* with those of *other powers; and*, as far as I could learn, *never could get* any satisfactory *reply* from the French government. After several conversations with me, he *addressed* your lordship an *official* note, which was laid before the ministers of the allied sovereigns, assembled in conference; *and* the subject was taken into consideration repeatedly, with a view to discover a mode of doing justice to the claimants of the specimens of the arts in the museums, without injuring the feelings of the King of France. In the meantime the Prussians had obtained from his majesty not only all the really Prussian pictures, but those belonging to the Prussian territories on the left of the Rhine, and the pictures, etc., belonging to all the allies of his Prussian majesty; *and* the subject pressed for an early decision; *and* your lordship wrote *your* note of the 11th instant, in which it was fully discussed.

29. "The ministers of the King of the Netherlands still having no satisfactory *answer* from the French government, appealed to me, as the general-in-chief of the army of the King of the Netherlands, to know *whether I had any objection* to employ his majesty's troops to obtain possession of what was his *undoubted property.* I referred this application again to the ministers of the allied courts, and *no objection having been stated*, I considered it *my duty* to take the necessary measures to obtain *what was his right.*"

The great characteristic of this writing (if writing it ought to be called) is the thorough-paced *vulgarity* of it. There is a meanness of manner as well as of expression, and, indeed, a suitableness to the subject much too natural in all its appearances, to have been the effect of art.

The writer, though addressing a minister of state, and writing matter to be laid before a sovereign, begins exactly in the manner of a quidnunc talking to another that he has just met in the street. "There has been a *good deal of discussion*," (that is to say, *talk*) "*here;*" that is to say, at Paris, Castlereagh being, at the time, in London. The phrase "to *get for*" is so very dignified that it could have come only from a great man, and could have been inspired by nothing short of the consciousness of being "*the ally of all the nations of Europe*," as the writer calls himself in another part of this famous "*dispatch.*"

But *what* are "these *reports*," of which the great Captain speaks in the latter part of this paragraph? He had spoken of no *reports* before. He had mentioned "*discussion*," and a "*good deal*" of it; but had said not a word about *reports;* and *these* reports pop out upon us like "*these* six men in buckram," in Falstaff's narrative to the Prince.

The Captain's "wishing to *trouble*" Lord Castlereagh, "for the regent's *information*," closes this paragraph in a very suitable manner, and prepares the mind for the next, where the regent would find *trouble* enough, if he were compelled to find out the English of it. The Dutch minister "*claimed* the pictures belonging to his sovereign, *equally* with those of *other powers.*" What! did this Dutchman claim *the whole:* those belonging to the Dutch sovereign and those belonging to all the other powers besides? This, to be sure, would have been in the true Dutch style; but this could hardly be the fact. If it were, no wonder that the duke had learned that the minister "*never could get any satisfactory* reply;" for it must have been a deal indeed that would have satisfied him.

The phrase "he *addressed your lordship* an official note" is in the *counting-house* style; and then to say to Lord Castlereagh, "your lordship wrote *your* note of the

11th of September," was so necessary, lest the latter should imagine that *somebody else* had written the note! Nor are the four *ands* in this paragraph to be overlooked; for never was this poor conjunction so worked before, except, perhaps, in some narrative of a little girl to her mother.

The narrative is, in the last-quoted paragraph, continued with unrelaxed spirit. The Dutch minister can still obtain no satisfactory answer; he asks the duke whether he has *any objection* to use force, and asserts, at the same time, that the *goods* in question are his master's "*undoubted property.*" Upon this the duke applies to the other ministers, and, "*no objection having been stated,*" he considers it *his duty* to obtain "*what was his right;*" that is to say, the Dutch king's right.

Never was there surely a parcel of words before put together by anybody in so clumsy a manner. In a subsequent part of the "*dispatch,*" we have this: "I added, that I had no instructions regarding the museum, *nor no* grounds on which to form a judgment." In another place we have "the King of the *Netherland's* pictures." In another place we have "that the *property* should be returned to *their* rightful owners."

But, to bestow criticism on such a shocking abuse of letters is to disgrace it; and nothing can apologize for what I have done but the existence of a general knowledge of the fact that the miserable stuff that I have quoted, and on which I have been remarking, proceeded from the pen of a man who has, on many occasions, had some of the most important of the nation's affairs committed to his management. There is in the nonsense of Castlereagh a frivolity and a foppery that give it a sort of liveliness, and that now and then elicit a smile; but in the productions of his correspondent there is nothing to relieve; all is vulgar, all clumsy, all dull, all torpid inanity.

LESSON V.

Remarks on a Note presented by Lord Castlereagh to the Ambassadors of the Allies, at Paris, in July, 1815, *relative to the slave trade.*

30. "VISCOUNT CASTLEREAGH, his Britannic Majesty's principal Secretary of State, etc., in reference to the communication he has made to the conference of the orders addressed to the admiralty to suspend all hostilities against the coast of France, observes, that there is *reason* to *foresee* that French ship-owners *might* be induced to renew the slave trade, under the supposition of the *peremptory* and *total* abolition decreed by Napoleon Bonaparte having *ceased* with his power; that, *nevertheless*, great and powerful *considerations*, arising from *motives* of humanity and even regard for the king's authority, require that no time should be lost *to maintain in France* the entire and *immediate abolition* of the traffic in slaves; that if, at the time of the Treaty of Paris, the king's administration *could wish* a final but gradual stop *should be put* to this trade, in the space of five years, for the purpose of affording the king the gratification *of having* consulted, as much as possible, the interests of the French proprietors in the colonies, now, that the absolute *prohibition* has been ordained, the question *assumes entirely* a different shape, *for* if the king were to revoke the said prohibition, he would *give himself the disadvantage of authorising*, in the interior of France, *the reproach* which more than once has been thrown out against his former government, of countenancing reactions, and, at the same time, *justifying*, *out of France*, and particularly in England, the belief of a systematic *opposition* to *liberal ideas;* that *accordingly* the *time seems to have arrived* when the Allies cannot hesitate formally to *give weight in France* to the immediate and entire *prohibition* of the slave trade, a prohibition, the necessity of which has been acknowledged, in principle, in the transactions of the Congress at Vienna."

Now, I put this question to you: *Do you understand what this great statesman means?* Read the note three times over, and then say whether you *understand what he wants.* You may *guess;* but you can go little further. Here is a whole mass of grammatical errors; but it is the

obscurity, the unintelligibleness of the note, that I think constitutes its greatest fault. One way of proving the badness of this writing is to express the meaning of the writer in a clear manner; thus:

"Lord Castlereagh observes that there is reason to apprehend that the French ship-owners may be induced to renew the slave trade, from a supposition that the total abolition, recently decreed by Napoleon, has been nullified by the cessation of his authority; that motives of humanity, as well as a desire to promote the establishment of the king's authority, suggest that no time should be lost in taking efficient measures to maintain the decree of abolition; that at the time of the Treaty of Paris, the king's ministers wished to abolish this trade, but, in order that the king might, as much as possible, consult the interests of the colonial proprietors, those ministers wished the object to be accomplished by degrees during the space of five years; that now, however, when the abolition has been actually decreed, the matter assumes an entirely different shape, seeing that it is not now an abolition, but the refraining from revoking an abolition, that is proposed to be suggested to the king; that, if the king were to do this, he would warrant amongst his own people the injurious imputation, more than once brought against his former government, of countenancing the work of undoing and overturning, and would, at the same time, confirm foreign nations, and particularly the English, in the belief that he had adopted a systematic opposition to liberal principles and views; that, therefore, the interests of the king not less than those of humanity seem to call upon the Allies to give, formally and without delay, the weight of their influence in favor, as far as relates to France, of an entire and immediate abolition of the slave trade, an abolition, the necessity of which has, in principle at least, been acknowledged in the transactions of the Congress of Vienna."

Now, as to the several faulty expressions in the note of Castlereagh, though I have made great use of *italics*, I have not pointed out one-half of the faults. Whoever before heard of a *reason* to *foresee* a thing? He meant reason to *believe* that the thing would take place, and as it was a thing to be wished not to take place, to *apprehend* was the word; because to apprehend means to think of with some degree of fear. Wishing to-morrow to be a fine day, what would you think of me if I were to say that I had *reason* to *foresee* that it would rain? The *might* is clearly wrong. If the abolition were *total*, what had *peremptory* to do there? Could it be *more* than *total?* The *nevertheless* had no business there. He was about to give reasons why the abolition decree ought to be confirmed; but he had stated no reasons given by anybody why it *should not.* To lose no time *to maintain;* and then the *in France*, and then the *immediate;* altogether there is such a mass of confusion that one cannot describe it. "To maintain *in France*," would lead one to suppose that there was, or had been, a *slave trade in France.* The next part, beginning with "*that if*," sets all criticism at defiance. Look at the verbs *could wish*, and *should be!* Look at *of having.* Then comes *prohibition* for *abolition*, two very different things. To *assume entirely a* different shape is very different from to assume *an entirely different* shape. The latter is meant and the former is said. Then what does the *for* do there? What *consequence* is he coming to? How was he going to show that the *shape* was different? He attempts to show no such thing; but falls to work to foretell the evils which will fall on the King of France if he revoke Napoleon's decree. And here, Goddess of Grub-street, do hear him talking of the King of France *giving himself the disadvantage of authorizing reproaches!* If the king's conduct would *justify* people in believing ill of him, why should it justify the English *in particular?*

They might, indeed, be *more ready* to believe ill of him; but it could not be *more just* in them than in others. An *opposition to ideas* is a pretty *idea* enough; and so is the *giving of weight in France* to an immediate prohibition!

Never was there, surely, such a piece of writing seen before! Fifty years hence, no man who should read it would be able to ascertain its meaning. I am able to pick it out, because, and only because, I am acquainted with the history of the matter treated of. And yet, most momentous transactions, transactions involving the fate of millions of human beings, have been committed to the hands of this man!

It is not unnecessary for me to observe that, though I have stated the meaning of this note in a way for it to be understood, I by no means think, that even in the words in which I have expressed it, it was a proper note for the occasion. It was false in professions; and it was, as towards the King of France, insolent in a high degree. Even if it had been just to compel the king to abolish the slave trade, the matter might have been expressed in a less offensive manner; and, at any rate, he might have been spared the brutal taunt that we meet with towards the close of this matchless specimen of diplomatic stupidity.

Hoping that this book will outlive the recollection of the transactions treated of by the papers on which I have been remarking, it seems no more than justice to the parties to say that the abolition, which was thus extorted, had effect but for a very short time; and the French nation never acknowledged it as binding; that at this moment (June, 1822), complaints are made in the House of Commons of the breach of agreement on the part of the French; that the French have revived and do carry on the traffic in African slaves; that our ministers promise to make remonstrance; but that they dare not talk of

war; and that without declaring their readiness for war, their remonstrances can have no effect.

LESSON VI.

Remarks on passages in Dispatches from the MARQUIS WELLESLEY, *Lord Lieutenant of Ireland, to Viscount Sidmouth, and to Mr. Peel, Secretaries of State; dated Dublin Castle, from 3d January to 12th June*, 1822; *and also on the charge of the* BISHOP OF WINCHESTER, *delivered in July*, 1822.

31. "Concluding that your lordship *had been* apprised, before my arrival in Dublin, of every important circumstance respecting the unhappy disturbances *which have* prevailed in this country, I proceed to *submit to you*, for his *Majesty's consideration*, such information as I have received on that subject during the few days that I have passed since my *succession* to this government.

32. "I propose to *arrange* this information *with reference* to *each* county *respectively*, for the purpose of facilitating *a comparison with* such statements as may already be in your lordship's possession, *and* of enabling you to form a judgment of the *relative* state of *each* particular district *at the different periods of time* specified in *each document*."

The marquis's style is not, in general, *low* and *clumsy;* it has the opposite faults, *affectation* and *foppishness;* and where the meaning of the writer is obscure, it is not so much because he has not a clear head as because he cannot condescend to talk in the language and manner of common mortals.

"*Had been* apprised *before* of disturbances *which have* prevailed" presents great confusion as to times. We can hardly come at the precise meaning. It should have been: "Concluding that, before my arrival, your lordship *was* apprised of every important circumstance respecting the unhappy disturbances *prevailing* in this country." For the prevalence was *still in existence*. To *submit* is

to place at the *disposal of*, to *put under the power of;* and, therefore, *transmit*, or *send*, was the proper word; for it is *the king* to whom the information is *submitted.* The marquis *sent* the information to Lord Sidmouth that he might *submit* it to the king.

"*Succession* to this *government*" is a strangely pompous phrase at best. But it is not correct; for his *succession* (if it were one) took place at his *appointment;* and he is about to speak of what he has learned since his *arrival* in Dublin; and why not say *arrival?*

The 32d paragraph is, perhaps, as complete a specimen of smoothness in words and of obscurity in meaning as ever found its way upon paper; and yet this was an occasion for being particularly clear, seeing that the marquis was here *explaining the plan* of his dispatch. *With reference to*, means *in relation to, as appertaining to, having a view towards.* The first is the best for the marquis: and that is little short of nonsense; for what is *arranging* information *in relation to* each county? What does it mean? Not what the marquis thought he was saying, which was that he proposed to speak of the state of all the counties, and that the *information relating to each county he meant to place under a separate head.* This was what he meant; but this he does not say.

And then again, what does *respectively* do here after *each? Respectively* means *particularly* or *relatively;* and as he had before said, or meant to say, that he proposed to place the information relating to each *county* under the head of that county, what need was there of the addition of this long and noisy adverb?

To be sure, to place the information under separate heads, each head confining itself to the information relating to one county, was a very good way of facilitating a comparison *of this information* with that which was already in Lord Sidmouth's possession; but it was not enough to say "*facilitating a comparison with such*

statements;" and there appears, besides, to be no reason to conclude that the information before possessed was arranged according to counties; on the contrary, the marquis's laying down of his *plan* would induce us to suppose that the arrangement of his matter was new.

The latter part of the sentence is all confusion. The marquis means that, by placing his information as before described, he shall enable Lord Sidmouth to form a judgment of the state of each district, *now*, compared with the state in which it was at the date of the *former information*. The "*relative state* of *each* particular district" may mean its state at *one period compared with its state at another period;* but "at *different periods* of time" by no means gives us this idea. And, even if it did, what are we to do with the "*each document*" at the close? *Each* means *one of two, one of more than one.* So that here we have the *relative state* of a district at the *different periods of time* specified in *one document;* and the main point that the marquis was driving at was to show Lord Sidmouth the manner in which he was going to enable him to compare the contents of the present document with those of the documents already held in his possession.

I have taken here the first two sentences of the dispatch. They are a fair specimen of the marquis's style, the great characteristic of which is *obscurity* arising from *affectation*. What he meant was this: "I propose to place the information relating to each county under a distinct head, for the purpose of facilitating a comparison of this information with that which your lordship may already possess, and also for the purpose of enabling you to form a judgment of the present state of each county, compared with the state in which it was at the date of former dispatches." And would it not have been better to write thus than to put upon paper a parcel of words,

the meaning of which, even if you read them a hundred times over, must still remain a matter of uncertainty?

But there is another fault here; and that is, all the latter part of the sentence is a mere *redundancy;* for of what was Lord Sidmouth to "form a *judgment?*" A judgment of the *comparative state* of the country at the two periods? What could this be *more* than *the making of* the comparison? *Judgment*, in this case, means *opinion;* and if the marquis had said that his object was to enable Lord Sidmouth to form a judgment as to *what ought to be done*, for instance, in consequence of the change in the state of the country, there would have been some sense in it; but to enable him to *see the change* was all that the marquis was talking about; and the very act of making the comparison was to *discern*, or *judge* of, the change.

It is not my intention to swell out these remarks, or, with this dispatch before me, I could go on to a great extent indeed. Some few passages I cannot, however, refrain from just pointing out to you.

33. "The commanding officer at Bantry *reports a daring attack* made a few nights previously, on several very respectable houses in the immediate vicinity of that town, by a numerous banditti, who succeeded in obtaining arms from many; and the officer stationed at Skibbereen *states his opinion* that the spirit of disaffection, which *had been* confined to the northern baronies of the county, *had spread* in an alarming measure *through* the whole of West Carbury; that nightly meetings *are* held at various places on the coast, and that bands of offenders *assemble*, consisting of not less than three hundred in each band.

34. "It further appears, from various communications, that the greater part of the population of the northern part of the county of Cork *had* assembled in the mountains, and that *they* have in some places made demonstrations of attack, and in others *have* committed outrages by day, with increased force and boldness."

"*Reports* an attack" is of the *slang military*, and should not have forced its way into this dispatch. '*States* his opinion that," is little better. But it is to the strange

confusion in the *times of the verbs* that I here wish to direct your attention. This is a fault the marquis very frequently commits.

I cannot help drawing your attention to "*a* numerous banditti" and "not *less* than three hundred men." *Banditti* is plural, and therefore the *a* ought to be left out. *Less* is the comparative of *little*, used with reference to quantity; but *men* are not a quantity, but a number, and the comparative of *few*, which is *fewer*, ought to have been used here.

35. "The magistrates resident at Dunmanaway report *that* illegal oaths *have for a long time been* administered in that neighborhood; *that* nocturnal meetings have frequently been held; *that* in the adjoining parishes, notices of an inflammatory description have been posted; *and in one* parish, arms have been taken from the peaceable inhabitants.

36. "The *Rector of* —— reports, on the 10th, that six houses of his parishioners had been attacked on the preceding night, and some arms obtained from them, *and then* an attempt had been made to *assassinate* Captain Bernard, an active yeomanry officer, when only a short distance behind his corps, but that, owing to the pistol presented at him missing fire, he escaped, and his brother shot the assailant."

We do not know from the words "*have for a long time been* administered," whether the oaths were administered a *long time ago*, or are now, and long have been *administering*. The *that* should have been repeated between the *and* and the *in* towards the close of paragraph 35; for the want of it takes the last fact *out of the report* of the magistrates, and makes it an assertion of the marquis. The same remark applies to the 36th paragraph, where, for the want of the *that* between the *and* and the *then*, it is the marquis, and not the rector, who asserts the fact of an attempt to *assassinate* the captain. An odd sort of an attempt to *assassinate*, by-the-bye, seeing that it was made by a *pistol openly presented at him*, and that, too, when his troop was just on before, and when his brother was so near at hand as to be able to *shoot the assailant!* But *assassinate* is become a fashionable word in such cases.

37. "On the evening of the same day a detachment of the 11th Regiment was attacked, on its march from Macroom to Bandon, by a party of sixty men, who followed *it* for three miles, and took advantage of the inclosures to fire, and to retard the march of the *king's troops.*"

The meaning is that the party of sixty men followed *it* (the regiment), took advantage of the inclosures to fire on *it*, and to retard *its* march; but the marquis, from a desire to write *fine*, leaves us in *doubt* whether the *regiment* and the *king's troops* be the *same* body of men; and this doubt is, indeed, countenanced by the almost incredible circumstance that a *regular regiment* should be *followed* for three miles, and actually have its march retarded by *sixty men!*

38. "A countryman's house is also stated to have been attacked by forty men, well mounted and armed, who severely beat and wounded him, and took his horse. —— *reports an attack* on the house of Mr. Sweet, near Macroom, who, having received previous intimation of the attack, and having prepared for defence, succeeded in repulsing the assailants, about two hundred in number, with a *loss of two killed*, who were *carried off by their associates*, although their horses were secured."

Here we have *reports an attack* again; but your attention is called to the latter part of the paragraph, where it would appear that *Mr. Sweet* sustained *a loss of two killed;* and yet these two dead men were *carried off by their assailants.* If the marquis had stopped at the word *killed*, it would have been impossible not to understand him to mean that Mr. Sweet had two of his men killed.

39. "A magistrate communicates that information had been received by him of several intended attacks upon houses in that neighborhood, but that they had been prevented by *the* judicious *employment of the police*, stationed at Sallans, under the Peace Preservation Act."

By *employing the police in a judicious manner*, the marquis means; but says quite another thing.

40 "The police magistrate at Westmeath reports *the setting fire*

to a farmer's outhouses, which, together with *the* cattle in them. WAS consumed."

It should be "the setting *of* fire;" and it should be *were*, and not *was;* for the deuce is in it if *out-houses, together with* the cattle in *them*, do not make up a *plural.*

41. "The *result of the facts* stated in this dispatch, *and its* inclosures, seems to *justify an opinion* that, although no material change has occurred in any other part of Ireland, the disturbances in the vicinity of Macroom *have assumed a more decided aspect of general disorder*, and accordingly I have resorted to additional measures of precaution and military operation."

There should be an *in* between the *and* and the *its.* But, it is not the *result* of the *facts* that seems to justify the opinion; it is the *facts themselves* that justify the opinion, and the *opinion is the result. Measures of military operation*, too, is an odd sort of phrase. This paragraph is all bad, from beginning to end; but I am merely pointing out prominent and gross errors.

42. "Another magistrate reports several *robberies of arms* in the parishes of Skull and Kilmore, and the burning of a corn-store at Crookhaven; and another, in representing the alarming state of the country, adds, that the *object* of the insurgents, in one district at least, has not been *confined* to the lowering *of rents and tithes*, but *extended* to the *refusal also* of the *priest's dues.*"

To *rob* applies to the person or thing *from* whom or which something is violently and unlawfully taken. Men rob a man *of* his money, or a house *of* its goods; but it is not the *money* and *goods* that are *robbed.* Yet this is a very common phrase with the marquis, who, in other places, talks of "*plundering* arms *from* people," and who, by saying "*six hundred and seventy-six firearms*," and the like, leaves us clearly to understand that *he* is at liberty to use this noun in the *singular*, and, of course, to say *a fire-arm* whenever he may choose; a liberty, however, which I would, my dear James, earnestly recommend to you never to think of taking.

To *confine* and *extend* an *object* does not seem to be very clear sense; and, at any rate, to say that the object of *lowering* rents and tithes has been extended to the *refusal also* of the priest's dues makes sad work indeed. Without the *also*, the thing might pass; but that word makes this part of the sentence downright nonsense.

43. "No additional military force, no improvement nor augmentation of the police, would now be effectual without the aid of the Insurrection Act; with that aid it appears to be rational to expect that tranquillity may be maintained, confirmed, and extended throughout Ireland. It is, therefore, my duty, in every view, to request the renewal of the law, *of which the operation forms the subject of this dispatch.*"

Did any man, in any writing of any sort, ever before meet with anything like this? Suppose I were to say, "*the writings of which the inaccuracies* form the subject of these remarks," what would the world think and say of me? This is indeed "prose *run mad.*"

Cobbett means, of course, that we should say, "the writings, the inaccuracies of which"; but we can now say, "the writings whose inaccuracies," which sounds much more smooth and elegant.

44. "With respect to Westmeath, the chief magistrate of police has *stated* the *revival* of those *party feuds* and *personal conflicts* in the neighborhood of Mullingar, which are considered in this country to be indications of *the* return of public tranquillity, and from which the magistrate expects *the detection of past offences* against the state."

One loses sight of everything about language here, in contemplating the shocking, the horrible fact! For, what is so horrible as the fact here officially stated, that *party feuds* and *personal conflicts* are deemed indications *favorable to the government*, and that they are expected by the magistrate to lead *to the detection of past offences* against the state! As to the grammar: to "*state the revival*" is just as good English as it would be to say that the magistrate has *stated the fine weather.* The "*the return*" ought to be "*a return.*"

45. "The early expiration of the Act would, at least, *hazard the revival* of that tyranny; the restraints imposed on violence have not yet been of sufficient duration to form any solid foundation of a better and more disciplined disposition in the minds of the people. Even now it is believed that arms are retained in *the hope of the expiration* of the law on the 1st of August; and although a more auspicious sentiment may exist in the hearts of some, even of the guilty, it would be contrary to all *prudent policy and provident wisdom*, by a premature relaxation of the law, to afford facility to the accomplishment of the worst designs, and to weaken the protections and safeguards, which now secure the lives and properties of the loyal and obedient, before the spirit of outrage had been effectually extinguished."

"To *hazard the revival* " is not correct. To *hazard* is to *expose to danger;* and certainly the marquis did not mean that the *revival of the tyranny* was a thing that ought not to be *put in danger*. The word *hazard* had no business there. Another mode of expression ought to have been used; such as, "exposed the *country* to the danger of the revival of the tyranny."

The *semicolon* after tyranny ought to have been a *full-point*. "In the hope *of the expiration*" is bad enough; but it is the *arrangement* of this sentence, the *placing of the several parts of it*, which is most worthy of your attention, and which ought to be a warning to every one who takes pen in hand.

"*Prudent* policy and *provident* wisdom" would seem to say that there are such things as *imprudent* policy and *improvident* wisdom; but, still, all the rest is inferior, in point of importance, to the *confusion* which follows, and which leaves you wholly in doubt as to the meaning of the writer. Now, observe with what facility this mass of confusion is reduced to order, and that, too, without adding to or taking from the marquis one single word. I begin after the word *wisdom:* "to afford, by a premature relaxation of the law, facility to the accomplishment of the worst designs, and to weaken, before the spirit of outrage had been effectually extinguished, the safeguards

which now secures the lives and properties of the loyal and obedient."

How clear this is! And how much more harmonious and more elegant, too, than the sentence of the marquis; and yet the words are all the same identical words! Towards the close of Letter XXI, I gave you, from Dr. JOHNSON and Dr. WATTS, some striking instances of the *wrong placing* of words in sentences; and, lest these should be insufficient to keep so great a man as the marquis in countenance, I will here show that *a bishop* can commit errors of the same sort and greater in degree.

Before passing to the bishop, let us consider for a moment wherein lies the cause or the mainspring of the errors committed by these high personages. It is plain that they did not, to recur to Mr. White's phrase, "conform to the laws of reason," nor "follow the order which we call logical." Had they, then, never studied logic? Undoubtedly they had; for they had all received a classical education, and logic forms a chief branch of such an education. How came they, then, to think and write illogically? There are some people who, notwithstanding their study of logic, cannot think or write logically, and there are some people who, without ever having studied logic, can think and write logically. Of the latter the number is small, however. For grammar is a branch of logic; that branch of logic which teaches us to express thought clearly and correctly; and as these men never learned or mastered this branch of logic, they were never able to express their thought clearly and correctly. English grammar, by itself, they probably never studied; and all they knew of it was derived from their study of Latin grammar, or of logic in general. Lord Castlereagh had never been taught to see the proper *relations* of things, and like Lord Dundreary, he "got things mixed." When the Speaker of the House of Commons talks of the necessity of returning to Cash Payments *as soon as possible*, and yet apprehends a convulsion from a *too rapid transition*, that is, from returning to such Payments *sooner than possible*, he is illogical in thought; for what he declares in one breath as *necessary*, he fears as *dangerous* in the next. And when Lord Castlereagh spoke of the Allies making themselves "parties in the *criminality* of this *mass of plunder*," he spoke about as logically as the child who complained of the "wicked candy that made him sick."

I have before me "*A Charge delivered to the Clergy of*

the Diocese of Winchester, at a primary visitation of that diocese, by GEORGE TOMLINE, *D.D., F.R.S., Lord Bishop of Winchester, Prelate of the most Noble Order of the Garter.*" We will not stop here to inquire what a *prelate's* office may require of him relative to an *Order* which history tells us arose out of a *favorite lady* dropping *her garter* at a dance; but I must observe that, as the titles here stand, it would appear that the *last* is deemed the *most honorable* and of *most importance to the clergy!* This bishop, whose name *was* PRETTYMAN, was the *tutor* of that William Pitt who was called the *heaven-born* minister, and a history of whose life has been written by this bishop. So that we have here, *a Doctor of Divinity, a Fellow of the Royal Society, a Prelate of the most Noble Order of the Garter*, and *a Bishop of one of the richest Sees in the whole world*, who, besides, is an *Historian*, and was *Tutor to a heaven-born minister.* Let us see then what sort of *writing* comes from such a source. I could take an incorrect sentence, I could even take a specimen of downright nonsense, from almost any page of the *Charge.* But I shall content myself with the *very first sentence of it.*

46. "My reverend brethren, being called to preside over this distinguished diocese, at a late period of life, I have thought it incumbent upon me not to delay the opportunity of becoming personally acquainted with my clergy longer than circumstances rendered absolutely necessary."

There are *two* double meanings in this short sentence. Was he called at some former time, to preside over the diocese *when he should become old?* or was he, *when he had become old*, called to preside over the diocese? But what follows is still worse. Does he mean that he thought it incumbent on him to become acquainted with his clergy *as soon as possible*, or *in as short a time as possible?* To *delay* an *opportunity* is not very good; and that which is of a man's own appointment, and which proceeds purely

from his own will, cannot strictly be called an *opportunity*. But it is the double meaning, occasioned by the *wrong-placing* of the words, that I wish you to attend to.

Now, see how easily the sentence might, with the same words, have been made unequivocal, clear, and elegant: "My Reverend Brethren, being called, at a late period of life, to preside over this distinguished diocese, I have thought it incumbent on me not to delay, longer than circumstances rendered absolutely necessary, the opportunity of becoming personally acquainted with my clergy."

How easy it was to write thus! And yet this bishop did not know how to do it. I dare say that he corrected and re-corrected every sentence of this charge. And yet what *bungling* work it is, after all! And these are your *college* and *university* bred men! These are the men who are called *Doctors* on account of their literary acquirements, *doctus* being the Latin word for *learned!* Thus it is that the mass of mankind have been imposed upon by *big sounding names*, which, however, have seldom failed to insure, to those who have assumed them, power, ease, luxury, and splendor, at the expense of those who have been foolish or base enough to acquiesce, or to seem to acquiesce, in the fitness of the assumption.

Such acquiescence is not, however, so general now-a-days as it formerly was; and the chagrin which the "*Doctors*" feel at the change is not more evident than it is amusing. In the very charge which I have just quoted, the tutor of the heaven-born minister says, "A spirit is still manifest amongst us, producing an impatience of control, *a reluctance to acknowledge superiority*, and an eagerness to *call in question the expediency of established forms and customs.*" What! is it, then, a *sin;* is it *an offence against God*, to be reluctant to "*acknowledge superiority*" in a bishop who cannot write so well as ourselves? Oh, no! We are not to be censured, because we doubt of the *expediency* of those establishments, those

colleges and universities, which cause immense revenues, arising from public property, to be expended on the education of men, who, after all, can produce, in the literary way, nothing better than writings such as those on which we have now been remarking.

The nature of the faults in these extracts may, perhaps, be made still clearer by calling your attention to the two kinds of sentences called loose and periodic. A loose sentence is one in which the sense is complete at the end of any phrase or clause in it, whereas a periodic sentence keeps the sense suspended till the end. The latter is generally preferable to the former. For instance: "We have learned to speak and write English correctly, in a few months, by means of this little book, in spite of many obstacles." This is a loose sentence; so loose that any member of it may be dropped without injuring the sense. Now let us put it in a periodic form, and you will see that you can come to a full-stop nowhere except at the end. "By means of this little book, we have, in a few months, in spite of many obstacles, learned to speak and write English correctly."

THE END.

"A work that should be in the hands of every teacher."

WILLIAM COBBETT'S
ENGLISH GRAMMAR,

WITH NOTES BY

ROBERT WATERS,

PRINCIPAL OF THE WEST HOBOKEN PUBLIC SCHOOL; AUTHOR OF "LIFE AND LANGUAGE OF WILLIAM COBBETT."

Mr. Richard Grant White, in speaking of the language of British authors, rightly places Cobbett among authors of the very highest class: "Macaulay, Thackeray, Helps, George Eliot, Johnson, Burke, Hume, Gibbon, Goldsmith, and Cobbett." The *Saturday Review* speaks of him as possessing "immense vigor, resource, energy, and courage, joined to a force of understanding, a degree of logical power, and, above all, a force of expression, which have rarely been equalled." Southey declares that there never was a better or more forcible English writer than William Cobbett; and it was, I think, the same writer who declared that if a foreigner should ask him for a specimen of PURE ENGLISH, he would select a passage, not from a work of one of the Oxford or Cambridge-bred scholars, but from one of those of the peasant-born and self-taught WILLIAM COBBETT.

As to his Grammar, it has enabled thousands who have failed to make head or tail of any other grammar to master the English language, and to speak and write it correctly. Sir Henry Lytton Bulwer speaks of it as "the only amusing grammar in the world:" Hazlitt says it is "interesting as a story-book;" and Mr. Richard Grant White declares that he "knows it well, and has read it with great admiration." When it first appeared

in England, ten thousand copies were sold in the first month, and it has had a steady sale in that country ever since. In Germany it has been considered worthy of an honor which has never, I believe, been conferred on any other English *grammar;* namely, it is printed in the original, with notes in the German language, for the use of German students.—*Extract from Preface to "Life of Cobbett."*

What Mr. Richard Grant White says:

"Of all the books on English Grammar that I have met with, William Cobbett's seems to me the best, and indeed *the only one to be used with advantage in teaching English.* It should be read just as he wrote it, no less for its example than for its precepts. Cobbett's style is a model of correctness, of clearness, and of strength. He wrote English of the best sort with unconscious ease. All attempts to mend it have resulted in disaster. I think that Mr. Robert Waters deserves great credit for his endeavor to bring this admirable book into general use in its original purity."

What the Hon. Stewart L. Woodford says:

"Every young person—especially the boys—ought to read your valuable Life of William Cobbett. His grammar is to me a revelation. It is practical common sense, intelligibly applied to the science and use of language."

What Mr. C. N. Bovee says:

"Cobbett's Grammar is almost the only book of its kind that makes it inexcusable for anybody to speak or write bad English."

What Mr. J. A. Cooper, Principal of the Pennsylvania State Normal School, says:

"A helpful book, not to learners only, but to teachers. I have found it a valuable aid in the class-room."

What Prof. Schlegel, of the New York Normal College, says:

"That was a very good idea of yours to republish Cobbett's English Grammar, even if for no other reason than to serve as a kind of antidote to the pedagogical or linguistic disease which Goold Brown introduced in our American Schools."

What the late Superintendent Wm. L. Dickinson, of New Jersey, said :

"I have always been an admirer of the rugged but clear way Cobbett had of putting things in his writings, and value his Life and Grammar, as presented by you, very much "

WHAT THE PRESS SAYS :

A few extracts will be sufficient to show the spirit in which the work has been received by the press of the country :

"Cobbett's Grammar is a novelty. If it could to-day be introduced in our schools, and two-thirds of the nonsense connected with grammar-teaching be forever banished from the class-room, the change would be wholly good. There is, in the study of grammar, in the majority of schools, more nonsense and more time lost in utterly useless memorizing of rules and exceptions, than in any other study in the course. We would commend especially to teachers the closing chapters of this book on grammar. They will find them abundantly suggestive and helpful."—*Chicago Inter-Ocean.*

"Cobbett's Grammar is a fresh spring in the middle of the driest desert ; and there is no question that if it were made the common text-book, there would not be half the dislike toward grammar which is now exhibited by school-boys. Compared with other grammars, Cobbett's is a pleasing tale."—*Rochester Herald.*

"This Grammar is as unique as anything that ever came from Cobbett's prolific and original mind. It was a remarkable experience to us to read a Grammar which was not only instructive, but also intensely entertaining and amusing."—*Every Evening*, Wilmington, Delaware.

"Should be studied by all lovers of the best English."—*Boston Globe.*

"If this Grammar were universally used in our schools, both public and private, the old feeling of distaste for the study of grammar would exist no longer ; it would become one of the favorite studies."—*Rural New Yorker.*

"Mystification is the object of the grammar-manufacturer of the present day. Cobbett desires to teach, and, knowing how to teach, his Grammar is as clear as a crystal fountain."—*New York Commercial Advertiser.*

"This Grammar is well worth the attention of teachers, as showing not so much what should be taught, as *how to make it interesting and amusing.*"—*The Schoolmaster*, London, England.

"That remarkable English Grammar, which had a success so enormous for many years after its appearance, is, no doubt, the best English Grammar extant for self-instruction, and ought to be familiar to the mind of every teacher."—*The School Board Chronicle*, England.

"A singularly lucid piece of work. Cobbett's style of composition is very straightforward and simple."—*Philadelphia Times.*

"The most readable production of the kind that has ever appeared in print."—*Scottish-American.*

*** *A copy of this work will be forwarded, postpaid, to any address in the United States, on receipt of seventy-five cents, by the publishers.*

A. S. BARNES & CO.,

NEW YORK AND CHICAGO.

This book should be returned to the Library on or before the last date stamped below.

A fine of five cents a day is incurred by retaining it beyond the specified time.

Please return promptly.
